Report of School Board for 1895.

It is our duty to summarize the results of our schools for the past year with such recommendations as in our judgment would be beneficial. Referring to the annexed table it will be seen that we have 119 enrolled scholars, while the average attendance has been 107, an improvement over previous years. Twenty-four weeks has been taught in each of the five schools, or a total of 120 weeks. \$840.50 has been paid for teachers' salaries, and \$264.40 for conveying scholars to school.

Two of the schools in the Summer did not meet our expectations. With these exceptions we confidently assert that the schools have been successful in a greater degree than usual. Teachers have labored faithfully and earnestly and have been assisted by parents, who realize that in united effort depends the success of the common school. One or more of the registers are disfigured by absence marks against pupils. Parents should use every effort to remedy this defect, for it is certain that irregular attendance is not conducive to satisfactory improvement.

The readers and grammars now in use have been in our schools about fourteen years. There are better ones that should be introduced, and we would suggest that a small sum be raised for this purpose at the annual town meeting.

Repairs are greatly needed on the inside of the school houses at the Centre and Town-House Schools. Plastering is off and floors are worn out. Doors and windows let in so much cold that it has been very uncomfortable for teachers and scholars during the cold weather prevailing a part of the last term.

Concluding, we thank all who have assisted us in the performance of our duties, some of which have had un-

pleasant features, though in most cases a satisfactory adjustment has been made.

Encouraged by the success attained the past year, we predict results in the future that will gratify all citizens having the elevation of our schools at heart.

Respectfully submitted,
