DURHAM, NH – New Hampshire residents feel they are financially better off than they were a year ago, and expect to be in a similar position next year. Granite Staters believe New Hampshire business conditions are improving but are not optimistic about national economic conditions.

These findings are based on the latest **Business and Industry Association (BIA) Report on Consumer Confidence**,* conducted by the University of New Hampshire Survey Center. Five hundred and sixty-seven (567) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between May 6 and May 22, 2015. The margin of sampling error for the survey is +/- 4.1 percent. Included were five hundred twenty-four (524) likely 2016 general election voters (MSE = +/- 4.3%).

N.H. Business Conditions

The U.S. economy has shown signs of improvement over the past year and New Hampshire has as well. Unemployment in the Granite State has dropped below 4% and residents' expectations about economic conditions in the state are positive. When asked how New Hampshire businesses will do over the next year, nearly half of Granite Staters (49%) think state businesses will enjoy good times financially, only 23% think they will experience bad times, and 28% anticipate mixed conditions. This measure has stayed relatively steady over the past year.

“New Hampshire fared better than other states during the Great Recession in terms of job loss, unemployment and economic recovery and I think that is reflected here in the number of Granite Staters (49%) with positive perceptions of business confidence and the low unemployment rate,” said BIA President Jim Roche. “Five years after the recession, residents have a positive outlook; however, this is not reflected in their attitudes about the rest of the country, with more than a third remaining pessimistic about long-term business conditions. This should remind state and national lawmakers of the importance of protecting the climate for job creation and enacting policies that support a strong economy in the future.”

* We ask that this copyrighted information be referred to as *the BIA Report on Consumer Confidence*, sponsored by the New Hampshire Business and Industry Association, and conducted by the University of New Hampshire Survey Center.

U.S. Business Conditions

However, expectations for the U.S. economy have dipped since February. Currently, 35% of New Hampshire adults think that business in the country as a whole are in for good times over the next 12 months, 35% think businesses will have bad times, and 29% think conditions will be mixed. In February, 46% thought the country was in for good times economically.

New Hampshire residents remain pessimistic about the long-term prospects for the U.S economy. In the most recent Granite State Poll, 30% of New Hampshire residents believe that the U.S. economy will enjoy continuous good times over the next 5 years, 34% expect periods of widespread unemployment and depression, and 36% see a mix of good and bad conditions.

U.S. 5 Year Economic Outlook

Personal Financial Conditions

Turning to household finances, most New Hampshire adults think they are financially better off or about the same as they were a year ago. When asked about their household's financial condition, 42% of New Hampshire adults say they are better off now than they were a year ago, 27% say they are worse off, and 31% say things are about the same. The percentage who believe they are better off is at its highest point in over a decade.

Household Financial Condition – Compared to 1 Year Ago

Looking forward, a majority of Granite Staters think their households will be in about the same financial condition next year as they are today. Currently, 31% think their family will be better off financially a year from now, only 16% think they will be worse off and 53% think their families will be about the same.

Household Financial Condition – 12 Months from Now

New Hampshire adults also think it is a good time to buy major items for their home. Fifty-six percent (56%) of New Hampshire residents think now is a good time to buy major household items, 22% think it is a bad time, and 23% think it depends on a person's finances.

Good Time to Buy Major Household Item?

Subgroup Analysis

There are few demographic differences in the economic expectations of New Hampshire residents. Democrats are consistently more optimistic about the state and national economy than Republicans and Independents. Younger residents are more likely to be optimistic about their household's financial condition over the past year and over the next year.

Granite State Poll Methodology

These findings are based on the latest Business and Industry Association (BIA) Report on Consumer Confidence, conducted by the University of New Hampshire Survey Center. Five hundred and sixty-seven (567) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between May 6 and May 22, 2015. The margin of sampling error for the survey is +/- 4.1 percent. Included were five hundred twenty-four (524) likely 2016 general election voters (MSE = +/- 4.3%).

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.

Good Time to Buy Major Household Item

“Now thinking about the big things people buy for their home – such as furniture, a refrigerator, a stove, television and things like that. Generally speaking, do you think now is a good time or a bad time for people to buy major household items?”
