DURHAM, N.H. -- UNH Wildcat Transit will join with other public transportation systems nationwide to participate in the fourth annual National Dump the Pump Day and offer free rides Thursday, June 18, 2009. Sponsored by the American Public Transportation Association (APTA), the 2009 National Dump the Pump Day is a day that encourages people to ride public transportation to save money, protect the environment, reduce our dependence on foreign oil, and improve our quality of life. Visit <http://www.unh.edu/transportation/wildcat/index.htm> for schedules.

Individuals can achieve an average annual savings of over \$8,000 by taking public transportation instead of driving and by living with one less car. And for every \$1 invested in public transportation infrastructure, \$6 is generated in economic returns to communities.

Public transportation saves 900,000 automobile fill-ups each day - 4.2 billion gallons of gasoline per year. And switching to public transportation can reduce individual carbon emissions by 20 pounds per day or 4,800 pounds per year.

"With the economic downturn affecting everyone, now is the time to save money and ride public transportation," said APTA President William W. Millar. "The National Dump the Pump Day on June 18 is an opportunity for people across the country to ease the strain on their wallets and provide a more secure future for America."

The University of New Hampshire, founded in 1866, is a world-class public research university with the feel of a New England liberal arts college. A land, sea, space-grant and community-engaged university, UNH is the state's flagship public institution, enrolling 11,800 undergraduate and 2,400 graduate students.
