Corrections.

On page 5, under head of Abatements, read G. W. BASSETT, instead Levi T. Haley.

On page 10, read J. H. Martin bounty on Crows 80 cents instead of \$8.00.

On page 11, line 6, read recording INVENTORY and making collector's book.

REPORT
OF THE
SUPERINTENDING SCHOOL COMMITTEE
for the town of Wolfeborough, N. H.

FOR THE YEAR ENDING MARCH 1, 1882.

——
To the Citizens of Wolfeborough:—

TO a republican form of government whose officers are elected and whose institutions are formed and controlled by the people, the system of common school education sustains a most interesting and important relation. It is not a system to educate the nobility, merely, it recognizes no such class. It is a system that secures the means of an education, in all the more essential and useful branches in the more common pursuits of life, to all, to rich and poor alike. It seeks to educate the entire population and thus to qualify them for useful, happy citizens and a good government. From the very structure therefore of our government and the relation that the entire community sustains to all the civil institutions of our country and also from other vital considerations the common school system of education becomes an institution of fundamental interest. It may perhaps with no impropriety be termed the corner stone of our National prosperity if not her very existence.

District No. 1. The summer term of twelve weeks was taught by Miss. Annie I. Warren. There seemed to exist mutual confidence between teacher and scholars and good improvement was made. The winter term of twelve weeks, was under the instruction of Mr. John A. Edgerley. The teacher well sustained his reputation. Good improvement was made.

District No. 2 THE CHAIRMAN of the board of education in district No. 2 has reason to believe that good progress has been made in that district during the past year. Thoroughness has been the aim of both committee and teachers. It is thought better to learn a little *well* than much *imperfectly*.

The system of grading adopted two years since has shown satisfactory results.

The good effect of the "new departure" by the town and district last spring in raising money for school purposes, was quite obvious in district No. 2, in as much as it afforded the means of an additional term in both departments, making three terms for each school.

Believing that experience in teaching is as essential to the work of education as is experience in other departments of life's duties, the board have sought to obtain the services of teachers who had some experience in the business. We think the result shows their course in this particular a wise one.

At the commencement of the school year a change was made in the Arithmetics and Spellers. The old books were replaced by *Robinson's* series of Arithmetics at the expense of the publishers. The schools are therefore now well supplied with the latest and best approved text books. No further changes will be needed within the time limited by law.

The first and second terms of the Grammar School were taught by Miss Annette L. Horn. The first term was ten weeks and the second

term eight weeks in length. Miss Horn has had considerable experience in teaching in Dover, N. H., and in this town. She labored hard for good order and thoroughness in preparation. Her success was commendable.

The third term of the Grammar School was taught by George A. Haines. Mr. Haines is a teacher of some experience and fully endorsed the views of the committee as to the need of thoroughness in preparation. The committee visited the school during the first week of the term and were satisfied with the prospect. No complaints or unfavorable reports reached them during the term. At the commencement of the last week the teacher was taken sick and the school closed without an examination by the committee. We cannot, therefore, speak of the progress made with the accuracy desirable. We think however, from such data as we have been able to obtain that it was fair.

The three terms of the primary department, ten, eight and nine weeks, respectively were taught by Miss Hattie E. Parker. Miss Parker brings to her aid patience and perseverance as well as experience, qualities very essential to success with the beginners and those little advanced. A person without experience can have but a poor idea of the persistent labor necessary to start the little ones aright upon their toilsome journey up the hill of science. Miss P. appears to be quite successful in this department, most of the pupils made good improvement in reading, spelling and a portion in Arithmetic. Good order prevailed and many things were learned which were not down in the text-books, things, however, necessary to be known.

Attendance.—GRAMMAR DEPARTMENT—1st term, whole number pupils attending two or more weeks, 27. Average daily attendance, 22. 2d. term whole number 29, average 24. 3d. term, whole number 42, average 36.

PRIMARY DEPARTMENT.—1st term, whole number

29 Average 27. 2d, term, whole number, 26 Average 21 3d term, whole number 21 Average 18.

C. H. PARKER,

for the board of Education.

District No. 3. A summer term of ten weeks taught by Miss. Lizzie B. Cate. The appearance of the school was good at each visit. Miss. Hortense Deland teacher of winter term of ten weeks. Miss Deland is a superior scholar and instructs those under her charge thoroughly.

District No. 4 The summer term of eight weeks taught by Miss. Louise M. Estes. A fall term of eight weeks by Miss. Ada E. Hersey and a winter term of ten weeks by Miss. Emma S. Wiggin. The school appeared well during each term.

District No. 5. One term of 15½ weeks by Miss. Annette L. Horne who is a resident of the district and has taught school several terms in the district. The present was a success.

District No. 6. The summer and fall schools of twelve and six weeks respectively were taught by Miss. Adria O Lord. The winter term of twelve weeks by Miss. Ora A. Fletcher fair improvement was made during all the terms.

District No. 7. This is a Union district only a small portion of the scholars belong to Wolfeborough. Miss Abbie Cate teacher of twenty weeks. All of the recitations showed thoroughness.

District No. 8. Miss. Velzira A. Copp had charge of the summer term of eight weeks. Miss. Mary E. Roberts for the fall term of eight weeks and Miss. Mary A. Elwell for the winter term of fifteen weeks, there existed during each of these terms what is always incentive to a pleasant and profitable school, confidence between teacher and scholars. At all the visits both teacher and scholars were busy, hence good improvement. All the teachers of this district (the present year) are graduates and had several of the higher branches, Latin included

in the last two terms.

District No. 9. Miss. Etta F. Mason teacher fall term of twelve weeks Miss. Mason labored faithfully for her scholars and her labors were crowned with success.

District No. 11. One term of seven weeks taught by Miss. Seddie Brewster. Miss. Brewster is a fine scholar and succeeds well in teaching.

District No. 13. Miss. Hortense Deland teacher for the summer term of eight weeks Miss. L. B. Cate for the fall of eight weeks. See No. 3. A winter term of 11 weeks by Mr. Walter H. Foss this was Mr. Foss first term but he was assiduous and succeeded in awakening a good degree of interest.

District No. 15. Summer term of eight weeks taught by Miss. Annah M. Cotton, Miss Cotton proved to be an efficient teacher thorough in all her instructions and good improvement was made. The winter term of twelve weeks by W. P. Horne, the scholars during the term were courteous and industrious many of them made rapid progress in their studies. The parents gave a hearty co-operation.

District No. 17. The following is a statement of the attendance upon the schools of this district for the past year:—

TERMS	HIGH		GRAMMAR		INTERME- DIATE		PRIMARY	
	Whole No.	Average.	Whole No.	Average.	Whole No.	Average.	Whole No.	Average.
Spring	19	18	23	22	35	28	47	44
Fall	26	25	25	24	41	37	52	51
Winter	25	24	28	26	38	35	40	34

It will be seen that the schools are slightly increasing in numbers and that the average attendance has been excellent.

There has been no change of teachers in the Primary or Intermediate Grades but in the Grammar School Miss George A Lynch, of Peterboro', N. H., has succeeded Miss. Butler, who resigned at the close of the Spring term and Mr. George F. Joyce, of Brookline, Mass., succeeded Mr. Morang, who resigned at the same time. The schools are all in excellent condition and the teachers are giving satisfaction to the Board, and so far as we know the people of the district,

The board deem it for the best welfare of the school that there shall be a rigid adherence to the prescribed course of study by all who are permanent members of the school. With the necessity upon us of economizing in the employment of teachers, it is essential to systematise the work of the schools in the best manner possibly. We cannot therefore make classes outside of the prescribed course without greatly impairing the efficiency of the schools.

The Board deem it essential to make promotions from one grade to another upon stricter rules of examination than have hitherto prevailed, experience shows that it is very unwise to advance a pupil faster than his actual requirements warrant. When this does occur the pupil either fails to get on with his new studies successfully, or he becomes a great hindrance to the others of his class who are able to progress steadily. It is clear that bright willing industrious pupils should not be kept back for the sake of those who are naturally dull, or unwilling, or lazy. There are not many in our schools who are not capable of passing such an examination as may hereafter be required for promotion, if they properly improve their time and advantages. But there are some, we hope but a few, who do not try to do as well as they can; who are indifferent whether they have their lessons well or not; who seem to loose

their courage in attacking their lessons; who prefer to waste their school room hours in idleness, in pretended study or in frivolty

The weekly reports sent to the parents by the teachers ought and we presume do indicate those whose rank in the studies and in deportment is low, and who are in danger of not succeeding in the examinations for promotion.

There is yet time during the coming term for such to retrieve the past, and put themselves where they need not fail, and if they do fail we hope, after this timely warnings, that neither they nor their parents will complain of the result.

E. C. BANFIELD.

*Chairman of the Board
of Education.*

District No. 18. In the two terms a fall and winter of ten weeks each, Miss. Clara A. Bassett teacher, considerable improvement was made each term.

The standard of our common school education is very much higher than formerly when less branches were pursued and scholars were much longer obtaining a knowledge of them. May the interest manifested in these primary educational institutions never be diminished. May they have the earnest and hearty co-operation combined with the cordial and liberal support of all. Truly it may be said that they are the indices of our future history the harbingers of our future greatness and prosperity, we commend them to the patronage of all lovers of their country and race.

Respectfully submitted,

W. P. HORNE.
