The Committee feel that there should be entered in our report a statement of what has been accomplished the past year to increase the area of Pine Grove Cemetery in our village.

There has always been much dissatisfaction with the entrance to Pine Grove Cemetery from Granite Street.

Early in the year Mrs. Kate I. Davis, offered to give \$500.00 in memory of her father, Mr. John H. Kimball, for the construction of a new road across the Hemenway Pasture to the cemetery.

After consultation with Mr. Hemenway, by the Selectmen and your committee, it seemed advisable for the benefit of the town to purchase all of the Hemenway pasture on both sides of the road then leading to the cemetery. This was done at the cost of \$500.00, and Mrs. Davis consented that her money pay for the land instead of the road, providing the Selectmen would construct a suitable road across the newly acquired land.

The Selectmen, on petition of citizens, laid out and built the road, and by the energy of their chairman, Mr. Merrill Mason, the road was fully paid for by subscriptions made by citizens interested.

To complete the plan of enlargement, the Selectmen bought of W. W. Richardson, for \$100. the narrow strip of land in front of the present cemetery and extending to the newly acquired land thus has been provided an addition to Pine Grove cemetery large enough for the needs of the town for scores of years to come.

Your committee, the Selectmen, and we believe the citizens in general feel profoundly grateful to Mrs. Davis for her most generous gift and we believe it our duty as citizens to appropriate money and continue the good work of grading and beautifying the land for the purpose of making it an attractive village cemetery.

In conclusion, we ask the support of the voters to Article 10 of the warrant for this meeting.

introduced by us for an appropriation for improving the newly acquired land for cemetery purposes.

Respectfully submitted,

GEORGE E. GOULD,	} Cemetery

REPORT OF FIREWARDS

—o—

The Firewards of Marlboro' would make the following report:

There has been eight alarms of fire the past year.

March 9th at 4.30 A. M. for fire at Selwyn Carter's house, cause defective chimney, damage \$600.00 April 15th, still alarm for chimney fire at John Vigneault's tenement house, no damage.

April 26th alarm for fire at picker house near L. M. Flint's, both companies responding, Torrent getting first stream, damage \$100.00. Same date call for brush fire near Trestle, soon put out.

May 20th alarm of fire at Stone Hill, tenement house burned to ground, steamer responding to this alarm but was uncalled for.

July 3rd and 9th at Cheshire Blanket Co. damage light, both companies responding. Oct. 21, at 6.30 A. M. alarm at Mrs. Amasa Fuller's house below Webb station, steamer responding, in thirty eight minutes had one stream and soon two streams Saved all but roof on main building. A great deal of praise is due the neighbors for their valiant work done before the department arrived. This fire caught from chimney.

April 17, an alarm call to the Engine house at 3.15 A. M. when aid was called to Chesham for the fire at P. W. Russell's box shop, to this the Steamer responded with men. Cause unknown, all was

destroyed. Town of Harrisville paid \$82.50.

We repaired the Reservoir near the schoolhouse at a cost of \$11.50. We put in a reservoir near Frost Free Library it costing \$123.29, \$23.29 more than the appropriation which was made up by subscription, Mr. George Beauregard giving \$5.00, Mr. Grant Hall giving \$5.00, Hugh Mahon giving \$2.00 and other contributions including the Village Improvement Society.

We now have ample supply for any ordinary fire. We have purchased four hundred feet of hose from the C. C. C. Fire Hose Co.

The companies have a full membership, the machines are in good order.

There are a few minor repairs to make in the Engine house and would recommend a small appropriation for improvements. One that would be of great benefit to the firemen as well as to the town's people is the fitting up of a sleeping room with telephone connection to the central station which could be done at a small cost. We also need an extension ladder that would reach our highest building.

Respectfully submitted,

C. E. WARD,	} Firewards of Marlborough

BOARD OF HEALTH

The passed year has been one of remarkable freedom from contagious and infectious diseases, other than tubercular cases, in our community, as there has been none brought to the notice of the board.

A few of the usual unsanitary conditions that are so apt to exist in any village, without a public sewerage system, have been noted and corrected as far as possible.

The board would call the attention of the people to an extract from the public health laws of the state, regarding tuberculosis, it being a matter that has been much neglected.

To Prevent the Spread of Consumption

Chap. 17 Laws of 1905. Section 1, 2, and 3.

Section 1. It shall be the duty of the attending physician or some member of the patient's family or household to report every death from pulmonary consumption, or the removal of a consumptive patient, to the local board of health within one week of said death or removal.

SECT. 2. It shall be the duty of said local board of health, within one week after such notice or such information from any other source, to cause the infected premises to be thoroughly disinfected and cleansed; said work to be carried out by methods endorsed and recommended by the state board of

health.

SECT. 3. No apartments which have been occupied by a consumptive shall be reoccupied until thoroughly disinfected and cleansed as provided for in this act.

SECT. 4. Any person violating the provisions of this act shall be punished by a fine of fifty dollars for each offense.

Respectfully submitted,
D. W. TENNEY,
W. H. ALDRICH,
E. P. RICHARDSON.

STREET LIGHTING COMMITTEE

Your Street Lighting Committee would make the following report for the year 1913.

The usual agreement was signed for 64, \$16.00 for all night service and has been carried out.

There has been some changes in location of lights owing to an arrangement made with the Telephone company and Electric Company, to use the same poles, their being new ones, replacing old ones. We would recommend one new light on School street between the school house and A. D. Sawyer's place.

Respectfully submitted,
W. McROY,
E. W. ATWOOD,
L. G. HILDRETH.

FROST FREE LIBRARY REPORTS

—o—

REPORT OF SECRETARY

The annual meeting of trustees of FROST FREE LIBRARY, was held Sept. 15, 1913.

Meeting opened with Vice-President, Rev. S. H. McCollester in the chair. Prayer was offered by Rev. John Kimball, of the Universalist church.

Reports of Secretary and Treasurer read and accepted, the treasurer stating \$106.19 on hand.

Officers elected for ensuing year:

LOWELL C. FROST,	President
REV. S. H. MCCOLLESTER,	Vice-President
MRS. H. H. PEASE,	Secretary
LEVI A. FULLER,	Treasurer
MRS. CARRIE T. K. WHITNEY,	Librarian
REV. S. H. MCCOLLESTER,	Auditor
Revs. S. H. McCollester, A. E. Gregg, John Kimball J. S. Mackay, with Mr. Merrill Mason and Mr. R. L. Whitney, Ex. Committee.	

Voted to have list of new books received for the year, printed in town report. No further business appearing the meeting was adjourned.

M. A. PEASE, Secretary.

—o—

LIBRARIAN'S REPORT

To the President and Trustees of FROST FREE LIBRARY: The Librarian submits the following report:—

The library has been opened as usual on Wednesdays and Saturdays through the year and the

circulation during the winter was exceptionally large but the total was less than the previous year.

The whole number of books issued 7074. The average circulation of magazines remains practically unchanged

The accessions were the same in number as last year, 85 books having been added. Of this number, by far the most note worthy is the ten volume set of the Photographic History of the Civil War. Of the accessions, twelve were gifts and thanks are due Mrs. Sanford Pierce and Mr. Chas. H. Bonney for their generous contributions.

Several books were also received from the late Mrs. R. S. Frost. Mr. Horace Hendrick has presented The Peoples Home Journal, Rev. A. E. Gregg, The Outlook; and the Librarian, To Days magazine.

The receipts for the year were \$5.50 for magazines and \$25.06 for fines.

Respectfully submitted,

CARRIE KNOWLTON WHITNEY,

Librarian.

SUPERINTENDENT'S REPORT

*To the Members of the 'School Committee
of the Town of Marlboro' :*

Gentlemen :

In making this report of my work as superintendent of schools for the year 1913-14, I should like to mention a number of matters connected with the new schedule of work, the scholastic work in the high school and grades, the equipment, the teachers' meetings and other helps, the registration bureau, the parents' association, teachers' reports regarding attendance, janitor service, etc., and to include brief reports of the principal of the high school and the supervisor of music.

Schedule of Work

An important step in organizing the work of the grades and putting it on a systematic basis has been made through the preparation of an outline showing what books and topics should be taken up in each grade. Copies have been distributed to the schools and will be furnished to any parents who are interested. When marked by the teacher this booklet becomes a report showing what material each school has covered in a given period.

The arrangement of the work is such that the rural schools can combine grades 2 and 3, 4 and 5,

and 6 and 7, taking up one-half of two years' work one season, and the other half the next, so making 5 instead of 8 divisions the maximum in a mixed school of all ages. The outline and reports make it possible to keep account of the progress of each child through the course, regardless of changes of schools or teachers, in a way that was not possible when there was no definite schedule to go by.

Booklets of test questions for grammar grades, memory selections for primary grades and primary seat work have been added to those mentioned last year. Others on general methods, arithmetic, memory selections for upper grade seat work are in preparation.

Scholastic work in the High School

The improvement in scholastic work that is most evident is found in the high school. In the State high school report for last year the name of our school appears among those deficient in English, Latin, French, geometry, physical geography, astronomy and Geology, and it might well have added physics, for there was no laboratory work worth mentioning. The defects referred to were either insufficient amount of work done, excessive number of failures, or lack of laboratory practice. In other words, the teachers either had to go too slowly, or fail to keep their pupils up, or else attempt to carry on work without proper apparatus for doing it. The work examined from time to time by the writer was found to be decidedly weak both in recitation and on paper, except in the case of a few pupils naturally brilliant. Some of the written work did not reach the standard of a good fifth grade. But fortunately prospects for this year

are very much brighter. A change in the course of study does away with the old twelve week courses in physical geography, astronomy and geology which we have no facilities to teach. Instead, we have introduced a course in general science, treating of the most striking and important principles and appliances in all the sciences—also we have made provision to take up, every other year, a combined course in commercial law and commercial geography, alternating with a year of bookkeeping and commercial arithmetic. Modern European history is made to alternate with ancient history on the theory that the students should learn something of the great men and nations of modern times as well as the half forgotten events of antiquity.

Changes have been made in the laboratory, under the direction of the principal, so that now our students can do work comparable with the best work of other places. Best of all, there is a spirit of energy evident among both teachers and pupils, quite in contrast with the torpid indifference more apparent in former days.

In the Grades

In the grades English still continues to be emphasized as the most important subject of the grammar schools, with the result that our pupils are mastering a style, in written work at least, that is creditable. Much remains to be done, however, to make both the spoken and written language of the pupils as good as the importance of the subject deserves.

Drawing has been given by the teachers this year without the assistance of a special supervisor. The results attained in a number of schools are very creditable.

The teaching of domestic science and manual training by normal post-graduates, who are specializing in these subjects under the personal direction of the normal school faculty, is an improvement, from the standpoint of economy of time and money, at least. The expense is small. The boys and girls of a whole grade are both occupied at the same time, doing away with the necessity of the grade teacher's repeating her work with each section separately when one-half of the class at a time are working in the basement.

The equipment for carrying on these branches is much more adequate than it was last year. The chief objections to the work, mentioned in my report a year ago, have now been removed.

Lowellville

At the opening of the school year there were no beginners at Lowellville. The average age of the 15 pupils who were attending there is 9 years and 2 months, about the average age of fourth grade pupils. As the lower primary school at the Center building was smaller than usual, and the other schools in the building uncommonly large, and as it seemed a distinct advantage for the Lowellville children to get the benefit of the kind of instruction given in the village, we transferred them to the primary room and allowed the teacher from Lowellville to take part of the assistant work that had formerly been done by a teacher from the normal school. A team is provided in bad weather for the pupils that live some distance beyond the Lowellville school. This ought to make up for the little extra distance they have to travel when the

going is good. The pupils get the benefit of better schooling. The town gets the benefit of a part of a teacher's time in rooms where two teachers are needed.

Equipment

Most of the money spent for books this year has gone to fill out our stock of series already in use. Some new supplementary reading has been added. Supplies for this and three other towns have been ordered in one lot from the lowest bidder. A great deal has been done in rebinding old books. All books have been given a coat of spar varnish on the outside, which makes the covers ink and water-proof and much more cleanly and durable. In my opinion the usual appropriation for text books and supplies has been too small. Wilton, with exactly the same number of pupils appropriates \$600 instead of \$400, and this is not more than enough to provide what is necessary. It is false economy to pay high salaries for teaching and then allow the work to be hampered for lack of good tools to work with. It is true that half the money spent for school supplies is wasted where books are not mended and writing materials carefully managed. We are doing both, and have added materially to our equipment, we still need rigid economy but with a little more working capital.

With the installation of screen or jacket for the Depot school, sanitary seats with spring hinges for all boys' closets, an additional supply of wall maps and a little more blackboard in our rural buildings, we shall have practically everything recommended by the State Department in its "Suggested Minimum Schoolroom Equipment for Elementary Schools."

There is need of extensive repairs in the outside school buildings. The teacher and pupils in the Wallace school have removed the torn, discolored wall paper and have the walls ready to paint. In the Depot school they have scrubbed the ceiling clean with a dry brush and washed the windows. The interiors of both these buildings should be made clean and attractive and the battered fragments or doors and sashes that have been accumulating for years should be replaced with whole ones. Shutters on the rural schools would save much lawless vandalism during vacations.

While the teachers in the village school all report a great improvement in the heating of their rooms lately, there is still the need for the change in the heating plant as mentioned in the last report. Steam would probably be much more efficient and economical than the present system.

Medical Inspection

Again and again there is forced upon us the need of at least one thorough medical inspection each year. Sore's, adenoids and tubercular symptoms may be apparent enough to teacher or superintendent, but some one more expert should be at hand to pass judgment upon them. There are many other less conspicuous afflictions interfering with a child's own or his neighbor's safety that only a competent physician can diagnose. We owe it to the sound and to the affected alike to have the schools periodically inspected. In many places the dentists work in harmony with medical inspectors and give their services at reduced rates to those whom the school physician send to them for treatment.

Teachers' Meetings and Helps

During the summer vacation a two weeks' session for the teachers of the district was held in Marlboro'. Of the 49 members who were in attendance, 20 were from Marlboro'. The subjects of the morning sessions were "History of Education," "Psychology," "School Management," "Primary Arithmetic," "Reading," "Cultural English," "Technical English," "Seat Work," and "Science." Afternoon sessions included daily practice in sight singing and drawing, and in the evening a course in music appreciation and a number of entertainments were provided.

No other meetings have been held this year except for the teachers in the village and an institute conducted by the State Department. Several meetings are scheduled for the spring term with the following topics "Taylor's principles of scientific management and their schoolroom application "Vizual mathematics;" "New light on the psychology of interest, with devices;" "Teaching how to study, with seat work devices for grammar grades." Any who are interested are invited to attend.

With a view to stimulating interest in neighboring schools and in the good ideas of other teachers, the writer has collected samples of pupils' work and passed them on to other places. Teachers are thus able to keep somewhat in touch with each other and to judge their own work by others' standards,

A Teachers Registration Bureau

One of the most important parts of a superintendent's work is to be able to advise in regard to the employment of new teachers. Ordinarily,

where salaries are low, the superintendent is forced either to choose from among his own acquaintances and the few candidates who happen to apply, or else call upon the teachers' agencies to furnish applicants whose records they have investigated. If he depends wholly upon his own lists, he is forced to accept a good many who are incompetent. If the agencies are consulted, salaries are reduced 5 per cent., for that is the regular commission of the agencies. This charge does not appear on the records as one of the town's expenses for it is paid by the teachers, yet in the end the town must bear the burden, for it must offer these applicants pay enough to cover both a salary and a commission.

The writer has attempted to remedy the difficulty to some extent by establishing a bureau, supported by a number of towns, where applications are received and the qualifications of candidates investigated. The information is kept on file for the use of anyone who may have a vacancy. In this way the work of the agencies is accomplished with very little expense. The plan makes it easier for teachers to find places and it enables committees to select the best candidates available at the salaries they can pay. Twenty-two towns have united with this one. One hundred and twenty-five teachers have been registered. Four high school and twenty-five grade teachers have been given positions. The entire expense has been less than an agency's commission would have been for one of the high school positions.

An Exchange

In educational circles a good deal has been said about "surveys" or investigations of the city's

school system by a corps of outside experts, who study the various schools in detail with a view to measuring and, without bias, rating their actual efficiency. Something of the advantages of a survey might be secured, in a rough way, by two superintendents changing towns and each making a report on conditions as he finds them in his neighbors' territory. At least the scheme would afford an interesting glimpse at the situation from another's standpoint. Plans are under way in this town for such an exchange for a short time with a neighboring superintendent.

A Parents' Association

Whatever the system and methods in vogue and whoever is chosen to administer them, the final burden of responsibility rests with the citizens. The schools will be as good as the people demand, or as poor as the people will tolerate. This does not mean that mere faultfinding will accomplish much, especially the vague, indefinite kind that springs from personal disfavor or poor digestion. But a constructive interest that is willing to spend a little time in studying educational matters, to learn what can be done and what ought to be done, and to lend support to the wisest and best means of improvement, can accomplish more than any other factor in school administration.

With the hope of interesting parents and others in an organization for the study and improvement of the schools, we have sent letters to a good many people in the district, describing the purpose of such an association and inviting co-operation.

These societies, meeting once a term or oft-

ener to hear speakers and discuss educational topics, have been of great interest and service in other parts of the State and are likely to accomplish as much here. Considerable outside talent is available for such meetings. There are always local topics that ought to come in for attention. If the gatherings did no more than bring teachers and parents together for a few minutes' discussion of their common problem, the work would be well worth the effort.

Teachers' Reports

The following reports recently filled out by the teachers for the last two terms may be of interest.

Approximately, how much time have you spent in mending or varnishing books? One; 40-60 hrs., one; 6 hrs; one 3 hrs., four, 0

How much in studying supplementary material used in connection with the lessons you teach? One 100 hr.; one 25 hr.; one 8 hr.; one 1 hr.; three, nothing or could not estimate.

How much in general professional reading? One, 24 hr.; one 8 hr.; one 1 hr.; three, 0.

What educational magazines do you read regularly? One reports 5; one, 4; one, 3; two, 1, one, 0

What professional books have you read? One reports 1; eight 0

What time have you spent in other work outside school hours preparing entertainments, supervising athletics, etc.? One reports 100 hrs., one, 90; two 6 hr.; four, 0.

How many cases of absence have you had that you know or suspect were illegal (not due to physical or mental inability of the pupil to attend)? One esti-

mates 12, one, one-fourth of all absences; one 6; two, none 0; one doesn't now.

How many cases have been reported to the truant officer? Two report 3, one, 1; three, 0

How many of these have been investigated by him and reported back to you again? One reports 3; one, 1; others, 0

How many cases of tardiness have you had so far this year? One, 61; one, 52; one, 42; one, 17, one, 13 Estimate the number that would have been easily avoidable. One reports $\frac{1}{2}$ to $\frac{2}{3}$ of all tardiness in this class; one, 52; one, 4; one, 15; one, 4; one, 13.

Is the school generally comfortable when you arrive in the morning? Seven, yes. Is it thoroughly swept? Seven, yes. How often? one, 5 times a week; five, twice; one, once. Is it thoroughly dusted, including woodwork, cupboard tops, etc. Seven, no. Are outbuildings cared for regularly? five report no.

These figures may be interesting to compare with similar reports from other towns in the district.

Respectfully submitted,

FRANK M. RICH,

Superintendent.

Marlboro', N. H., Feb. 18, 1914.

Mr. Frank M. Rich, Superintendent of Schools,
Sir:—

I have the honor of submitting for your consideration the report of the principal for the year 1913-14.

Work Done

When school opened affairs were evidently in a rather chaotic state. Several small repairs upon the furniture had to be made immediately. Since that time practically all of the High School text-books, which were then in a wretched condition, have been repaired and varnished. A few pieces of chemical apparatus have been constructed.

A very fair laboratory was fitted out early this year, and a reasonable amount of apparatus purchased. A stove was placed in the basement to heat the room. With that arrangement, and the use of double windows, we have just barely been able to work there during the winter. We have been able to offer a fairly good course in chemistry.

A Social club was early organized in the High School, and has been, and promises to be, a success. About six socials, and one sleigh-ride, have been held under its auspices.

We are confident that an advance has been made in the English course.

In history an attempt has been made in collateral reading to make use of books from Keene.

Recommendations

Many improvements are still necessary for the greater efficiency of the school.

Not less than seventy-five to a hundred dollars should be invested in physical apparatus. This appropriation ought to be available shortly after town meeting, and those supplies which would be used the very first part of the fall of 1914, should be purchased before June, in order that no delay may be caused next year.

A permanent hood, providing for the passage of obnoxious gases from the laboratory, should be installed. The space above and below the present cabinets in the laboratory, should be made into closets, where chemicals in bulk, and various pieces of physical and chemical apparatus may be stored. A large closet, reaching from floor to ceiling, should be constructed in the passageway to the laboratory. This should be for the storage of maps, physical apparatus, and the High School text-books, which now lie open to the dust. It should also contain drawers for the duplicate report cards, perception cards, and school records, which should be filed as far as possible according to the card index system. Such a system is sorely needed in order that records may be arrived at a moment's notice. The cost of the above would not, probably, be over fifteen dollars.

The outbuildings should be repaired and thoroughly cleaned. Sand should be kept on hand to sand the closets, and to put upon the steps and

walks at the front of the school during icy weather.

The building itself should receive a thorough cleaning. Windows and pictures should be cleaned during every vacation. They are in a very unsanitary condition at the present time. The floors of the building should be cleaned and oiled.

More reference books in history are sorely needed by the school.

There is plenty of junior and senior reading matter in English, but there is great need or more for the freshmen and sophomores.

A movement is on foot to get electric lights into the building. The town should pay for their maintenance. The laboratory should be furnished with an adequate supply of electricity.

The main High School room should be provided with a good bookcase in which the reference books may be kept clear of dust.

School Spirit

I am very glad to be able to report a marked change in the spirit of the High school. The pupils are apparently taking a much greater interest in their studies, and in practically all cases are showing better results now than at the beginning of the year. As a whole, the spirit of co-operation between pupils and teachers prevails.

Respectfully submitted,

FRED W. CHAPLIN, Principal.

Marlboro', N. H., Feb. 14, 1914.

REPORT OF
THE SUPERVISOR OF MUSIC

*To the Superintendent of Schools:
Marlboro', N. H.*

The principles of sight singing have been taught and practiced in all the schools each day.

The revised edition of Normal Music Readers and charts has been used in the grades and the supervisor has visited the grades each week.

Musical interpretation and the lives of the great composers have been studied with much interest.

A program of songs used in the high school was given in the Town Hall on May 12, at which \$18. was made, to be used for the lighting fund.

An entire new series of music books is recommended for use in all the grades. The present stock is inadequate for the regular work, but could be used to good advantage for supplementary material.

Respectfully submitted,
BLANCHE T. GANE,
Supervisor of Music

ROLL OF HONOR

Respectfully submitted,

CHARLES L. BEMIS, Treasurer.

This is to certify that we have examined the books and accounts of the School Board and School Treasurer and that we find them correctly cast and properly vouched.

C. B. COLLINS, {
F. D. HEMENWAY, } Auditors.

Marlboro', N. H., March 3, 1914.

SCHOOL WARRANT

THE STATE OF NEW HAMPSHIRE

To the inhabitants of the School District of the town of Marlborough, qualified to vote in district affairs:

You are hereby notified to meet at the Town Hall in said district on the tenth day of March 1914, at two o'clock in the afternoon to act upon the following subjects:

1. To choose a Moderator for the coming year.
2. To choose a Clerk for the ensuing year.
3. To choose a member of the School board for the ensuing three years.
4. To choose a Treasurer for the ensuing year.
5. To hear the reports of Agents, Auditors, Committees, or Officers, heretofore chosen, and pass any vote relating thereto.
6. To choose Agents, Auditors and Committees in relation to any subject embraced in the Warrant.
7. To see how much money the District will raise and appropriate for the support of Schools.
8. To see how much money the district will raise for Repairs and Insurance.
9. To see what sum of money the district will raise to pay the district officers.
10. To see what sum of money the district will raise for Superintendent.
11. To see if the district will raise a sum of money to continue a course in Manual Training, Drawing and the Household Arts.

12. To see if the district will vote to discontinue the Marlboro' High School at the close of the present school year in June, or act in any manner in relation thereto.

13. To see if the district will vote to make the standard of the Grammar School such as will entitle graduates therefrom to admission to any High School approved by the State Superintendent of Public Instruction.

Given under our hands this twenty-first day of February, 1914.

LEVI A. FULLER, } School Board
 RAY H. PAGE, } of
 CLINTON COLLINS, } Marlborough.

VITAL STATISTICS

To the Selectmen:

In compliance with an act of the legislature passed June Session, 1887, requiring "clerks of towns and cities to furnish a transcript of the record of births, marriages and deaths to the municipal officers for publication in the annual Report." I hereby submit the following:

I hereby certify that the foregoing transcript of births, marriages and deaths is correct according to the best of my knowledge and belief.
 FRED E. ADAMS, Town Clerk.

WARRANT FOR TOWN MEETING

THE STATE OF NEW HAMPSHIRE

To the inhabitants of the Town of Marlborough, in the County of Cheshire in said State, qualified to vote in Town affairs:

You are hereby notified to meet at the Town Hall in said Marlborough on Tuesday, the tenth day of March next at nine of the clock in the forenoon, to act upon the following subjects:

1.—To choose all necessary Town Officers for the year ensuing.

2.—To raise such sums of money as may be necessary to defray town charges for the ensuing year, and make appropriation of the same.

3.—To see what sum of money the Town will raise for the support of Electric Lights.

4.—To see what sum of money the Town will raise for Memorial day.

5.—To see what sum of money the Town will raise for Old Home Day.

6.—To see if the Town will vote to continue the Liquor Agency or act in any manner in relation thereto.

7.—To see if the Town will vote to repair sidewalks; raise money for the same or act in any manner in relation thereto.

8.—To see if the Town will vote to raise fifty dollars for the extermination of Browntail Moths or act in any manner in relation thereto.

9.—To see if the Town will vote to purchase a set of Hay Scales, raise money for the same or act in any manner in relation thereto.

10.—To see if the Town will vote to raise the sum of three hundred dollars to be expended by the Cemetery Committee of the Town in fencing, grading and improving the newly acquired part of Pine Grove Cemetery.

11.—To see if the Town will vote to purchase a new Snow-plow for the sidewalks, and raise money for the same, or act in any manner in relation thereto.

12.—To see if the Town will vote to build a sidewalk near the Brick Church, and raise money for the same, or act in any manner in relation thereto.

13.—To see if the Town will vote to raise money to resurface Tarvia road on Main street if thought advisable by road agent or act in any manner in relation thereto.

14.—To see what sum of money the Town will raise for improvements and repairs of the Fire Department, or act in manner in relation thereto.

15.—To see what sum of money the Town will vote to raise for the installation of a new electric light at the head of School street, or act in any manner in relation thereto.

16.—To see what sum of money the Town will vote to raise for the installation of a new electric light at corner of street near George Beauregard's residence, or act in any manner in relation thereto.

17.—To see if the Town will appropriate any sum of money for a series of Band Concerts to be given this ensuing summer by the Marlboro' Band or act in any manner in relation thereto.

18.—To see if the Town will grant to the Marlboro' Band the use of the Upper Town Hall or the Engine Hall for rehearsals for the ensuing year.

19.—To see if the Town will vote to exempt for a term of years taxation on any new building or business which may be erected or established on the site of the Knowlton sawmill so called, or act in any manner in relation thereto.

20.—To see if the Town will vote to raise money for relaying the water pipe from Dr. Aldrich's residence to the Town Hall or act in any manner in relation thereto.

21.—To see if the Town will authorize the Selectmen to borrow money on the credit of town.

22.—To hear reports of the Town Agents, or committees or other officers heretofore chosen or appointed and to pass any vote relating thereto.

23.—To act upon any other business that may legally come before this meeting.

Given under our hands and seal, this twenty-first day of February, in the year of our Lord nineteen hundred and fourteen.
