SCHOOL REPORT.

DISTRICT NO. 1.

PRIMARY SCHOOL.—Summer Term, 11 weeks, taught by Miss Hattie L. Nelson. Miss Nelson has the faculty of greatly endearing herself to children, an important qualification in a teacher of the young. She apparently lacks the faculty to govern so many and such restless children.

Winter Term. 12 weeks, taught by Miss Hattie M. Hazen. This school showed great improvement in order, from what it was at the beginning. We have never seen the order better. We think it was a profitable term of school.

GRAMMAR SCHOOL.—Summer Term, 11 weeks, taught by Miss Frankie Chase. Miss Chase manifested a great desire to interest and profit her scholars, but failed to maintain good order. We think that in both Summer Schools, the scholars were permitted to be absent from the School room, more than was advisable.

WINTER TERM. 12 weeks, taught by Fred. F. Foster. Mr. Foster has followed teaching as a profession for several years in the High schools of Massachusetts. He is master of his profession. The best order we have ever found in the district. His mode of instruction is oral—rarely using a text book.

This district supported two select schools last fall—one taught by Miss Belle Ward and the other by Mrs. Prescott Farrar, both good schools.

DISTRICT NO. 2.

Summer Term. 3 weeks, taught by Miss Mary A. Ray. This bade fair to be a profitable school, we think. The teacher left the school Thursday noon to be absent until Monday morning, with the intention of making up the time. The Prudential Committee manifested dissatisfaction, and the teacher offered to leave the school, which offer was accepted. We think both made a mistake—the teacher in leaving the school for so long a time, and the committee in accepting her resignation. Better have finished the term.

Winter Term. 11 weeks, taught by Miss Frances M. Butler. Miss Butler is an old and well known teacher, and kept a good school. P.

DISTRICT NO. 3.

Summer Term. 5 weeks, taught by Miss Mary F. Wiley of Washington. Miss Wiley seemed anxious to do good in her school, and also to help herself. She was hardly qualified to teach and the committee made a mistake in permitting her to continue the school. She began before applying for examination. With more study she may succeed well.

Fall Term. 4 weeks, taught by Miss Susie Gay. An experienced teacher and a good school. No report.

Winter Term. 7 1-2 weeks, taught by Edward A. Wood of Henniker. This was one of the best schools in town for the year. It will rank with the best. P.

DISTRICT NO. 4.

Summer Term. 12 weeks, taught by Miss Addie C. Mills. For some reason, or without any reason, quite a number of the scholars left the school, quite early in the term. No complaint was made to your committee. The only reason ascertained was "the teacher gave too long lessons, and was partial to some scholars." We hardly think the teacher intended to be hard with the scholars or neglect any one; even if these faults existed or any other they could have been easily remedied. It ought to be a grave and irremediable fault to cause a scholar to leave a school. Is the fault in the scholar, or in the parent?

Winter Term, 12 weeks, taught by Enoch L. Colby. Mr. Colby with more earnest attention to study may make a good teacher. The scholars showed a lack of thorough drill. The reports of both schools are very imperfect.

Another term has recently commenced in this district, taught by Miss Susie Gay, which we have no doubt will be a good school. P.

DISTRICT NO. 5.

Summer Term. Taught by Miss Lydia A. Burt of Hillsborough. This school appeared well at the commencement, but as the district failed to notify us of its close we were unable to be present at the examination. B.

Winter Term. Charles H. Chapin of Antrim, teacher first half, Miss Jenny Nesmith of Hancock, last half. This term commenced well but such a youthful teacher could not go through with a school like this; he did the best that he could, and it was evident that all the pupils did not do as well as they were able—but under the guidance of Miss Nesmith they found out the right path, and were obliged to keep it,—Miss N. sustaining her usual reputation as a good teacher. B.

DISTRICT NO. 6.

Summer Term, 8 weeks. Winter Term, 9 weeks. Both terms taught by Miss L. S. Pike of Bradford. Miss Pike is an experienced and successful teacher. The school is large, and if there was any lack it was in discipline. The winter term needs a firm, strong hand at the helm. P.

DISTRICT NO. 8.

Summer Term. Taught by Miss Addie C. Mills of Hillsborough. This term was but five weeks in length. The scholars made fair improvement; but the incompleteness of the Register shows that the teacher is wanting in that energy that suggests the motto, "Whatever is worth doing, is worth doing well."

Winter Term. Taught by Miss Frankie Chase of Hillsborough. Miss C. is a teacher of considerable experience. The school was small in numbers, and the improvement very good. B.

DISTRICT NO. 9.

Summer Term. Taught by Miss Lucetta A. Tuttle of Antrim. Miss T, worked hard though her school was few in numbers, and deserves to rank with our first class teachers.

Winter Term. Taught by Fred A Buttrick of Hillsborough. This was Mr. Buttrick's first effort as a teacher. The improvement was very good, considering the laxity of the discipline.

B.

DISTRICT NO. 10.

Summer and Winter Terms. Taught by Miss Mary E. Andrews of Hillsborough. This school was found in a very neglected condition; but being placed under the care of one of our most thorough teachers, it has been restored to its former reputation; thus making the improvement quite satisfactory.

B.

DISTRICT NO. 11.

Summer Term. Taught by Miss Susie M. Gay of Hillsborough. Miss Gay spared no pains to make the term one of value to the district. Maintaining order and creating an interest among her scholars, made the term a success.

Winter Term. Taught by Miss Martha R. Wilder of Peterborough, an experienced teacher. The school appeared remarkably well at commencement, but cannot report of it at closing.

B.

DISTRICT NO. 12.

One Term. Mr. C. A. Flint of Hillsborough, teacher. Mr. F. was in the opinion of your Committee deemed capable of teaching this term of school; but by certain management on the part of some of the parents, the school closed with only five pupils. It is a positive fact that parents cannot teach school and remain in their homes.

B.

DISTRICT NO. 13.

Summer Term. Taught by Miss Sarah F. Flint of Hillsborough. Miss F. did the best that she could; and the pupils

following her example made the improvement all we could expect,

Winter Term. Taught by Amos Colby of Hillsborough. It was a small school and made rapid improvement. Mr. C. proved his talent as a school teacher some time ago. B.

DISTRICT NO. 14.

Summer Term, 6 weeks, taught by Miss Tattle of 1860. This was Miss Tattle's first school. She bore a good examination and the school appeared well at the first visit. On account of a mistake on the part of your committee, the school was visited only once.

Winter Term, 1860, taught by Miss Fanny M. Gay. With great care and diligence on the part of the teacher, some scholars this term would have been more profitable. At least on the part of teacher. P.

DISTRICT NO. 15.

Summer Term, 8 weeks, taught by Miss Angie A. Ray.

Winter term, 12 weeks, taught by Mary J. Tyler, of Hopkinton. Miss Tyler was a good teacher and the school appeared much improved from the summer term. We would not disparage Miss Ray; she seemed to be content and in general for her school, but she endured a bearing from her scholars that was very unpleasant. P.

DISTRICT NO. 16.

Summer Term. Taught by Miss Vilona L. Simonds of Washington. A good school, for the co-operation of both teacher and scholars made the improvement commendable.

Winter Term. Taught by Miss Angie A. Ray of Hillsborough. The school made great progress in reading, which is very creditable—but am sorry to say that the improvement in other branches did not compare with that in reading. B.

DISTRICT NO. 17.

Summer Term. Taught by Miss Caroline E. Paige of Weare. Miss P. appeared to labor hard for the advancement of her pupils and seemed to give general satisfaction to the district; but more *method* and better *order* suggested itself to us.

Winter Term. Taught by George N. Gage of Washington, a young man of excellent scholarship. The advancement of this school was very marked; and the teacher and scholars merit much praise. B.

DISTRICT NO. 18.

Summer Term, 7 weeks, taught by Laura F. Gerry.

Winter Term, 11 weeks, taught by Clarence B. Root of Frankestown. Mr. Root is a thorough scholar, and both schools were very fair. P.

DISTRICT NO. 19.

Winter Term, 10 weeks, taught by Miss Lizzie A. Tuttle. Miss Tuttle as reported in No. 14, passed a very satisfactory examination, and with more experience, a close application, and a little more thoroughness may make a successful teacher. P.

Your committee in submitting their report wish to do justice to all. It would be pleasant to speak in words of praise of all, but doing this unjustly in any case, would be injustice to all. We crave then your calm judgement, and your approval so far as it can rightfully be granted.

We wish to call the attention of all interested in the education of the youth to the following points. No Prudential committee should permit a person to commence a term of school until they have obtained a certificate from the Superintending committee. We think the person doing this is liable alone, to pay the teacher until he or she obtain the certificate, besides it is embarrassing to the committee.

Then again, no Prudential committee can legally pay a person for services in teaching until said teacher presents a certificate from the S. S. committee, that a proper report has been made of the school. We recommend to future Superintending committees to enforce this law for the sake of example. Remind the Prudential committees that they are liable for money paid without a receipt from the Superintending committee, that the person has made a proper report. A few examples here would remedy this whole business; so it would in respect to permitting persons to commence a term without proper authority. See that no person is permitted to draw pay from the public money for services before being qualified.

We quote here for the benefit of all concerned, the law on these points, as we believe all are desirous of understanding our laws.

“No person shall be employed or paid for services as teacher, unless he shall produce and deliver to the prudential committee a certificate of the school committee of the town in the district where the school is to be kept is, or is deemed to be. Gen. Stat, P. 169, S. 6.

Every teacher at the close of his school and at the end of each term thereof, shall make a return of such register or record to the school committee of the town, who shall give to him a certificate thereof; and no teacher shall receive payment for his services until such certificate is produced and delivered to the prudential committee. Gen. Stat, P. 170, S. 15,

We would state here that the reports are generally, very poorly kept—many items not returned.

There is another matter that will undoubtedly seem trifling to all at first thought, but is a matter of serious importance to persons visiting schools with teams. But few school houses have suitable places for hitching horses,—no hook or post,—some not even a pair of bars or a board fence within reasonable distance. Let any person visit a school with a team and this remark will be properly appreciated. A trifle in time and expense will remedy this fault.

We think there is a serious neglect of the elements of reading in our schools. We are sorry to say that teachers seem to be exceedingly deficient here, and to greatly neglect this in teaching. Hardly a school has been able to pass a creditable examination in the elements of reading—such as the vowels, articulation, accent, emphasis, and inflection. A grave fault exists here.

There is also a serious fault in parents not visiting the schools more. Hardly a prudential committee has been prevailed on to visit a school with us this year. Only thirteen visits are reported from prudential committees, and these in only nine districts. Gentlemen, are you doing your duty according to the best of your ability? In many instances not a visitor from the district has been present at the examination. Is this right?

While we insist on maintaining good order in the school-room, we would not suffer a scholar to be unreasonably punished, and no teacher will be allowed to continue an unreasonable punishment,—indeed we think that such a case will rarely occur if the teacher is properly supported by parents. There should be harmony between teacher and parent. Let the parent approve any proper discipline, and any other will rarely occur. We would not remove a scholar from school for one punishment even if it seem to be hard; let the parent learn all the facts on both sides, and confer with teacher and committee, and insist that the child shall be only reasonably punished, that the child must obey all regulations of the school, and this whole matter may be arranged to the satisfaction of all concerned. Take your children from school only as a last resort. This we think need

never be done. It very much interferes with the authority of the teacher, and the discipline of the school, if children are aware that on a little trouble arising, they will be permitted to leave the school.

There is more impatience here than most persons seem to possess. The names of our tardy scholars and children are seriously affected. Discipline is necessary to the well being of the State and the highest good of our children. We do then great wrong when we let down the standard of discipline.

It is reasonable to suppose that grave faults exist in our common schools, since to "err is human." We would advise that all take more interest in endeavoring to remedy the fault. There is no time to be wasted in making up a committee, and committee; let this interest manifest itself in an earnest endeavor to correct faults. Let this begin in the school meeting, by selecting the right person as Prudential committee, and full instructions be given. Let the school room be visited oftener by the superintendent after a faithful conference with the teacher and we think an improvement may be gained.

Are parents tardy here? Let the many tardy marks and dismissals answer. Only necessity should cause a scholar to be tardy; let one scholar of a school consisting of 20 members be three minutes late, and he will disturb the whole school two minutes. Here are 20 scholars interrupted three minutes, sixty minutes lost. Think of that, ye who consider it a light matter that your boy or girl is late,—three minutes late and one hour of precious time lost!

Let your child be dismissed *one* day and he loses a lesson,—this is a serious matter and he loses his chain and probably he will need the same lesson the next day, and is severely interrupted in the branch until he has attained the last recitation which is rarely done.

A law passed and approved at the last session of the Legislature, provides that an adult female who has been a resident of the district six months, may be elected or appointed by the selectmen as Prudential committee, and an adult female who has been a resident of a town six months, may be elected or appointed School committee.

We would suggest the idea of districts providing more freely for select schools; it is a good supplement to short schools, and we think three or four weeks at the end of a short school worth as much as six weeks alone. This brings us to speak of a High school. Look at Claremont, Warner, and Bristol, and why not *one* for Hillsborough? Is there not some friend of the young, and a lover of education who will make an offer of \$25,000 as a fund, on condition that the town will provide a suitable building? Here is a fine opening for some one to build his or her monument that shall do lasting honor to his or her name and

be of enduring worth to the future. What finer place than Hillsboro' Bridge for such an institution. It is central, for business, for travel, it is growing, the centre of a fine and well peopled region. It would not fail to be well patronized by the numerous young men and ladies of this and adjoining towns.

It would not at all interfere with the common schools, but offer a fine opportunity to the scholars in them to graduate from them to it, for higher and more extended advantages. The great mass of young men and ladies will not enjoy the facilities of our higher Academies, at least for the present, but nearly every youth of this and adjoining towns could easily avail themselves of the privilege of such an Institution.

A worthy example has been set the present year by Mr. John Gilbert who donated to the school house in district No. 11, a full set of patent seats and desks at a cost of \$150., for which the district feel a profound gratitude toward that gentleman.

We invite the consideration of the town and of persons blessed with money to this subject. We earnestly plead for a High school at Hillsboro' Bridge.

We wish to call special attention to the table, there are many items of interest. The blank spaces were not reported by the teacher,—please notice the great number of these. It is utterly impossible to make a full report of our schools until teachers do their duty in *filling* the registers. We suffer great inconvenience by this in making our report to the Board of Education. In some instances teachers have reported no scholars, yet quite a number who read and pursued other studies. In other instances these registers are nearly unintelligible—figures indistinct, scratched out, blotted, &c. Why should not your register be plain, neat and full? This will be the case when committees do their duty in enforcing the regulations concerning these.

Let parents notice and ponder well the difference between the number of scholars and the average attendance—the instances of tardiness and dismissal. Can these otherwise than operate to the disadvantage of a school. Here, parents is an opportunity for you to greatly improve your school. Feel the importance of your child's being in the school-room at the hour for beginning, and don't permit him to get excused unless in case of great necessity.

Let prudential committees see that their column is better filled in the future. Our judgment is that the greater part of the visits from citizens occur on the day of examination. It is well—very desirable to see the parents present then, but it is also desirable that they visit their schools oftener during the term.

School houses form a subject of interest. We add a column of value. More care ought to be bestowed on this item by teachers.—Thus in No. 1, one teacher puts it at \$2,500, one \$2,000., another \$25.00. Several similar cases occur. Repairs

are reported in No. 1, \$35., No. 3, 30 cents, No. 9, \$20., No. 11, \$150. A new one built in No. 4, cost \$800. We have put in the reports of the value of schoolhouses as given in the register hoping it will lead to greater care and uniformity. Remarks by teacher from the register. One says "pleasantest term I ever taught—cause parents know their place." Another, "two conditions are necessary to success in schools—earnest education at home and a good school house." One says again speaking of scholars, "they have been studious and always ready to obey." Again, "the object of Common Schools is to render the knowledge of books to practical use. If a person know every rule in arithmetic, it may not avail to measure cloth, timber, wood or stone.—I think penmanship has been sadly neglected in this school." Another, "few imperfect recitations. I have labored hard for their advancement, I think if they had labored as hard and their friends encouraged them, the examination would be more satisfactory."

"There is one great fault in this school, as soon as a scholar is made to obey, it is taken out of school or permitted to absent itself from school. If I were permitted to keep it again no child should be permitted to leave school without a written request."

"Great fault in this district, the disinclination on part of parents to visit the school and requests to have pupils excused."

"Hearty cooperation of parents and scholars has made the teacher's work pleasant and profitable."

"I may as well say here if the deportment of three or four older pupils and their influence over others—particularly younger ones, had been different, the term might have been in more respects pleasanter to all."

In submitting our report for the year, we wish to improve this opportunity to express our hearty thanks to teachers, committees, and all persons who have rendered aid or sympathy in our work. We have been actuated by a simple and earnest desire to be faithful and just to all. That we have erred can hardly be doubted, since we are human. Be assured that any mistake has been of the head and not of the heart. In retiring from the trust bestowed upon us, we return our thanks to all our constituents, and express a hearty desire for the prosperity of the common schools of Hillsborough.

L. W. PRESCOTT, } *S. S. Committee of*
F. J. BICKFORD, } *Hillsborough.*
