DURHAM, NH – Despite being controversial and the subject of much publicity, New Hampshire residents are only somewhat familiar with the proposed Northern Pass and Kinder Morgan pipeline projects to bring new sources of electricity to the region. Granite Staters are divided in their support for both projects.

These findings are based on the latest **WMUR Granite State Poll**,* conducted by the University of New Hampshire Survey Center. Five hundred and sixty-seven (567) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between May 6 and May 22, 2015. The margin of sampling error for the survey is +/- 4.1 percent. Included were five hundred twenty-four (524) likely 2016 general election voters (MSE = +/- 4.3%).

Familiarity With Northern Pass

A controversial issue facing the state is the proposed “Northern Pass” project which would bring hydro-electric power from dams in Canada through New Hampshire on high tension wires. Despite considerable controversy and news coverage, awareness of the project remains low. Only 18% of New Hampshire adults say they are very familiar with Northern Pass, 50% are somewhat familiar, 18% are not very familiar, and 14% are not familiar at all.

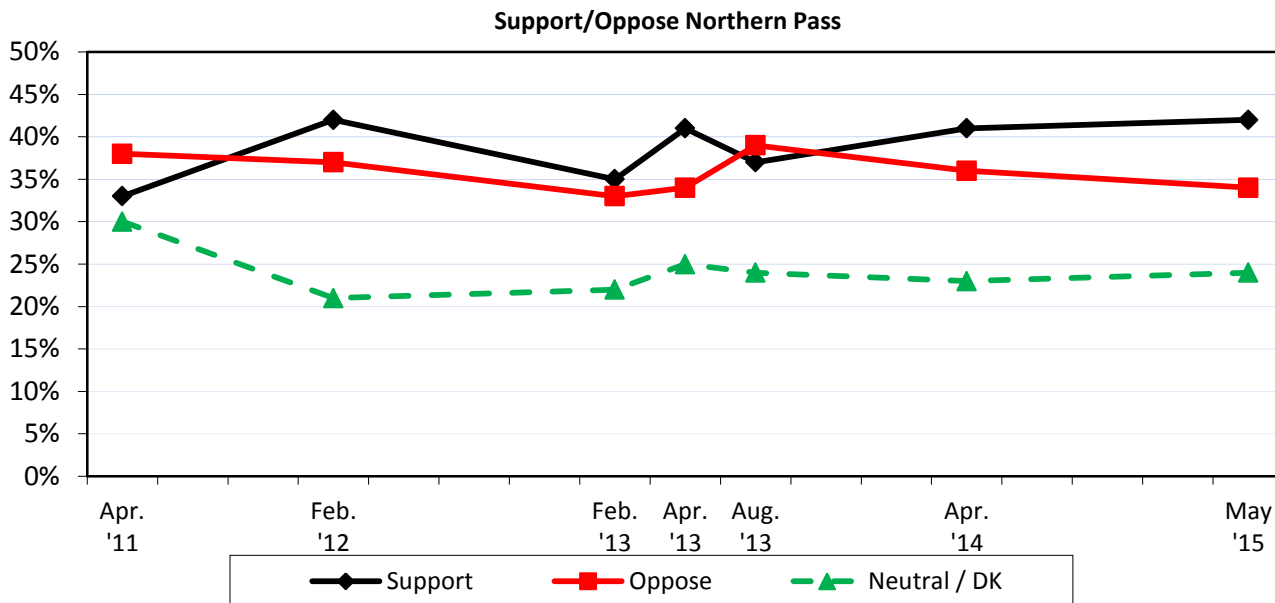

Familiarity with Northern Pass

* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

Support/Oppose Northern Pass

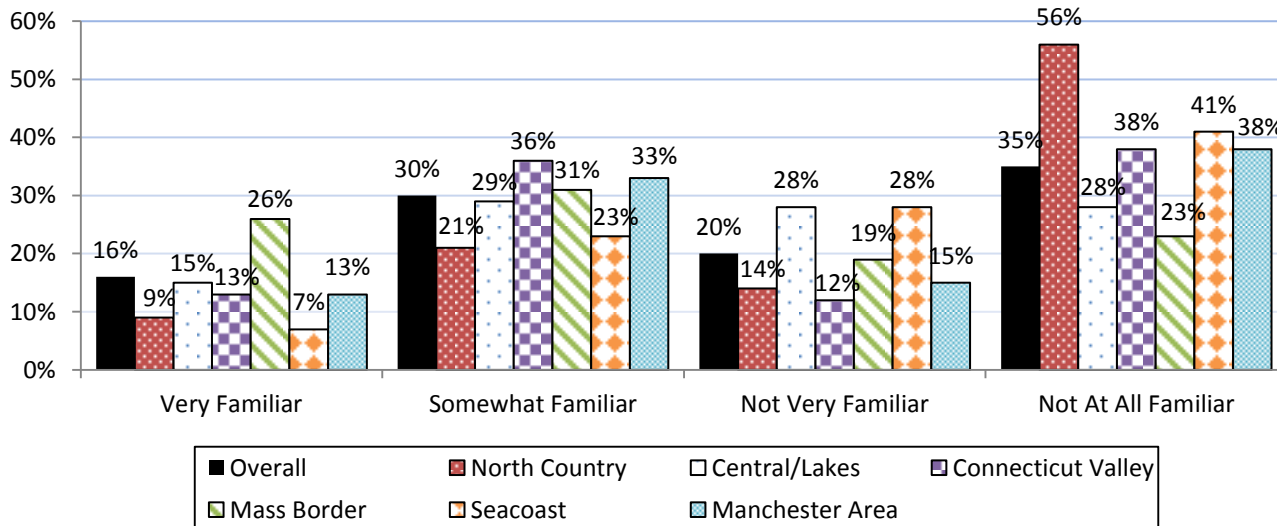

When asked if they support or oppose Northern Pass, attitudes remain mixed. Currently, 42% of New Hampshire adults who have at least some familiarity with Northern Pass support the project (16% strongly and 26% somewhat), 34% oppose the project (21% strongly and 13% somewhat), 19% are neutral, and 5% don't know enough to say. Residents of the North Country (45%) and the Connecticut Valley (45%) regions are more likely to oppose the Northern Pass project, while residents in the Manchester area (50%) are more likely to support it.

Proposed Kinder Morgan Pipeline

Another controversial energy project facing the state is the proposed Kinder Morgan pipeline which would bring natural gas into the state, largely from Pennsylvania. Despite the controversy over routing of the pipeline, New Hampshire residents are not very aware of this project. Only 16% of New Hampshire adults say they are very familiar with the Kinder Morgan pipeline, 30% are somewhat familiar, 20% are not very familiar, and 35% are not familiar at all. Residents along the Massachusetts border, which is the area that would be most affected by the pipeline, are more likely to be very familiar (26%) with the project. Residents of the North Country are the most likely to be not at all familiar (56%) with the project.

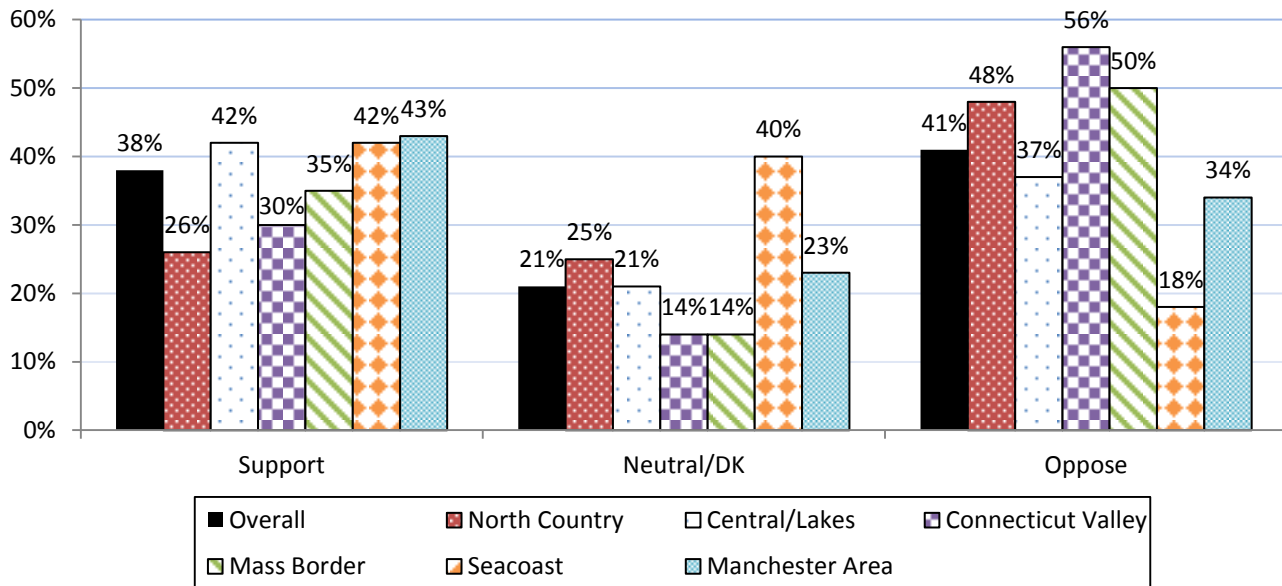

Familiarity with Proposed Kinder Morgan Pipeline

Support/Oppose Kinder Morgan Pipeline

When asked if they support or oppose the Kinder Morgan pipeline, New Hampshire residents are divided. Currently, 38% of New Hampshire adults who have at least some familiarity with the pipeline support the project (15% strongly and 23% somewhat), 41% oppose the project (23% strongly and 18% somewhat), 14% are neutral, and 7% don't know enough to say. Residents in the Connecticut Valley (56%) and along the Massachusetts Border (50%) are more likely to oppose the project.

Support/Oppose Kinder Morgan Pipeline

Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred and sixty-seven (567) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between May 6 and May 22, 2015. The margin of sampling error for the survey is +/- 4.1 percent. Included were five hundred twenty-four (524) likely 2016 general election voters (MSE = +/- 4.3%).

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.
