www.unh.edu/survey-center

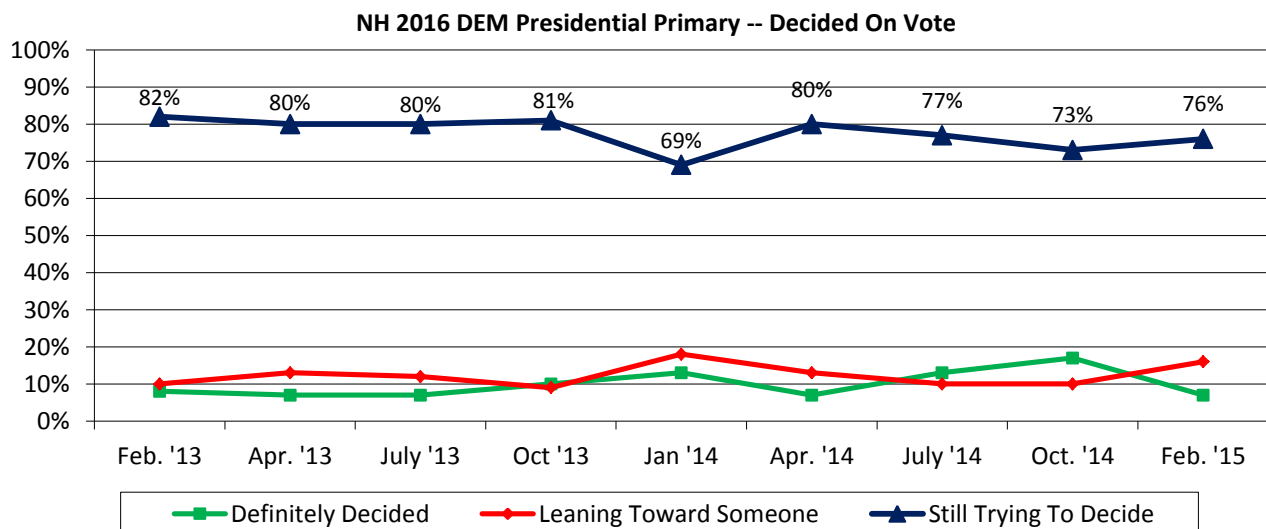

DURHAM, NH –Hillary Clinton remains the frontrunner in the 2016 New Hampshire Primary although very few voters have made up their minds about who to vote for in the 2016 New Hampshire Primary.

These findings are based on the latest **WMUR Granite State Poll**,\* conducted by the University of New Hampshire Survey Center. Two hundred and ninety-seven (297) randomly selected likely 2016 New Hampshire Democratic Primary voters were interviewed by landline and cellular telephone between January 22 and February 3, 2015. The margin of sampling error is +/- 5.7 percent.

### NH Voters Not Engaged

2016 is the 100<sup>th</sup> anniversary of the New Hampshire Presidential Primary. One year before the First in the Nation New Hampshire Presidential Primary, prospective Republican and Democratic candidates have been testing the waters here for presidential runs in 2016 but voters have not yet engaged. While many of the candidates discussed in this poll will decide not to run, and others may enter who were not discussed, candidates who are the early identified frontrunners have typically won past New Hampshire primaries.

New Hampshire primary voters typically decide who they will vote for in the last weeks, or days of the campaign and it is no surprise that very few voters currently have made up their minds about who they will support in 2016. Currently, only 7% of likely Democratic primary voters say they have definitely decided who they will support, 16% are leaning toward a candidate, but the great majority of voters (76%) are still trying to decide who to support.

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

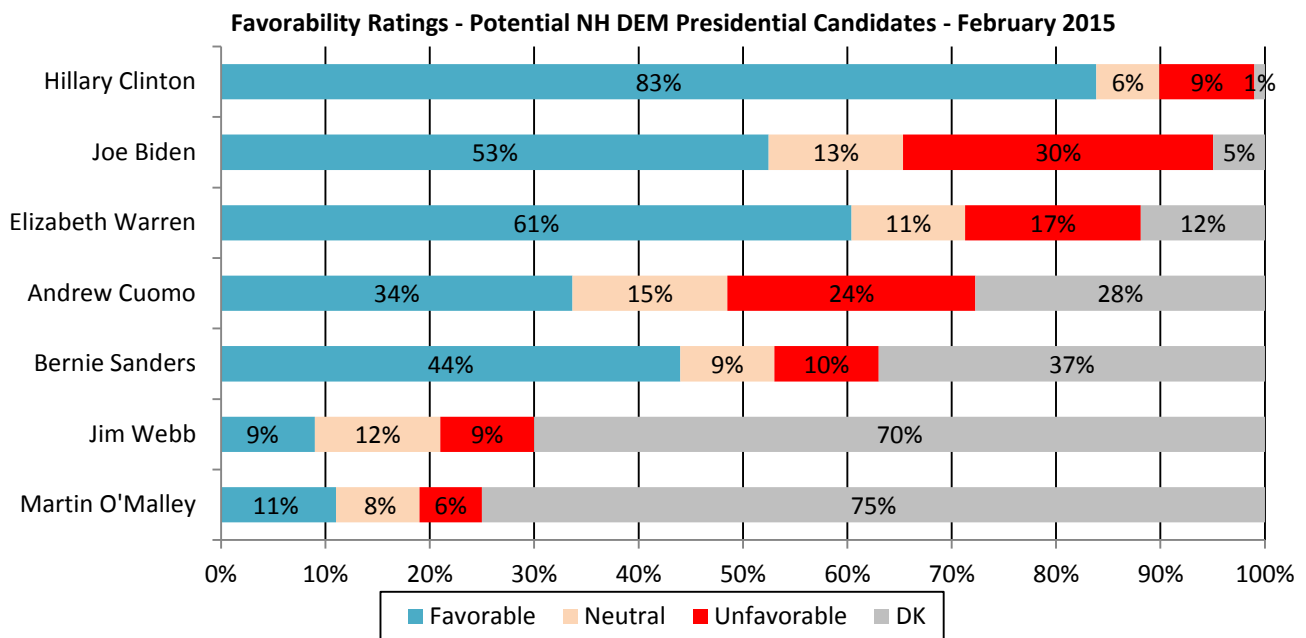

The Democratic electorate is not as engaged in the 2016 primary campaign as they were at a similar point in 2007. Currently, 32% of likely Democratic primary voters say they are extremely interested in the election, 39% are very interested, 23% are somewhat interested and 6% are not very interested. By comparison, in 2007, 44% of likely primary voters said they were extremely interested in the 2008 Democratic primary, 33% were very interested, 20% were only somewhat interested, and 4% were not very interested.

Another indication of the lack of interest in the 2016 primary among Democrats is that undeclared voters, often erroneously referred to as “independents”, are much less likely to say they plan to vote in the Democratic primary than they were in 2008. Currently, 37% of undeclared voters say they plan to vote in the Republican primary, only 26% plan to vote in the Democratic primary, and 37% say they will not vote in either primary. At this time in 2007, 44% of undeclared voters said they would vote in the Democratic primary, only 22% said they planned to vote in the Republican primary, and 34% said they would not vote in either primary.

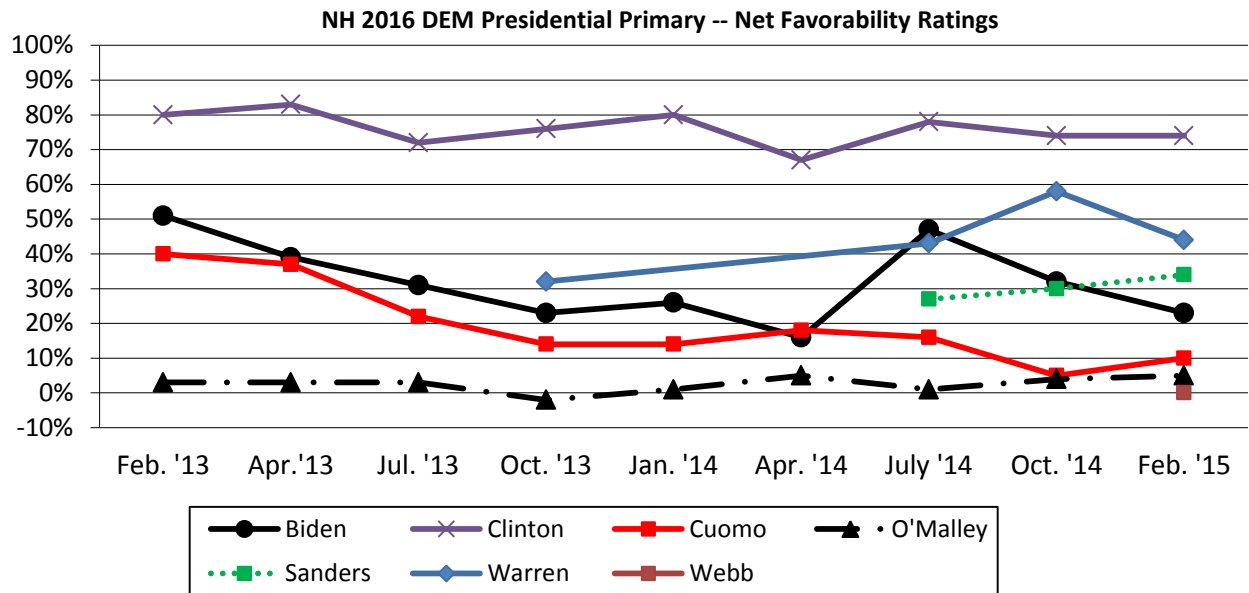

### Democratic Favorability Ratings

2008 New Hampshire Primary winner Hillary Clinton remains the most popular Democratic candidate by a wide margin. Most likely Democratic Primary voters, 83%, have a favorable opinion of Clinton, only 9% have an unfavorable opinion of her, and 7% are neutral or unsure. Her net favorability rating, the percentage who have a favorable opinion minus those who have an unfavorable opinion, is an extremely high +74%.

Potential candidates with moderate net favorability ratings include Massachusetts Senator Elizabeth Warren (+44%), Vermont Senator Bernie Sanders (+34%) and Vice President Joe Biden (+23%). Maryland Governor Martin O’Malley (+5%) and Former Virginia Senator Jim Webb (+0%), are less well known and have lower net favorability ratings. Despite being relatively well-known, New York Governor Andrew Cuomo (+10%) continues to have a low net favorability rating.

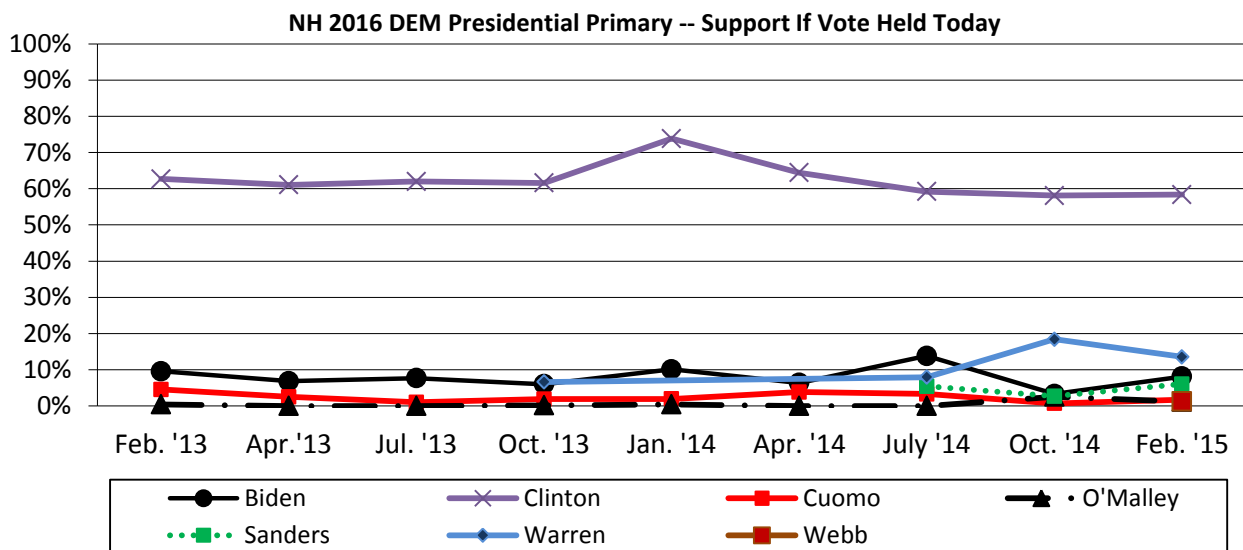

Clinton has been the most popular Democratic candidate by a considerable margin for the past two years as her net favorability rating has ranged between 70% and 80%. The net favorability ratings of Biden and Cuomo have declined over the past two years while those of Warren have increased somewhat as she has become better known.

### 2016 NH Democratic Primary Trial Heat

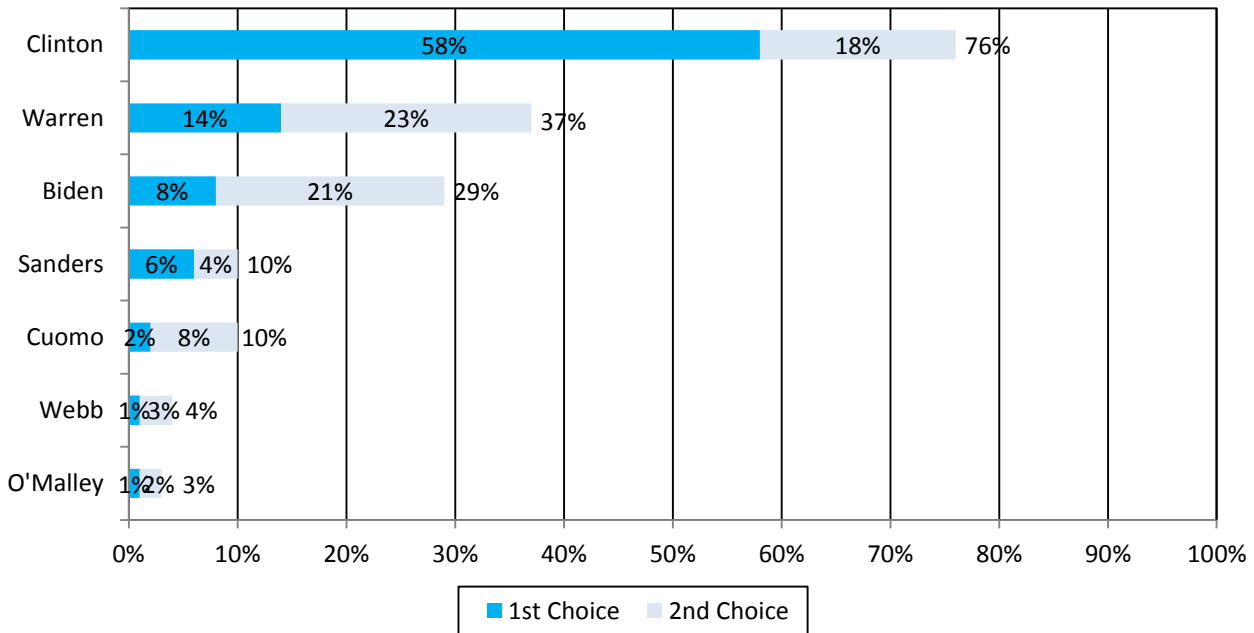

Clinton remains the clear favorite among Democratic voters when they are asked to choose from a list of prospective candidates. In the most recent Granite State Poll, 58% of likely Democratic Primary voters say they would vote for Clinton if the election were held today, 14% prefer Warren, 8% prefer Biden, 6% prefer Sanders, 2% prefer Cuomo, 1% prefer Webb, 1% prefer O'Malley and 9% are undecided.

Clinton has consistently held 60% support among likely Democratic primary voters.

### 2016 NH Democratic Primary with Second Choice

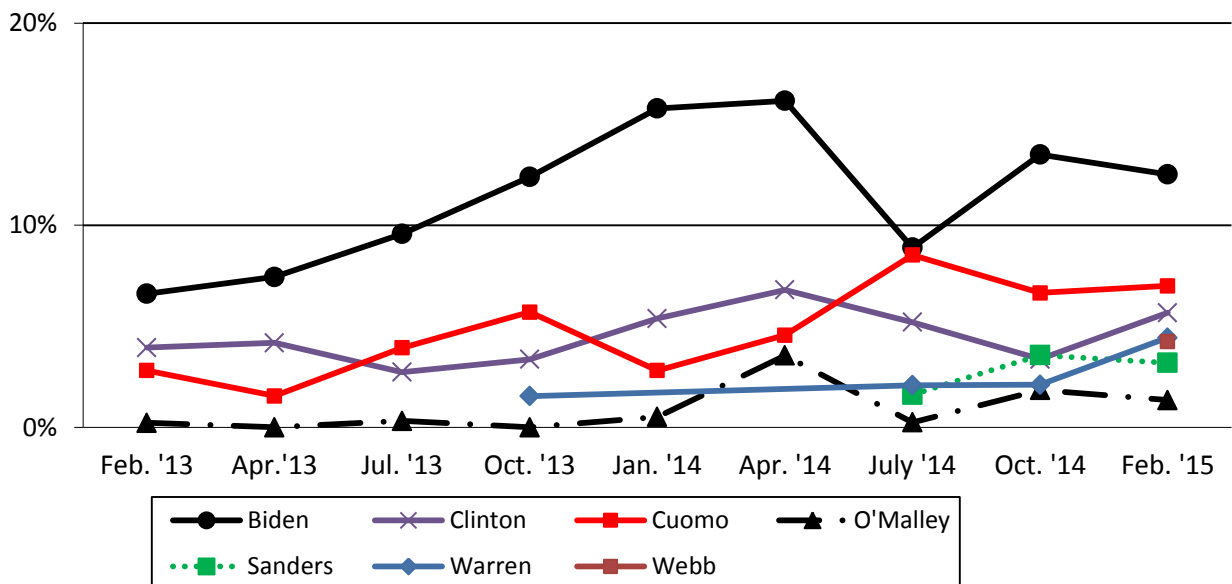

While Hillary Clinton is currently the frontrunner in the Democratic field, likely Democrat Primary voters also view Elizabeth Warren and Joe Biden as potential options. When the top two choices are combined, 76% of likely primary voters favor Clinton, 37% favor Warren and 29% favor Biden.

### Most Unpopular Democrat Candidate

Nominations typically go to candidates who are acceptable to most members of their party and not to polarizing figures. When asked which potential candidate they would NOT vote for under any circumstance, 13% of likely Democratic Primary voters say they would not vote for Biden, 7% would not vote for Cuomo, 6% would not vote for Clinton, 4% would not vote for Warren, 4% would not vote for Webb, 3% would not vote for Sanders, 1% would not vote for O'Malley, 32% think that all of the prospective candidates are acceptable, and 29% are unsure.

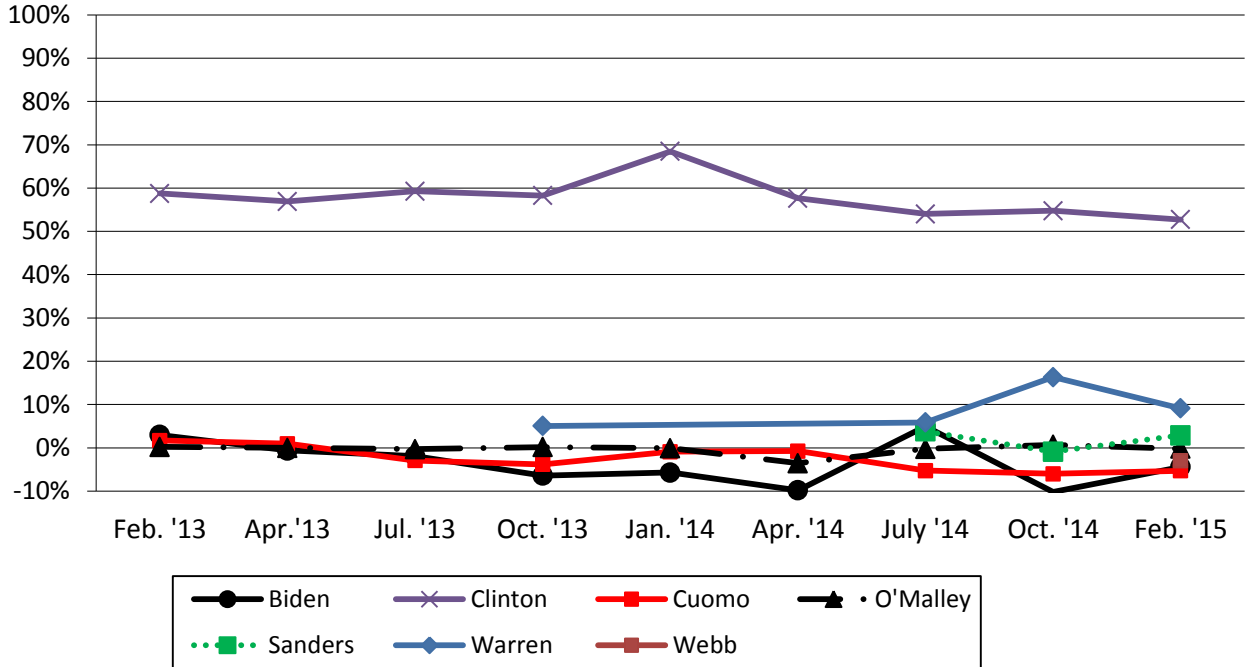

### NH 2016 DEM Presidential Primary -- Would Not Vote For

### Democrat Net Electability

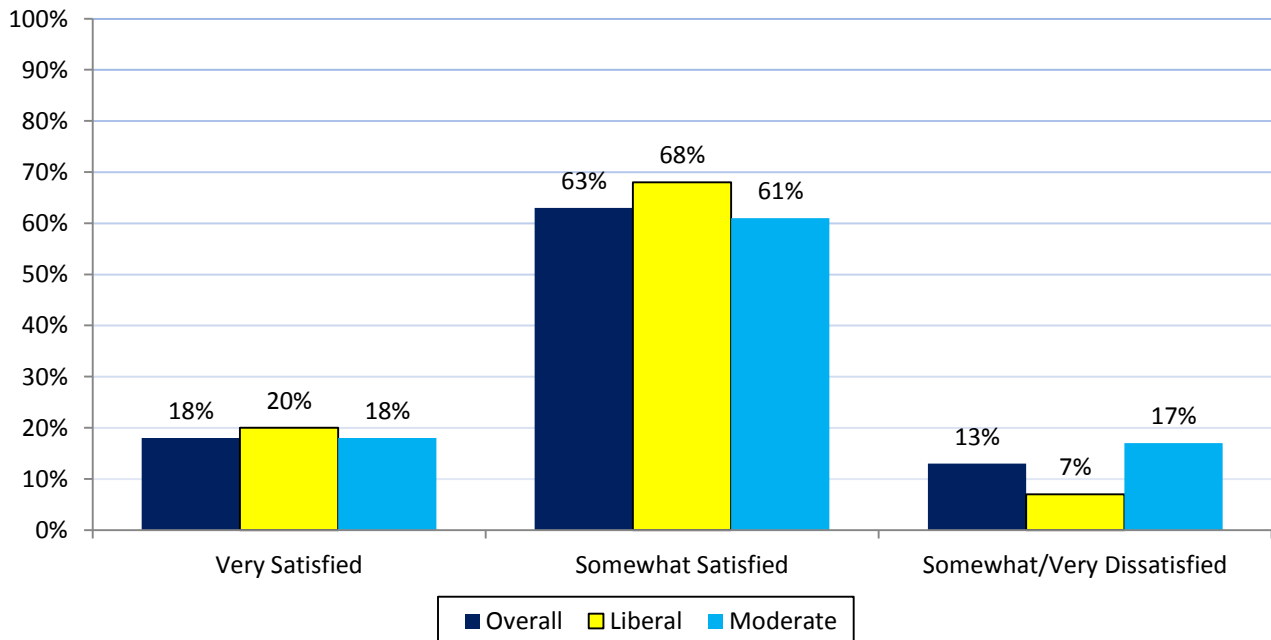

Clinton has a wide lead in net electability (the percentage who support a candidate minus the percentage who would not vote for that candidate under any circumstances) at +53%. Warren (+9%), and Sanders (+3%) have positive electability ratings while O'Malley (0%), Webb (-3%), Biden (-4%), and Cuomo (-5%) have neutral or negative electability ratings.

NH 2016 DEM Presidential Primary -- Net Electability Ratings

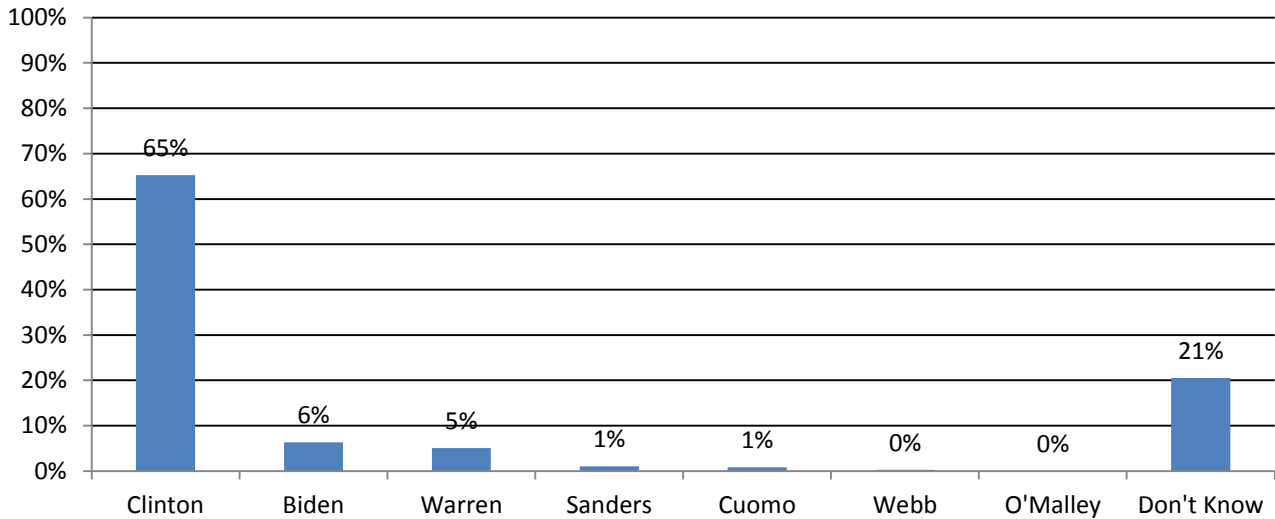

### Satisfaction with the Current Primary Field?

Most Democratic Primary voters (63%) are only somewhat satisfied with the current field of candidates, 18% are very satisfied and 13% are unsatisfied. These feelings are similar among both liberal and moderate primary voters.

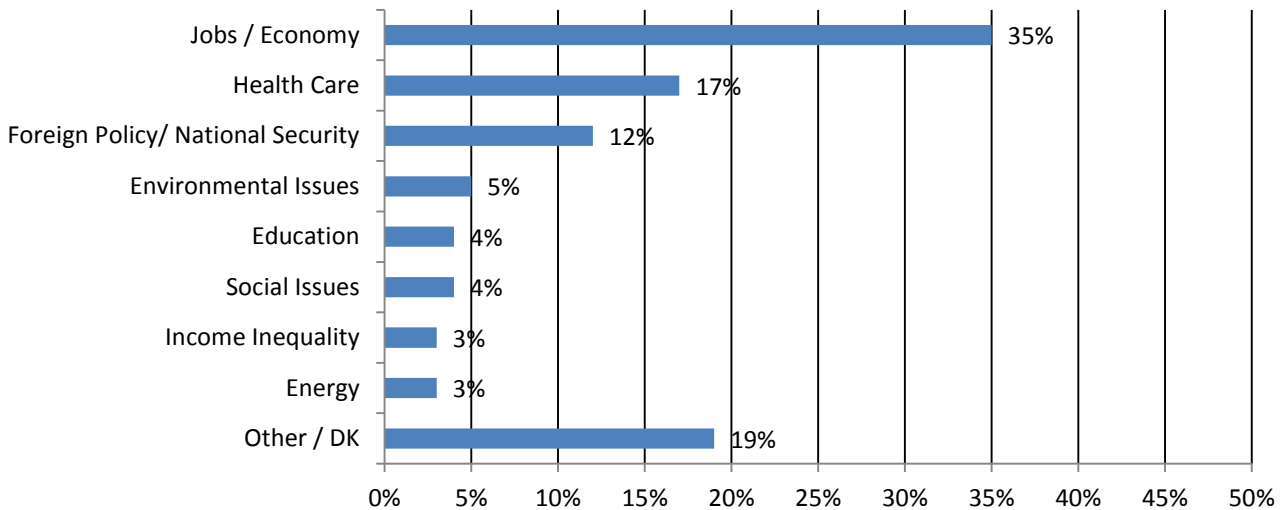

### Who Will Win Primary?

Clinton is seen as the likely winner of the New Hampshire primary by most Democrats. Among likely Democrat Primary voters, 65% believe that Clinton will win the New Hampshire primary, 6% believe Biden will win, 5% believe Warren will win and 21% are not sure.

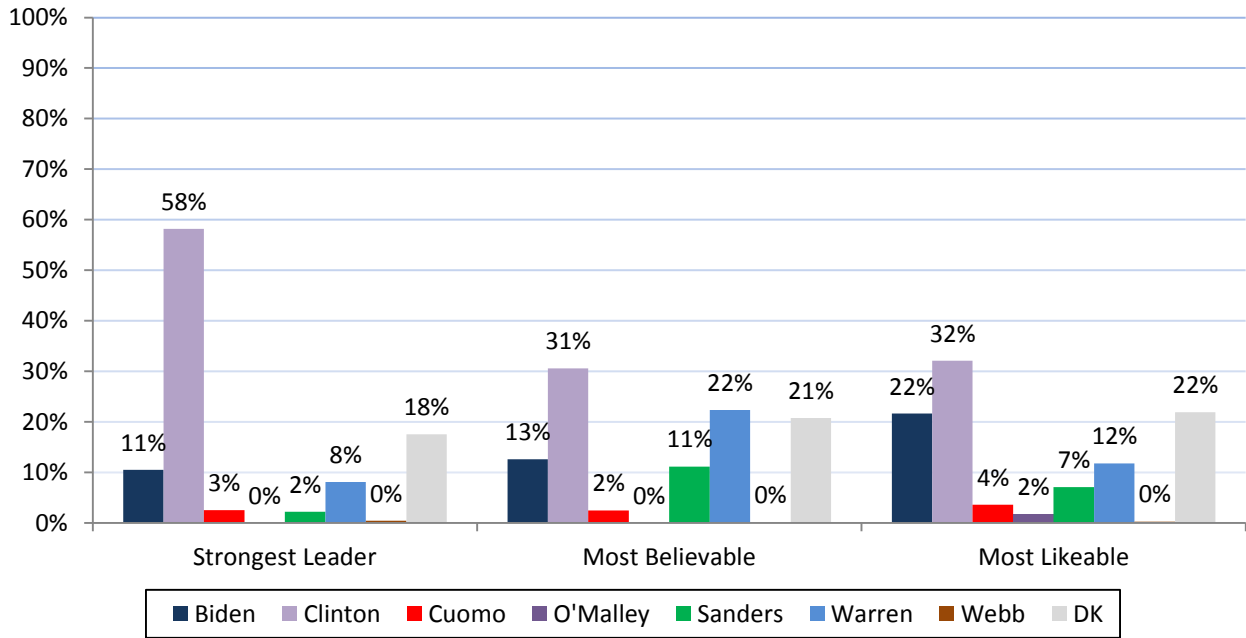

### Most Important Issues to Primary Vote

What asked what issue is the most important facing candidates in the presidential primary, 35% of likely Democrat Primary voters cite jobs or the economy, 17% cite health care, 12% cite foreign policy or national security, 5% cite the environment, 4% cite education, 4% cite social issues, 3% cite income inequality and 3% cite energy.

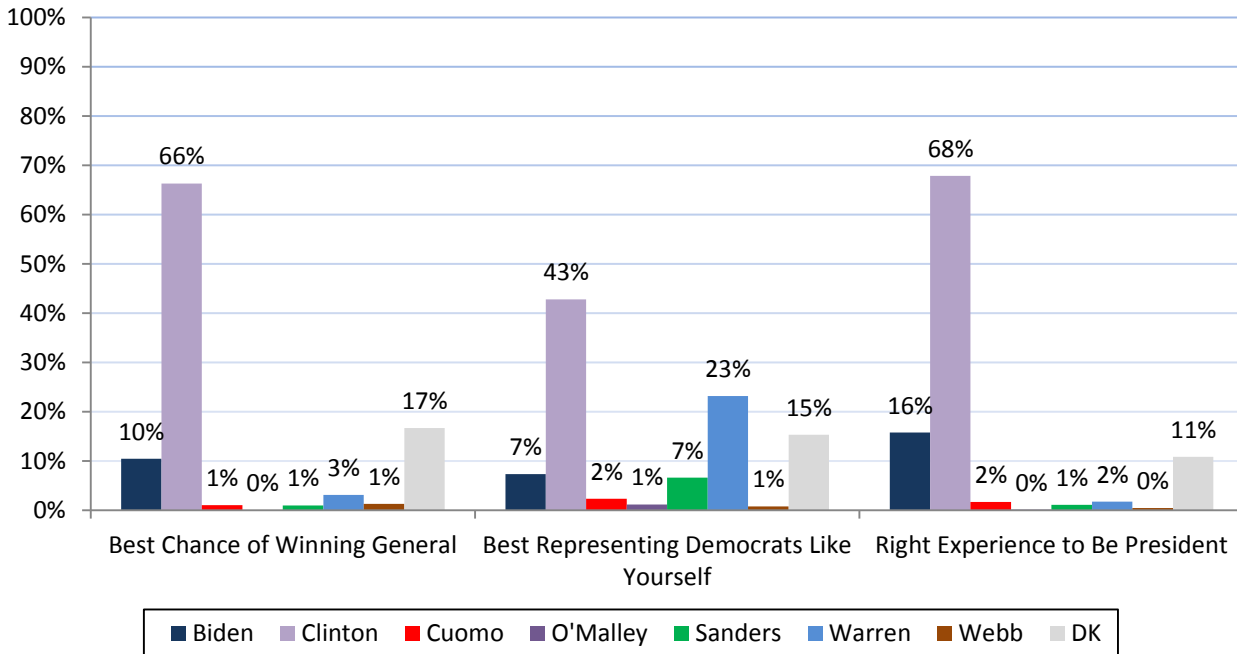

### Candidate Qualities

A majority of likely primary voters (58%) view Hillary Clinton as the strongest leader in the field. Nearly a third (31%) of likely voters view Clinton as the most believable followed by Warren at 22% and Biden at 13%. Thirty-two percent (32%) say Clinton is the most likeable candidate followed by Joe Biden at 22%.

Two-thirds of likely Democratic primary voters say that Clinton has the right experience to be President (68%) and the best chance of winning the general election (66%). Forty-three percent say that Clinton best represents Democrats like themselves with 23% feeling that Elizabeth Warren best represents them.

## Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center. Two hundred and ninety-seven (297) randomly selected likely 2016 New Hampshire Democratic Primary voters were interviewed by landline and cellular telephone between January 22 and February 3, 2015. The margin of sampling error is +/- 5.7 percent.

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.
