TROY, March 1st, 1869.

SCHOOL REPORT.

FELLOW CITIZENS :

In presenting the report of the schools, for the year now ending, your committee would suggest certain things, which appear necessary in order for our schools to rise above their present condition, in which, although there is much to praise, still there are many defects.

All will acknowledge that a system of education which is not practical, does not meet the wants of society. But the branches taught in our schools are certainly the useful ones; therefore the defect is not there, if our scholars are not qualified to enter practical life on leaving the school-room. If we would have our schools, in this respect, what they should be, our teachers must have a thorough practical education, and in their efforts in teaching, must constantly keep in view the real object of common-school instruction, namely, to qualify their pupils for an intelligent discharge of the duties of life.

But for teachers to accomplish this object, they must have a good set of practical text books.

That all our books now used in our schools are such, no person well qualified to judge, will say. Take for example, our reading books. They generally comprise a series of five books, containing a great amount of reading matter with rules for reading scattered through the whole.

Such being the character of the books, the result is, but few good readers are found in our schools; whereas, if all the rules for reading were comprised in one or two comparatively small books, with a little well selected reading matter under each rule for the purpose of drill, the result would be that our scholars would be better educated in this important branch of study, at a very much less expense to the parent, which is surely an important consideration.

Then, if we look at English Grammar, as now taught, we find greater defects than in reading. If we find but few good readers in our schools, there are a less number well versed in English Grammar. And this science, as now taught, amounts to but very little in giving our scholars a correct knowledge of the true principles according to which the English language is constructed. The teachers are not so much in fault as our Grammars. There is but little good philosophy in them, and this is the reason why scholars generally are not fond of this study. The Grammars are full of contradictions, and therefore the minds of scholars revolt at such text books, as well they may. Then, too, there is a great amount of unnecessary matter in them, which only burdens the mind without conferring any adequate benefit.

The above remarks, in some respects, will apply to most of our Geographies. There is a lack in them of good arrangement and sound philosophy. In fact they are generally made up of statements with very little or no connection. There is in them, therefore, but little to elicit thought, or develop the reasoning powers.

But some of our authors have seen these faults, and have now furnished better books upon this science. Your committee has availed himself of this advantage, and introduced Guyot's Common School Geography, and so far as it has been adopted, it has awakened a new interest both in the teachers and scholars.

But the best teachers and text books cannot do all that is needed for our schools. Parents and guardians must acquaint themselves with the real wants of the schools, and cheerfully and energetically supply them, and all these evils of which we complain, will be removed because they possess all the power to mould them as they please, for our schools are now just what

they say they shall be. If, therefore, they are right upon this subject, then the schools will be what they should be ; if wrong, then the schools will be.

If, therefore, all the power rests in the parents and guardians to mould the schools, through their committees and teachers, they should be wholly alive to this fact and exercise it in an intelligent manner, so that the object of Common Schools may be accomplished.

SCHOOL NO. 1.

MR. A. W. BAKER, Prudential Committee.

The Summer term of nine weeks, was taught by MISS NETTIE A. BLANDING. Although the school was large, there being fifty-two different scholars, and the number of studies ranging from the Primer to History, and the classes many, yet immediately on entering upon her duties she reduced the school to good order, and so arranged the classes as to give a pretty thorough drill in all the studies, and materially advance the school. The progress was very good.

The Fall term of nine weeks was taught by the same teacher. The whole number of scholars only being twenty-seven, ranging from four to eight years of age, she had more opportunity for thoroughly drilling each class, the effect of which was very visible at the close of the term, in the apparently rapid progress which the school had made, which is the best encomium a teacher can receive.

The Winter term of eleven weeks, was under the tuition of MR. DAVID W. NICHOLS of Keene, a good disciplinarian and thorough teacher, which the school evinced not only during the whole term, but most fully at the closing examination.

The year, therefore, in this school, has been a very successful one.

SCHOOL NO. 2.

MR. D. W. FARRAR, Prudential Committee.

This District has had twenty-nine weeks schooling, namely, nine in the summer, eleven in the fall, and nine in the winter.

under one person, MISS EMMA E. BROWN of Keene, a well qualified and indefatigable teacher.

Most of the scholars in this school are well disposed and studious, and under her faithful instruction have made excellent progress in their studies, but I am sorry to say there are a very few who, unless they change their course immediately, should be expelled for the benefit of the school.

SCHOOL NO. 3.

MR. JAMES R. STANLEY, Prudential Committee.

The Summer term of this school, of eight weeks, was taught by MISS HATTIE A. HOWARD, a diligent teacher.

The order was fair and the progress commendable, but there was not all that thoroughness in teaching that is necessary to ensure the greatest progress.

The winter term of fourteen weeks, was under the tuition of the same instructress. The order was not as good as in the summer, and the progress, although the term was six weeks longer than the summer, was not as good as might have been expected.

SCHOOL NO. 4.

MR. WEBSTER CORREY, Prudential Committee.

The Summer term of seven weeks, and the Winter term of fourteen weeks, was taught by MISS MARY A. TOLMAN, a good, faithful teacher. And under her mild government and persevering efforts, both terms were a success.

The order was good, and the advancement very fair. And it is due also to say, that there is a commendable interest manifested by parents in this district.

SCHOOL NO. 5.

MR. ORREN PECK, Prudential Committee.

This school consisted of two terms, one of eight weeks and the other of ten, taught by MISS MATTIE A. F. STARKEY of Swanzev. Although quite young, she possesses the elements of a good teacher, and with more knowledge and experience, can take high rank as an instructress. Under her instruction, there was very good progress made by the few scholars composing this school.

SCHOOL NO. 6.

MR. A. S. CLARK, Prudential Committee.

In this District there was only one term of eleven weeks, in the fall, taught by MISS S. LOUISA RICHARDSON of Corinth, an experienced, excellent teacher.

She soon succeeded in infusing an enthusiasm into all the scholars, which secured close application to study, and the result was excellent progress in all the branches pursued.

Having had great experience in teaching, she knew just how to stimulate thought in her scholars, which was very evident at the closing examination.

HIGH SCHOOL.

There have been two terms of ten weeks each, one in the spring, and the other in the fall, taught by MRS. LOUISA B. WRIGHT of Swanzey.

Suffice it to say, that under her judicious management and thorough instruction, the scholars made very good progress in all the branches taught.

This school was supported wholly by the tuition of the scholars, at an expense of two hundred and forty-seven dollars. This effort does great credit to the town, and it is desirable that it should continue, and that all the youth should avail themselves of its advantages.

J. S. HERRICK,
Sup. School Committee.
