DURHAM, NH –Hillary Clinton, who has held comfortable leads over all her Democratic rivals, is now in a statistical tie with Vermont Senator Bernie Sanders in New Hampshire. Clinton and Sanders now enjoy identical net favorability ratings among Democratic primary voters.

These findings are based on the latest **CNN / WMUR New Hampshire Primary Poll**,\* conducted by the University of New Hampshire Survey Center. One thousand and ten (1010) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between June 18 and June 24, 2015. Included were three-hundred sixty (360) likely 2016 Democratic Primary voters (MSE = +/-5.2), and four hundred two (402) likely 2016 Republican Primary voters (MSE = +/- 4.9).

### NH Voters Not Yet Engaged

2016 is the 100<sup>th</sup> anniversary of the New Hampshire Presidential Primary, and with more than six months remaining before the election, most voters have not yet engaged. While some of the candidates discussed in this poll will decide not to run, and others may enter who were not discussed, candidates who are the early identified frontrunners have usually won past New Hampshire primaries.

New Hampshire primary voters typically decide who they will vote for in the last weeks, or days of the campaign and it is no surprise that few voters have made up their minds about who they will support in 2016. Currently, only 20% of likely Democratic primary voters say they have definitely decided who they will support, 26% are leaning toward a candidate, but the majority of voters (54%) are still trying to decide who to support.

\* We ask that this copyrighted information be referred to as *the CNN / WMUR New Hampshire Primary Poll*, sponsored by CNN and WMUR-TV, and conducted by the University of New Hampshire Survey Center.

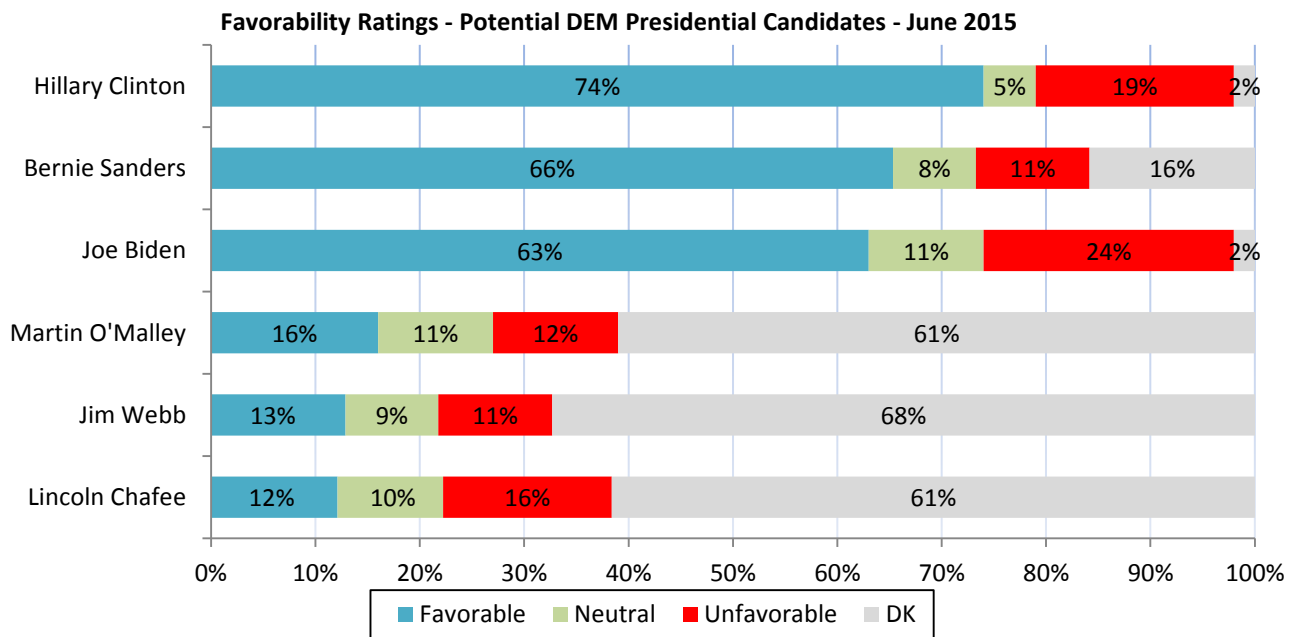

Currently, 37% of likely Democratic primary voters say they are extremely interested in the election, 40% are very interested, 18% are somewhat interested and 6% are not very interested. This is similar to this point in the 2007 cycle.

However, it appears that the electorate is more interested in the Republican primary than the Democratic contest. Undeclared voters, often erroneously referred to as “independents”, are much less likely to say they plan to vote in the Democratic primary than they were in 2008. Currently, 35% of undeclared voters say they plan to vote in the Republican primary, 34% plan to vote in the Democratic primary, and 31% say they will not vote in either primary or are unsure which primary they would vote in. At this time in 2007, 49% of undeclared voters said they would vote in the Democratic primary, only 24% said they planned to vote in the Republican primary, and 28% said they would not vote in either primary or were unsure which primary they would vote in.

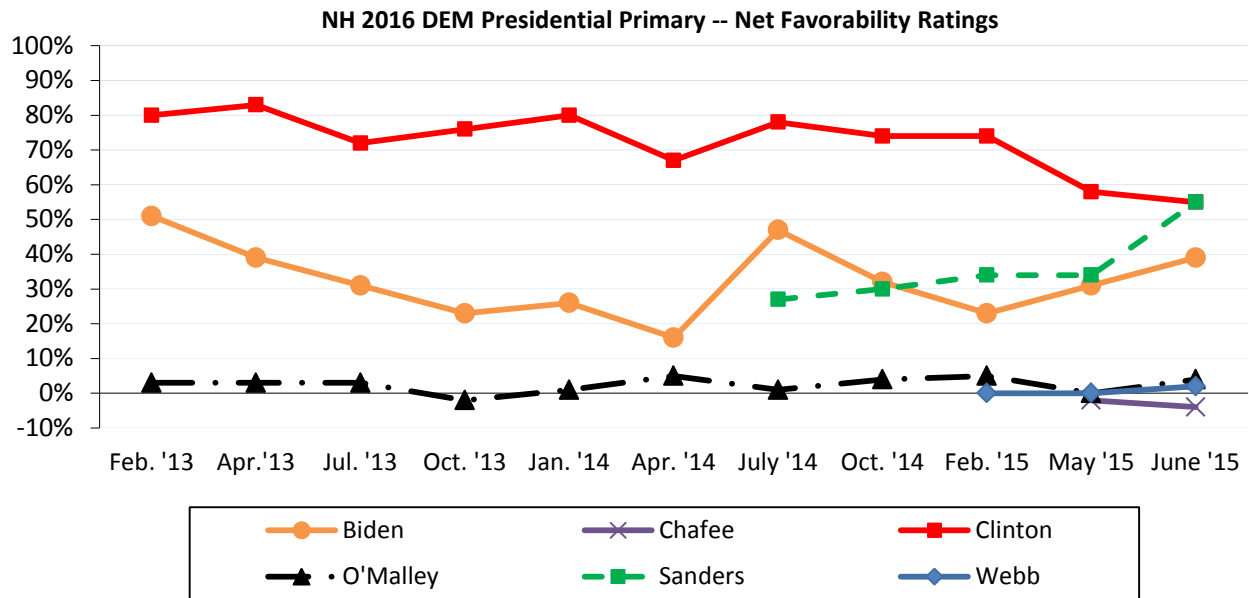

### Democratic Favorability Ratings

2008 New Hampshire Primary winner Hillary Clinton remains the most popular Democratic candidate. Most likely Democratic Primary voters, 74%, have a favorable opinion of Clinton, 19% have an unfavorable opinion of her, and 11% are neutral or unsure. Her net favorability rating, the percentage who have a favorable opinion minus those who have an unfavorable opinion, is a +55%, her lowest rating since President Obama was inaugurated in 2013.

Vermont senator Bernie Sanders has enjoyed a significant increase in his net favorability ratings in recent months and he is now tied with Clinton on this measure with a net +55%, up from +34% in May. Vice President Joe Biden has solid net favorability ratings (+39%) while other Democratic challengers -- former Maryland governor Martin O’Malley (+4%), former Virginia senator Jim Webb (+2%), and former Rhode Island governor Lincoln Chafee (-4%) and are less well known and have low net favorability ratings.

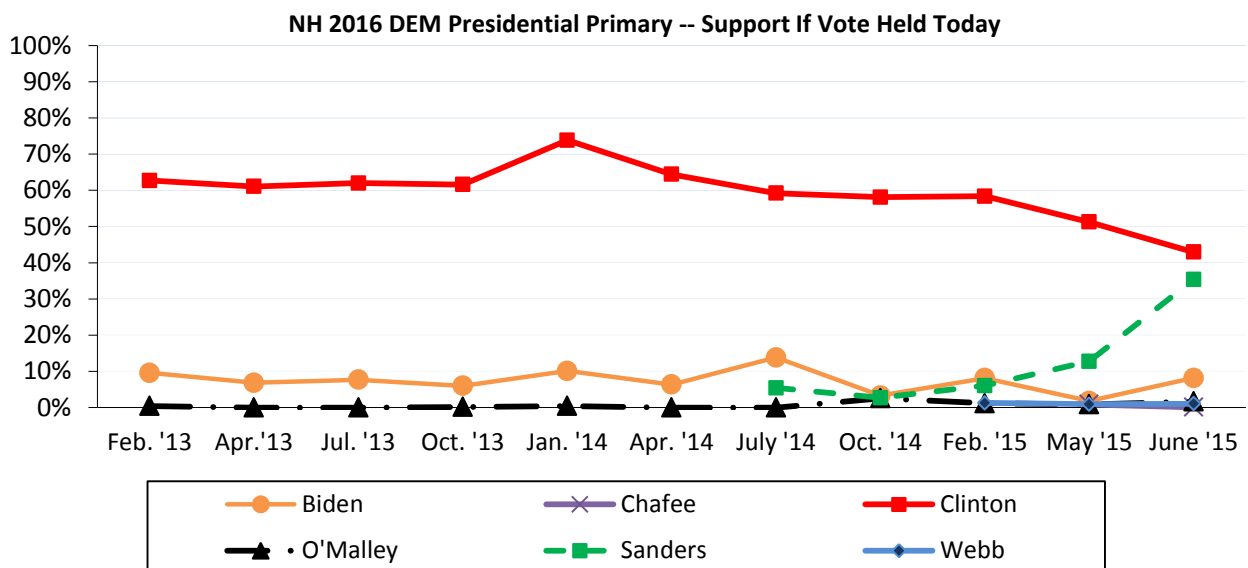

Clinton has been the most popular Democratic candidate over the past two years, but her net favorability has dropped from +74% to +55% since February.

### 2016 NH Democratic Primary Trial Heat

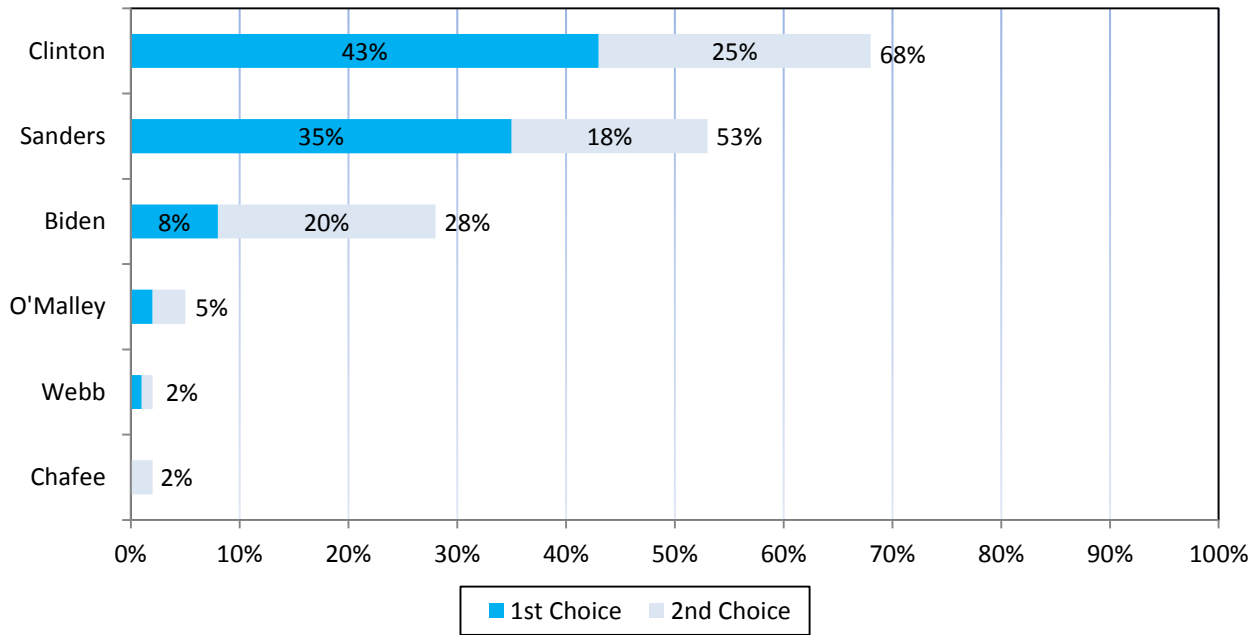

Clinton had been the clear favorite among Democratic voters when they are asked to choose from a list of prospective candidates since 2013, however, Sanders has surged in recent months. In the current CNN / WMUR Poll, 43% of likely Democratic Primary voters say they would vote for Clinton if the election were held today, 35% say they would vote for Sanders, 8% prefer Biden, 2% prefer O'Malley 1% prefer Webb, less than 1% prefer Chafee, 2% favor some other candidate, and 9% are undecided. Support for Clinton has dropped below 50% for the first time in the 2016 nomination cycle while support for Sanders increased from 13% in May.

Clinton's strongest support comes from voters with only high school degrees (60%), registered Democrats (52%), women (51%), 51 to 64 year olds (51%), and Manchester area residents (50%). Sanders strongest support comes from North Country residents (50%), liberals (48%), and voters under 35 (47%).

### 2016 NH Democratic Primary with Second Choice

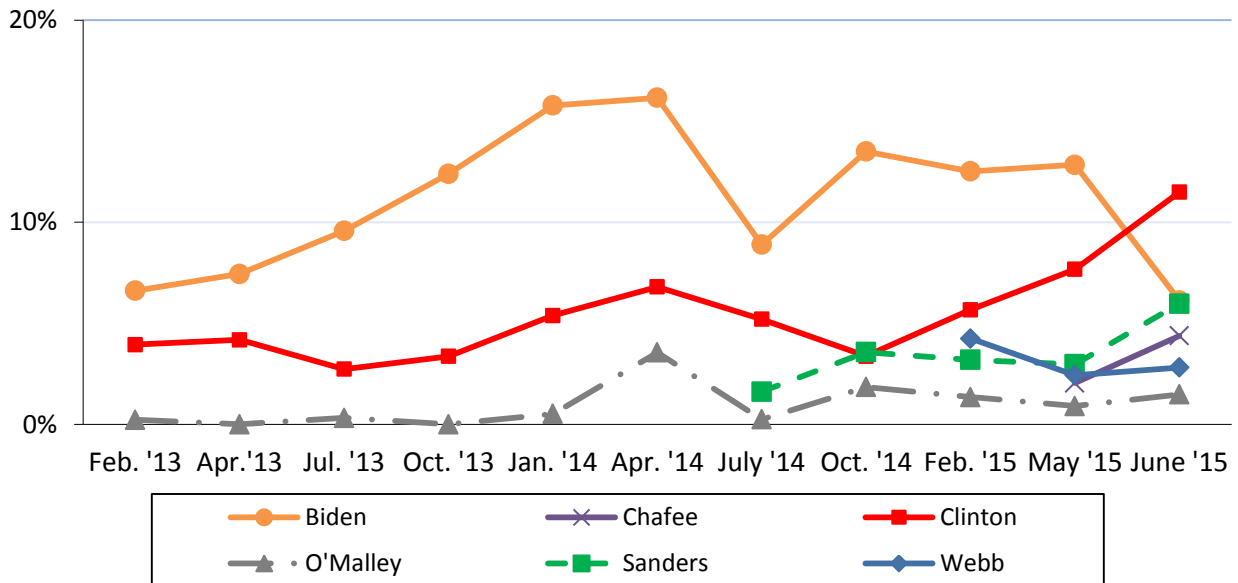

While Hillary Clinton is currently the frontrunner in the Democratic field, likely Democrat Primary voters view Bernie Sanders as a viable option. When the top two choices are combined, 68% of likely primary voters favor Clinton, 53% favor Sanders and 28% favor Biden.

### Most Unpopular Democrat Candidate

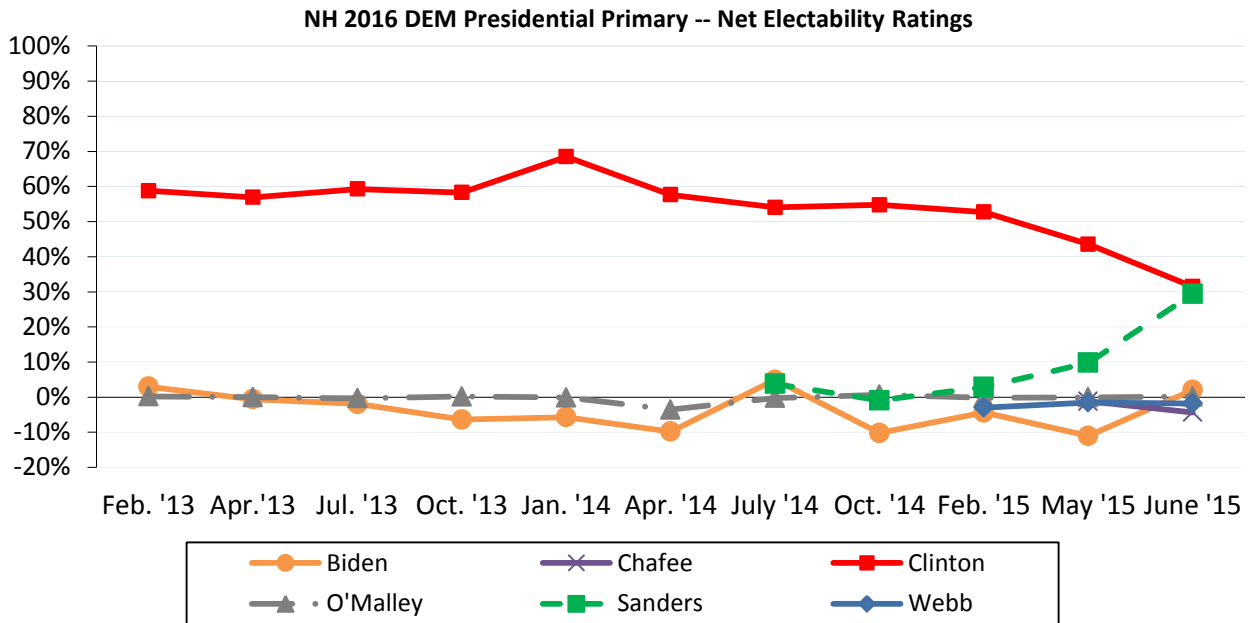

Nominations typically go to candidates who are acceptable to most members of their party and not too polarizing of a figure. When asked which potential candidate they would NOT vote for under any circumstance, 11% of likely Democratic primary voters would not vote for Clinton, 6% would not vote for Biden, 6% would not vote for Sanders, 4% would not vote for Chafee, 3% would not vote for Webb, 3% think that all of the prospective candidates are acceptable, and 30% are unsure. Clinton leads on this measure of unpopularity for the first time in the 2016 cycle.

### NH 2016 DEM Presidential Primary -- Would Not Vote For

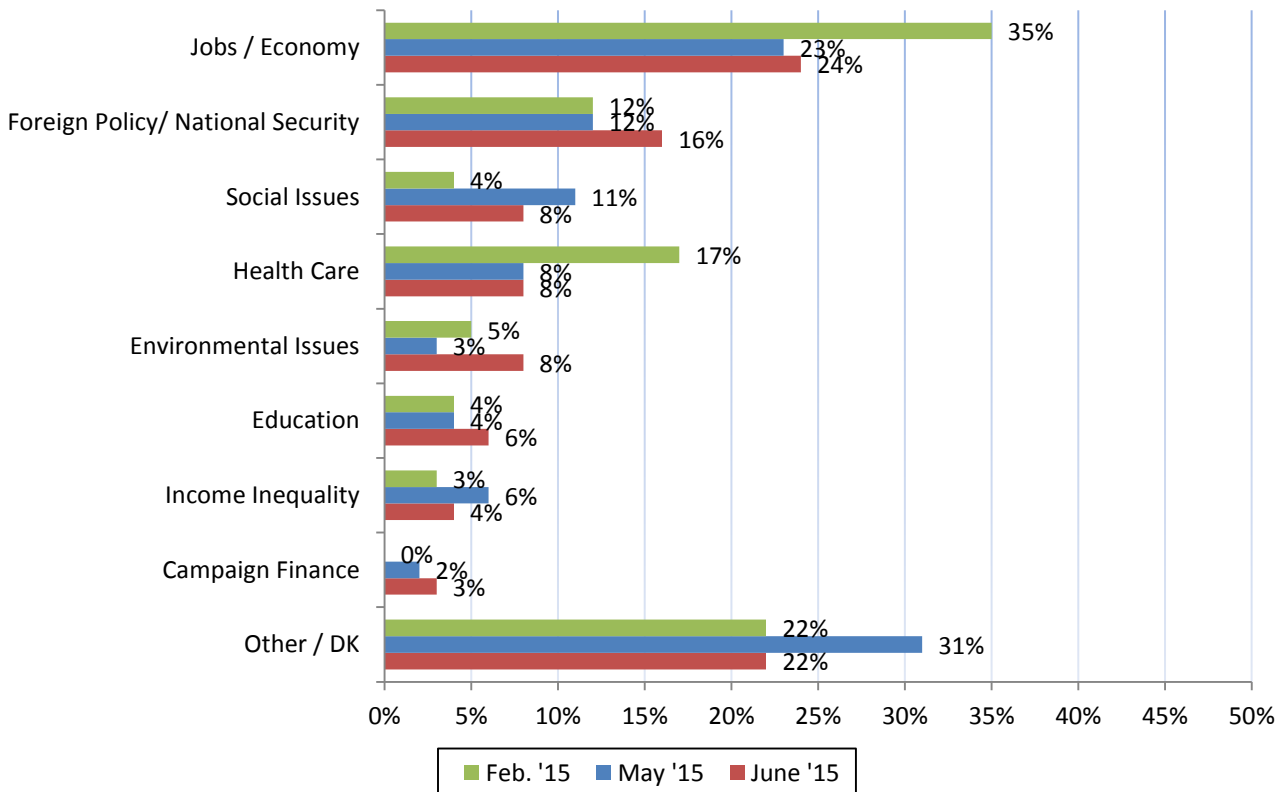

### Democrat Net Electability

Clinton had held a wide lead in net electability (the percentage who support a candidate minus the percentage who would not vote for that candidate under any circumstances), but this has disappeared in recent months. Clinton's net electability score is +31%, followed closely by Sanders at +29%. No other Democratic candidate has net favorability ratings above +2%.

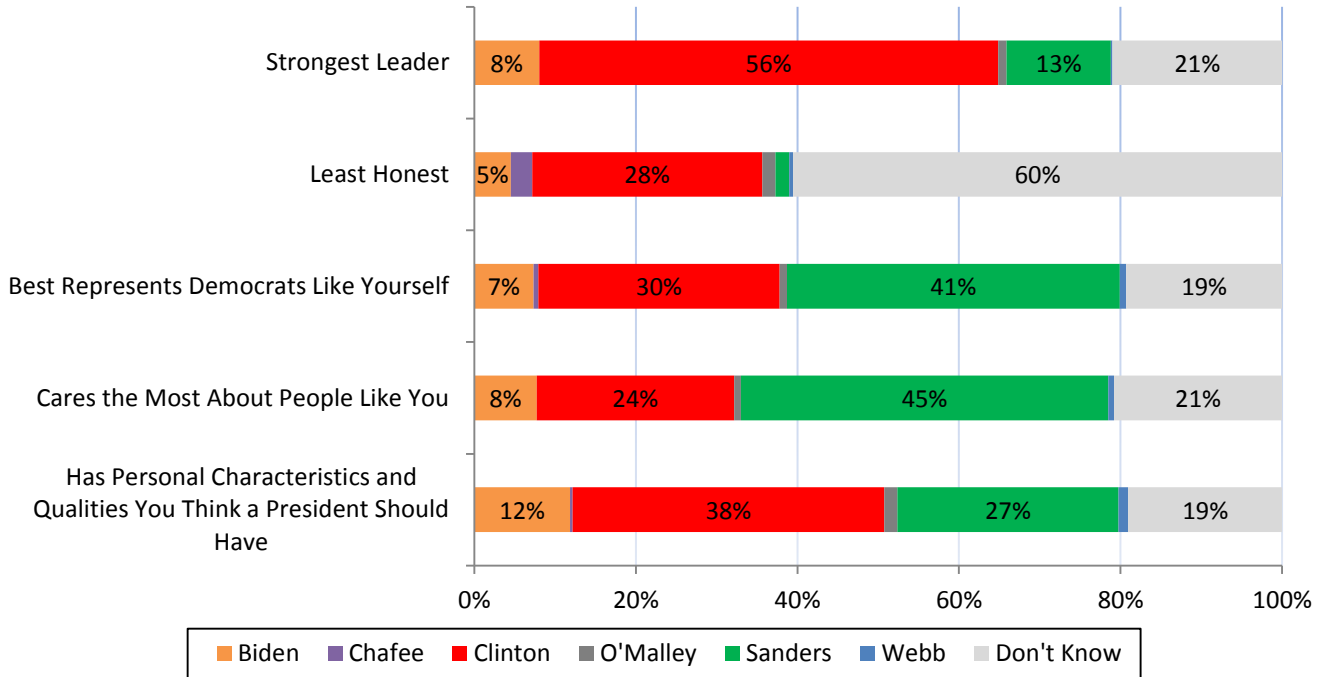

### Most Important Issues to Primary Vote

When asked what issue is the most important facing candidates in the presidential primary, 24% of likely Democrat Primary voters cite jobs or the economy, 16% cite foreign policy or national security, 8% cite social issues, 8% cite healthcare, 4% cite income inequality, 6% cite education, and 8% cite the environment.

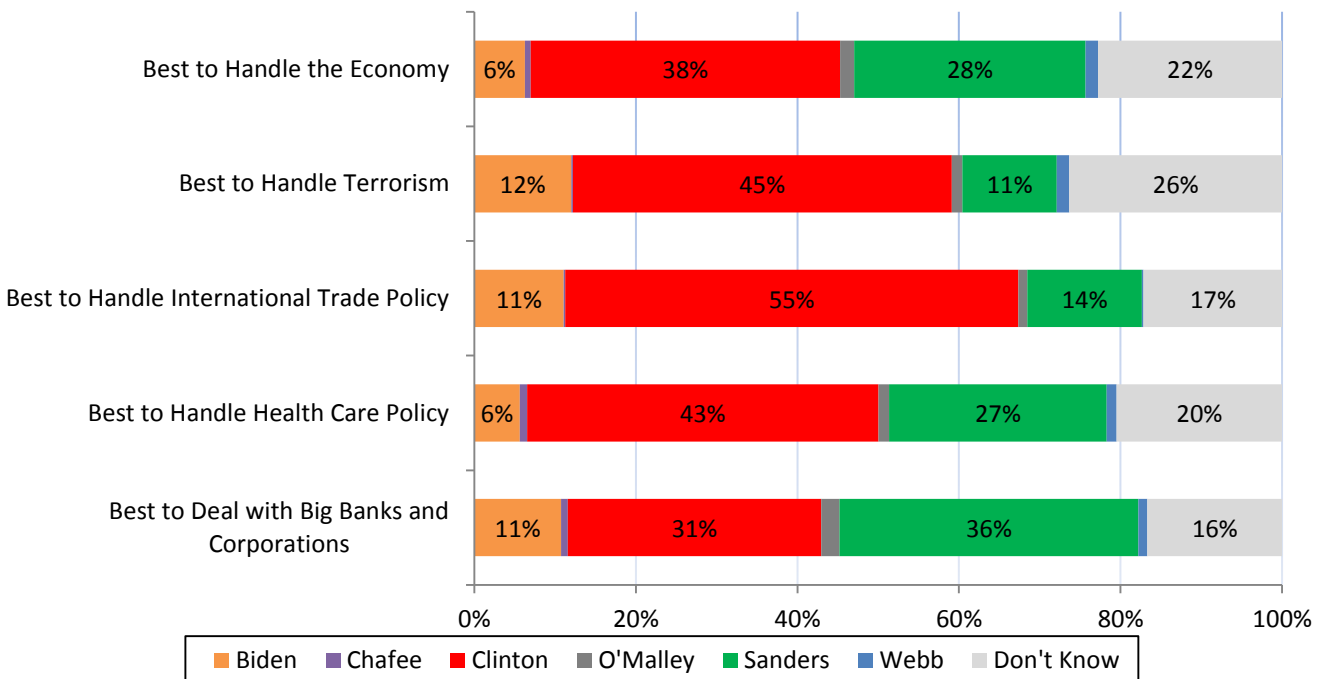

### Candidate Qualities

Voters were asked which candidate most exhibits several candidate qualities. Clinton gets higher ratings for leadership and appearing presidential but voters think Sanders has greater empathy for them. A majority of likely primary voters (56%) view Hillary Clinton as being the strongest leader, 38% think she has the personal characteristics and qualities to be president, 30% believe she has the best represents Democrats like themselves, and 28% think she is the least honest candidate. A plurality (45%) chose Bernie Sanders as the candidate who most cares about people like them and 41% think Sanders best represents Democrats like them.

Likely Democratic Primary voters were next asked which candidate is best able to handle several top issues. For most issues, Clinton is viewed as the candidate best able to handle that issue – 55% think she is best able to handle international trade issues, 45% think she can best handle terrorism, 43% think she is best on health care policy, and 38% think she is best able to handle the economy. However, a plurality (36%) think Sanders is best able to deal with big banks and corporations.

**CNN / WMUR New Hampshire Primary Poll Methodology**

These findings are based on the latest **CNN / WMUR New Hampshire Primary Poll**, conducted by the University of New Hampshire Survey Center. One thousand and ten (1010) randomly selected New Hampshire adults were interviewed by live interviewers in English on landline and cellular telephones between June 18 and June 24, 2015. The margin of sampling error for the entire sample is +/- 3.1 percent. Included were three-hundred sixty (360) likely 2016 Democratic Primary voters (MSE = +/-5.2), and four hundred two (402) likely 2016 Republican Primary voters (MSE = +/-4.9

The random sample used in the CNN / WMUR New Hampshire Primary Poll was purchased from Scientific Telephone Samples (STS), Foothill Ranch, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.

For more information about the methodology used in the CNN / WMUR New Hampshire Primary Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at [andrew.smith@unh.edu](mailto:andrew.smith@unh.edu).
