DURHAM, NH – An increasing number of New Hampshire adults believe that drug abuse is the most important problem facing the state. Furthermore, almost half of New Hampshire residents know of someone who has recently abused heroin.

These findings are based on the latest **WMUR Granite State Poll**,\* conducted by the University of New Hampshire Survey Center. Five hundred and thirty-two (532) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between July 7 and July 20, 2015. The margin of sampling error for the survey is +/- 4.2 percent. Included were four hundred seventy-two (472) likely 2016 general election voters (MSE = +/- 4.5%).

### Most Important Problem Facing New Hampshire

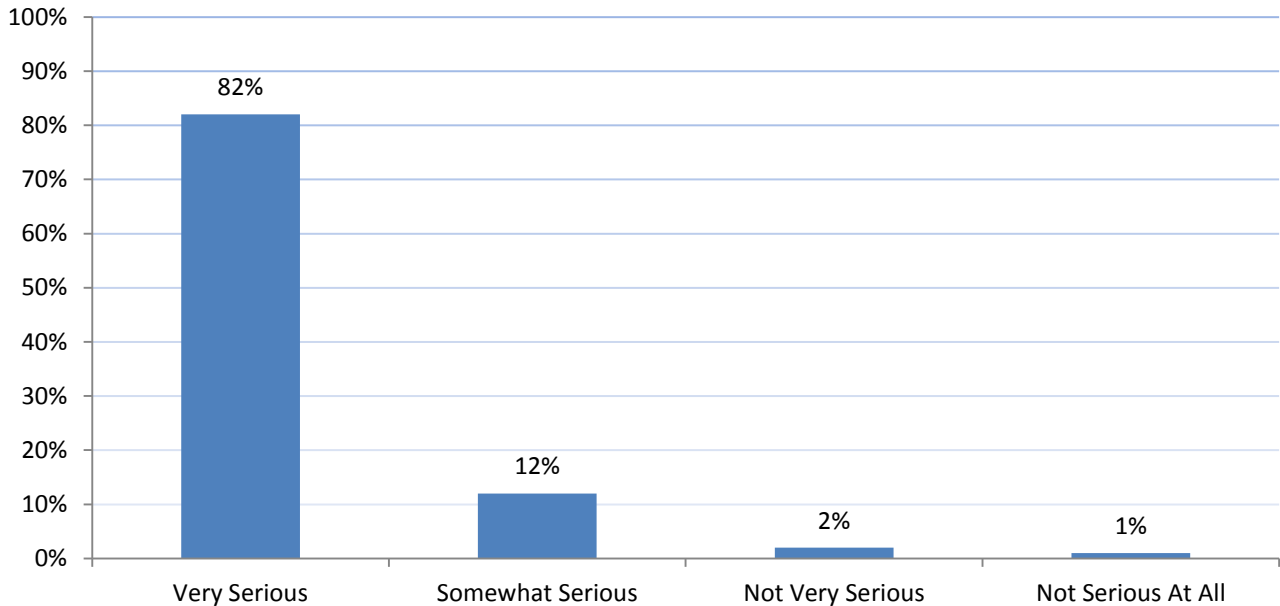

Although a lack of jobs and the slowly recovering economy are still seen as the most important problem facing the state, Granite Staters are increasingly concerned with drug abuse. Currently, 25% of New Hampshire adults cite jobs and the economy as the most important problem facing the state, followed by drug abuse (14%), the state budget (9%), education (8%), health care (7%), and taxes (6%).

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

### Seriousness of Heroin Problem in New Hampshire

Overdoses and deaths from heroin have gone up dramatically in New Hampshire recently and the families of victims have been increasingly vocal and public about this problem. The visibility of this problem is reflected in this poll as four of five Granite State adults (82%) say that heroin abuse is a very serious problem in New Hampshire, 12% say it is somewhat serious and only 3% say it is not very serious or not serious at all.

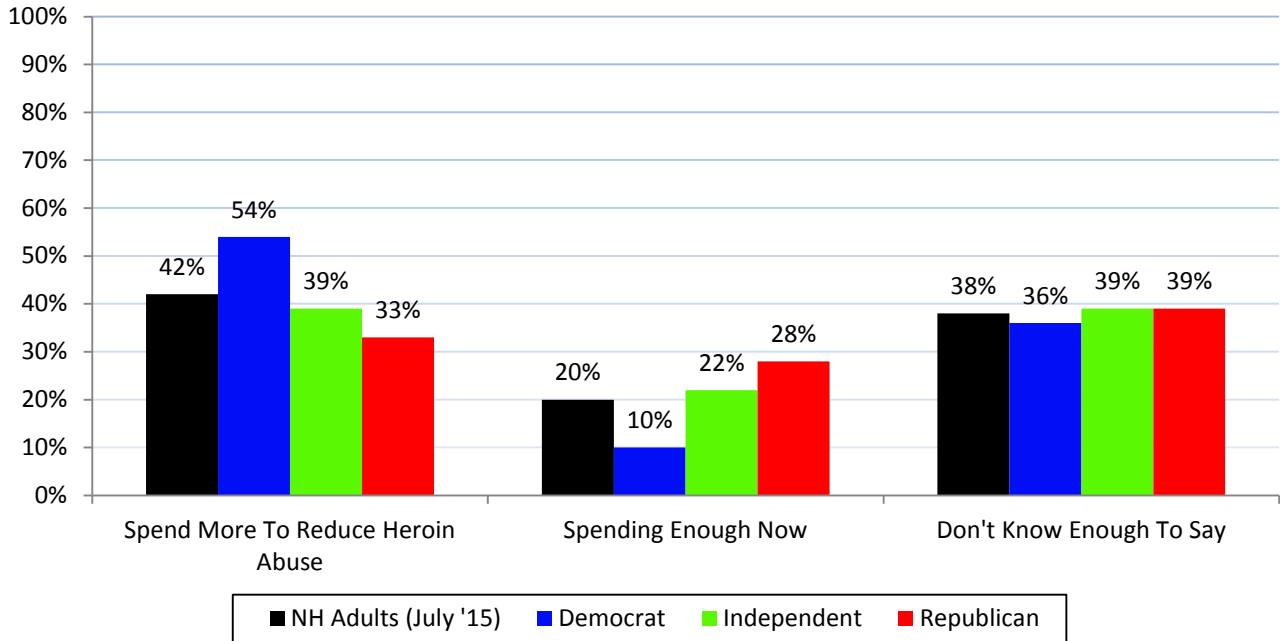

### Know Someone Who Has Abused Heroin

Furthermore, 46% of New Hampshire residents say they personally know someone who has abused heroin in the past 5 years. Younger residents are more likely to know someone who has abused heroin than older residents as nearly three in five (58%) adults under 35 years old say they personally know someone who has abused heroin in the past 5 years.

### Should State and Local Governments Spend More To Reduce Heroin Abuse?

When asked whether or not state and local governments should be spending more on programs to combat heroin abuse, Granite Staters are divided – a plurality, 42%, believe the government should spend more, 20% believe we are spending enough now and 38% don't know enough to say. Democrats (54%) are more likely to say the government should spend more to reduce heroin abuse than Independents (39%) or Republicans (33%).

### Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred and thirty-two (532) randomly selected New Hampshire adults were interviewed in English by landline and cellular telephone between July 7 and July 20, 2015. The margin of sampling error for the survey is +/- 4.2 percent. Included were four hundred seventy-two (472) likely 2016 general election voters (MSE = +/- 4.5%). These MSE's have not been adjusted for design effect. The design effect for the survey is 1.2% and 1.2% for the sample of likely 2016 general election voters.

The random sample used in the WMUR Granite State Poll was purchased from Scientific Telephone Samples (STS), Foothill Ranch, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

For more information about the methodology used in the WMUR Granite State Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
