www.unh.edu/survey-center

DURHAM, NH – The Republican field of candidates vying for the nomination continues to grow but there remains no frontrunner. The New Hampshire race will remain very unclear for some time as very few voters have decided who they will support.

These findings are based on the latest **CNN / WMUR New Hampshire Primary Poll**,* conducted by the University of New Hampshire Survey Center. One thousand and ten (1010) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between June 18 and June 24, 2015. Included were three-hundred sixty (360) likely 2016 Democratic Primary voters (MSE = +/-5.2), and four hundred two (402) likely 2016 Republican Primary voters (MSE = +/-4.9).

NH Republicans Not Engaged

2016 is the 100th anniversary of the New Hampshire Primary and while an ever growing field of candidates is contending for the Republican nomination, New Hampshire Republicans are taking their time deciding who to support. While some of the candidates discussed in this poll will decide not to run, and others may enter who were not discussed, candidates who have been identified as early frontrunners have typically won past New Hampshire primaries.

New Hampshire primary voters usually decide who they will vote for in the last weeks, or days of the campaign and it is no surprise that very few likely Republican primary voters have made up their minds about who they will support in 2016. Currently, only 8% of likely Republican Primary voters say they have definitely decided who they will support, 17% are leaning toward a candidate, and 75% are still trying to decide.

* We ask that this copyrighted information be referred to as *the CNN / WMUR New Hampshire Primary Poll*, sponsored by CNN and WMUR-TV, and conducted by the University of New Hampshire Survey Center.

The Republican electorate is somewhat more interested in the 2016 primary than it was at a similar point in 2007, the last time both parties had contested primaries. Currently, 36% of likely Republican primary voters say they are extremely interested in the election, 48% are very interested, and 16% are only somewhat interested or not very interested. By comparison, in 2007, 34% of likely Republican primary voters said they were extremely interested in the 2008 primary, 40% were very interested, and 26% were only somewhat interested or not very interested.

GOP Favorability Ratings

Florida senator Marco Rubio leads the GOP field in net favorability (the percentage who have a favorable opinion of him or her minus the percentage who have an unfavorable opinion) among Republican primary voters. Currently 49% have a favorable opinion of Rubio, 21% have an unfavorable opinion and 29% are neutral or don't know enough about him to say. Rubio's net favorability rating is +28%, which is down from +44% in May. Other GOP candidates with moderate net favorability ratings include neurosurgeon Ben Carson (+27%), Wisconsin governor Scott Walker (+25%), and businesswoman Carly Fiorina (+24%).

Former Florida governor Jeb Bush (+17%), former Texas Governor Rick Perry (+12%), Kentucky Senator Rand Paul (+11%), and Texas Senator Ted Cruz (+1%) have low net favorability ratings, despite most Republican Primary voters knowing them. Businessman Donald Trump (-10%), former Pennsylvania Senator Rick Santorum (-11%), former New York Governor George Pataki (-11%), former Arkansas governor Mike Huckabee (-12%), New Jersey governor Chris Christie (-13%) and South Carolina Senator Lindsey Graham (-23%) have negative net favorability ratings, despite most Republican Primary voters knowing them.

Ohio governor John Kasich (+7%), Louisiana governor Bobby Jindal (+5%), former Maryland governor Bob Ehrlich (-9%), former Virginia governor Jim Gilmore (-9%), and New York congressman Peter King (-21%) have low net favorability ratings, and are also are not well known.

Trump, who officially announced his campaign last week, has seen his approval ratings increase from -50% in February to -10% in June.

Favorability Ratings - Potential NH GOP Presidential Candidates - June 2015

■ Favorable
 ■ Neutral
 ■ Unfavorable
 ■ DK

2016 NH Republican Primary

There continues to be no frontrunner in the Republican race and no candidate above 20% in a hypothetical election matchup. Currently, 16% of likely Republican primary voters support Bush, followed closely by Trump (11%), Paul (9%), Walker (8%), Rubio (6%), Fiorina (6%), Carson (5%), Christie (5%), Perry (4%), Cruz (3%), Huckabee (2%), Kasich (1%), Pataki (1%), and Graham (1%). All other potential candidates receive less than 1% support, and 21% say they are undecided.

NH 2016 GOP Presidential Primary -- Support If Vote Held Today

2016 NH Republican Primary with Second Choice

Asking likely Republican Primary voters who their second choice is does not clarify the primary picture. When the top two choices are combined, 30% of likely primary voters favor Bush, 21% favor Trump, 15% favor Walker, 14% favor Paul, 14% favor Fiorina, 13% favor Rubio and 13% favor Christie.

Most Unpopular Republican Candidate

While support for him has increased in recent months, Trump remains the candidate Republicans are least likely to vote for. When asked which candidate they would NOT vote for under any circumstance, 23% of likely Republican Primary voters say they would not vote for Trump, 10% would not vote for Bush, 10% would not vote for Christie, 4% would not vote for Cruz, 4% would not vote for Paul, 3% would not vote for Huckabee, 2% would not vote for Jindal, 2% would not vote for Walker, 2% would not vote for Rubio, 2% would not vote for Pataki, 2% would not vote for Santorum, 1% would not vote for Perry, 1% would not vote for King, 13% think all the prospective candidates are acceptable, and 19% are unsure.

Republican Net Electability

Electability scores (the percentage who support a candidate minus the percent who would not vote for that candidate), do not help in identifying a clear leader. Walker (+6%), Fiorina (+6%), Bush (+5%), Carson (+5%), Paul (+5%), Rubio (+4%), Perry (+3%), and Kasich (+1%) all have positive net electability scores. Gillmore (+0%), Ehrlich (+0%), King (-1%), Pataki (-1%), Graham (-1%), Huckabee (-1%), Cruz (-1%), Jindal (-2%), Santorum (-2%), Christie (-5%), and Trump (-12%) have neutral or negative net electability scores.

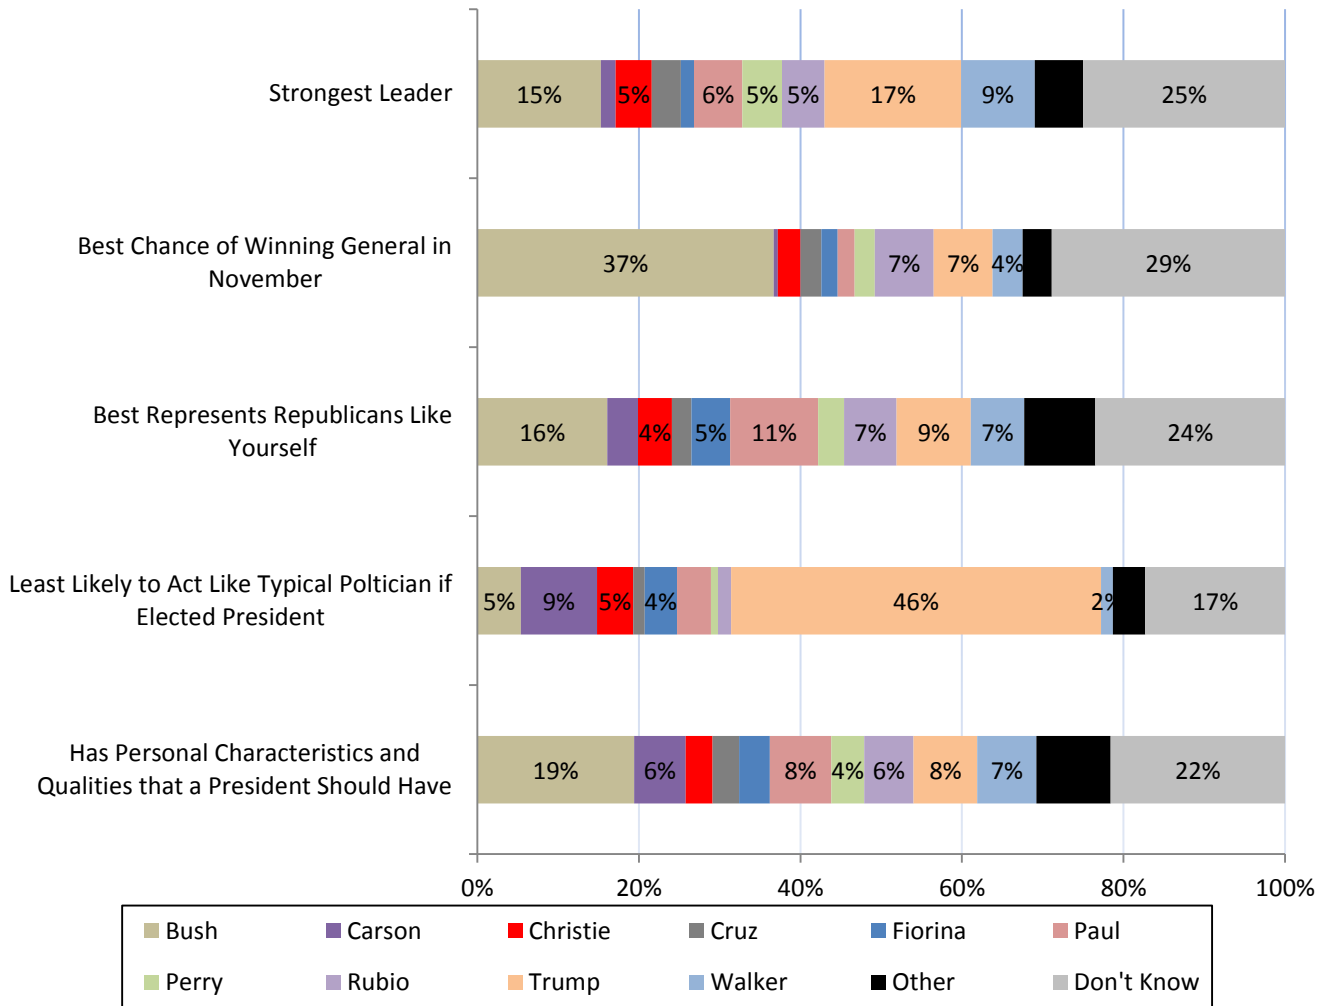

Most Important Issue To Primary Vote

What asked what issue is the most important in deciding to vote in the presidential primary, 44% of likely Republican Primary voters cite jobs or the economy, 19% cite foreign policy or national security, 7% cite immigration, 5% cite health care, 4% cite the budget or national debt, 2% cite social issues, 2% cite education and 1% cite taxes.

Candidate Qualities

Voters were asked to identify which candidate best exemplified a number of candidate qualities. A plurality of likely Republican Primary voters (46%) believe that Donald Trump is the least likely to act like a typical politician if elected president. However, when it comes to electability, a plurality (37%) say that Bush has the best chance of winning the general election next November. Likely Republican Primary voters are more divided when it comes to other qualities about the candidates – 17% say Donald Trump is the strongest leader, followed by Bush with 15% and Walker with 9%. Sixteen percent (16%) say Jeb Bush best represents Republicans like themselves, 11% chose Paul, 9% chose Trump and 24% were unsure. Nineteen percent (19%) say Jeb Bush has the personal characteristics and qualities that a President should have, 8% chose Trump, 8% chose Paul and 22% were unsure.

Voters were also asked to name the candidate best able to handle several policy issues. When asked which candidate could best handle the economy, 29% of likely Republican Primary voters chose Trump, 13% chose Bush, and 17% were unsure. When asked which candidate could best handle international trade policy, a plurality (27%) also chose Trump, 14% chose Bush and 32% were unsure. When asked which candidate could best handle illegal immigration, 16% chose Perry, 13% chose Bush, 13% chose Trump, and 23% were unsure. When asked which candidate could best handle health care policy 13% chose Bush, 11% chose Carson, and 38% were unsure. When asked which candidate could best handle terrorism, 15% chose Bush, 10% chose Trump and 35% were unsure.

CNN / WMUR New Hampshire Primary Poll Methodology

These findings are based on the latest **CNN / WMUR New Hampshire Primary Poll**, conducted by the University of New Hampshire Survey Center. One thousand and ten (1010) randomly selected New Hampshire adults were interviewed by live interviewers in English on landline and cellular telephones between June 18 and June 24, 2015. The margin of sampling error for the entire sample is +/- 3.1 percent. Included were three-hundred sixty (360) likely 2016 Democratic Primary voters (MSE = +/-5.2), and four hundred two (402) likely 2016 Republican Primary voters (MSE = +/-4.9

The random sample used in the CNN / WMUR New Hampshire Primary Poll was purchased from Scientific Telephone Samples (STS), Foothill Ranch, CA. STS screens each selected telephone number to eliminate non-working numbers, disconnected numbers, and business numbers to improve the efficiency of the sample, reducing the amount of time interviewers spend calling non-usable numbers.

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.

For more information about the methodology used in the CNN / WMUR New Hampshire Primary Poll, contact Dr. Andrew Smith at (603) 862-2226 or by email at andrew.smith@unh.edu.
