CARRIE E. BRYANT,

Librarian.

Westmoreland, Feb. 13, 1904.

REPORT OF TRUSTEES.

It will be seen in the report of the librarian that our library now contains 1,861 volumes. 2,318 volumes have been issued during the year to 180 patrons. We believe that a fuller understanding of the merits of our library

would produce a greater appreciation, an increased patronage and an increased measure for good. So believing, we earnestly invite you citizens of Westmoreland, both old and young, to thoroughly inspect it, and if you find it to be meritorious, make it evident by your increased patronage. We invite suggestions for its welfare. We have faithfully labored to make our library a success, limited only by the light given us. During the year a legacy of \$1,000 has been given for library purposes, by will of Charlotte A. West in memory of her mother, Martha Wood Burt. Five hundred dollars of this has been paid over and is now on deposit. The balance is payable in five annual maturity installments of \$100 each. This legacy at a special town meeting has been accepted. Thus to the roll of the few names who have remembered their, and our town. namely, Eliphalet Fox, Jotham Lord, Henry Esty, we add the name of Charlotte A. West. Let these names ever be kept in grateful remembrance by every loval citizen. It is their due and our duty.

It is apparent that in the near future, if not at the present time, increased accommodations are or will be demanded by necessity. The dimensions of an ordinary dwelling house is not sufficient for a proper and convenient arrangement of all the books. We believe that it is expedient to furnish a building suitable for a library without a large expenditure of money by the town, if any at all, and we respectfully ask for your co-operation in securing it. We do not ask for your money but we do ask for your hearty support. From the first we have been most fortunate in having the best librarian service, and we feel that in a large measure the present success of our library is due to the faithful, efficient services of our librarian and her predecessors. We present the following financial statement:

RECEIPTS.

From the town appropriation,

C. M. SCOVELL,

Trustee.

I hereby certify that I have examined the accounts of the selectmen, treasurer and trustee of the public funds, and believe them to be correct and properly vouched.

WILLARD BILL, Jr.,
Auditor.

Westmoreland, Feb. 18, 1904.

REPORT OF SCHOOL BOARD.

The care of the schools for the past year has been left largely with the superintendent, the board confining its work to the care of the buildings, supplies, transportation and finances. As a result, the schools have had the benefit of expert supervision, and the expense of the school board is less than formerly.

The superintendent has worked faithfully in the interest of the schools, and his services cannot be too highly commended. The school board would thank him for the many courtesies received and the good work done. His report will speak for itself.

With the schools more consolidated than ever before, it has been the aim of the board to employ a better class of teachers, consequently the salaries paid have been somewhat higher than formerly, but in nearly every case the work done has justified the additional cost.

During the past year a private school has been maintained by a few families in the southwest part of the town formerly district No. 8. This school has been regularly visited by the superintendent and on his report has been approved by the school board, and the pupils excused from attending the public schools, as provided by law. On the 9th of April last, a proposition was made to the gentleman who represents the interests of this private school, that the school board would convey the pupils from No. 8 school to No. 9, during the spring and fall terms, and maintain a school in No. 8 during the winter term; leaving to the judgment of the parents to determine when the

child or children were able to attend school. It is the aim and intention of the board to give to every child in the district as nearly equal advantages as possible; but conditions beyond its control have prevented the carrying out of these intentions in all cases.

The board recommends that the same amount be raised for school purposes for the ensuing year as in the past. This should cover all ordinary repairs. If in the opinion of the district extraordinary repairs are called for, a special appropriation should be made and an agent appointed to expend the same.

The records of the spring term not being available, the roll of honor includes all who have attended every half day of the present school year.

ROLL OF HONOR.

George Capron, Julia Winchester, Jessie Dragoon, John B. Knight, Elva Farrington, Myrtle Green, Almyr Punt.

The following table gives the most important statistics for the year.

The amount of school funds due and paid the district treasurer for the year ending Feb. 15, 1904 is:

Required by law, \$3	1,242	00
Special tax,	400	00
State literary fund,	96	76
Town literary fund,	219	39
Dog license,	93	60
To pay indebtedness,	566	69
For repairs,	100	00
Balance due Feb. 15, 1903,	4	10
\$2	2,722	54
Expended as follows:		
Teaching, \$	1,500	00
Mileage and conveyance,	312	85
Fuel,	121	63
Care of buildings,	55	60
Repairs and sundries,	81	97
W. Bill, Jr., agent,	100	00

Mary K. Ward, note and interest, C. M. Scovell, interest,

\$551 25 15 44

\$2,738 74

Excess of expenditures over receipts,

\$16 20

For amounts paid individuals see report of school treasurer.

Respectfully submitted,

FRANK A. KNIGHT,
JAMES A. CRAIG,
School Board of Westmoreland.

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Board of Westmoreland:

Gentlemen—In accordance with your requirements I submit this my second annual report.

Such a report is not designed primarily to enlighten the board as to the progress of the schools under their charge, but more to inform and educate our citizens in general, in regard to the present conditions and needs, to endorse whatever has been commendable, and to suggest further improvements.

TEACHERS.

The most important consideration in any school is a good teacher. All other improved conditions are of small moment compared to this.

More is being required year by year of the teachers in our public schools. The ideal teacher must be strong in discipline, tactful, scholarly, well trained, and in sympathetic touch with child life and conditions. She must be so related to the social, religious and intellectual life of the community as to be a safe model for her pupils in both manners and morals:

When we consider the difficulty of securing and retaining desirable teachers in the smaller country towns, it is not surprising that we occasionally secure one who falls considerably below our ideal. With the exception of the fall term of the village primary, the schools throughout the town have made commendable progress. It is a matter of regret that so many changes of teachers have seemed necessary during the year. We hope the present teachers can be retained until the close of the school year at least.

GRADING.

In the last annual report it was stated that the grading must necessarily be imperfect at first on account of the irregular way in which much of the work had been taken. It has been possible during the year, by the aid of the teachers, to group the pupils more accurately and to lay out the work along more definite lines. One hindrance in this work has been the irregular attendance of some pupils who most need the help of the schools.

The earnest and successful work that has been done in the high and grammar school at the village is highly gratifying. Members of the class graduated so creditably last summer have been able to take advanced standing in the higher schools which they have entered.

By a readjustment of the course of study this school may, in accordance with the new law, meet the conditions required by the state department for approved high schools with abridged courses. If a change is made, due care should be exercised not to interfere to any extent with the work of pupils who are pursuing the course as already laid out.

Beginning with the fall of 1902, permanent yearly records have been kept of the standing, including attendance and deportment, of all pupils. Reports made from these records are sent to parents at the close of each term, or oftener, if deemed advisable.

Tests in the principal subjects studied are prepared and

sent to all schools. These tests are uniform for corresponding grades in all the towns of the supervisory district.

Half-term reports are also received from each teacher, giving the general condition of membership and attendance and the progress of each grade represented in the subjects or topics studied.

From these records, tests, and reports, and especially by personal visitation and examination of the work of teachers and pupils, it is possible to form a very fair estimate of the progress and standing of any pupil, grade or school.

ATTENDANCE.

A degree of improvement may be noted this year in the smaller number of unnecessary absences. But there still remain some who are so unmindful of their obligations as citizens and parents as to allow their children to remain out of school to work or for more trivial reasons.

It can be readily proved by statistics furnished by the United States department of public instruction, that the wealth producing power or earning capacity of the average citizen is in proportion to his opportunities for education. The parent who keeps his boy out of school to assist in the work of the shop or the farm, is crippling his child's power to earn a comfortable living, for the sake of a trifling temporary advantage to himself.

But there is a stronger argument for regular attendance than one based on merely commercial standards. The state needs good citizens and intelligent voters more than men who can make money. Good citizenship implies intelligence, honesty, patriotism and industry; there is no known agency better adapted to develop and train these qualities than the public schools.

It is because the very existence of the state depends on intelligent citizenship that it requires the children to be educated at public expense, and it assumes the right to compel attendance at the schools provided. A truancy by-law in accordance with the statutes and advised by the state superintendent will doubtless be proposed at the annual meeting. If this by-law should be adopted and teachers should be required to report to the truant officer any absences from their rooms for which no valid excuse has been given, there would be, without doubt, some improvement in attendance.

But whatever may be done by official action, the responsibility must rest primarily with the parent because of the obligation imposed by the natural relationship; and further because, by indifference or evasion he may too often succeed in depriving his child of school advantages and yet escape the penalties of the law.

Much of the non-attendance has occurred in the winter. In many cases this was excusable on account of sickness, the unusually severe weather, and the long distances which some of the children have to travel to reach school. In view of this it might be well to consider the plan of omitting the winter term in some schools. A spring term of twelve or fourteen weeks could be held, and a fall term beginning in August and continuing until about Christmas, with a short vacation near the middle of the term.

TEXT-BOOKS.

The schools are fairly well supplied with the standard text-books. The introduction of a new series of arithmetics, which was begun last year, has been completed. Several sets of supplementary reading books have also been supplied. More elementary texts are needed. Some new geographics and language books will also be required. The set of fine cased maps furnished to the village schools adds much to the permanent value of the rooms.

Reference was made last year to the system by which an account is kept of the number, kind and location of all the school books in town. This plan has been followed out consistently during the year. We believe that pupils should be held more strictly to account for loss or injury of books than they have been in the past.

BUILDINGS.

All the schoolhouses appear to be in fair repair. Some modifications of the heating arrangements of the new building at the South Village may be necessary. The general plan is excellent. It is the same as used in all modern houses. We believe that the difficulty in the past has been largely from the lack of careful and intelligent attention. If such defects as may be found to exist are remedied, and a thoroughly efficient janitor be put in charge, we have reason to believe that no further difficulty will be experienced. The present janitor is to be commended for the interest and intelligence he has shown in his work.

PRIVATE SCHOOL.

A somewhat anomalous condition is to be found in Division No. 8, where a private school has been supported. By direction of the school board this school has been visited once each term, and its work has received formal approval.

It suffers from the limitations and defects which are nearly always to be found in small, remote schools. The few pupils attending appear to have unusual natural ability which should be given better means of development. It is to be hoped that the people of this section will consent to some arrangement which will be more in harmony with the best interests of their children.

CONCLUSION.

In this, as in all other communities, we find among us the elements of civic life and progress as well as those that tend to disorder and retrogression. It should be the chief business of our schools to develop the one and repress the other. That this work is being accomplished in greater degree year by year is due to the active interest and co-operation of citizens, school officials and teachers.

Respectfully submitted,

CLINTON J. RICHARDS;

Supt. of Schools.

Westmoreland, N. H., Feb. 20, 1904.

REPORT OF THE

TREASURER OF THE SCHOOL DISTRICT

OF WESTMORELAND.
