Warrant for Annual Meeting

STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Wilton in the County
of Hillsborough in said State, Qualified to
Vote in Town Affairs:

You are hereby notified to appear at the Town House
in said Wilton on Tuesday the eighth day of March next
at nine o'clock in the forenoon to act upon the following
subjects:

1. To choose all necessary town officers for the en-
suing year, and a member of the Board of Selectmen for
a term of three years, a member for the term of two
years and one for the term of one year.

2. To bring in your ballots upon each of the ques-
tions submitted by the Convention to Revise the Con-
stitution relative to the amendments proposed by said
Convention at a session held on January 28, 1921.

3. To hear the reports of town officers, agents, and
committees and pass any vote relative thereto.

4. To see what sum of money the town will vote to
raise and appropriate to defray town charges for the en-
suing year, including maintenance of the poor, roads
and bridges, street lighting, flushing of the sewers,
water works and sewers, state and county tax, interest
on debt, board of health, salaries of town officers and
expenses of the same, fire department, moth extermina-
tion, cemeteries, police department, serial notes and
bonds, free library, patriotic purposes, state aid and
trunk line maintenance, and miscellaneous items.

5. To see if the town will grant the free use of the
town hall for the following purposes: Abiel A. Liver-
more Post 71, G. A. R., Memorial day and evening; Roy

Bent Post 10, American Legion, for the annual party; public schools for Memorial and graduating exercises; and the fire department for the annual party.

6. To see what action the town will take in relation to construction of state aid roads and raise and appropriate money for the same.

7. To see what action the town will take in regard to discount on taxes and also to authorize the selectmen to borrow money in anticipation of taxes.

8. To see what action the town will take relating to observing Old Home day during the week of August 20, 1921.

9. To see if the town will vote to fix up and furnish one of the rooms in the town hall for the use of the American Legion and raise and appropriate money for the same.

10. To see if the town will vote to extend the water pipe main on Pine Valley street into the town of Milford or take any action relating thereto.

11. To see if the town will vote to construct a sewer on Pine Valley street to connect with a sewer to be constructed by the Town of Milford, and raise and appropriate money for the same or take any action relating thereto.

12. To transact any other business that may legally come before said meeting.

Given under our hands and seal this 19th day of February in the year of our Lord Nineteen Hundred and Twenty-one.

WILLIAM E. HICKEY
GEORGE W. MARDEN
JOHN F. HURLEY

Selectmen of Wilton, N. H.

BUDGET

Estimate of Revenue and Expenditures for the Ensuing
Year, Feb. 1, 1921 to Jan. 31, 1922; Compared with
Actual Revenue and Expenditures of the Pre-
vious Year, Feb. 1, 1920 to Jan. 31, 1921.

SOURCES OF REVENUE	1920	1921

Report of Selectmen

To the Citizens of Wilton:

Your selectmen present the following report for the year ending January 31, 1921, and trust it meets your approval:

The year just closed has been a bad one in a financial way, owing chiefly to the terrible condition on our high-ways. During the winter of 1920 the town was called upon to expend an enormous amount of money to break roads. This, together with the collapse of the bridge over Gambol brook near Gray's Corner and the prevailing high prices of material, labor and teams, has caused an expenditure of money in excess of the appropriation. However, we believe no money has been wasted and trust you will approve of the same.

Town House.

At our last annual town meeting the sum of \$500.00 was appropriated to begin repairs to the plumbing which is in an unsanitary condition, but owing to the high cost of labor and material we decided to postpone work on the same. However we strongly recommend the work be done during the coming year if conditions warrant.

It was left to the board of selectmen to arrange a new schedule of prices for the use of Town Hall and supper room. Your board adopted the following schedule:

Residents. Until 11 o'clock p. m. \$7.00; until 11 o'clock p. m., with heat \$9.00; one show rehearsal free; one show rehearsal with heat \$3.00; basketball practice, per hour \$1.00.

Non-Resident. Until 11 o'clock p. m. \$11.00; until 11 o'clock p. m., with heat \$14.00.

Use of supper room \$4.00; use of scenery \$3.00. All additional time for use of hall per hour \$1.00.

A new license to operate moving pictures in the hall was granted by the selectmen. The show has been operated four nights per week except when the hall was taken by the selectmen for other purposes. This has added additional revenue to the income and will materially help in maintaining the building. Owing to trouble in the past the selectmen decided it to be for the best interest of the town to own the metal booth and curtain and purchased same. It is now the property of the town and can be used by anyone hiring the same.

During the summer the metal gutters became defective and it became necessary to replace the same. This has added considerably to the expense of the building but without doubt saved considerable expense later.

New Bridge

During the heavy rains in March the bridge over Gambol brook, near Gray's Corner, became unsafe and a temporary bridge was erected. The selectmen posted notices for a public meeting to consider a new bridge, but there was evidently a lack of interest among the citizens, but few attending. However, it was decided to replace the bridge with a re-enforced concrete arch and bids were asked for the same. The contract was awarded to the Sanders Eng. Co., of Portland, Maine, for \$7,165.00, exclusive of grading. During the summer the course of the brook was straightened and the new bridge located further down stream, removing some of the curve in the highway, adding somewhat to the cost of the bridge.

State Aid Construction

New road was constructed during the fall in the Intervale under the direction of Mr. J. N. Tuttle, commencing where work was left off last year. 2002 feet of gravel road was built, making a permanent road nearly to the schoolhouse. The board of selectmen was called upon to choose between building the Forest road and the Intervale. After investigating the matter it was decided

to continue the Intervale road, owing to the deplorable condition of the highway.

Federal Aid

The town at its last annual meeting appropriated \$1,500.00 for Federal Aid to rebuild the macadam road from the B. and M. station to the Milford line. Owing to the opinion of the State Highway Department that the amount available (\$6000.00) was insufficient to complete the job, work was not commenced. Instead the surface was patched, making an additional expense for Trunk line maintenance. It is the opinion of your board that this section of road will have to be attended to during the coming year.

Financial

It was brought to the attention of the selectmen that the law requiring all town debts to be placed upon a serial note or bond basis had not been complied with. Therefore we were compelled to retire all demand notes and issue instead serial notes. This has been quite a large undertaking and we are indebted to the Treasurer, Mr. Sanborn, for his assistance in the same.

We wish to call your attention to the financial condition of the town. Owing to the new bridge and the schoolhouse addition the debt has increased over \$23,000.00 during the year, nearly \$90,000.00. Taking into consideration the resources of the town and owing to state law, this sum will have to be paid inside of approximately 20 years. It will make a heavy burden upon the tax payer for some years to come. We therefore urge each and every citizen of Wilton to do all in their power to assist in keeping down expenditures.

Property in the Town of Wilton is assessed at the present time for all it can stand and we wish to call your attention to the fact that the selectmen are not responsible for high taxes, being compelled to raise the amounts appropriated at town meeting. Owing to

changing conditions some property was reassessed during the year. While this probably did not meet with the entire approval of the owners, it was an honest opinion honestly carried out for a more equal distribution of our tax burden. Therefore we wish to again call your attention to the fact that with an enormous debt and nearly \$9,000.00 of notes to retire annually, together with our necessary yearly expense, our only hope for reduced taxes is to insist on strict economy at our annual meeting.

Highways

The expense of maintaining our highways increases yearly. The cost of maintaining them during the year just closed has been a record breaker. The winter and spring of 1920 will, we believe, compare favorably with some of the old timers, remembered only by our oldest inhabitants.

The selectmen appointed Mr. J. V. Tuttle as Highway Agent and he has given entire satisfaction to your board and we trust his stewardship of our highways has met with your approval. Owing to the excessive cost of material, labor and teams and the frequency of storms we expended over \$4,000.00 on snow, but owing to the transportation of the mails and school children, it was a necessary expense. Continued rains during the summer and late fall caused many washouts and necessitated considerable expense in addition to the usual cost.

During the summer we purchased a Ford truck for the use of the agent at a cost of \$325.00. While no doubt it costs considerable to maintain the same, taking into consideration the service rendered, especially to the outlying districts, it has proved to be a good investment. Owing to trouble experienced in the past to obtain good bridge plank the selectmen and highway agent purchased about 15 M feet of chestnut bridge plank and while it added considerable to the cost of the department,

there is on hand, delivered to the various bridges, about 11 M feet of about \$600.00 value.

A petition was presented to the selectmen for a highway through the estate of the late A. D. Abbott to the residence of Charles Brown. After a public hearing and a thorough investigation it was decided to lay out the proposed highway, which was subsequently done. An award for land taken of \$100.00 was made to the Abbott estate. This road should have some work done upon it the coming year.

Suit Against the Town

During the year Mr. Joseph W. Robbins, through his attorneys, Doyle and Doyle, brought suit against the town. Without doubt Mr. Robbins experienced considerable loss caused by the overflow of the Hardy brook. The selectmen, through the town counsel, Mr. Cheever, answered the suit, denying the town responsibility. Said suit is still upon the docket of the Superior Court for Hillsborough County.

Street Lighting

It was voted at our last meeting to extend the lights to Hesselton corner in the Intervale. Application was made to the Milford Light and Power Co, but nothing has been done. It is the belief of your selectmen that the said company is not showing the proper spirit in co-operating with the town in carrying out the contract, causing a lack of proper service, not only in this instance, but to the general service. In many instances lights have been out several nights at a time while protests have been in vain. However, we live in hopes and trust conditions will improve the coming year.

We wish to thank the citizens of Wilton for their courtesies extended to your board.

WILLIAM E. HICKEY,
GEORGE W. MARDEN,
JOHN T. HURLEY,

Selectmen of Wilton.

Report of Fire Department

During the year ending January 31, 1921 the fire alarm has been sounded three times for chimney fires, which, with several still alarms, has constituted our fire suppression activities. There have been no fire losses.

A new truck has been purchased and fitted up to meet transportation requirements, and the old truck disposed of.

We would recommend that the chemical cart, purchased about ten years ago, be re-mounted for more rapid transportation to the rural communities; also the purchase of additional hose.

D. M. BRENNAN

J. F. HERLIHY

THOMAS A. WELLS.

Report of Cemetery Committee

The grounds of the several cemeteries have been well kept and are in an improved condition. There are no outstanding bills contracted by the committee. All the income of our special depositors has been expended as seemed best on the individual lots, and the same are in good condition.

The committee would suggest that the sum of \$400 be raised and appropriated for general care of the cemeteries, and in addition that the sum of \$100 be raised and appropriated for permanent roads and care of same in Mt. Calvary cemetery, said sum to be expended under the supervision of the Cemetery Committee. The sum of \$400 will be sufficient to provide a caretaker for the summer months, which the committee advises.

DAVID WHITING

G. G. TOLFORD

EDWARD W. HESSELTON

Cemetery Committee.

Report of Trustees of Trust Funds

Joshua T. Frye, Chairman

William E. Stanton, Clerk

David Whiting, Treasurer

There has been received during the year two Trust Funds. Each of these funds are for the care of cemetery funds. This makes 30 Trust Funds received by the Trustees. In March 1920 all deposits of Trust Funds in banks, made by the Trustees of Trust Funds were verified.

There has been paid to Edward W. Hesselton \$96.00 for the care of cemetery lots. A statement is presented showing where the funds are deposited, the amount of each fund and the income and expense of each fund.

Respectfully submitted,

JOSHUA F. FRYE,

For the Trustees.

Report of Soldiers' Memorial Committee

To the Citizens of Wilton:

Under Article 10 at our last annual meeting it was left to the moderator to appoint a committee of five members to install suitable memorials for all Wilton soldiers and sailors in all our wars, and appropriated the sum of \$1200 for the use of said committee. The moderator subsequently appointed Maurice J. Herlihy, Joshua F. Frye, Edward L. Killkelley, George W. Bean, and William E. Hickey to serve on said committee.

The committee organized with William E. Hickey as chairman and Edward L. Killkelley as secretary. Since organizing the committee has met twice each week, except during the warm summer months. A contract was entered into with the Wm. Highton Sons Co., for two bronze tablets, size 41 x 61 inches, to be placed in the brick panels at the main entrance to the town hall. The contract price was \$1100.

Your committee has found it a much more difficult task to make a correct list of soldiers and sailors than was anticipated. However we decided to make a thorough canvas of all available resources and leave no stone unturned to avoid any omission. The committee is still at work on the list and can report considerable progress, and hope to finish the same at an early date.

WILLIAM E. HICKEY

For the Committee.

Report of Water Commissioners

The various demands of the water works system have been attended to by the Commissioners and any chances for trouble anticipated, so far as possible. There has been an abundant supply of water the past year and analysis has shown this to be of satisfactory quality. A few leaks in the main pipes have developed but these have been promptly discovered and the necessary repairs made. During the past year ten new services have been installed. One hundred feet of 6 inch main has been laid on Pine Valley Street, most of the material for which we had on hand. Two hydrants were purchased, one being located on Pine Valley street and the other one placed in stock, in case of emergency, as it requires several months to obtain this class of goods from the foundry.

Owing to a lowering of the grade on Pine Valley street during the summer, it was found necessary to lower about 200 feet of the main pipe which was laid last year, so as to avoid chance of its freezing.

A request has been filed for an extension of the pipe line on Pine Valley street to the Milford line, a distance of 335 feet, also about 150 feet into the town of Milford, to supply houses which it is planned to erect the coming season.

We have had 20 meters repaired at the factory at an expense of \$112.44 and there are quite a number more needing repairs.

The maintenance expense has naturally increased very much in recent years, and as the time seems very remote, when the two principal items of expense, namely labor and material, will be reduced to the level prevailing at the time the present service rates were established, we believe that an increase in those rates is not only justified but a business necessity.

Report of Auditors

The accounts of the following officers have been examined, covering business for the year ending January 31, 1921:

Selectmen, Town Treasurer, District Treasurer, Trustees of Trust Funds, Judge of Municipal Court, Tax Collectors, (Mr. Putnam for the current year and Mr. Bean for the closing of the previous year) Trustees of the Hannah Howard and Isaac Spaulding Funds.

All the accounts are found to be correct, the books properly kept and the work neatly done. We have been shown the securities in the care of the various trustees, as well as vouchers for all payments.

Respectfully submitted,

REPORT OF LIBRARIAN

The Thirty-first Annual Report of the Librarian of the
Wilton Public Library for the Year Ending
January 31, 1921.

The library has been open 150 days. During the year six holidays occurred on library days, and one day in March it was not opened on account of a blizzard.

The total circulation of books and magazines was 16,308, an increase of 1,476 over that of last year. The average circulation was 108.

The number of books discarded is larger than any previous year as it was necessary to make room for newer books. All second copies and many books that were never called for were withdrawn and all that seemed readable were sent to the president of the New Hampshire Shut-in Society at Manchester, N. H., who was very grateful for them and informed us "it gave them courage to start a circulating library for Shut-ins."

The larger part of the non-fiction taken out is used by the pupils of the public schools. We wish it might be more generally read by the people of the town, as we

have many interesting books in that class in the library. The non-fiction shelves are now open to the public and we hope people will avail themselves of the privilege of making their own selection.

The table lamps which have been installed are much appreciated by the readers.

There have been frequent calls for fiction in the French language and a number of such books have been purchased. As most of them are published in paper covers it has been difficult to obtain as many as we desire, but we hope in time to make this department more complete.

In June a Neighborhood Meeting was held at the library. Librarians from several towns attended. The secretary of the Library Commission and the chairman of the "Books for Everybody" movement were present. A pleasant and profitable meeting was the result.

The State Library commission offered to all libraries in the state the privilege of selecting a number of books, in good condition, which had been used by the soldiers; the only expense being transportation. We received a package and intend to avail ourselves of a second offer which has recently been made.

REPORT OF THE TRUSTEES

The Gregg Free Library congratulates its patrons on another year of unqualified success. We have been able to make its rooms useful, not only to its readers, but to the Red Cross and kindred organizations and while the school building is going through a transition we have been able to give the District the use of one of our basement rooms for the primary department.

Our expenses for the year are a trifle more than the income, as will be seen by the Treasurer's report, the reason being the finishing of the gallery for the display of the very nice lot of paintings given us by the Lewis Estate. Mr. Ryder, the artist, has promised to superintend the placing and hanging of these pictures upon his return in the spring.

We would again suggest that an album be made of pictures, with a brief biography of the men who have made Wilton.

While the committee on the soldier records have accomplished much why not remember the men who were patriotic in working the farms and the mills to raise and earn money to care for the men who stood between them and the rifles of the enemy? The Southern Confederacy failed because their men were on the firing line, leaving no one at home to furnish supplies.

The expense of such a record would be small if the friends would furnish the photographs and a short biographical sketch, of say 50 words, giving the salient points of the man's life work. Don't forget the past. There are a lot of good things done by the fathers and the mothers we ought not to forget.

The Gregg Free Library is gaining power, influence and usefulness every day.

The donor builded better than he knew.

D. E. PROCTOR

SCHOOL CALENDAR 1921—1922

Fall Term: All schools 15 weeks, from Sept. 7, 1921 to Dec. 16, 1921.

Winter Term: High School, 12 weeks, from Jan. 2, 1922 to March 24, 1922. All other schools 11 weeks, from Jan. 2, 1922 to March 7, 1922.

Spring Term: High School 11 weeks, from April 3, 1922 to June 16, 1922. All other schools 10 weeks, April 3, 1922 to June 9, 1922.

NO SCHOOL SIGNALS

Three long blasts of the whistle sounded twice at 7.45 o'clock A. M. indicates that there will be no sessions of the schools during that forenoon. The same signal at 12.30 P. M. indicates that there will be no session in the afternoon.

REPORT OF THE SCHOOL BOARD

The Wilton School Board submits the following report :

At a meeting of the School Boards of the towns of New Ipswich, Temple, Greenville, Mason, Lyndeboro and Wilton we were fortunate enough to secure the services of Mr. Ralph P. Currier as superintendent of our District for another year. In his report Mr. Currier will speak of the teachers whom he has employed and of their work in our schools.

At the last annual School Meeting, held at Wilton Mar. 13, 1920, there was in the warrant an article asking for \$15,000 to build a new wing to the High School building as for a number of years the room furnished has not been adequate. The Board was assured that \$15,000 would be ample to complete such an addition. The money was appropriated and a building committee consisting of Mr. David Whiting, Mr. Maurice J. Herlihy and Mr. Richard Moore was appointed. This committee will also render a report of their work.

On Oct. 25, 1920 the Building Committee reported to the School Board that the money was spent and the building not anywhere nearly done. Accordingly the School Board called for a special meeting to raise more money for the completion of the annex. This meeting was held Nov. 13, 1920 and was adjourned three times, to Nov. 20, to Nov. 27, and to Dec. 4. During these meetings some of us learned a great deal about parliamentary law and that money cannot be appropriated at a special meeting unless half the number of legal voters at the time of the last regular meeting, are present. The number of votes required was about 320. The number cast was less than half that number but about the ratio of 7 to 1 in favor of completing the work. It seemed unwise to continue these meetings so we put off the vital question until the regular meeting in March and instead of being in March this year it will be on Apr. 2, in accord-

ance with the wishes of the State Board. At this time we hope every one will be present and help us to decide what to do in so important a matter. We thank our moderator, Mr. A. L. Curtis and our clerk, Mrs. Isabella Batchelder, who helped us so faithfully in these meetings, and also we wish to express thanks to those who came and voted.

Two citizens' meetings were held, the first on March 10, 1920, before the money was appropriated, and the second on Nov. 9, just before the special meetings. The Board is anxious for the parents to know as much as possible about what is being done in educational matters and are glad to answer any questions relating thereto.

As it was impossible to finish the schoolhouse we were obliged to provide other accommodations for some of the school work. Last year Mr. Charles Dunbar gave us the use of his tenement for the domestic arts classes. This made a very good suite for us and we were glad to hire the same tenement this year. The trustees of the library allowed us to use the room formerly used as a sewing room by the Red Cross, for our first grade school. This has made a very good school room for us and is convenient for parents to visit when they go to the library. Our thanks are due to the trustees for the use of this room. We also wish to express our thanks to Mr. Ernest Wright, who gave us the use of an excellent stove for the domestic arts room.

A slight change has been made in the age in which a child may enter our schools. For the past few years a little one must have attained the age of six years or older in order to enter in September, but now a child may enter in September if he will be six years old on or before January 1 of that school year.

With the higher prices we have been obliged to pay for teachers, books and supplies and other things needed in school work we have been obliged to increase our tuition from \$40 to \$55 a year and next year it may be even higher. Payment for the transportation of 7th and 8th

grade pupils will not be made by the State Department another year.

The transportation of school children has been somewhat of a problem to the Board. Throughout the year there have been but three pupils in the Davisville District and Miss Marion Hartshorn, who formerly taught the school there, has been hired to give them private instruction. This has cost much less than transporting them would have. One pupil from Abbot Hill, Master Arthur Keilig, has been boarded in the village. The School Board paid a sum equal to what it would cost to transport him, and his parents the remainder of the board.

The school at the Center has been closed for the past two years as there were not pupils enough to allow the Board to maintain a school there. This year it appears that there will be eight or ten pupils there, most of them small children, and therefore the school will probably be opened.

More attention has been paid to the health of the school children than in former years. For the past two or three years the three physicians of the town have made an examination of the pupils and reports have been sent home to the parents of cases which needed attention. In most cases the trouble if any, was defective teeth. Since the medical inspection this year, by the courtesy of Mr. Edward Abbot, of the Hillsborough Mills, Miss Ellis, industrial nurse employed at the mill, has visited the school building each afternoon and inspected the children and given what assistance she could. This assistance of Miss Ellis is very much appreciated by Supt. Currier and the members of the School Board.

The repair work this year has been largely on roofs. Necessary repairs were made on the main roof of the High School building when the slaters were working on the addition. By the requirements of the new state law the Abbot Hill building has been remodeled. Much

needed shingling was also done there at the same time.

Another year an immediate economy will be the renewing of part of the toilets in the basement of the High School building. These fixtures are so old that they cannot be kept in order. When the addition is completed the outside woodwork on the entire building should be painted. That on the old part has not been done since its construction twenty six years ago.

The School Board must ask the town to meet a deficit much of which could not have been planned on, to complete this year's expenses. At the last regular School Meeting no money was raised to meet the payment of either the first bond or the interest on the \$15,000, payable in January and July. Neither did we anticipate that the Building Board would fall short of money and that the School Board would feel it their duty to the citizens to take the responsibility of having the building closed and pipes protected, beyond what the Building Board had funds to do. Another expense which we were expected to meet occasioned by the addition was the payment for a partition which made two recitation rooms of the Assembly Hall. No money was raised to meet the expense of the repair work on the main roof of the High School building which it seemed opportune to do. The uncompleted building has nearly doubled our electric light bill, for the office has to depend entirely upon artificial light.

We had also to meet unexpected insurance, rent for the domestic science rooms, janitor service at the library, the purchase of a stove and other fittings, as well as fuel for both places, although we had purchased coal to heat the building when finished. The manual training boys, under the direction of Mr. Willis Hopkins, have completed an excellent laboratory table at half the expense of the price listed. As we had planned on \$500 which was to come out of the \$15,000 appropriated for the new addition, we had thought this an economy to be met be-

fore the building was completed.

Early in 1920 a car of coal billed from the mines to the Wilton School District was confiscated en route by the Lehigh Valley railroad. The coal which we finally secured to replace it cost nearly \$375 more than the first car would have done. We are still hoping to get something from this claim.

The School Board wish to call the careful attention of the readers of this report to Mr. Currier's more detailed statement of the deficit.

And now about the advisability of completing the building. Let us say what few people probably realize, with the building completed we should save, at the very least, more than \$375 a year or more than six months interest on \$15,000. The insurance alone on the uncompleted building is more than twice what it would be on a completed building of the same value. Is this not conclusive evidence that the building should be finished this summer?

The question of state aid for the coming year is a problem which only the Legislature can solve. There is so much unrest at the present time in that body that by request of the State Board our school meeting has been postponed till April 2nd. Not until then can we know how much we can depend on from the state, or how much to recommend the town to raise for another year.

It will not be possible to print the budget for another year in this report, but this will be available under a separate cover before the regular school meeting.

Please note in our School Treasurer's report "Cash in treasury Sept. 1, 1920, \$931.57. \$60.55 is the balance and \$871.02 has been received from next year's town appropriation. . . . Respectfully submitted,

JESSIE L. HATCH,
EFFIE E. DUNBAR,
PHILIP C. HEALD,

SUPERINTENDENT'S REPORT

To the School Board of Wilton:

Herewith I submit my second annual report as superintendent of your schools:

Enrollment and Attendance

As a comparison of the tables appended to this report show, the enrollment this year for all schools is about the same as that for last year, while last year there was an increase of eighteen over the previous year. The high school has made an appreciable gain while there has been a marked falling off in the two rural schools. There has been a decided improvement in both the attendance and tardiness records although our expectation of a fine record last year was spoiled by the epidemics of mumps and measles. For the first four months of this year Miss Sweet's school and Miss Doherty's school have shown the highest per cent of attendance while Miss Doherty's pupils have made an enviable record in the matter of tardiness, only four cases being recorded. Mention should also be made of Miss Mary Doherty's school at Intervale which has an average thus far of 96.69 per cent. With the exception of a few families it is evident that parents appreciate the value of regular and punctual attendance.

Changes in the Teaching Force

The measure of a school is the teacher it possesses. A town which can retain its experienced teachers, providing it has been fortunate in the original choice, is sure to have good schools. Few changes have been made this year in the teaching force. While we regret very much the loss of Mr. O'Brien, whose sterling qualities and kindly sympathy made him respected by all, yet the Junior High School has apparently not suffered through the choice of his successor. Under Mr. John Urquhart,

who is a graduate of the Massachusetts Agricultural College, the school has been organized in an efficient manner and general improvement both in scholarship and school spirit has been made. In the spring Miss Catherine McCarthy resigned her position as teacher of English and History. Her place has been filled by Miss Helen Johnson, a graduate of Wheaton College. Miss Johnson is attacking her new problems as a teacher with energy and is proving a good organizer of school activities. It was our policy to secure at least one teacher for the seventh and eighth grades who was normal trained and who should have a nappreciation of what boys and girls of the adolescent period require. After considerable search our choice fell on Miss Florence Wheeler, a Wilton girl, who last year taught elementary science in the Junior High school at Keene. In her organization of the general science course in our school Miss Wheeler has measured up splendidly to the reputation she had previously established. She has also done very efficient work as teacher of the seventh and eighth grade mathematics, eighth grade history and manual training. Mr. Willis Hopkins had charge of the wood working for a few weeks in the fall term, but pressure of outside duties made it necessary for him to discontinue the school work. Mr. Hopkins stayed long enough however to complete with the assistance of some of the high school boys, a chemistry table for the laboratory. For this we feel deeply indebted as a table of splendid workmanship has been made and at a saving to the town of about \$200. Miss Emma Southwick occupies the position as music supervisor, left vacant by the resignation of Isabel K. Emerson. Miss Southwick comes to us from Massachusetts schools and has made a most favorable impression. We regretted very much the loss of Mrs. Jennie Abbott, teacher of the Abbot Hill school. Mrs. Abbott has had this school several years and has given her pupils thorough drilling in the fundamentals. Miss Marion Abbott

is very ably filling her place and we have no cause to worry on account of the change. During the fall term Miss Winifred Fitzgerald resigned as teacher of the second grade and as yet no regular teacher has been hired. Miss Abbie Kendall substituted for three weeks in November, while for the past three months Miss Lulu Blanchard has filled the position. A new position was created this year by the separation of the first and second grades. Miss Gladys Wilder, a graduate of Keene Normal School, was secured for the first grade. During the fall term the children of the first two grades went to school on part time, one grade occupying the primary room in the morning, the other in the afternoon. As the children were not making satisfactory progress under this arrangement a change was considered advisable. Through the courtesy of the trustees of the Public library the first grade was installed in the basement room of the library, formerly used by the Red Cross. As a temporary arrangement this has proven most satisfactory, little difficulty being experienced by the janitor, Mr. Putnam, in keeping the room warm with a wood stove. Miss Wilder has a splendid little school and although a rather poor beginning was made because of conditions at the High School building, the children are now improving rapidly.

Work in the Grades

In the second grade the children were seriously handicapped during the fall term because of the shortened school day and frequent changes in the teachers. Under the trained guidance of Miss Blanchard, however, good progress has been made, the work in numbers being especially satisfactory. For the remainder of the year emphasis will be placed upon the reading in which the children as a whole are a little below the average. Under the efficient teaching of Miss Ellen Doherty splendid progress is being made this year by the children of the third and fourth grades. Because of rather disad-

vantageous conditions last year the third grade is still below the average. However, if the progress the fourth grade has made under Miss Doherty is any criterion little fear need be felt of the ultimate results. The fourth grade is now quite up to standard in both reading and arithmetic while a year ago at this time we were wondering how they could possibly be promoted to the fourth grade. The fifth and sixth years are the ones in which children are drilled in grammar and arithmetic and the fundamentals in each subject are supposedly completed. This is impossible of accomplishment however, unless the work as laid out by the program of studies has been thoroughly covered in the preceding years. We are fortunate in having a woman of Miss Sweet's qualifications as teacher in these important grades and good progress is being made although the sixth grade has much work to do during the remainder of the year to cover the requirements.

Junior High School

In the Junior High School the regular subjects are the same as last year although the program has been enriched by additional subjects which come once or twice a week. Miss Huse has organized a course in geography based on current geographical magazines and readers, which is proving not only interesting and instructive but also furnishes some review of work covered in the lower grades. Drawing is also taught this year in the seventh and eighth grades, the mechanical drawing of the boys correlating with their work in manual training. Mr. Urquhart with the boys and Miss Elwell with the girls have cultural and organization periods one a week. Especial emphasis has been laid this year on affording practice in the fundamental subjects. Arithmetic received special attention in the seventh grade mathematics and in concrete geometry only such figures and problems have been studied as have practical application. Under Miss Johnson the children of these two grades are re-

ceiving through work in composition, constant practice in the application of grammatical principles. A word should be said in commendation of the work of the boys and girls in Miss Wheeler's general science classes. Eager to know and interpret the laws of nature children of this age are very apt pupils. Boys learn by actual construction why things work and how they work. At the present writing the children are making fireless cookers and Walter Herlihy is cooking food in his cooker in the most approved fashion. The time spent in cooking and sewing has also been increased this year, the attempt being made to give the girls a thorough foundation in plain cooking and sewing. While I feel the place of our Junior High School in our system of education is assured yet any recommendations for the future should, I believe, look toward affording still greater opportunity for practice in the fundamental subjects.

High School

For any detailed discussion of work in the high school reference may be made to the report of the headmaster, Mr. Raymond Hutchinson. It is only necessary to note the few changes which have been made this year in the program of studies. The course in history and appreciation of music which was formerly offered in all four years of the Domestic Arts Curriculum has been dropped. Art is no longer given in the Freshman and Sophomore years, although the time allotted to this subject in the Junior and Senior years has been doubled. Physics is now given in the Sophomore year and is a required subject in all curricula. Chemistry is offered in the Junior year. Practically all of the mathematics offered to the Senior High School is given in the last two years. Geometry, advanced algebra and trigonometry are subjects for minds of some maturity and I feel that the proper place for them is late in the high school course. My only suggestion for change in the present

program is the offering in the Senior year of a course in business practices and economics.

School Gardens

Considerable impetus was given to the work of gardening last summer by the offer of Mr. A. J. Foster of land for gardens on his farm in the west part of the village. Under the supervision of Mr. Hutchinson twenty-four young gardeners worked their plots during the summer. With two or three exceptions their gardens were a reasonable success and many favorable comments on the general appearance of the plots were heard from passers-by. In the fall an innovation was made by having a fair for all the towns in the district. This fair was held in conjunction with the regular fall exhibit of the high school. Judging by the number of exhibits and their quality it was a success and worth repeating each fall. We feel indebted to Advance Grange of Wilton for its cooperation through the offer of a prize for the best exhibits of the visiting towns. Lyndeboro took first prize, a large picture of Lincoln, while Mason carried off second honors and was awarded a picture of Washington. In the Wilton schools the first prize was won by the third and fourth grades, thus proving that quite young people sometimes make very good gardeners.

School Finances

While complete figures cannot be given at this time showing the exact financial status of the school district nevertheless it is possible to give a general idea to what extent and in what manner the district is in arrears.

At the school meeting last year a \$5 tax on the 1920 inventory, which amounted to \$7511.84 was voted for the support of elementary schools. The budget of the school board as printed in the town report last year called for an expenditure of \$10,968., although the budget of actual expenditures for the year as sent in for the approval of the state board was considerably in excess of

this figure. The increase over the original estimate was due almost entirely to three factors; namely, the big advance in the price of coal coupled with the necessity of making provision for heating the new addition, the advance in teachers' salaries, and unexpected demands for transportation. It is upon this budget that the state board has based its allowance of state aid for the present year, and it was expected that any deficit for reasonable expenditure above the \$5 tax would be paid out of the state fund. After all budgets from state aided towns were in the state found itself confronted with a demand for \$750,000, with only \$280,000 to pay the bill. It became necessary therefore to allow aid for only such expenditures as would provide the bare necessities of a common school education. Expenditures for teachers of special subjects such as singing, drawing, domestic arts and manual training, and transportation of seventh and eighth grade pupils from uncrowded rural districts to village schools, were not allowed. Allowances in general were based on state averages, and towns with abnormal expenditures under any item were cut accordingly. With this brief statement of the basis adopted by the state board for granting state aid it may be well to explain the approximate deficits under the various headings occasioned largely by not being allowed the state aid asked for.

Under transportation the actual expenditures contemplated for the year is \$869.50, while the state allowance is \$576. This makes a deficit of \$293.50 occasioned entirely by the transportation of seventh and eighth grade pupils to the village. This year the state has not allowed the expense of a music teacher. The cost of our music teacher for the elementary schools is \$471, which includes expense of transportation to the rural schools. No allowance was made for our teachers of other special subjects, including drawing, manual training and domestic arts; however the actual deficit here is slight, as

nearly enough money was raised last year for teachers to cover the expenditure under this heading; \$71.11 will cover this deficit. Accordingly the total deficit on all teachers including music supervisor is \$542.11. The other item which shows a heavy deficit is fuel. The cost of fuel for all purposes this year will be approximately \$1618, of which sum \$1553.50 has already been expended. There were two contributing causes for this excessive expenditure, namely the high price of coal and the necessity of making provision for heating the expected new wing to the high school building. As a result of the building not having been completed from 20 to 25 tons of the present supply will not be used this year. The budget allowance for fuel including the sum raised for the high school, was \$900. Consequently the deficit for fuel will be approximately \$718.

There are also smaller deficits under some of the other headings which total, including the above figures, approximately \$2300. There has also been extra expense to the district occasioned by not having the new wing for occupancy this year. Summarized these expenditures have been approximately as follows: Rental and fuel for domestic arts classes at Charles Dunbar's, \$250; cost of having first grade in library, \$125; cost of partition in assembly room and boarding up opening to protect old building, \$55. Other expenditures incident to the new building for which assessment should have been made include the payment of \$1000 July 1 to retire the first serial bond and the first year's interest amounting to \$750 on the \$15,000 borrowed. The total allowance for state aid this year will be approximately \$2500, although only 53 per cent of the sum is sure to be available. The balance or 47 per cent will be sent provided the legislature votes to raise the deficit of \$245,000 for which the state board has asked. Accordingly it will be impossible to state definitely what the deficit of the school district will be until this matter of the state de-

ficit has been acted upon. For this reason it has been necessary to postpone the school meeting until about the first of April. Before school meeting a pamphlet will be issued containing an exact statement of the deficit for the present school year, and the school board's report of assessments required for the support of schools next year.

Medical Inspection

Ever since the Medical Inspection law went into effect it has been recognized by the physicians that the examinations themselves may or may not be of any particular benefit to the children. Parents are notified if any physical defects are found, and there the responsibility of the physician ceases. It appears than an increasing number of people are recognizing the value of the inspection as the report of the school physicians this year shows that 62 defects have been remedied since the last examination. The decrease in the number of cases of hypertrophied tonsils is particularly marked. There are still a great number of cases of diseased tonsils and adenoids, however, and many of these probably should be attended to. While there is a decrease in the number of children who are unvaccinated, still there are a great many who should be vaccinated before the beginning of another school year. Following is a summary of the report of the school physicians: Malnutrition, 3; Defective vision 27, defective hearing 2, anaemia 11, nervous disease 1, cardiac disease 1, skin disease 1, orthopedic defects 3, defective teeth 171, hypertrophied tonsils 32, adenoids 16, enlarged glands 1, unvaccinated 83; number of defects remedied, 62.

In many towns in the state nurses are employed by the district to supplement the work of the school physicians. Through the courtesy of the Abbots we have had the service since November of Miss Myra Ellis, the nurse for the Hillsboro Mills Corporation. Miss Ellis

visits the schools each day and we have appreciated very much her helpfulness in looking after the physical welfare of the children. To show the nature of her work I can do no better than to include in this report a brief statement from her of what she has done:

“On November third last the first nursing visit was made. Each day the grades were visited and cases needing attention were called from the class room and examined carefully. If the trouble was very clearly shown to be of light nature advice was given and such cases followed up each day to see that the corrections had been made; but should the trouble appear to be questionable or decidedly serious the family of the individual case was visited and strongly advised to secure medical assistance. With the exception of a few head colds and inflamed throats very few scholars came up for treatment before the first of the new year. As the doctors had just completed their physical examination of the scholars except the eyes and ears, this remaining part of the examination was taken up by this department and finished before the end of the school term. About this time letters were being received from parents of some of the scholars complaining of *Pediculi* in the heads of their children which they claimed were being contracted in school. All heads were examined and all those found to be infected with live vermin were sent home to be attended to, while those showing traces only of past infection were advised as to the care of the scalp and hair and watched carefully from day to day to see that they did not become a menace to the others.

“After the opening of the school in January many cases of small infectious cuts and sores were presented for treatment, and a small first-aid outfit was purchased for the immediate attention of these cases. Each day these small wounds were cleaned and dressed, thus preventing the drainage from falling on books, furniture, etc. and therefore being spread around among all the

pupils. Various sore throats were inspected and gargling at home was insisted upon. These were watched each day and in cases where it was thought advisable the teachers placed them in different seats, thus safeguarding the others.

"Since the medical inspection cards were sent out this year various corrections have been noted, which is very encouraging.

"Since January 217 cases were given attention, six homes were visited in regard to the health of their children and one health talk was given in one of the grades."

The business of running the schools is a cooperative enterprise in which all people in the community should take an intelligent and active interest. The educational policy, whatever it may be, should be the product of the minds of those men and women who understand the educational needs of boys and girls. When this policy is determined I believe it should be a matter of common knowledge among all people so that any changes recommended may be the result of intelligent forethought. For this reason I feel that citizens and parents should embrace every opportunity to learn what the schools are trying to do; that they should attend meetings held for the purpose of discussing school questions, not only to learn how this educational policy under which these schools are run, is being worked out but also to express their own ideas. In this way the children would get the maximum benefit of the combined efforts of teachers and parents and schools would become more responsive to public demands. Would not some organization formed for the immediate purpose of making better schools be of value? I am throwing this out as an open question with the hope that a responsive chord will be struck.

It has been a pleasure to work in your schools and in all of our undertakings I have felt the combined cooperation of the School Committee, teachers, and citi-

zens. For this support I am deeply appreciative and wish to express my thanks.

Respectfully submitted,

R. P. CURRIER,
Superintendent of Schools.

ROLL OF PERFECT ATTENDANCE

Three Terms

Elizabeth Mahoney	Albert Broome
James Herlihy	Earle Foster
Mary McGrath	

Two Terms

HEADMASTER'S REPORT

I herewith submit the following report as Headmaster of the Wilton High School:

Our enrollment is 120, classified as follows:

Grade	No.	Dom. Arts	Agric.	Class
VII	27			
VIII	24			
IX	28	8	9	11
X	18	3	7	8
XI	8	3	2	3
XII	15	7	3	5
	120	21	21	27

The Junior High School includes grades VII and VIII, and the Senior High School includes grades IX, X, XI, and XII.

The per cent of attendance thus far this year is 95, which is slightly lower than for a corresponding period last year.

The number of tardy marks given out this year is slightly in excess of that of last year and is a matter which warrants attention. I believe a closer cooperation between the parents and school officials would help us to eliminate this trouble because in some cases where the student fails to take the responsibility of getting to school on time it is impossible to adjust the matter without the attention and cooperation of the parents.

Our basketball team has done very well this year, considering the fact that it is very light and most of its members comparatively inexperienced. Next year there are good prospects for a strong team as only one player is lost by graduation.

The school fair which took place early in October was the most successful one which has been held. It included vegetable exhibits from the school gardens,

animal and vegetable exhibits from the agricultural projects, cooking, sewing and canning by the Domestic Arts classes, manual training exhibits both wood and iron from the seventh, eighth, ninth and tenth grades, and exhibits of various electrical appliances by Miss Wheeler's Junior High classes in Elementary Science. The Domestic Arts Department served a supper which was very well patronized by the townspeople and netted over \$40.

A High School orchestra has been developed this year, consisting of five pieces, and has been very successful, having furnished music for dancing after the basketball games of both the High School and the town teams.

We have a fire department in the school and occasionally have a fire drill in order to prepare the students for emergencies. The last time the fire signal was pulled the school building was vacated by everyone in one and one-quarter minutes.

This year a new system of passing from one class room to another has been installed and now each class files in a single line to their respective classes, thus eliminating all whispering or any other unnecessary noise.

A warning bell is rung five minutes before the end of each period now in order to notify the teachers that the period is nearly over so that when the final bell is sounded each class will be dismissed promptly, thus avoiding any loss of time between periods.

Our social activities have consisted of a Senior Hal-
lowe'en Party at Proctor's Hall which proved very successful. The Senior Play is to be given early in April and the following month the annual Junior Prom. will take place.

I have been somewhat disappointed with the marks which some of the students have received this year because I believe that a large per cent of those students

who have received low marks are capable of doing much better if they really apply themselves to their studies.

I think they lack earnestness and interest in their work in some cases and the result is that they are inclined to slide along rather than to be thorough. I hope every parent will examine the report cards which are issued every six weeks and note carefully whether or not there are any marks below 60 and if there happens to be any will cooperate with the school officials in trying to find the reason and in stimulating the student to work a little harder, because in some cases where the student fails to show the proper amount of interest the parents must take the matter in hand and work with us in order to promote the improvement which we desire.

The pupils of the Wilton schools produced \$1883.13 worth of vegetables this year, divided up as follows: Agricultural Projects, \$882.19; Remaining students of Senior High, \$134; Junior High, \$405.53. This is a total of \$1421.72 for the High School. The Agricultural boys cleared \$585.03 on their projects. They worked 753 hours, making a labor income of 79c per hour. The grades and rural schools produced \$461.41.

I believe the school has improved this year as much as possible under existing conditions. The lack of room to accommodate some of the large classes is a difficult matter to adjust until the wing is completed and although we partitioned off our assembly hall into class rooms this year we are considerably cramped and are unable to bring our whole school together at any time.

In conclusion I wish to express my appreciation of the fine manner in which the School Board, Superintendent and teachers have cooperated with me in order to make the school year a successful one.

Respectfully submitted,
 RAYMOND W. HUTCHINSON,
 Headmaster.

BUILDING COMMITTEE'S REPORT

At the regular annual meeting of the School District held March 13, 1920 it was voted:

That the School District of Wilton appropriate the sum of \$15,000 for the purpose of building a one wing addition to the present High School building, making such alterations thereto as are necessary and authorize the School Board to raise said amount by the issuing of serial notes or bonds for an amount not to exceed \$15,000 in accordance with the provisions of the Municipal Bond, October 1895 as amended by Chapter 129, session laws of 1917.

On motion of Maurice J. Herlihy it was voted that the Moderator appoint a committee of three citizens to act as a building committee to carry out the vote of the town; to build a wing to the present High School building and to act in conjunction with the School Board in financing serial notes or bonds to pay cost of such addition to the extent of \$15,000.

Accordingly a committee was appointed by the Moderator to carry out the terms of the vote as far as possible with the sum appropriated, \$15,000. After several meetings of the Committee, when the matter of cost was thoroughly discussed, it was apparent to the Committee that the whole addition could not be completed for the sum provided and the matter of calling a special meeting and making a report to that effect was discussed. It was finally decided that the Committee was not appointed for that purpose but to do the best they could with the funds appropriated, which we did, hoping that we might be able to get the two so much needed rooms ready for the coming school year, but owing to the exceeding advance in the cost of material and labor we were very much disappointed that we could not do so. It is our desire at this time to thank the many friends

for the charity and kind consideration manifest to the committee, and while this committee might not have judged correctly of what the conditions were to be in all cases before the building was finished, we can truthfully say that everything has been done with the best intentions.

We shall be pleased to assist in every way possible another committee that may have the completion of the addition.

Financial standing of the affair :

Dr.

Received from sale of School District
