REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the Sunapee School Board:

I am presenting this, my fifth annual report. The annual report of the Superintendent gives the only opportunity he has during the year of presenting to the people as a whole the school situation as he sees it. In this report I shall try to speak of the educational progress that has been made since the last report; what we should still hope to accomplish in the next year; and a statistical statement as a matter of record for future reference.

It has been a deliberate plan on my part since being with you as your Superintendent to bring our schools to a high state of proficiency both as regards equipment and by selecting high grade teachers. This task has been made all the easier, due to the fact that the Boards I have had to work with had the same desire with relation to these details so that today we have arrived at a point where we can feel that we are getting value received for the educational outlay. Our problem has become rather concentrated since all our Schools are now in three buildings.

Some of the tests that are being given in the Center School this year indicate that the work we are doing is above the average for school systems throughout the country. Another indication which is a check on this situation proving it to be valid is that pupils coming to our schools from other systems considered to be su-

perior find our own schools entirely adequate to their needs. This should give satisfaction and pleasure in knowing that when we have been trying to build for superior educational advantages we have succeeded in creating them.

The problem of greatest moment before us is to obtain superior teachers, especially trained for the tasks for which they are employed. This will be rendered easy with the fine spirit of co-operation I have always received from the Board in building to such an ideal.

I am truly grateful for the fine support I have had from nearly every source in trying to make our Schools better for building worthy and intelligent citizens by our schools. Having provided superior opportunities, I think we shall see that well trained young people going out from our schools will bring great credit for the advantages provided and prove to be an asset to their town.

Respectfully submitted,

TRUE C. MORRILL, Supt. of Schools.
