ANNUAL REPORT

OF THE

JOINT STANDING COMMITTEE ON FINANCE

Dover, N. H., January 2, 1948.

TO THE CITY COUNCILS OF THE CITY OF DOVER, N. H.:

The undersigned, Joint Standing Committee on Finance of the City of Dover, have examined the books and accounts of the City Treasurer, Katherine B. O'Neil and compared the footings of the receipts and disbursements with the accounts of the City Clerk, and find the same in agreement.

We have carefully examined and verified all bonds, securities and trust fund accounts belonging to the City, and are satisfied that all funds and other property for which the City Treasurer is officially responsible are accounted for, leaving a cash balance in banks to the credit of the City Proper of \$13,524.63.

> Respectfully submitted, F. Clyde Keefe, Carroll E. Hall, Hubert Staney, Raymond Peabody, James F. Murphy, Thomas McLin, Lloyd Perkins,

Joint Standing Committee on Finance.

cases 1,886.96 Total resources		35,886.96
1947 cost in excess of resources	\$	3,782.64
Total number of Welfare Cases, 308		
Classification of Expenditures:		
Old Age Assistance Board and care of adults Board and care of minors		8,291.55

Food	3,479.29
Fuel	638.39
Rent	915.75
Clothing	373.30
Hospital, medical, ambulance and burials.	1,647.49
Public Utilities	37.24
Office expense	108.48
Salary of Investigator	1,300.00
047 angle annon litures	41 915 10
947 cash expenditures\$	41,315.18

In submitting my annual report to your honorable board, I would like to state that the total cost in excess of our 1947 resources amounting to \$3,782.64 was due to the increase granted by the State of New Hampshire Welfare Dept. to all Old Age Assistance recipients, plus the increased cost of living, the increase in number of board and care of Minors placed in State approved homes and that granted for board and care of Adults.

Respectfully submitted,

JAMES P. NADEAU,

Overseer of Poor.

OF THE

CITY SOLICITOR

To His Honor the Mayor, and the City Councils of the City of Dover:

Gentlemen: I herewith submit my report as City Solicitor for the year 1947.

The action for tax abatement brought by the Franklin Square Corporation against the City of Dover was settled by agreement between the assessors and the Franklin Square Corporation.

The petition by the Boston and Maine Railroad to close the Hanson Road Crossing, after a hearing before the Public Service Commission, was granted, with provisions satisfactory to the City and the citizens concerned.

The action for tax abatement brought by Elizabeth C. Sawyer, Trustee, against the City of Dover was continued and will probably be disposed of in 1948.

The action for tax abatement brought by the Strafford National Bank against the City of Dover was dismissed.

The petition for an injunction brought by Miller-Hermer Corporation, to prevent the sale of the Mill property by the City of Dover, was dismissed by agreement of the City Solicitor and counsel for Miller-Hermer Corporation.

Considerable research was necessary to accomplish the sale of several school houses in Dover.

All criminal matters brought to the attention of the Solicitor were disposed of in Municipal Court. For a detailed report of action taken reference is made to the report of the City Marshal.

Various legal instruments were drawn at the request of the City officials and many opinions were rendered to the City Councils and various City officers.

I wish to extend my appreciation to all the officers and employees of the City for their cooperation and assistance during my term of office.

Respectfully submitted,

T. CASEY MOHER,

City Solicitor.

FINANCIAL REPORT

OF THE

HEALTH DEPARTMENT

December 31, 1947

		\$ 2,424.27

In conclusion I wish to thank the City Government, Ex Mayor F. Clyde Keefe, Ex Mayor Carroll E. Hall, my employees, and all other citizens of Dover who have cooperated to make Dover a healthful city.

> Respectfully submitted, THOMAS P. McDonough, Health Officer.

OF THE

BOARD OF POLICE COMMISSIONERS

To His Honor the Mayor, and Gentlemen of the City Council:

It is a pleasure to submit to your Honorable Board, all transactions of the Dover Police Department for the year ending December 31, 1947.

The Board of Police Commissioners is: Chairman, Robert W. Greenaway; Clerk, Melvin W. Richardson and Maurice J. Murphy.

On September 1, 1947, Maurice J. Murphy was appointed by the Governor and his Council as a member of the Board, replacing Daniel J. Hughes.

During the year one member of the Police Department retired. John Daley, who had served the Department faithfully for over twenty years, retired on February 1, 1947.

Robert C. St. Cyr and Paul H. Proulx, who were taken into the Department in 1946 as Government Trainees, were promoted to regular patrolmen after completion of a year's training.

James F. McCooey was promoted to regular patrolman on September 1, 1947.

Miss Carolyn Foley who was Secretary of the Police Department resigned as of July 31, 1947. Mrs. Claire A. Watson returned as Secretary of the Department.

PERSONNEL OF THE DEPARTMENT FOR THE YEAR ENDING DECEMBER 31, 1947

ANDREW H. MCDANIEL, City Marshal JOHN J. MURPHY, Assistant Marshal Edward F. McDonough, Sergeant Claire A. Watson, Secretary

PATROLMEN

Dewey W. Allen Henry E. Griffin George E. Fleming Alphonso M. Ayer John A. Smith Patrick J. Fagan Gustav A. Korn John A. Davy Lewis W. Perkins Clayton A. Fall Thomas Redden Robert C. St. Cyr Paul H. Proulx James F. McCooey

gated by the Department	7,078
Number of animals disposed of	95
Number of accidents reported and investigated	
by the Department	. 288
Number of people injured in these accidents.	117
Number of autômobile fatalities	1

In submitting my annual report to your Honorable Board, I would like to recommend that a new car be added to the Department and equipped with two-way radio communication.

The parking meters have worked very satisfactorily and have made parking spaces available for people who patronize the stores of the City of Dover. I think the system of allowing two hours for five cents, and a minimum fine of twenty-five cents for parking violations, is one of the finest in New England, as we have received many favorable comments.

There is an urgent need for off-street parking, so that the automobiles will not be parked in front of residential sections all day.

The traffic situation in the City of Dover is very serious. There are some 18,000 automobiles traveling between the Lower and Upper Squares every twenty-four hours. This figure will increase greatly in the next four or five years. In order to meet this situation, I would recommend that a traffic engineer make a survey of the conditions and that thought be given to building a thru-way outside the City of Dover as several of these cars pass through with no intent of stopping. It would allow for speeding up traffic and would not hinder the parking of cars.

Another serious situation which should be given careful study is the Railroad Crossing, both at Central Avenue and Third Street which is one of our greatest hindrances to traffic.

The Juvenile situation has not been too serious during the past year but there is a great need for a supervised recreation center for the youth of our City.

I desire at this time to express my sincere appreciation and thanks to the Honorable Board of Police Commissioners; His Honor, Mayor F. Clyde Keefe and His Honor Mayor Carroll Hall and the members of the City Government; the heads of all the departments of our city; the Honorable Ovila J. Gregoire, Judge of the Municipal Court; City Solicitor T. Casey Moher; Charles W. Webb, Clerk of the Municipal Court; Fire Chief Edward F. Knott and all the members of the Fire Department; Lyman Plummer, Inspector of Motor Vehicles; Donald J. Sweeney, State Probation Officer; Colonel Ralph W. Caswell and the State Police for their help in solving criminal cases; County Solicitor Frank W. Peyser; Sheriff Stephen W. Scruton; Superintendent of County Farm, Mr. and Mrs. Harry O. Berry; all Scout Masters and Boy Scouts for their helpful assistance.

I also wish to express my thanks to the members of the Police Department for their loyalty.

Respectfully submitted,

ANDREW H. MCDANIEL,

City Marshal.

ANNUAL REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Committee:

The opportunity of presenting my seventh annual report is appreciated, for it involves the history of progress for 1947 and a proposed school program for immediate and long-range educational problems for consideration of the people selected by the people of Dover to establish legislative policies, and in its judicial capacity to judge results.

Under laws of the State of New Hampshire, the School Committee has extensive powers, including legislation for salaries for clerks, teachers, janitors, and other employees; transportation of school children; heating, lighting and repair of schools; selection of school sites; construction of schools as part of a joint building committee with the city councils; purchase of land for a school site when appropriations have been made by city council; school health and safety services; providing of textbooks and teaching aids; school furniture and equipment; responsibility for interscholastic and intramural athletics; responsibility for the school budget and any financial accounts of athletics. federal lunch, and school clubs; school lunch program; use of school property; and any other legislation concerning the operation of schools. All powers are held by the school committee as a whole, and the committee or any member may initiate policies for consideration.

The superintendent of schools is the executive officer of the school committee. His duties are to initiate policies for school committee consideration, and to place in execution all policies voted by the school committee. He carries out all policies and rules of the State Board of Education and of the Laws of New Hampshire. He is the liason officer between the school committee and the schools. It is his duty to keep the school committee informed concerning educational needs, school progress, school conditions, educational trends, and progress towards local and state educational goals. He stands as the liason officer between the school committee and the people, interprets, as a public relations executive, school committee policies, and must bear the brunt of carrying out school committee policies. · The schools of a community are not in politics and are created for the welfare of all pupils sent by parents or guardians to the public schools for education in the fundamentals of learning, vocational training, preparation for college,-but primarily for the development of civic responsibility in the American way of life; for preparation for citizenship in a democracy; for respect for law and order; for religious and racial toleration. The schools must be dedicated and consecrated against fascism, totalitarianism and communism either at home or abroad.

The year 1947 in Dover School history was marked by the following:

- (1) A complete hearing testing of all pupils in the public and private schools with second and third tests for those with hearing difficulties.
- (2) The establishment of lip-reading instruction for twenty-five pupils in the public and private schools.
- (3) A salary bonus of approximately \$13,000 to teachers.
- (4) A new salary schedule that gave women teachers a maximum of twenty-two hundred dollars, men teachers a maximum of twenty-eight hundred, and trades and industry teachers a maximum of three thousand. In addition, men coaching interscholastic athletics were voted a maximum of five hundred dollars, and

four part-time guidance teachers were paid four hundred dollars each.

- (5) Dover High School received extensive cleaning and repairs, a complete floor scrubbing and window washing, plumbing and boiler repairs, renovation of headmaster's office, three coats of gymnasium floor finish, cleaning of storerooms, removal of old platform in biology room, a new floor in the biology room, new power lines for grade shop, new wiring in cafeteria, replacing of seventy window panes, renovation of one hundred desks.
- (6) The purchase of one thousand chairs for the gymnasium.
- (7) The completion of renovations of the boys' shower room with new group showers, toilets, washbasins, bubbler and athlete foot sprays.
- (8) The addition of an elementary supervisor to coordinate the grade program.
- (9) The state aid of \$32,000 from legislative act of 1947.
- (10) The establishment of a head janitor for all Dover schools.
- (11) The admission of Madbury elementary pupils to the Dover schools.
- (12) The formation of a local Parent-Teacher Association.
- (13) The development of a transportation problem by the city growth.

SCHOOL BUILDING PLANS

The School Committee voted to erect two grade schools. The South School would close the Varney School, erected in 1861 and now 87 years old; the Belknap School, erected in 1857 and now 90 years old; the Hale School, erected in 1872 and now 76 years old; and the Hanson School, converted from an Armory in 1934.

The North School would close the Sawyer School, erected in 1870 and now 78 years old; the Pierce School, erected in 1853 and now 90 years old; and move the Sherman School out of the Davis Vocational School.

The School Committee also planned a memorial gymnasium auditorium.

The Federal Works approved the plan of two grade schools, and alloted the sum of \$24,800 for planning. Half of this amount was advanced with the remainder payable on completion of plans. The School Committee approved the plans and they are now in the office of the Federal Works Agency.

The School Committee selected Woodman Park for a site on the South of the city and the City Councils allotted the land to the School Department. The School Committee recommended the Horne Street site for the North School, but the City Councils did not make the appropriation to purchase the land.

There is no Federal aid except for planning for school building at the present time,

The superintendent makes the following recommendations to the School Committee as a program necessary to improve the school system. It is long-range and a shortrange, since some projects should be planned over an extended period and some completed in 1948. The decisions as to order of precedence will depend on the system. It is feasible that the Committee will decide to eliminate some projects or add other projects.

It naturally follows that consideration of any projects will depend on the budget available in this and future years. Until funds are available, the superintendent, the principals and teachers, and the children will continue, as in the past, to secure the best educational results with the means made available through taxation, state and federal funds, and tuition receipts.

1. SCHOOL BUILDINGS

A long range program should replace all present school buildings, with the possible exception of the Davis Vocational School. The first building should be a grade school for the north of the city, the second a grade school for the south, the third a high school. On construction of a high school, the vocational department should be an annex of the new building or an addition should be made to Davis Vocational.

2. School Budget

A school budget should be provided that allows the purchase of many modern teaching aids and devices. The present budget is expended chiefly in salaries, school repairs, school maintenance, and transportation.

3. TRANSPORTATION

The problems of transportation would be reduced to a minimum if the City of Dover maintained two grade schools instead of seven, for the one mile transportation measurement for the south side pupils would be the same regardless of grade, and the north side measurement for the pupils residing on the north would be similar for all grades. A distance measurement from an assigned school is the only recognized method. It is difficult for parents of small children to approve transportation rules when small children close to a mile are not transported and children of higher grades are transported.

For example, the children of Eliot Park of the first four grades are not transported to the Hale School because the distance is not one mile, while the fifth and sixth grade children are transported to the Belknap School and the seventh and eighth grade pupils transported to the Hanson School because those schools are over one mile from the Park. An eight-grade school at Woodman Park would give all children of the south side transportation, if they resided over one mile from the school.

The absence of sidewalks on heavy-traffic highways and the inability of buses to cover certain roads in the Back River area during muddy periods lead to many complaints.

The following recomendations are made to the School Committee:

- (1) That the ninth bus, now an emergency spare, be placed in operation immediately. This will alleviate the crowded condition of two buses, but will not extend the transportation to those living within one mile from their assigned grade school.
- (2) That sidewalks be constructed, maintained, and snow-ploughed on all heavy-traffic highways where there are no sidewalks and pupils are compelled to walk.
- (3) Pending sidewalk construction, that children on hazardous highways without sidewalks registered in grades 1-4 inclusive be allowed to ride as long as local and state traffic officials allow the bus loads. If this is not feasible, it is recommended that two double trips be considered.
- (4) Effective September 1, 1948, it is recommended that the transportation distance for grades 7-8 inclusive be one and one half miles, for grades 1-4 inclusive one mile, and high school pupils two miles, with the space conserved used for lower grade pupils on heavy-traffic areas without sidewalks and for pupils with special physical disabilities.

For a long-range program for transportation and in view of housing developments, the following recommendations are made when funds are available:

- (1) That the School Committee sell three of the present nine 48-passenger buses.
- (2) That the city purchase four 60-passenger buses.
- (3) That the city operate four 60-passenger and five 48-passenger buses with a total seating capacity of 480, with one 48-passenger bus reserved for a spare.

It is believed that these recommendations would provide proper bus transportation until school buildings are constructed. The location of new schools would determine whether the seating capacity was sufficient. It would be feasible to change all buses to 60-passenger when bus depreciation required new purchases, and the development of better highways made the use of larger buses possible.

4. TEACHER SALARIES

The Dover salary schedule of 1947 was a distinct improvement, but new developments have placed Dover at the lowest of all New Hampshire cities. It is impossible to secure an experienced teacher under the present schedule. There is still an acute teacher shortage for elementary teachers, for vocational teachers, and for music and art. In order to compete with other cities in securing qualified teachers, to compensate for the increased living costs, and to retain the best teachers, the following is recommended:

- (1) The retention of all increases due under the present schedule.
- (2) A temporary salary adjustment effective January1, 1948 to December 31, 1948. This period of time

is necessary under the new City of Dover charter budget requirements.

- (3) A new salary schedule effective January 1, 1949 that will place Dover on an equal basis with other New Hampshire cities. This schedule should be made on a cooperative study basis of the School Committee and the teaching staff. It should be placed in full effect in 1953 with gradual increases over a five-year period.
- (4) When an adequate salary schedule has been initiated the city has a right to expect the highest standards of teacher qualifications, exceptional teaching results, and a continuous program of inservice training of teachers.

5. FEDERAL LUNCH PROGRAM

The city operates two cafeterias, one at Dover High School and one at Davis Vocational. The Dover High cafeteria is patronized by St. Mary Academy, Belknap, Hale and Varney Schools. A school bus transports the small children of Hale and Varney Schools daily to Dover High School, with some loss of teaching time. Sawyer School has hot water facilities. The grade schools lack hot water facilities, dishes, eating utensils, serving tables, storage facilities, and sinks. The city owns some thermalcontainers for hot foods. It is questionable how much should be expended for establishing hot lunches in grade schools, if schools are to be constructed within reasonable time.

The increase of food costs has made it impossible to maintain the present school lunch program. Most cities and towns are making a tax appropriation to retain the lunch program. The feeding of indigent children has practically stopped for lack of funds. The following is recommended:

- (1) Since the Sawyer School has approximately 300 pupils, the city should purchase dishes and utensils engage one person for four hours per school day for work, and provide transportation daily for hot food to and from Sawyer School from Dover High School.
- (2) The city should make an appropriation to pay the salaries of three cafeteria workers at Dover High School and Davis Vocational.
- (3) The wall in the rear of the Dover High cafeteria should be removed and tables and chairs provided for the additional room, increasing the cafeteria capacity by approximately fifty pupils.

6. School Safety Program

In view of the age of the Dover schools, the increase of highway traffic, the congested streets at noon from pupils and factory workers walking or riding to their homes, the heavy accumulation of buses for the pupils of Dover, Durham, Rollinsford, Madbury, and Barrington at Dover High at the opening and closing of schools, the cars of area vocational pupils, the crossing of pupils at the dangerous Durham-Portsmouth road intersection, the traffic congestion on Fifth, Silver, Main and St. Thomas Streets,—considerable parent apprehension has developed.

The following recommendations are made:

 A request be made by the School Committee to the State Education Department, the State Health Department, the State Fire Commissioner, the State Board of Fire Underwriters, the local Fire Chief, the local City Engineer, for a joint survey by February 15, 1948 as to the existence of any fire or other hazards in the City of Dover Schools and what steps in connection with fire alarms, fire escapes, and other safety preventive measures should be taken by the City of Dover. This report would enable the School Committee to proceed on professional advice to make proper financial provisions in the 1948 budget.

- (2) A request be made to the City Councils for a traffic officer at the Durham-Portsmouth road intersection from 8.00 to 8.30 A.M. from 12 noon to to 1.15 P.M. and from 3.00 to 3.30 P.M. These are the time periods when pupils are crossing this intersection.
- (3) A request be made to the City Councils for a traffic officer at the corner of Washington and Locust Streets and in front of Dover High School for the same periods of time.
- (4) That a pupil traffic patrol with proper insignia and officer-raincoat equipment be provided under Police Department authority and training for the Belknap, Sawyer, Sherman and Hanson Schools for morning, noon and afternoon times for arrival and dismissal.
- (5) A request be made to the local and state highway departments for Bus Stop signs to be erected at every bus stop of Dover buses.
- (6) A request be made to the City Councils for portable School Crossing standards to be placed on Silver, Fifth, Main and St. Thomas Streets during pupil-crossing periods.
- (7) That a pupil Bus Monitor system be established, with proper insignia, for assisting small pupils in crossing highways.

- (8) That, since it is undesirable for small pupils to undertake traffic duty, the teachers of Grades 1-2 inclusive take complete charge of pupils crossing the streets at noon and afternoon dismissals. This is very necessary in view of early dismissal of these pupils at the Hale, Varney, Pierce and Sawyer Schools.
- (9) That the School Committee, through the State School Boards Association and the State Board of Education, seek 1949 State Legislature action for stringent legislation compelling motorists to stop when school buses are loading and unloading children and not proceed until children have crossed the highway and the buses are under motion. The legislation should include the deputizing of all bus drivers as special police for reporting offenders to local and state police authorities.

7. School Building Insurance

The insurance of city buildings and equipment is maintained by the City Councils. The Davis Vocational School and equipment is now insured for \$10,000. In view of the valuable equipment secured through war surplus donations and purchase through state funds from area vocational areas, it is recommended that this amount be increased to \$200,000 immediately.

6. Area Vocational Advisory Committee

It is recommended that the School Committee take steps to appoint Area Vocational Advisory Committees of laymen to serve in an advisory capacity in connection with commerce, trades and industry, agriculture, distributive education and home economics. It is recommended that labor and management have equal representation in trades and industry and distributive education.

9. Area Vocational Curricular Extension

If the State Board of Education, in view of large enrollment of pupils at the Dover Area School, allots extra funds for courses and instruction, it is recommended that the following be added:

- (1) Business Machines
- (2) Barbering
- (3) Air Plane Mechanics
- (4) Printing
- (5) Jewelry Repair

10. Automobile Driving Instruction

It is recommended that a two drive autombile be secured through the Automobile Association of America and that an instructor be engaged to teach automobile driving to high school pupils.

11. DOVER HIGH SCHOOL HEATING PLANT

The city is wasting funds annually in repairing the three boilers at Dover High School. Great difficulties are experienced in retaining a clean building with janitor time devoted to firing and ash removal. It is almost impossible to maintain even heat and proper hygienic conditions in rest rooms, shower rooms, corridors and classrooms in a building used seven days per week for instruction and city recreation.

It is recommended that the School Committee investigate with engineering opinion whether or not the present boilers should be discarded completely or are economically convertible. In either event, it is recommended that the heating plant be converted to oil heating during the summer of 1948. It is believed that this change will result in a bettermaintenanced school building.

12. DOVER HIGH MAIN BUILDING ROOF

The High School, constructed in 1904-1905, is costing the city money for roof repairs, destruction of ceilings from leakage, and damage to equipment. It is believed that the gutters and roof edgings should be replaced. It is recommended that engineering advice should be secured and provisions made for renovations in 1948.

13. DOVER HIGH CORRIDORS IN MAIN BUILDING

The main corridor of the first floor of Dover High School is worn in sections and drab in appearance from fortythree years of heavy traffic. It is recommended that a new asphalt tile floor be installed on the three main corridors of Dover High School from the viewpoint of school safety, building appearance, and facility of maintenance.

14. Dover High School Girls' and Boys' Rest Rooms

The City of Dover is annually wasting money on plumbing repairs on delapidated toilet facilities of 1905 vintage. It is difficult to secure plumbing parts since these toilets are no longer manufactured. The washbasins are few and ancient.

It is recommended that these two rooms in the basement of Dover High School be completely renovated with new toilets, washbasins, mirrors, and floors. The same situation holds true in grade schools but no recommendation is made in view of new building proposals.

15. Dover High School Clock System

The Dover High central clock system ceased to operate during the war. It is recommended that the clock system be rewired and renovated.

16. GUPPY FARM

The City Councils in 1946 voted to transfer all of Guppy Farm with the exception of the part used for recreational purposes to the School Committee for vocational training and other school purposes. This action would seem to include all except the softball diamond.

The School Committee has a unique opportunity to use the farm and the farm buildings for home economics and agriculture. There is the chance for the development of a model small New Hampshire farm with experiments in part-time farming of a factory worker, forestry, a fish culture station, agriculture shop, and practical home housekeeping and interior decoration. This will require extended study and a long-term financial investment.

The immediate recommendation is that funds be provided for a school agricultural shop for day pupils and veterans, and that the project be used as a part of the vocational training construction program. It is possible that some building materials may be secured from war surplus.

17. DOVER HIGH STUDY HALL

The Dover High instruction is hampered by lack of a study hall and the necessity of placing study pupils in the rear of pupil classes. This situation has existed through the years but has become acute with the increased high school enrollment and extension of the curriculum.

It is recommended that one hundred modern desks and chairs be purchased for a study hall.

18. DOVER HIGH STAGE CURTAIN

The Dover High stage curtain has completely worn out after twenty years of service. It is recommended that a fire proof modern curtain be purchased.

19. Dover High Teachers' Room

A teachers' rest and committee room is needed. It is recommended that the School Committee consider the transfer of the central supply room to another section of the high school, and that the present supply room be converted to a teachers' room.

20. DOVER HIGH SCHOOL LOCKERS

Dover High pupils now use the old open-rack system for clothes, books and supplies. It is recognized that the steel shortage and costs make delivery of lockers from a year to a year and one-half after ordering. It is recommended that nine hundred full-length lockers be provided for Dover High pupils, two hundred full-length lockers for athletic teams, and 1500 six-section lockers be provided for high school and grammar school physical education.

21. Americanization Classes

State law requires the establishment of Americanization classes for teaching foreign-born reading and writing so that they may qualify for citizenship, understand the common language in usage, and intelligently enjoy American culture. The Naturalization Division of the Federal Bureau of Intelligence has notified the School Department that there is a steady flow of new immigrants unable to read and write English to Dover. Many local residents have requested this instruction.

eran trade evening classes.

It is recommended that the 1948 budget provide funds for four part-time teachers for evening classes in the Davis Vocational School, since this building is heated for vet-

22. HEALTH AND PHYSICAL EDUCATION EXAMINATIONS

It is recommended that the School Committee make provisions for the employment of four part-time physicians for a complete physical examination in May, 1948 of all pupils who will enter Grade 1 in September, 1948 and of all pupils in grades 4, 7, and 10. This procedure should be followed annually so that complete health records would be secured. Examinations in May will make possible the removal of many defects before September.

It is recommended that the School Committee request the City Council to make a definite part of the duties of the City Physician the physical examinations of all pupils taking physical education, so that pupils with heart or other ailments may be excused or given appropriate work for their physical condition. It is also recommended that the City Physician or a physician substitute attend all home interscholastic athletic contests where the opportunity of severe injury exists.

23. Dental Hygienist

It is recommended that the School Committee request the City Councils to employ a trained dental hygienist, using the present city hall Red Cross dental facilities, and give complete dental examinations to all school children for a two months period per year. Parents would then be able to take their children to dentists for treatment, or local service clubs and organizations might furnish treatment to needy children. The shortage of dentists makes it impossible to expect local dentists to volunteer for parttime work in dental hygiene.

24. Showerroom Facilities at Bellamy and Woodman Fields

Woodman Park is used all spring for track and baseball and all fall for football for school teams. Bellamy Field is used during the fall for football. The lack of shower facilities and rest room conveniences greatly hamper the practice and game periods. It has been alleged that some schools refuse to play Dover teams at Bellamy Field for lack of showerroom facilities.

It is recommended that showerroom, restroom and locker facilities be provided at both parks.

26. Remedial Reading Teacher for Grades

There are many pupils who are suffering from various reading-learning difficulties, resulting in scholastic failure or a reading handicap that prevents proper learning. It requires a skilled specially-trained teacher with individual instruction to overcome these handicaps. Regular grade teachers lack the time and the training necessary for much of this work, since some cases involve eye difficulties.

It is recommended that a reading specialist for remedial work be provided.

27. Full-Time Dover High Art Teacher

The city now has one teacher of art for all grade schools and the high school. It is impossible to give adequate time for proper training in the grades, and many pupils desiring art in the high school are refused instruction for lack of teacher-time. It is recommended that a second teacher be employed for full-time work in the high school.

28. Reduction of Submaster Duties

The submaster now teaches three classes, is supervisor of guidance, coaches hockey and baseball, keeps the high school register, and supervises some extra-curricular work. It is obvious that all these duties must suffer and that the head-master must perform many office routine duties that a submaster should do. It is recommended that the submaster, commencing in September, 1948 be freed from some duties so that he may devote more time to regular submaster work. This will then automatically free the headmaster from submaster duties he is now performing. and make him available for the administrative, supervisory and organizational duties.

29. Additional Teacher for Dover High School

Many Dover High teachers are teaching six classes daily that require special preparation, paper work, and organization for each class, in addition to some extra-curricular work. It is recommended that one additional teacher be employed for September, 1948 to reduce the teaching loads of five teachers.

30. GRADE SCHOOL DESKS

Grade school desks are very delapidated after 75 to 100 years of use. It is recommended that one hundred desks a year be purchased to replace present worn-out desks for a seven year period. These desks of modern movable adjustable type would improve pupil posture and could readily be used in future new school buildings.

31. Typewriter Replacement in Dover High School

It is recommended that the School Committee make budget provisions for the replacement of ten typewriters per year with new modern typewriters. Companies have now restored special rates for school typewriters. It is noted that Dover, at the request of the Federal Government, turned in twenty-five typewriters in 1943 for the army and navy. Dover did secure thirty-five typewriters at 95 per cent discount from the Office of Price Administration equipment.

32. Science Laboratory Renovation

There is an earmarked appropriation of \$9000 for renovation of a chemistry laboratory in a special account in the City Treasurer Office. The fund was not used because of inability to secure equipment. It is a matter of record that two ceilings had to be replaced in Dover High School from leakage from old plumbing facilities of the chemistry laboratory.

It is recommended that the School Committee study the possibility of combining the chemistry, biology and physics laboratories at some future date.

33. MOTION PICTURE MACHINES

It is recommended that motion picture machines be purchased for instructional purposes for the Hanson, Hale, Varney, Belknap, Sawyer and Pierce Schools. Sherman School and Dover High School have one machine each. Davis Vocational has two machines secured from war surplus donations. The University of New Hampshire is developing a very extensive motion picture film library with low school rental rates.

34. School Building Fund from State Aid

The \$32,000 state aid from New Hampshire for 1947 was used for tax reduction. It is recommended that all future state aid annual payments be placed by the School Committee in a building fund earmarker for that purpose. This money could be used for the bonds and interest of the school building program.

35. Schoolhouse Sites

It is recommended that the School Committee study the schoolhouse site question for two grade schools and a high school, and that sufficient land be secured and held for that purpose. It would be more economical for the city to secure land now for school buildings to be constructed later, rather than wait for all desirable land is used for real estate developments, with the future necessity of taking land by eminent domain.

36. MUNICIPAL GYMNASIUM-AUDITORIUM AND ATHLETIC STADIUM

On a long-range planning program, it is recommended that a city municipal gymnasium-auditorium and an athletic stadium be constructed, that would be used for city and school athletic and cultural programs. It is believed that these projects should be considered after a new school building program has been completed.

May I reemphasize, rather than to be misunderstood, that these recommendations are made for future consideration of the School Committee, the City Council and the people of Dover. It is readily understood that the costs involved would migrate against immediate consideration of many of these projects. It is contended, however, that all of these projects are worthy of study for future establishment. It is believed that the School Committee will recommend many other necessary and desirable projects in this and future years.

GENERAL APPRECIATION

Appreciation is expressed to all city officials, principals, teachers, school secretaries, janitors, other school employees and to all service and civic organizations, and to all individuals, who in 1947 aided the superintendent, the school department, the pupils, the athletic teams, school organizations, and the federal lunch program.

GENERAL SUMMARY

This report is intended to give information on the school problems of Dover with recommendations for action when city finances are available. I shall continue to serve the School Committee, the City of Dover, and the school children for the best interests of all, and shall try continually to improve the schools, maintain the schools, and develop the school program, to the maximum possible within the limitations of the school budget.

Respectfully submitted,

GORDON L. FOX,

Superintendent of Schools.

	Bennett, M.I	D.,

Pathologist.

Without wishing to be repetitious it should be said that the year just passed has been the busiest year in the history of the hospital. Three thousand, five hundred and six patients were admitted and accumulated a total of 24,523 hospital days including newborn. This gave us a daily average census of 67.2 patients. Our normal capacity is 84 so we had an average of 80% occupancy all of the year. It is to be understood that for the most part our occupancy was 100% and over. A few days of low census brings the percentage of occupancy down considerably.

NURSING SERVICE

Assuring our patients of adequate and a high type of nursing care has been most difficult with the continued personnel shortage in the nursing department. Toward the latter part of the year it was felt that the condition was somewhat alleviated in the fact that more professionally trained nurses were applying for work. Keeping the hospital "well covered" for twenty-four hours has presented many problems because it is necessary to have three shifts with the nurses working eight hours daily. There has been a happier working situation, however, which in the end assures the hospital of more willing cooperation and better service to our patients. The nursing personnel have worked very diligently toward maintaining the principles of good nursing in spite of shortages and harassing difficulties.

THE TRAINING SCHOOL

At the present time in the School of Nursing we have seventeen students.

Theoretical preparation this year has been simplified to a great extent with the event of a well qualified science instructress. The State Board of Education is now laying the groundwork for higher educational standards in all nursing schools. During the war years it was necessary to deviate from the usual standards in order to staff nursing schools and hospitals.

It is important, we feel, that we continue our nursing school and make every effort to keep up our standards if at all possible. The United States Public Health Service conducted an educational survey recently in the state of New Hampshire. The general feeling of State educators after the completion of the survey was to eliminate or discontinue all of the smaller schools unless the high standards could be met. Several centrally located large schools in New Hampshire should be maintained as the training centers they felt, associated with a university or college. In a small school the State contends that the student does not have the variety or volume of cases necessary to meet the requirements of the curricula.

Graduates of the training school give us a source from which to draw our nursing supply. It is not difficult to understand that our own graduates have a greater interest and enthusiasm for the hospital than graduates from other schools. Procedures are also performed in a more consistent manner. Thus it would seem that to retain our school of nursing would be to the advantage of the hospital and the people whom it serves. We have been an accreditted school ever since the school began. It is hoped that we will continue in that capacity. It is interesting to note that our school led the State in ranks this Sepember. We had no failures in the State Board examinations. Since the school began, a good record has been maintained in the fact that our State Board failures are very few.

X-Ray

The addition of the new X-Ray equipment and the renovated quarters have increased service, efficiency and satisfaction to a great degree. Constant aid is rendered our medical staff in establishing diagnosis and no time is lost waiting for reports and service. Having a full-time certified roentgenologist practising here is an asset in many ways and makes for a more scientific and modern manner of practising medicine and rendering hospital service.

DIETARY DEPARTMENT

During 1947 there were 105,594 meals served in our institution. Every effort is made to buy and serve food of the highest quality. The volume of food served is not so great that methods of cookerv cannot be used that one would use in one's home. We take pride in the fact that our patients often remark that our food seems "home-made". The addition of a coffee urn, rotary toaster, vegetable steamer and range have improved efficiency to a great extent in our kitchen. Without any elaborate accounting methods I feel sure it is safe to sav that almost every item of food has increased three times in price, making food the second highest expenditure in the hospital. This fact raises our cost per day per patient considerably and influences our patient charges. It is a condition over which we can exert very little control. When costs continue to spiral it is necessary for us to charge patients rates that are commensurate with costs.

The Medical Staff

The American College of Surgeons in their last inspection stressed many changes in our Medical Staff organization and record department. They also recommended a 15% postmortem examination on all hospital deaths. In the past year our medical men have held two monthly meetings in an effort to properly organize their group, discuss medical cases and records and review the surgical and obstetrical work performed in the hospital. The standards of the American College of Surgeons have also been met regarding the autopsy rates. Several new physicians have been accepted by the Medical Staff this year. The various services are properly grouped and a high type of medical work in the hospital is assured. The doctors, themselves, assume the responsibility for the records and consequently they are kept up in a much better manner than they have been in the past. Each and every man on the Staff has given generously of their time and skill in caring for our ill personnel for which we are truly grateful.

INCREASED COSTS

There are many factors that contribute to the enormous increase in hospital expenditures. A large portion can be attributed to the basic supplies.

New scientific discoveries have added more expenses. During a comparatively short time we have been obliged to meet the climbing costs incurred because of the discovery of sulfonamides, penicillin and streptomycin. Each in turn has been followed by an increase in the cost of pharmaceuticals necessary for improved patient care.

Salaries are another substantial item. Salaries for nursing service have increased in some instances 100%.

The fact remains that if each and every admission paid full charges, and we had no unpaid accounts, we would still operate at a deficit because our charges, although seemingly costly are not as yet what our actual costs represent. We are not unique in this instance. Nearly 100% of all non profit institutions are realizing the same difficulty. Therefore, it is necessary to solicit help from the community in order to continue to operate our hospital.

Repairs and Improvements

At the latter part of this year a switchboard was installed. It is the answer to a long felt need and saves time and steps in many ways. There is much to be done in the way of painting and repairing although some painting was absolutely necessary and was done this year. We look forward to the event of a new addition which is greatly needed. Much of our equipment is obsolete and outmoded and needs replacing. These replacements will be realized, we hope, in the new building.

At this time I wish to express my gratitude to our medical staff, personnel and Board of Trustees for their sincere interest and cooperation at all times.

Respectfully submitted,

MARY H. CALLAHAN, R. N.

Superintendent.

DOVER WATER WORKS

REPORT OF WATER COMMISSIONERS

To the City Councils of the City of Dover:

Gentlemen:—Agreeable to a provision contained in Section 6, Chapter 29, of the City Charter, we, the Water Commissioners of the City of Dover, have the honor to submit herewith the sixtieth annual report of the year ending December 31, 1947. For the complete details of the Water Department you are respectively referred to the report of the Superintendent, which is attached hereto and which will appear in the City Report.

The organization of the board for the year as was follows: President, Hon. F. Clyde Keefe; Vice-President, John D. Grady; Secretary, James F. Murphy; Leo E. Carroll and Edgar W. Bois.

The total cash receipts for the year amounted to \$99,-876.91. Uncollected accounts of the department on December 31, 1947, amounted to \$8,691.57. After paying all the bills of the department for 1947, the department had a cash balance of \$2,279.14 on December 31, 1947.

Respectfully submitted,

F. CLYDE KEEFE, JOHN D. GRADY, JAMES F. MURPHY, LEO E. CARROLL, EDGAR W. BOIS,

Board of Water Commissioners.

Dover, New Hampshire, December 31, 1947

DOVER WATER WORKS

REPORT OF THE SUPERINTENDENT

TO THE BOARD OF WATER COMMISSIONERS, DOVER, N. H.:

Gentlemen: I have the pleasure of presenting the sixtieth annual report of the Superintendent, showing the present condition of the department for the year ending December 31, 1947.

Samples of water have been sent to the Chemistry Department of the State Board of Health in Concord for testing purposes twice each month. The reports from this department clearly proves that Dover's water continues to be of an excellent quality.

The following table and figures show the activities of the department during 1947 in detail:

Services renewed	67
Services added	-84
Services discontinued	1
Services repaired inside street line	27
Services repaired outside street line	19
Services shut off for owners to make repairs	3
Services frozen	2
Number of services in use at present	3,022
Services shut off and turned on	78
Meters repaired	34
Meters repaired by department	24
Meters repaired by the factory	10
Meters frozen	12
New meters set	44
Meters replaced with new	63
Meters in use at present	3,090

Meters tested	8
Hydrants added to system	2
Hydrants in use at present	332
Gates set in hydrant branches	2
Hydrants repaired	4
Distribution system leaks	10
New gates set	6
Total gates in use to date	399
Gates repaired	7
Extension of service mains during the year	7,214
Total length of mains now in use	47.63
	miles
Extension of services during year	2,184
	feet
Total length of services now in use	28.07
	\mathbf{miles}

The total pumpage for the year 1947 as shown by the statistics compiled at the High Pressure Station, was 400,-046,000 gallons. This proved to be 7,221,000 more than any previous year. Approximately equal amounts were pumped from Willands Pond and the Smith Well. The daily average was 1,096,011 gallons for the 365 days pumped.

The total extension mains laid in 1947 are as follows:

Hull Avenue	425 feet—6" pipe
Redden Street	100 feet—6" pipe
Grove Street	100 feet—2" pipe
Horne Street	100 feet—6" pipe
Myrtle Street	315 feet—8" pipe
Off Chesley Street	160 feet—6" pipe
Knox Park	1,136 feet—6" pipe
Knox Park	220 feet-2" pipe
Silver Street	1,200 feet-8" pipe
Boston Harbor	2,227 feet—6" pipe

Hilton Way	 1,231 feet-6" pipe
Grand Total	 7,214 feet pipe

WALTER C. CAMPBELL,

Superintendent.

BEQUESTS TO THE PUBLIC LIBRARY

In 1888, by the will of Dr. T. J. W. Pray, the sum of one thousand dollars, the income to be used for the purchase of books.

In 1895, by the will of Mrs. Elizabeth Hale Jacques, the sum of two thousand dollars, the income to be used for the purchase of books.

In 1907, by the will of Dr. J. E. Lothrop, the sum of one thousand dollars, the interest to be expended annually for the music department.

In 1916, by the will of Sarah C. Woodman, the sum of five thousand dollars, the income to be expended yearly for books.

In 1920, by the will of Col. Daniel Hall, the sum of five hundred dollars.

In 1925, by the will of Edmund J. Lane, the sum of five hundred dollars.

In 1932, by the will of Lydia J. Pike, the sum of seven thousand dollars, the income only to be used for the purchase of books.

In 1933, by the will of Abbie F. Lane, the sum of two hundred and seventy-two dollars and seventeen cents, the interest to be expended for books.

In 1934, by the will of George H. Williams, the sum of one thousand nine hundred and ninety-seven dollars, the income of which is to be used for improving and beautifying the Library grounds.

In 1934, by the will of Abbie F. Lane, an additional sum of one hundred and twenty-five dollars, the income to be used for the purchase of books. In 1934, by the will of Caroline H. Garland, the sum of one hundred dollars, to be expended by the Librarian and her assistants in the purchase of pictures for the use of the children of the public schools.

In 1946, the sum of \$2,000.00 to be known as the Samuel Burnham Shackford Fund, the income of which is to be used for the purchase and care of books and magazines relating to local and family history. This is a gift from the estate of the late Samuel B. Shackford and is given his name by the request of his sister, Miss Martha Hale Shackford.

\mathbf{Gift}

In 1947, The Sawyer Woman's Relief Corps, Auxiliary of the Grand Army of the Republic of Dover, New Hampshire, which has functioned for many years in Dover, has disbanded, and the members, through their Treasurer, Mrs. Grace Tripp Hayden, have given to the Dover Public Library, the sum of one hundred and fifty dollars, the interest of which is to be paid each year to the Librarian of the Dover Public Library for the purchase of children's books to be added to the Children's Room.

FINANCE COMMITTEE'S REPORT

To the Trustees of the Dover Public Librady:

This is to certify that we have examined the financial accounts of Katherine O'Neil, Treasurer, and Anne Elizabeth Leach, Librarian, from January 1st to December 31, 1947, and find them to be correctly cast and properly vouched.

Rose V. Connelly,

CHARLES W. WEBB,

Finance Committee.

Dover, N. H., January 12, 1948.

TERMS OF USE:

Free to all inhabitants of the city.

TOTAL NUMBER OF AGENCIES:

One central library.

- One station. 2:30-5:00 P. M. Saturdays except July and August.
- Five small deposit stations (where books are changed frequently upon request.)

Wentworth Home for Aged.

Green Pastures Convalescent Home.

O'Hearn Convalescent Home.

Hurd Convalescent Home.

Fire Station.

THE LIBRARY HOUSES:

The Lamson Collection (Piscataqua Pioneers, 438 Volumes.)

The Juliette Duxbury Brown Collection of books and pamphlets (214 volumes).

Hundreds of periodicals.

Thousands of mounted and unmounted pictures.

A collection of 5,000 book plates.

REPORT OF LIBRARIAN

To the Chairman and Board of Trustees of the Dover Public Library:

I submit herewith the 65th annual report of the Librarian for the year ending December 31, 1947.

LIBRARY HOURS

The Dover Public Library continues to be open each week-day from 10:00 A.M. to 8:00 P.M. The Children's Room is open from 2:00 to 6:00 P.M. The Library is closed Sundays and Holidays.

During the High School summer vacation period the Library is closed at 12:00 noon on Wednesdays and Saturdays.

On January 15 and January 20 the Library was closed all day because of severe storms causing hazardous traveling conditions.

Registration for the year.....Adults 489 Juvenile 222

Total Registration 711

The Library can report progress though slow on the recataloging and re-classification of the Main Library's stock of books. The steel shelving ordered in 1945 has not yet been delivered, so the re-shelving of many books in the basement has been held up, particularly those on early American history.

While statistics are necessary in a well organized library, they do not tell the whole story of a library's usefulness and in one, like ours, where there is not supervision in each room at all times, no true figures can be kept of the number of persons who come to the Reading Room, for instance, to read the newspapers, use the unabridged dictionaries, or other books of reference which that Room contains.

Often persons come into the Library and select a book from the shelves, or the table in the Main Room and take it to the Reading Room, where they spend a longer or a shorter time waiting for a business appointment or a social engagement. Others come to the Reading Room to wait for the arrival of a train or the departure of a bus, and no official record of such patrons can be kept.

CIRCULATION

It is gratifying to report that the upward trend in circulation which began in October 1945, following the continual decrease during the war years, still continues.

The total gain in circulation for the year 1947, though smaller than last year because of a decrease in the Children's Room, is 884. There was an increase in the Adult Department of 1741 and the total figures for the year are as follows:

Circulation in Adult Department	
Total circulation	
Books circulated at Book Station	,
Pictures circulated387Recorded telephone calls1,373	

The daily record of pieces of mail received during the year shows the following:

Letters, magazines, house	organs,	sample	copies,	
etc				7,184
$Government \ Documents \ .$				627

Total pieces of mail received at Librarian's desk 7,811

GIFTS

The Dover Public Library subscribed last year to the Congressional Quarterly and received as a gift from Mr. Wilson P. Poynter, the Publisher, the first and second volumes of the Quarterly for the year 1945. This Quarterly is a very valuable addition to the reference books in the Library. It contains the vote of every Senator and Representative on every roll call. It also gives the attendance record of all members of Congress and shows how many times your Congressmen voted with the majority of their party on partisan issues when most Republicans voted one way and Democrats another. It provides full reports on lobbies and their activities, and complete accounts of all debates and arguments.

The unbound copies of the previous year's issues of Current Biography were received from the Librarian of the University of New Hampshire, Miss Thelma Brackett.

The Sawyer Woman's Relief Corps, auxiliary of the Grand Army of the Republic of Dover, New Hampshire, which has functioned for many years in Dover, has disbanded, and the members, through their Treasurer, Mrs. Grace Tripp Hayden, have given to the Dover Public Library, the sum of one hundred and fifty dollars, the interest of which is to be paid each year to the Librarian of the Dover Public Library for the purchase of children's books to be added to the Children's Room.

The British Information Service from its New York Office has sent us much valuable information concerning the British government, the evolution of many of the customs and traditions which are a part of the England we know today.

The China News Service, also from its New York office, has sent up copies of the China Magazine and a 2-volume edition of the wartime messages of Chiang-Kai-Chek.

The Rev. Thomas J. Connor presented to the Library a copy of the souvenir program of St. Mary's Church Tri-Celebration held May 11-12, 1947.

The Dover High School Class of 1947 presented to the Library a copy of their yearbook THE PROFILE.

Also a copy of the Dover High School paper THE SCHOOL SPIRIT was presented to the Library each quarter as published.

A large collection of books were donated to the Library by Mrs. Maude E. Keating, Mrs. Addie McEwan, and the estate of Ella Durgin.

Two pictures were donated to the Library by Mrs. Thomas Lothrop and have been hung in the Fine Arts Room: MATER DOLOROSA and HANDEL AS A CHILD.

In September Mrs. Norman Seavey, on leaving Dover, presented to the Library a very valuable collection of dolls in native dress and other articles of interest.

There are dolls from Holland, Canada, Switzerland, Austria, England, Japan, Soviet Russia, France, and a sponge doll from Brazil, and Mormon doll from Utah.

Among the miscellancous articles there is a model of Cologne Cathedral, the leaning tower of Pisa, the Eiffel Tower, a small vial containing a specimen of the ash from Mt. Vesuivius eruption of April 1906. Also a vial of the colored sand from the Painted desert in Arizona.

BOOK STATION

Through the courtesy of Mr. and Mrs. Philip Daum a Book Station of the Dover Public Library continues to be operated in the Daum Neighborhood Store at 612 Central Avenue from 2:30-5:00 P.M. every Saturday afternoon except for the last two weeks in June, and during July and August, resuming operation the week-end after Labor Day.

In September two signs were placed in the Daum Store notifying the public of this Library Service to readers in the North section of the city, which may partially account for the fact that 165 more books were circulated there in 1947 than in 1946, the total number for the year being 1799.

THE HISTORICAL ROOM

The Historical Room has had 121 visitors during the year:

4 from California	1 from Pennsylvania
1 from Montreal, Canada	1 from Rhode Island
1 from Oklahoma	13 from Massachusetts
1 from Virginia	11. from Maine and the rest
1 from New York	from New Hampshire

t

This Room was the recipient of seven splendidly bound volumes of Dover Reports and School Reports sent us by Miss Mildred J. Peaslee, Librarian of the Franklin Library, Franklin, New Hampshire. These had been part of the library of Thomas M. Pray and Miss Peaslee thought they should be in the Dover Library and we paid transportation charges to secure them. We have duplicates of some of them but the gift copies are in better condition than ours.

A different plan of circulating the new books has been adopted so that persons who are employed may have an opportunity to get one of the new books, which will go into circulation alternately, at 2:00 P.M. and at 7:00 P.M., notice appearing in the local paper announcing the names of the books and the time of circulation.

CHRONOLOGICAL EVENTS OF THE YEAR

On Monday, January 13, at the suggestion of Mrs. William Grimes, who had been doing work with the children during the previous year, the Librarian was interviewed on the radio by Lee Spencer, on the Open House program of WHEB, the local Broadcasting station, concerning the library and the services it can render the community.

Other broadcasts followed and those who had given book reviews at the Round Table meetings were invited to condense their reviews and these programs were a part of the Open House radio program until the summer vacation, thus giving the Library publicity over the radio and words of appreciation of this service were received by both Mrs. Spencer and the Librarian from persons outside of Dover. Since Mrs. Spencer removed to California in the fall radio service has not yet been resumed.

In March the Librarian prepared an annotated Rural Women's Reading List consisting of sixty of the best books published during the last two years (not those of the last year) both fiction and non-fiction and this long list was sent to 14 addresses of rural women who had replied to a questionnaire from the Librarian of the State Library, stating that they would like such a list and they could use the Dover Library.

On March 27, Mr. George Gray, one of our regular borrowers, died suddenly in the Library of cerebral hemorrhage while selecting his books.

In April the staff arranged for the display of religious books for Religious Book Week May 4-11.

With the installation of the parking meters, the free parking spaces on the Library circle were often taken for all day so that Library patrons found it difficult to get near the Library which was a hardship in bad weather, so with the consent of the Trustees, and the cooperation of Mr. Gordon L. Fox, Superintendent of Schools, a special sign for the parking of cars of Library patrons was made by the Vocational School and Mr. Herlihy and the boys from the School erected the new sign June 4th, thus reserving one space nearest the entrance for the use of Library visitors.

The annual High School Art Exhibit was held in the Lecture Hall of the Library the first week in June under the direction of Mrs. Jane McHugh, the Art teacher.

The Librarian attended the New Hampshire Library Association meeting held at Plymouth, New Hampshire June 12 and 13 at her own expense for board and room, as transportation was furnished by friends. On June 21 the Dover Public Library Scrap Book, a record of the year 1946 with many pictures taken by Mr. A. Thornton Gray, was entered in the publicity contest in connection with the American Library Assocation National Meeting in San Francisco, California. This Scrap Book did not win the award, but it was returned and we are very glad to have it as a permanent reminder of a busy year. The Scrap Book may be seen by anyone wishing to do so.

A special appropriation to the amount of \$3000.00 was voted by the City for Library repairs and on June 23rd, the carpenters appeared to replace the falling ceiling in the stack room so that the rope barriers which had long warned of danger could be removed. Later the ceiling in the Work Room was also replaced and still later in the Reading Room.

On September 2nd occurred the first meeting of the fall of the Board of Trustees with the new Mayor, Carroll E. Hall, as chairman, former Chairman Ex-Mayor F. Clyde Keefe having resigned to become Collector of Internal Revenue at Portsmouth.

On September 5th a loan service of books was started for the Hurd Convalescent Home at 118 Locust Street.

On September 10th Mrs. Norman Seavey brought in the Collection of Dolls. She also gave us a large cabinet in which to display them, for which she had had new keys made. This cabinet has been placed in the alcove at the end of the book stacks, until such time as it can be added to the Children's Room, where it should be.

In September, the city of Dover made it possible for the library employees as well as other city employees to take advantage of reduced rates for Metropolitan Life Insurance policies under the Group Insurance Plan which is deeply appreciated by each member of the library staff.

The staff is also appreciative of the reduced rates quoted to the library staff, as city employees, for Blue Cross and Blue Shield benefits for which they became eligible in September.

Upon the opening of school in September the Librarian had a conference with Mr. Walter E. Scott, the new Headmaster of the Dover High School, and at his request there was a meeting of the English teachers with the Librarian in the Lecture Hall on October 9 and partial copies of a list of books for High School reading which had been prepared at the library and mimeographed at the school were distributed. All but two English teachers were present, one of whom was in the hospital and the other one was absent from the city.

On October 29, as usual, the High School Classes, in groups of approximately 25, came over from 9-11 A.M. to be instructed in the use of the Library and 256 students were given this instruction from October 29 to November 10 by Miss Leach, Librarian, and Miss Manoch, Reference Librarian.

The Librarian and the Assistant Librarian attended the Meeting of the New England Regional Library Association at the New Ocean House, Swampscott, Mass., for one day and night of the three days' conference and are grateful that the Board of Trustees made their attendance possible. The sessions were most interesting and one of the speakers was Mr. Verner W. Clapp, Chief Assistant Librarian, Library of Congress, a relative of Miss Caroline H. Garland, former Librarian at Dover.

Miss Parker selected 1449 books and with the help of the staff these were prepared to be sent to Grades 3-8 for supplementary reading.

Book Week was celebrated in the Children's Room from November 16-22. The slogan this year was "Books for the World of Tomorrow".

Posters announcing the Week were shown outside on the Bulletin Board and in the Hall and Main Library. Teach-

ers in several grade schools brought their classes to the Children's Room to see the books, to get a glimpse of the Library, and to arrange for their pupils to get a registration slip for father to sign so that young son and small daughter might become eligible to have cards of their own. Miss Ruth Somers, Supervisor of the Elementary Schools arranged to have a meeting in the Lecture Hall with her teachers during the Week and she told stories to a grade class visiting the Library that day.

On Saturday afternoon of Book Week a short play, "The Discontented Boy" was given with the following cast of characters:

Discontented Boy,	Carl Johnson
Little Wizardess	Margaret White
Ned	Joseph Cote
Nelly	Carolyn Smalley
Cinderella,	Diana D'Arcy
Hans Brinker	Russell O'Connell
Jo March,	Ellen Kidney
Robinson Crusoe,	James McCraren
Tom Sawyer	Scotty McAdams
Heidi,	Joan Murphy
Pollyanna,	Marie Nadeau

This play was given under the direction of Miss Leach and Miss Manock.

The Disc Reading Club started late in 1946, closed with an entertainment consisting of reviews of favorite books given by the children, themselves, and refreshments of ice cream sandwiches were served. On that day a new Reading Club for the children was announced by Miss Parker and 124 boys and girls are registered in it. This is called the Race Track Reading Club for after reading 4 books a child receives a small cut-out horse, which advances one space on the race track as two books are read. The spirit of the holidays was in evidence at the Library in the Christmas tree at the end of the stacks, decorated with tinsel and lights, in the beautiful wreath over the Main desk, the annual gift of a Library friend, and in the lovely winter bouquet on the table in front of the Main desk also the gift of a Library friend.

In the Children's Room the low table with the symbolic creche, as every year, attracted the little folks.

The library today no longer is satisfied to merely charge out a few books to a comparatively small number of borrowers, but it seeks to exert a wider influence in the city or town in which it is located.

While it still *does* aim to increase the number of its borrowers, it also seeks to be a center of cultural interest in the community, and by means of lectures (illustrated by films if possible) book reviews, and art exhibits to enrich the every day life of each man or woman living within reach of its doors.

The Dover Public Library has been a center of art since the Library came to its present home. At that time, the art collection of Benjamin T. Tredick, who was a merchant in Dover from 1823-37 was presented to the Dover Library. Pictures in this collection appear on the walls of the Lecture Hall and upper corridor, and are foreign reproductions of masterpieces in European art galleries.

Therefore it was in keeping with tradition and also keeping step with the modern library trend that what proved to be the most outstanding event in the Dover Public Library in 1947 was the (First Annual) Local Artists' Exhibit, which was opened the first week in November, since that was American Art Week.

The Exhibit grew like the proverbial snowball, for at the beginning, only one or two local persons were known to the Librarian as possible exhibitors. But one by one, persons' names were suggested by telephone, the names of other prospective exhibitors were sent in until the total number of 30 were registered and the pictures included a rich variety of mediums—oil, water color, pastel, crayon, charcoal, chalk and pencil.

The success of the Exhibition in large measure was due to the untiring efforts of Mr. George F. Gray, who not only exhibited many of his own lovely pictures, in several mediums, but also superintended in the arrangement of the Exhibit so that each picture might be artistically exhibited to the best advantage. He also served as Curator of the Exhibit, which originally intended for one week, was extended by repeated requests to four weeks, during which time more than 600 persons visited the Library to see the pictures.

The New Hampshire Sunday News, hearing of the Exhibit, telephoned from Manchester for information concerning it and gave an account of it in the issue of November 23rd.

Several notices appeared in *Foster's* and Radio Station WHEB gave announcements of it.

The last Sunday afternoon of the Exhibit, November 30, there was an informal reception for the Exhibitors, to which the Trustees and their wives were invited, and refreshments were served.

The interest was so great that requests have been made to have a second annual Exhibition in 1948.

The names of those exhibiting pictures or other specimens of artistic work follow:

Mr. George F. Gray	Miss Gladys Tasker
Mrs. C. Cunningham	Mrs. Walter Flanders
Schoolcraft	Mrs. Harry Henderson
Mr. A. G. Randall	Mrs. Ella M. Parker
Mrs. Juliet Burdoin	Mr. Frank Bliss
Mrs. Gertrude Hills	Mrs. Frank Bliss

Mrs. Mildred C. Whitney	Miss Elizabeth J. Morrill
Mrs. Katherine Head	Francis Fay
Mrs. Jane McHugh	Mrs. Napoleon Pichette
Miss Barbara McHugh	Mr. Napoleon Pichette
Mr. Harry Donnelly	Mrs. Florence LaBonte
Mr. Laurence Swaine	Mrs. Harold Tupper
Mr. Fred Reynolds	Reginald H. Fogg
Miss Marian Lee Flanders	John Darby prints photo-
Miss Madge Parsons	graphically reproduced by
Mr. George Junior	Mr. Tifft
Mr. John K. MacCallum	

The telephone is used not only to request the renewal of a fourteen day book (seven day books are not renewed) but often brings an inquiry to the library desk which may take a few minutes in which to locate the answer, but if the inquirer leaves his telephone number he is called as soon as the answer is found. The Librarian and the staff are always glad to give this telephone service, except in the case of Quiz Program questions.

Some of the questions received this last year follow:

What are the Spanish words for gram and kilogram?

In what county is Austin, Texas?

Who wrote "Twas the Night Before Christmas"?

Origin of the Tuberculosis Christmas seal?

How do you spell airplane in Italian?

Of what use is oxygen in aviation?

What were the original thirteen colonies.

What does this word mean—Antidisestablishmentarianism?

A grade school boy asked for a picture of a Bessemer converter.

RECOMMENDATIONS FOR BETTER SERVICE

- 1. The Library needs a Moving Picture Projector (still and sound) to use in the Lecture Hall for both children and adults, for the children on Saturday afternoons in lieu of a story hour, and an occasional educational or travel film for adults in the evening after closing hour. The rental charge for such films is small.
- 2. The floors are in bad condition, one badly worn groove back of the circulation desk needs attention. There is some floor covering but it is so badly worn that it causes persons to stumble, several recently narrowly escaping falls. If this could be replaced by asphalt or rubber tile where the most walking is done, it would be much appreciated by those who now have to walk on the wooden floors.
- 3. Many of the windows are loose, the putty having been worn off and much cold air comes in. Replacing the putty and weatherstripping would help cut down the oil bill.
- 4. The window shades in many of the rooms are in very poor condition and most of the old steel window springs, which were installed when the building was finished are broken and need to be replaced so that the windows may be opened and closed easily.
- 5. At present the Library has flourescent lights in the Lecture Hall and the Fine Arts Room. If indirect nonglare flourescent lights could be installed in the Children's Room, Main Room, Reading Room, and Office it would cut the electric bill.
- 6. All of the walls need to be painted, particularly in the Stack Room, Work Room, Children's Room, the Office, and in the Unpacking Room in the basement.

- 7. There is need for a light in the Staff toilet and the floor there needs repair.
- 8. The radiator should be moved in the Office to permit that room to be heated adequately.
- 9. There are two small radiators in the Work Room, but these are not sufficient to heat this northwest room.
- 10. A new encyclopedia for adult Reading Room.
- 11. A new clock for Main Room.
- 12. There needs to be several changes made in the Children's Room, among them, arranging for more shelving space. By taking out the single wall lights on the east and putting in shelving there for the books which do not circulate, using the revolving bookcase for books which do circulate, and by discarding many worn out and out-dated books, the central shelf which cuts the Room in two, could be removed to the Historical Room where it is sadly needed, and the symmetry of the Children's Room would be restored.
- 13. The last recommendation concerns the Main Room. There is much congestion back of the Main desk when the High School students are selecting their books from their two special collections there; so much congestion, that it is with difficulty that the work at the desk is carried on by the two librarians who are there during the school rush hour. It was suggested before the present Librarian was appointed that a new desk should be procured if possible, but if not, that the present one be moved forward to relieve this congestion. To do this would be beneficial in two ways besides relieving the congestion, for it would permit better supervision of most of the Reading Room and the Children's Room when those rooms are not otherwise supervised, and it

also would permit a closer supervision of those coming and going to the Historical Room.

One objection which has been raised to this change is that it might be too cold, but in several libraries the desk is located much nearer the door than the proposed plan here, with no ill effects.

APPRECIATION

The Librarian is grateful to Mr. Philip Foster for notices printed in *Foster's Daily Democrat* often at short notice, to station WHEB for radio notices, to Mr. and Mrs. Daum for use of space in their Neighborhood Store, and to Mr. Gordon L. Fox, Superintendent of Schools, and the Vocational School for the Parking sign, and to those who have this year served as Chairmen of the Board of Trustees, Ex-Mayor F. Clyde Keefe, and Ex-Mayor Carroll E. Hall, and to all other members of the Board for their help and advice.

She is also appreciative of all the encouraging words received from whatever source this year, and wishes to thank each member of the staff and the janitor for their cooperation during 1947.

Respectfully submitted,

ANNE ELIZABETH LEACH,

Librarian.

CITY OF DOVER, N. H.

ANNUAL REPORT

OF THE

CITY BUILDING INSPECTOR

To His Honor the Mayor, Gentlemen of the City Council, and the City Manager:

I hereby submit the Report of the City Building Inspector for the year ending December 31, 1947.

Total number of permits issued by the Inspector.... 153 No. of applications forwarded to the City Councils.. 16 Estimated value of construction authorized.. \$686,929.00

A brief breakdown of the above figures shows that 55 permits were issued for 61 single houses at an estimated value of \$383,900, 2 permits for double houses valued at \$15,500, and 18 permits were issued for converting existing houses for the purpose of adding 25 apartments at an estimated cost of \$36,000.

Fifty-eight permits for alterations to dwellings, private garages, etc., had an estimated value of \$36,350.

Twelve permits for construction of new commercial buildings and one church basement were processed through the City Councils, and had an estimated value of \$113,200. Twenty-four permits for additions or alterations to existing commercial structures at an estimated cost of \$101,979 were issued or handled through the Councils. It is not possible to report on the work which has been completed. I estimate that of the 90 dwelling units for which permits were issued, at least 10 have not, and probably will not, be started, and I know of at least 6 more which have not progressed beyond the excavation stage. It is probable that not more than 60 dwelling units were completed in the City during the year.

This report of permits issued does not cover more than a fair percentage of the construction actually undertaken in the City during the year, as the present Ordinance does not provide for inspections, and there are no penalties which may be invoked for failure to obtain building permits. The Planning Board has submitted a proposed revision of the Building Inspector Ordinance to the City Council which provides for inspection, penalties, and the review of many proposals by the Board and City Council. This ordinance is intended to be effective until a Zoning Ordinance and Building Code have been adopted, and I recommend that serious consideration be given to these items as soon as possible.

Respectfully submitted.,

GRANT L. DAVIS, City Building Inspector.
