REPORT

OF THE

BOARD OF EDUCATION.

A year ago the old district system of schools in our town was abolished and a Board of Education appointed. With a unanimity that was assuring in itself, the people declared their lack of confidence in the old method and a desire for a change.

A year of trial has been given to the present mode, and criticisms friendly and otherwise have been freely bestowed. Whatever way be the general verdict in the matter one thing ought to be borne in mind, namely—the lack of sufficient opportunity to give the system a proper test. When early in the year at a special meeting of the town a request was made for adequate and convenient school buildings, no action was legalized and the Committee were left to only one course of action. We were forced to make the most of the old school houses and seek for the best results possible from buildings poorly located for the economical expenditure. Of course under these circumstances only partial success could be expected. It was to some the repetition of the old story “few scholars and many schools.” We were able however to reduce the number of schools somewhat and during the year school houses Nos. 2 and 5 have remained closed and in No. 7 only two terms have been given.

Two difficulties have been increasingly emphasized this past year. One of them is the small number of scholars in the out district schools. We are still of the same opinion as ever in regard to the necessity of numbers in order to create the necessary interest or enthusiasm that any school must have in order to deserve the name.

It is a mistaken notion that many parents seem to have, that education can be measured off by the yard or imparted independent of association or conditions. You cannot order an education as you do a garment or an article of merchandise. “Comparisons are odious” and we would not seek to draw them, but we most heartily wish that any person who has the idea or belief that one teacher of one or two scholars is the best arrangement, could only take a day or week in visiting schools where

the scholars are classified or arranged with reference to a system in which one teacher manages, controls and teaches forty scholars and where there is less confusion and larger results attained in one day than will be ordinarily seen in many days under the small school idea.

The patrons of our schools are making a serious mistake when, on the plea of distance or trouble or indifference the massing of the pupils of our town is not insisted upon.

Could there be three or four schools properly located of a primary or primary and grammar grade combined in which all the pupils of a required age should be gathered, an interest and enthusiasm would be awakened beyond any thing we now suppose to be possible.

Another difficulty is the lack of grade or classification. Your Committee endeavored in the beginning of the year to prepare a schedule of studies that should tend towards a district classification, but the failure of the town to provide any building for the completion of such a system and the lack of material to back it up prevented any thing more than the mere attempt.

As the schools are and always have been, with possibly more glaring faults, there is and can be "little real supervision less inspection and of standard of scholarship and test of work, none but those the teacher has wit enough to supply."

We are well aware that some of the best minds of the country have been educated in schools just like these, and that some of the noblest powers have been aroused under such surroundings, but it is also true that the average of results in all rural and ungraded schools has been lamentably small.

It is not only possible to do away with this haphazard and desultory method, but it is possible to establish a system that in time will commend itself to well nigh universal favor.

Without in any way desiring to assume authority that does not belong to us your Committee, after consultation and examination, have resolved to present the following schedule or programme of studies, embracing a term of seven years and adapted to primary or District schools. This course of study is to be considered as preparatory to an advanced school to be located in the centre of the town or village in which a class of study naturally following the primary course could be pursued.

As this plan is not altogether original with us or untried by

others, it seems as if it must commend itself to every candid examiner.

FIRST SECTION.

Reading: First two books of series. Sight readings. Memorizing.
 Spelling: Oral and written. Words from reading lessons and in common use.
 Writing: on slate and board in connection with reading and spelling.
 Numbers: Reading numbers to 1,000. Simple operations in the fundamental processes, written and oral. Roman notation.
 Miscellaneous: Oral lessons daily. Home geography: Place, direction, the town, ship, and county, the globe. Language: Correct speech, correct forms, capitals, punctuation, &c.

The work of this section will cover an average period of about two years.

SECOND SECTION.

Reading: Third and fourth books of the series. Select readings and recitations.
 Spelling: Oral and written. Words from reading lesson and spelling book.
 Writing: Forms of letters, Copy books. Dictation—words and sentences.
 Arithmetic: First book, completed. Fundamental processes, fractions, decimals, and compound numbers reviewed in advanced text book.
 Geography: First book of series completed. Studies of maps and globes. Map drawing.
 Language: Systematic oral lessons. Kinds of sentences. Parts of sentences. Common errors corrected. Written work.
 Miscellaneous: Oral lessons daily. History—anecdotes of familiar characters and events. Physiology—health. Other subjects.

The work of this section will occupy about three years of the course of an average pupil.

THIRD SECTION.

Reading: Fifth book of the series. Select readings. Recitations.
 Spelling: Advanced spelling book.
 Writing: Advanced copy book.
 Arithmetic: Advanced text book completed. Business forms and methods.
 Geography: Second book completed. Map drawing. Commercial geography.
 United States History: Oral or text book, with special attention to the civil government of the United States.
 Grammar: Text book completed. Letter writing. Composition. Paraphrasing.
 The work of this section will cover an average of about two years in the ordinary ungraded school course.

In order to the fulfilment of some such plan as this, of which the above is only a brief outline, it will be necessary to make the number of schools as few as possible. To the accomplishment of this end your Committee would recommend the establishment of three or at the most four primary schools and a grammar or higher grade school, to which all the pupils who desire advanced studies may come.

We leave this matter to you, believing that as you have seen fit to commit the schools to our care, you will naturally give us the compliment of making their condition our study.

We do not wish to say very much with reference to our attempts at reform this past year.

The school buildings have been made habitable with as little expense as possible, teachers desks have been supplied with books, illustrative apparatus has been purchased to a small extent.

We can speak with great satisfaction with regard to most of the teachers who have been employed. There has been of course varying success according to the standards of judgement.

Our policy has been, even to our own discomfort and the loss of personal popularity, to use our best judgment in the selection of teachers, and upholding them in every just and reasonable law or rule.

On the whole we have met with a large hearted courtesy from the citizens and a disposition to abide by what seemed to be the largest good for the schools.

If we have erred it has not been from personal maliciousness, but a lack of knowledge, and for this, you, as a district must be responsible as far as the future is concerned, since upon your votes will depend the character of the one member who shall serve for the next three years.

In bringing this report to a conclusion we would take occasion to thank the citizens for their words of encouragement and the sympathy which has so fully been expressed in the welfare of our educational interests.

The report of the Treasurer and general statistics are herewith submitted.
