PUBLIC INSTRUCTION,
Town of Newmarket.

ANNUAL REPORT

OF THE

Board of Education,

FOR THE

Financial Year Ending March 1,

1888.

ORGANIZATION.

Chairman and Treasurer, WILLIAM T. FOLSOM.
Secretary, CHARLES A. MORSE.
Superintendent, IRVING T. GEORGE.

School Committee's Report.

The law requires the School Committee to make an annual report of the condition of the schools under their care. The facts necessary to determine such condition will be found in the reports made to us by the District Treasurer and Superintendent, which are annexed, and to which reference is now made.

WILLIAM T. FOLSOM,
CHARLES A. MORSE,
IRVING T. GEORGE.

REPORT OF SUPERINTENDENT.

TO THE SCHOOL COMMITTEE:—

A New Hampshire Statute licenses the Superintendent to inflict upon the public annually his opinions concerning the public schools. This is now done by means of a report addressed to you, appended to which are certain statistical tables required by the same Statute.

The purpose of such a report is that the public be informed of the condition of the schools. What is really obtained is the opinion of an officer appointed by you to report upon such condition. This is well enough if people are content to form their opinions at second hand. The true way, however, to seek such information is by personal visit to the school room. The taxpayer has a right there. He built the house, maintains the school and pays the teacher. The school is therefore his creature and he should visit it. It will obtain new life and more healthy growth if he visit and personally encourage it. If he find things going wrong, he will know what to do at the next annual school meeting.

TEACHERS AND SCHOOLS.

With one exception we have the same teachers who served during the administration of my predecessor. The change has occurred in the First Primary. At the close of the term of service for which she was employed, Miss Nealley left us and attended a

course of Normal training in another state. Her place has been filled by Miss Elizabeth Meservey of New Hampton. This young lady has been with us a short time, but she appears to be industrious, sensible and active, and apt in her methods of instruction.

The other teachers have been with us many years. The words of praise so freely bestowed upon them in school reports of the past are here indorsed. Matters which have needed unfavorable criticism have been brought before the teachers themselves, and the good of the schools does not require that they be commented upon publicly. There are two ways to judge the qualifications of a teacher. The first is to observe the method of teaching. The second is to observe the results of teaching. The former is the fair way. The latter would be a very satisfactory way if all teachers of a certain grade had the same material to work upon—the same quality and quantity—but the fact seems to be that no two schools are alike. They differ in the average age, number and ability of the pupils attending. One school had a better teacher last term, or it has a larger percentage of bad boys this term than the other. To judge by results, therefore, one must make many allowances and be very familiar with the school and the past training of the pupils. Still, your Superintendent has tried to judge the qualifications of the teachers by both methods. He has visited the graded schools of various places, and is prepared to say that in point of discipline and in methods of imparting instruction your teachers compare favorably with those employed in other graded schools.

The results at the end of the school year (as near as can be ascertained at this time) will probably be about as follows: The applicants for diplomas from the Grammar school will pass a good, thorough examination in English Analysis and Physiology, and a good examination in English Grammar and Geography. An examination in Arithmetic was made during the present month. The Superintendent obtained the same problems which were proposed in 1886 to the applicants for diplomas from the Grammar schools of Boston. There were eighteen problems; six in written arithmetic, six in oral and six in sight arithmetic. All the work in written arithmetic was given in full, and done in pen and ink, so that erasures and mistakes could not be concealed. No answers were given, nor any opportunity to consult text books or to communicate. The test was a severe one, al-

though the problems were not very difficult. The result in oral arithmetic was very satisfactory, a much larger per cent. of correct answers being obtained than appears from the report of the Boston examination. In sight arithmetic the result was satisfactory. In written arithmetic the result was not satisfactory. The failures in written work were in point of accuracy in numerical computation and in the knowledge of common fractions. The teacher of that class was advised to give special attention in the review to the subject of fractions, and to conduct all arithmetic work in that class with special reference to accuracy; that no answers should be given until the problems are solved, and no credit given for correct analysis unless a correct result be obtained. This rule may be somewhat harsh, but it might not be unprofitable to apply it, in reason, throughout the last three years of the Grammar school course.

Upon the whole, the *results* show that the teachers have required good faithful work, and have conducted with a degree of firmness and self-poise which commands the respect and cheerful obedience of their pupils..

ABSENTEEISM AND SCHOOL ACCOMMODATIONS.

These two subjects must be treated together, because in the Grammar and High schools, where there is plenty of room, a truant officer is never needed. He is seldom needed in the Intermediate room. In the lowest Primary grade, in which there were last fall one hundred and three pupils in one room (a majority, perhaps, of those that should have attended that grade), a truant officer might have been employed continually. We pay that officer ten dollars. The old truant officer resigned. A new one was appointed. He filled the office acceptably for a few days and then resigned it and the ten dollars. Since then this glittering prize has been held before the eyes of many office-seekers, but no one seems to want money. A truant officer can easily be found who will agree to enforce the attendance at school of those children whose parents will co-operate with him; but if he is expected to enforce the attendance of unwilling children, whose parents are not in harmony with our institutions, and who use all expedient means to oppose him in his duties, he will decline the office at the present salary. An increase of his salary is not advisable, however, until there is an increase in our Primary school

accommodations, and an amendment in the unexplored labyrinth called the school law. With no resort to the law and no truant officer save the Superintendent, enough pupils have been in regular, voluntary attendance at the Second Primary school during this severe winter to fill an additional school room.

With the law amended as suggested hereafter, there would be no difficulty about filling two additional Primary rooms. With such an amendment, and a truant officer earning a fair salary, three additional rooms could be filled. The third room should be ungraded. If the parochial school continues to run, the ungraded school might not be needed.

The most expedient way to obtain satisfactory school accommodations seems to be this: A brick projection should be built on the easterly side of the present Primary building, for the entrances, dressing rooms and stairs. More space is thus left for school rooms. The main building should then be divided centrally by a partition running east and west. This will make four good, high-posted school rooms, capable of accommodating one hundred and sixty pupils. The floor dimensions of each room would be 24 x 31 feet. The building should then be heated by steam, and the cellar made into a dry, ventilated basement, like that on the hill, where the children could go at recess in inclement weather. In its present condition this cellar is always liable to be a death trap, unless carefully and constantly watched.

These improvements sound expensive to an already tax-ridden people, but is there any permanent, satisfactory way out of the difficulty that is less expensive?

It is suggested that a two story wooden building be erected on Durham Side. To this proposition there are several objections. It leaves the Primary building in its present unsanitary condition. The schools can not be so well graded. It will cost as much money. A school over there will be a waif, the receptacle for poor teachers and general neglect.

Graded schools should as far as possible be kept in the same building. They regulate themselves in that way. Good teachers with some reputation at stake will object to the advent of a bad disciplinarian in their building, for disorder is contagious. One badly governed school will make trouble for all the schools in the building. Each teacher has, therefore, an interest in the welfare of all the schools so situated, and the good teachers will in-

sist upon the removal of a very bad one, or the acceptance of their own resignations. The attention of committees to the evil discipline is thus enforced.

There are many other reasons that might be given for keeping the village Primary schools near together; but the demand for increased accommodations somewhere seems imperative. Speaking for himself alone, the Superintendent does not think his oath as a school officer requires him to destroy the good schools we have by further overcrowding them.

SCHOOL LAWS.

Chapter 91, Section 6, of the General Laws authorizes towns to pass by-laws to enforce the attendance at school of minors between the ages of six and sixteen years, who have no regular and lawful employment. No child under sixteen years of age can have any lawful employment in a cotton mill, who can not read fluently in the third reader, and write a legible hand. Under the age of thirteen years he can not be lawfully employed at all. Now of what use is a law which turns school children out of the mills to contract vicious habits on the streets? Obviously, the law which prohibits their employment by the corporation should provide for their attendance at school; but the politicians in their unseemly haste to catch the labor vote never thought of the children for whose benefit the law was supposed to have been passed.

It is true we may now require them to attend one term in three, leaving them during the balance of the year to forget what they have learned, and to become qualified to graduate from the street corner to the reform school. To require their attendance for this brief period, however, the committee must keep track of their unpronounceable names, which they change as often as their clothes, and of their ages, which they and their relatives will always solemnly aver to be over thirteen years.

To remedy this difficulty, recourse should be made to the local option law above referred to. By virtue of the provisions of that statute, the city of Dover passed a by-law, with suitable penalties, requiring the regular and constant attendance of children at school. It can be done here if the people desire it, and will furnish the necessary school accommodations.

HIGH SCHOOL.

An unusually large number of pupils will graduate from this room at the close of the present school year.

Up to this time no cases of disorderly conduct have been reported by the Principal. If the conduct of any member of this school has been unbecoming to a young lady, or gentleman, the fact has not reached the ears of the Superintendent. The same thing might be truthfully said of the pupils in some other grades. This room is singled out, because Rule XI provides that "The Principal of the High School shall have general supervision of the building and yard in which he teaches, and shall be held responsible for all school property and for the general discipline of the schools in his building outside their respective rooms. He shall also assist the several teachers when necessary in the enforcement of rules of discipline and order * * *." It is of the first importance, therefore, that we have a Principal of the High School who will command the respect and obedience of all the pupils. The order and decorum prevailing among the large pupils in his immediate charge, as well as the general discipline in and about the building, is conclusive evidence that this much desired end has been accomplished.

In regard to the thoroughness of the work done here it may be said that graduates from our Classical Course who can obtain a certificate of qualification from our Principal are admitted to the Latin Scientific Department of Dartmouth College, which is a part of the regular Academic Course. This does not mean that every time-killer who manages to squeeze through our course with just high enough average to graduate, can receive such a certificate, but that every bright boy, who will *work*, can qualify himself right here at home, without expense, to enter Dartmouth College.

Some reforms are needed in the High School. It may be that too many branches are taught, giving a smattering of many things and a knowledge of few. So many branches are taught that the time devoted to each class averages only twenty minutes. In the present state of public opinion concerning so-called practical education, is it advisable to make any change in our courses of study? This matter may be discussed and acted upon during the coming year. It is certain that too many of our bright boys and girls enter the English Course because it is easier than the

Classical. A Superintendent of schools from a neighboring city remarked in conversation that the English Course is for the weaklings. It is also for those pupils who think, or whose parents think, that education consists in filling the mind with facts as a cistern is filled with water, by pouring in at the top, forgetting that they will soon leak out through the memory. All that is then left of benefit from the English Course is the intellectual muscle developed in acquiring those facts. This mental strength is better developed by the Classical Course. It is impossible for a pupil to pass through that course with a high average of scholarship and not acquire the habit of study, and power to apply the mind to a subject and hold it there until it is mastered.

The committee, teachers and all interested in the education of our youth should therefore advise our *bright, hard working* boys and girls to enter the Classical instead of the English Course.

UNGRADED SCHOOLS

Have been run during part of this financial year in each of the outlying districts. The Grant, Pine Hill and Four Corners schools have been taught by the same teachers who have heretofore served so acceptably. Miss Sanborn and Mr. Alley are much better teachers than can ordinarily be employed at the salary they receive. The Bay Side school was taught during Dr. Morse's term of office as Superintendent by Miss Addie B. Harvey. A very small number of pupils attended, and it was hardly profitable to run a school there. The Plains school was taught by Miss Mary E. Kelley, a graduate of the Robinson Seminary. It was her first term as a teacher, but no complaint was made to the committee by any one in the district, and from personal visits to her school, it appeared that the pupils were making advancement in their studies.

There are many other things which might now be referred to. Only those that seemed most important have been mentioned in this report.

IRVING T. GEORGE,

Superintendent.

Absent but one-half day in eight years: Jennie M. Young.

RULES AND REGULATIONS
FOR THE
PUBLIC SCHOOLS.

- I. The Public Schools of Newmarket shall be divided into the following grades: Primary, 1st and 2d, Intermediate, and Intermediate No. 2, Grammar, 1st and 2d, and High.

SCHOOL HOURS.

- II All the schools shall, throughout the year, commence the morning session at 9 o'clock, A. M., and during the summer season, the afternoon session shall be from 2 to 5 o'clock, P. M.; and from the middle of October to the close of the year, from 1.30 to 4.30 o'clock, P. M., with suitable recesses for each session. Teachers may keep one continuous daily session with suitable recesses, when the condition of the weather demands it; but otherwise, are not to dismiss their schools, nor change the school hours, except by permission of the School Committee.

ATTENDANCE AND GENERAL DUTIES OF TEACHERS.

- III. Teachers are required to be at their respective school rooms at least ten minutes before the commencement of the sessions both morning and afternoon. A strict observance of the hours of commencing and closing is required. No teacher shall be absent from the school without the consent of the School Committee. No teacher shall ever introduce a substitute into the school without the express sanction of the School Committee. The teachers are required to observe and carry into effect all the regulations of the School Committee in relation to the instruction, discipline and general management of the schools, and to consult him freely on occasions of serious difficulty, to the end that all parties may work in unison and be of mutual support.

OPENING EXERCISES.

- IV. The morning session shall be opened with the reading of the Scriptures.

SCHOOL REGISTERS.

- V. Every school shall be furnished with a record book, in which shall be registered the names, ages, absence and tardiness of each scholar, and the daily average rank in recitation and deportment, and the register shall be open for the inspection of visitors.

ABSENCE, TARDINESS, DISMISSALS.

- VI. The names of pupils who are habitually absent or tardy shall be reported by the teachers to the parents, the School Committee, and also to the truant officers. In every instance of absence or tardiness a written statement or personal explanation shall be required of the parent or guardian on the return of the pupil to school, or at the next session, that the teacher may know whether the cause is legitimate or otherwise. No pupil shall be allowed to leave school before its dismissal, except for satisfactory reasons, without a written or personal request from parent or guardian.

SCHOLARS LIMITED TO SCHOOL GROUNDS.

- VII. No pupil shall leave the school-grounds during school hours, except by permission of the teacher.

CLEANLINESS OF SCHOLARS.

- VIII. Personal cleanliness must be required of every pupil. Teachers are expected to rigidly enforce this rule.

GOOD MORALS.

- IX. Good morals being of the first importance to the pupils, and essential to their highest progress in useful knowledge, instruction therein shall be given in each of the schools, and the principles of truth and virtue faithfully inculcated upon all suitable occasions. The pupils shall be carefully instructed to avoid idleness and profanity, falsehood and deceit, and every wicked and disgraceful practice, and to conduct themselves in an orderly, courteous and respectful manner; and it shall be the duty of the instructors, so far as practicable, to exercise a general inspection over them, in these regards, both in and out of school, and also while going to the same and returning home.

VENTILATION.

- X. Teachers shall give special attention to the ventilation and temperature of their school rooms, both in summer and winter, and see that the air is thoroughly changed at each recess and at the close of each school session.

SUPERVISION OF PRINCIPAL.

- XI. The Principal of the High School shall have general supervision of the buildings and yard in which he teaches, and shall be held responsible for all school property, and for the general discipline of the schools in his building outside their respective rooms. He shall also assist the several teachers, when necessary, in the enforcement of rules of discipline and order; and it shall be the duty of the several teachers to co-operate with him in the discharge of his general duties.

CARE OF SCHOOL PREMISES.

- XII. Teachers shall be held responsible for any want of decorum or neatness about the school premises, and also for all damage done to the school property in their respective rooms during school hours. Any pupil who shall write any indecent language or draw any obscene or indecent pictures or representations on any part of the school premises shall be liable to expulsion.

BOOKS AND UTENSILS REQUIRED.

- XIII. Pupils shall not be allowed to attend any of the public schools unless they are furnished with the books and utensils required in the respective classes.

SUBJECTS TO BE EXPLAINED AND INSTRUCTION TO BE THOROUGH AND PRACTICAL.

- XIV. The teachers are required to illustrate and explain the subjects of study in such language and by such methods of their own as shall find the readiest access to the understanding of the pupils. And the instruction should be thorough, and made practical by showing to the pupils distinctly the various applications to the common affairs of life that may be made of the knowledge they are acquiring at school.

NON-RESIDENTS.

- XV. Non-residents shall not attend school in any district except by consent of the local committee and the payment of such tuition as shall be determined.

DETENTION OF PUPILS.

- XVI. No pupils shall be detained in the school room during a full session of the school; if deprived of recess from any cause, a reasonable absence shall be granted sometime during the session.

GOVERNMENT OF THE SCHOOL.

- XVII. The discipline of the schools shall be of a parental character; such as a kind, judicious and faithful parent would exercise in the family. Corporal punishment shall be restored to only when other means fail.

SUSPENSION OF PUPILS.

- XVIII. Scholars will be suspended from school for persistent disobedience, and when so suspended will not be allowed to return without permission from the School Committee.

ABSENCE FOR HALF A TERM.

- XIX. Any pupil who shall from any cause absent himself from school for half a term shall not be allowed to rejoin his class without satisfactory evidence of proficiency in the studies pursued during the absence being presented to School Committee.

CONTRIBUTIONS, SUBSCRIPTIONS, ADVERTISEMENTS, &C.

- XX. No contributions or subscription shall be introduced into any school; and no person shall be allowed to occupy the time of a school by giving any notice or advertisement to the pupils or teachers, and no person not connected with the schools shall be permitted to address the pupils on any subject not pertaining to their studies, except by permission of the School Committee.

PROMOTION.

- XXI. Promotions will be made at the commencement of the school year, but any pupil who shall excel in scholarship, may be promoted at any time upon passing a satisfactory examination by the School Committee. In determining promotions a yearly average of 70 per cent. of correct answers shall be required for entry to the High School, and for promotion from class to class therein. But no scholar shall be promoted who shall rank less than 50 per cent. in any study. Promotions in the Grammar Schools shall be determined in the

same manner, excepting that the required average shall be 66 per cent. and not less than 50 per cent. in any study. In the High and Grammar Schools daily recitations shall be ranked, and considered in finding the general average, equally with written examinations, and an oral examination shall be taken at the close of each school year, and considered likewise.

DIPLOMAS.

- XXII. Diplomas shall be awarded at the close of the school year to such pupils of the High School as shall have completed the prescribed course to the satisfaction of the School Committee. Certificates of Graduation will be awarded to all pupils who satisfactorily complete the course of study in the Grammar Schools, but no such certificates will be awarded to pupils whose average per cent. is less than 70 for the last year.

COPY OF REGULATIONS TO BE KEPT IN SCHOOL.

- XXIII. A copy of these regulations shall be kept upon the desk in each school room, and teachers are required to read them before the school at the commencement of each term, and allow visitors to freely consult the same.

IRVING T. GEORGE,

Superintendent.

COURSE OF STUDY

IN THE

PUBLIC SCHOOLS.

PRIMARY.—SECOND GRADE.

<i>Oral Instruction.</i>	Common objects; form, size, color; the five senses; good morals, cleanliness of person and dress. Effects of stimulants.

<i>History, 2d Class.</i>	Goodrich's Child's History of U. S.
<i>1st Class.</i>	Barnes' History of U. S.
<i>Arithmetic, 2d Class.</i>	White's Complete.
<i>1st Class.</i>	Walton's Intellectual Arithmetic. White's Complete Arithmetic, with review; frequent exercises in notation and numeration.
<i>Geography, 2d Class.</i>	Swinton's Grammar School Geography.
<i>1st Class.</i>	Swinton's Grammar School Geography.
<i>Spelling.</i>	Harrington's Graded Speller, completed. Harper's Spelling Blank.

<i>Grammar, 2d Class.</i>	Powell's How to Talk.
<i>1st Class.</i>	Harvey's Grammar.
<i>Penmanship.</i>	Harper's New Graded, No's 4 and 6.
<i>Declamation and Composition.</i>	Twice each term.

Written examinations each term by teacher.

GRAMMAR.—FIRST GRADE.

<i>Oral Instruction.</i>	Government—National, State and Municipal affairs.
<i>Reading, 2d Class.</i>	Swinton's Fifth Reader.
<i>1st Class.</i>	Swinton's Fifth Reader completed.
<i>Spelling.</i>	Swett's Normal Word Book.
<i>Physiology and Hygiene, 1st Class.</i>	Smith's Human Body. Steele's.
<i>Arithmetic, 2d Class.</i>	White's Complete Arithmetic. Walton's Intellectual Arithmetic. Practical questions outside of text-book given by teacher.
<i>1st Class.</i>	Walton's Intellectual Arithmetic completed. White's Complete Arithmetic, completed and reviewed.
<i>Geography, 2d Class.</i>	Swinton's Grammar School Geography, finished and reviewed.
<i>1st Class.</i>	General exercises in Historical Geography and general review.
<i>Grammar, 2d Class.</i>	Harvey's Grammar.
<i>1st Class.</i>	Harvey's Grammar completed.
<i>History, 2d Class.</i>	Barnes' United States History.
<i>1st Class.</i>	Barnes' United States History completed.
<i>Penmanship.</i>	Harper's New Graded, No. 8.
<i>Declamation and Composition.</i>	Twice each term.

Written examinations each term by teacher.

HIGH SCHOOL.

 ENGLISH COURSE.

JUNIOR YEAR—FIRST TERM.

Algebra, English Grammar, Physical Geography.

SECOND TERM.

Algebra, English Grammar, General History, Physical Geography.

THIRD TERM.

Algebra, General History, Book-Keeping.

MIDDLE YEAR—FIRST TERM.

Geometry, Physics, Rhetoric.

SECOND TERM.

Geometry, Physics, Rhetoric.

THIRD TERM.

Geometry, Civil Government, Political Economy.

SENIOR YEAR—FIRST TERM.

Astronomy, Arithmetic, English History.

SECOND TERM.

Arithmetic, Astronomy completed, Chemistry. English History completed, English Literature.

THIRD TERM.

Algebra, English Literature completed, Chemistry.
 Exercises in Reading, Spelling, Declamation and Composition continued throughout the course.

Written examinations each term by teacher.

N. B. During the first two terms of Junior Year, Physiology may take the place of English Grammar, at option of the teacher.

HIGH SCHOOL.

CLASSICAL COURSE.

JUNIOR YEAR—FIRST TERM.

Algebra, English Grammar, Latin Grammar and Lessons.

SECOND TERM.

Algebra, English Grammar, General History, Latin Grammar
and Lessons.

THIRD TERM.

Algebra, General History, Cæsar.
