DURHAM, NH – With four months to go before the 2014 election, Senator Jeanne Shaheen leads her potential Republican challengers by double digits. Former Massachusetts Senator Scott Brown is the strongest challenger, but he is still viewed unfavorably by Granite Staters.

These findings are based on the latest **WMUR Granite State Poll**,\* conducted by the University of New Hampshire Survey Center. Six hundred and sixty-nine (669) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between June 19 and July 1, 2014. The margin of sampling error for the survey is +/- 3.8 percent. The sample included 509 likely voters (with a +/- 4.3 percent margin of sampling error).

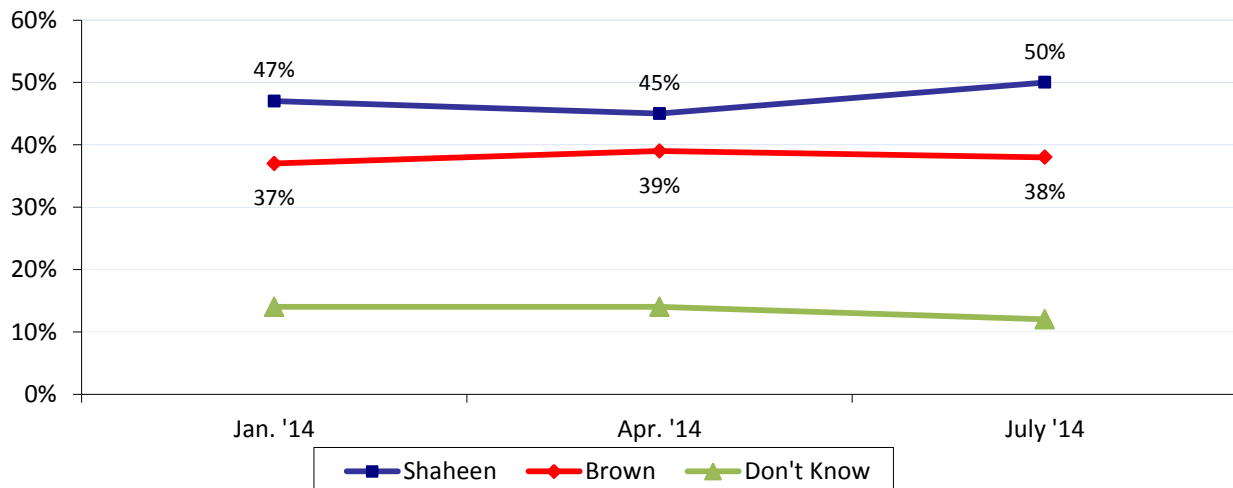

### 2014 U.S. Senate Election

Despite considerable media attention, very few voters have decided who they will vote support in the race for the U.S. Senate seat from New Hampshire. Only 17% of likely voters say they have definitely decided who to support, 14% are leaning towards someone, and 69% are still trying to decide.

The overriding dynamic in this race is that the Republican challengers to incumbent Senator Jeanne Shaheen are either unknown or unpopular.

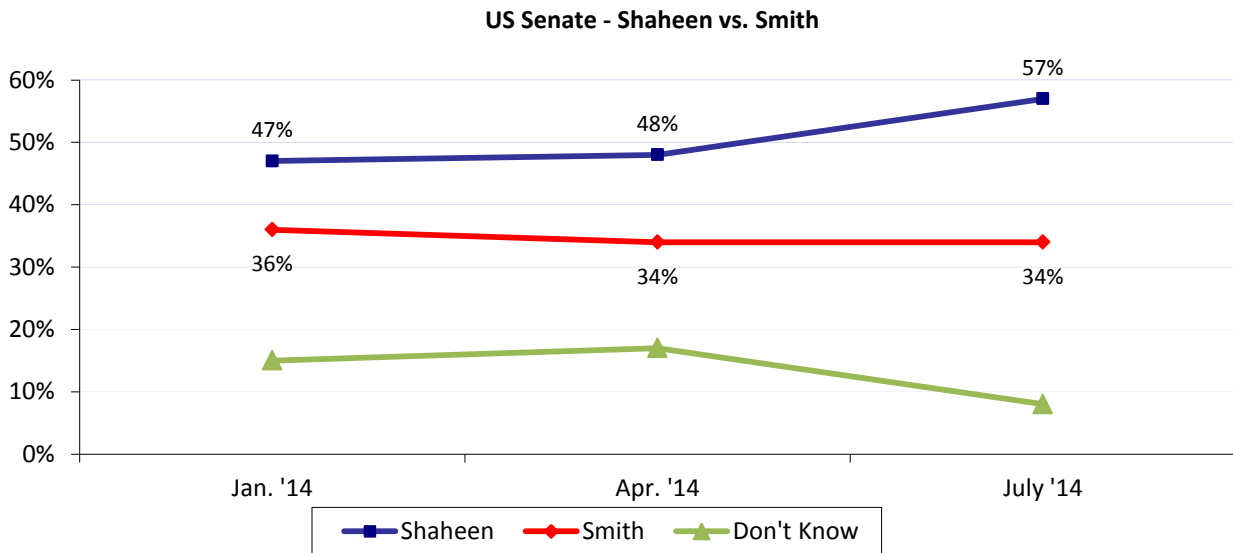

If the election were held today and Shaheen and former Massachusetts Senator Scott Brown were the candidates, 50% of likely voters say they would vote for Shaheen, 38% would vote for Brown, and 12% are undecided. When undecided voters are asked which candidate they lean toward supporting, 52% would vote for Shaheen, 40% would vote for Brown, 1% would vote for someone else and 7% are still undecided.

### US Senate - Shaheen vs. Brown

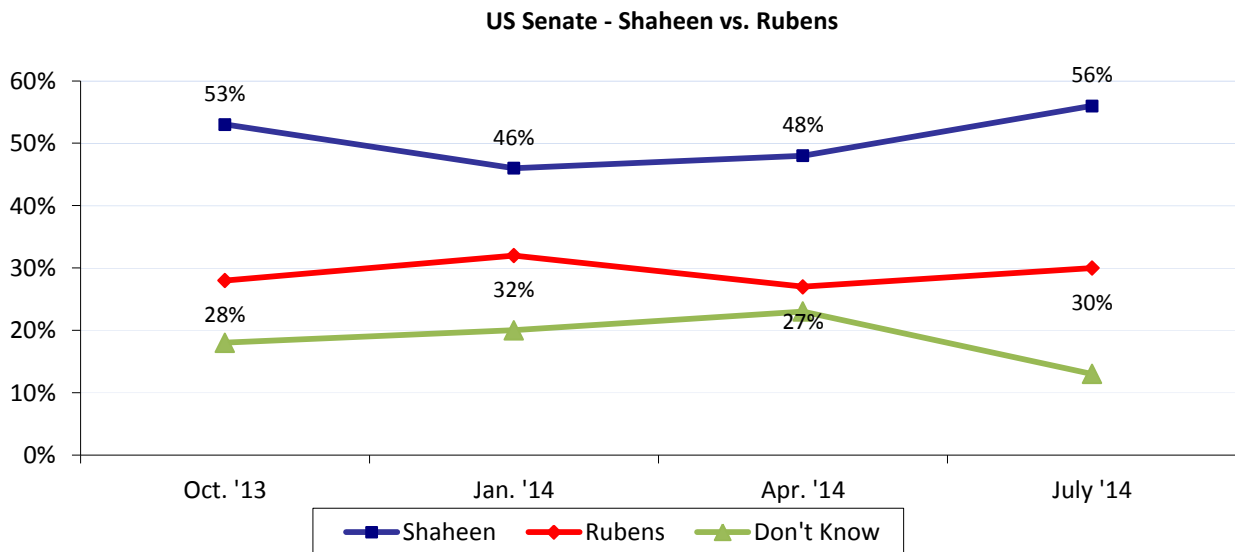

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

If former New Hampshire Senator Bob Smith were the Republican nominee, 57% of likely voters say they would vote for Shaheen, 34% would vote for Smith, 1% support someone else, and 8% are undecided. When undecided voters are asked which candidate they lean toward supporting, the margin stays the same -- 57% would vote for Shaheen, 34% would vote for Smith, 1% would vote for someone else and 8% are still undecided.

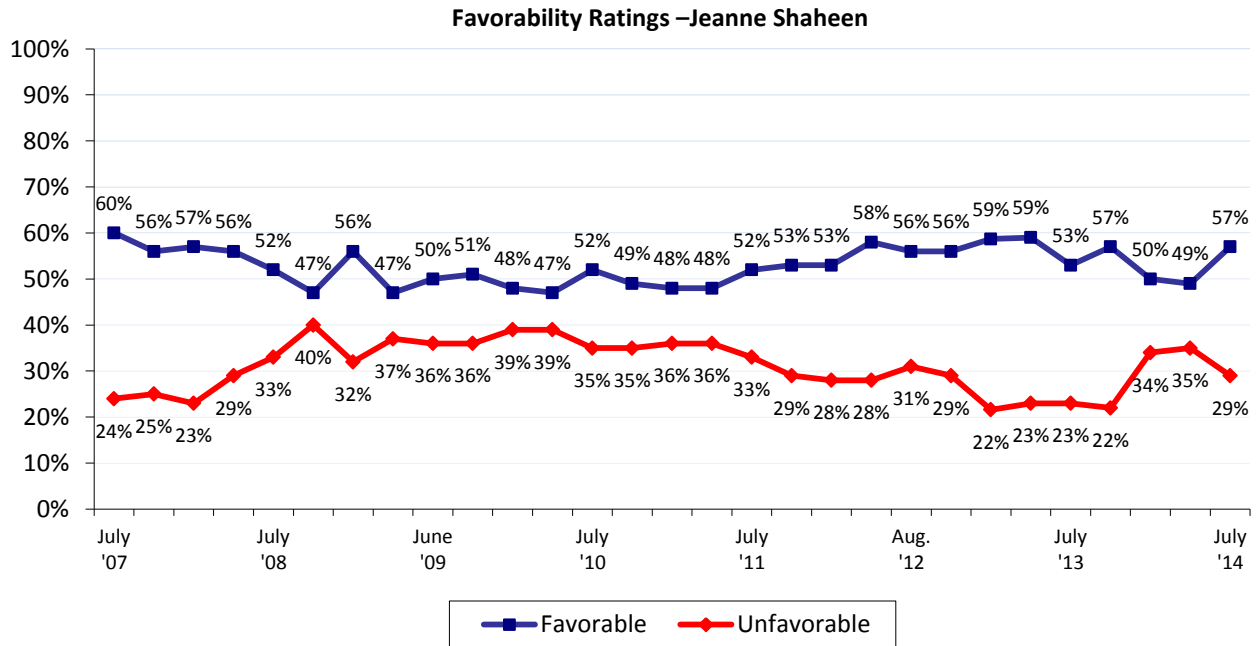

And if former State Senator Jim Rubens were the Republican nominee, 56% of likely voters say they would vote for Shaheen, 30% would vote for Rubens, 1% support someone else, and 13% are undecided. When undecided voters are asked which candidate they lean toward supporting, 57% would vote for Shaheen, 33% would vote for Rubens, 1% would support someone else and 9% are undecided.

While all candidates lead by large margins in their respective parties, Brown is closer to Shaheen because he leads among Independents by a 42%-34% margin. Smith (38%-44%) and Rubens (28%-41%) trail Shaheen among independents.

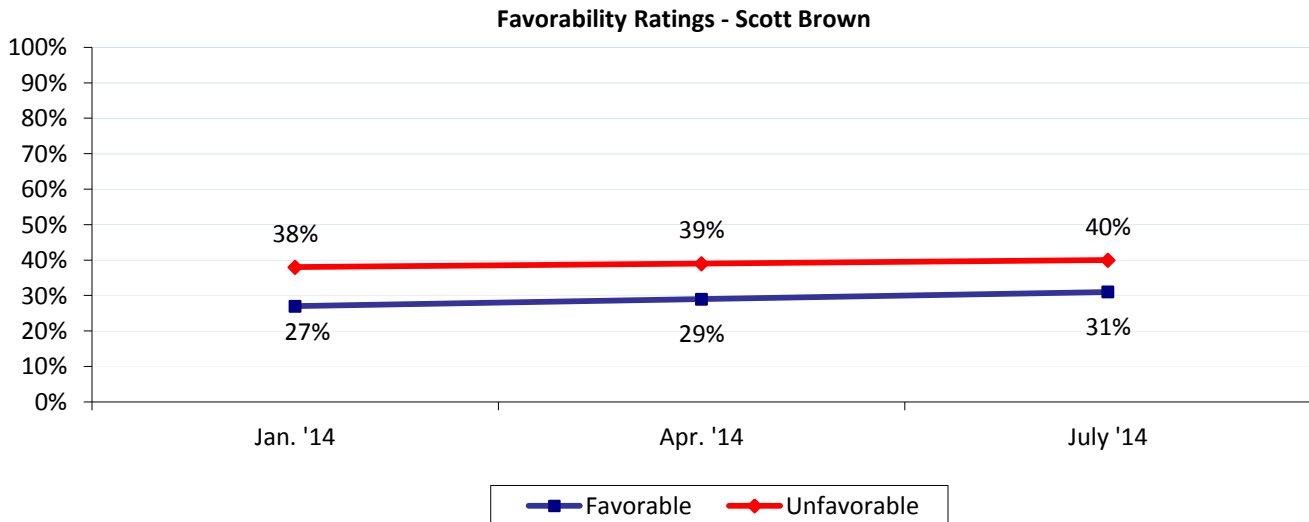

### Favorability Ratings – Senator Jeanne Shaheen

A major reason why Shaheen is currently leading is that she is a popular incumbent. In the most recent Granite State Poll, 57% of New Hampshire adults say they have a favorable opinion of Shaheen, 29% have an unfavorable opinion of her, 5% are neutral and 9% don't know enough about her to say. Shaheen's net favorability rating, the percentage who have a favorable opinion of her minus the percentage who have an unfavorable opinion, is +28%, which is up from +14% in April. Shaheen is viewed very favorably by Democrats (net +78%) and unfavorably by Republicans (-19%), while Independents are divided (+0%). Shaheen's net favorability among 2014 likely voters is +25%.

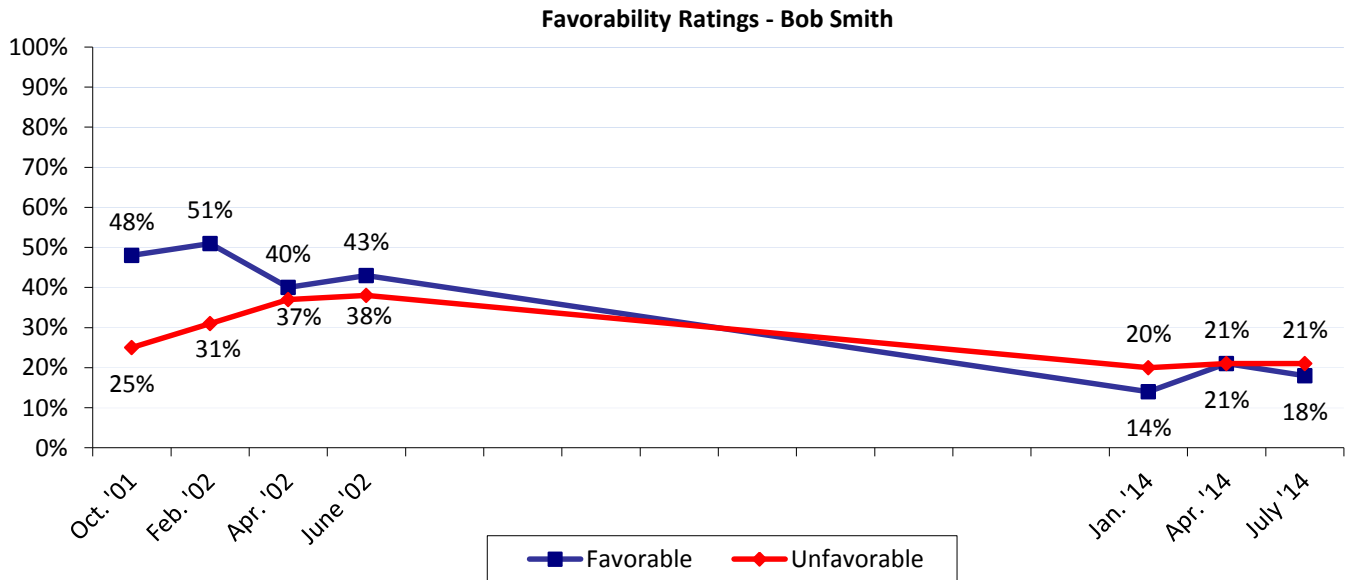

### GOP Challengers for U.S. Senate

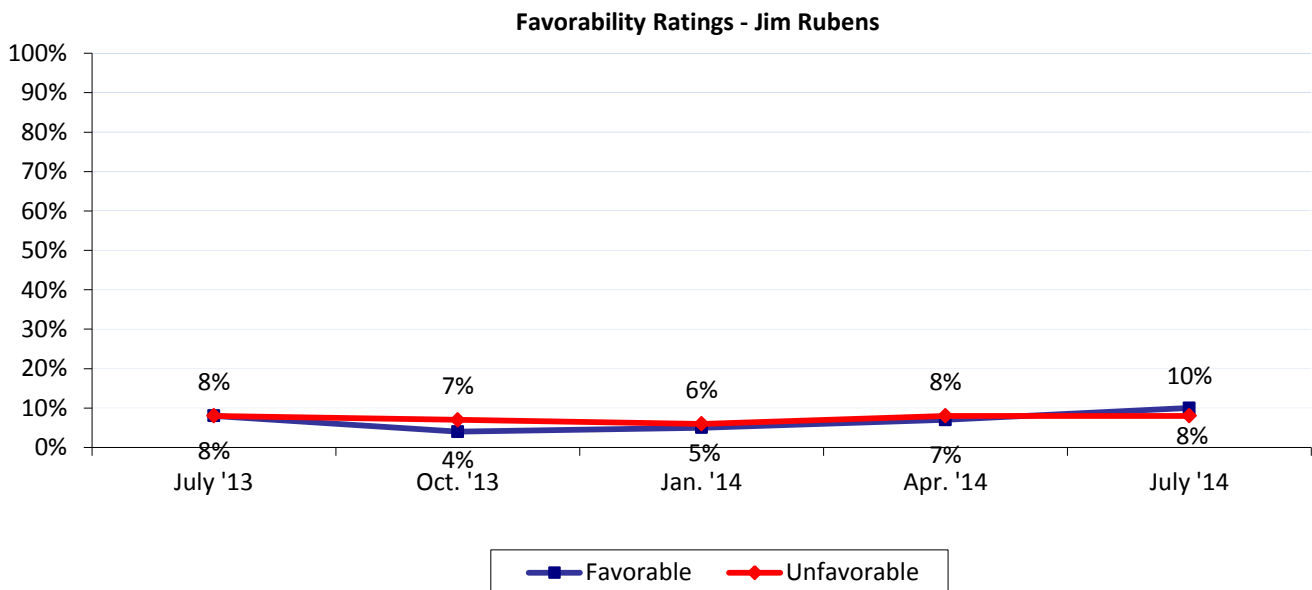

Brown has the highest name recognition of any Republican challenger but he remains unpopular in the state. Currently 31% of New Hampshire adults say they have a favorable opinion of Brown, 40% have an unfavorable opinion, 8% are neutral and 21% don't know enough to say. His net favorability is -9%, which is up from -10% in April. Brown remains popular among Republicans (net +45%), but is somewhat unpopular among Independents (-5%) and very unpopular among Democrats (net -52%).

Despite being a three-term congressman and two-term senator, it has been more than a decade since Bob Smith has been active in New Hampshire politics and he remains largely unknown in the state. Currently, 18% of New Hampshire adults say they have a favorable opinion of Smith, 21% have an unfavorable opinion, 6% are neutral and 55% don't know enough to say. His net favorability is -3%, which is down from 0% in April. Smith is somewhat popular among Republicans (net +13%) and somewhat unpopular among Independents (-3%) and Democrats (net -17%).

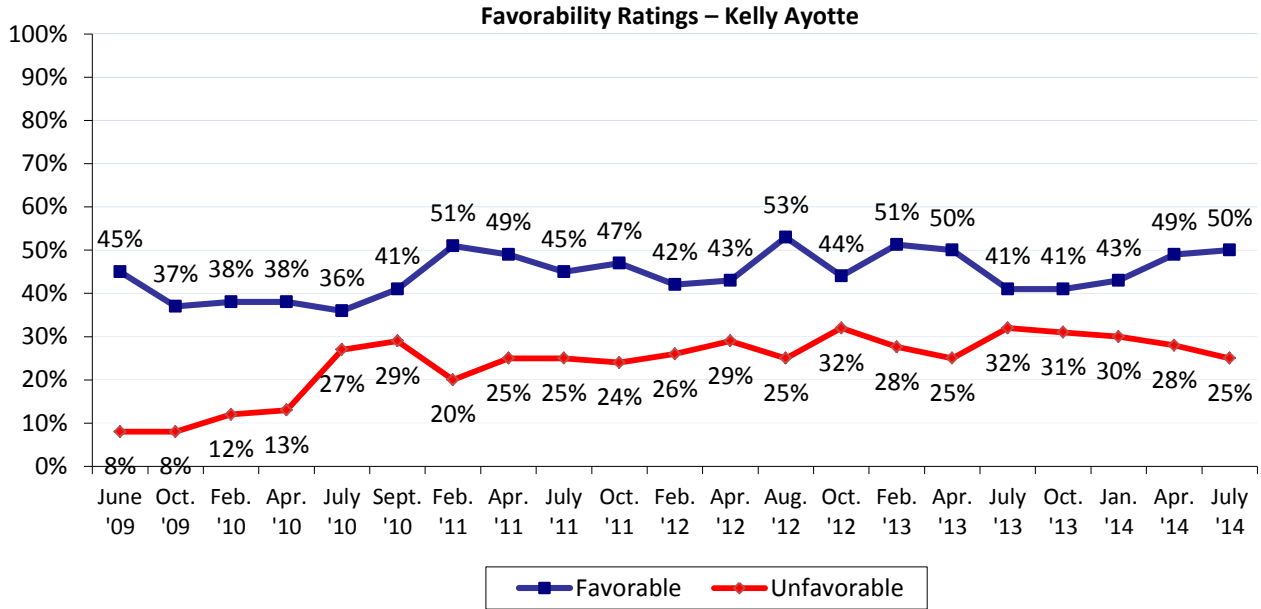

Jim Rubens remains largely unknown in the Granite State. Currently, only 10% of New Hampshire adults have a favorable opinion of Rubens, 8% have an unfavorable opinion, 5% are neutral and 77% don't know enough to say. Rubens' net favorability rating is +2%, which is up from -1% in April.

### Favorability Ratings – Senator Kelly Ayotte

The favorability ratings of New Hampshire’s junior senator, Republican Kelly Ayotte, continue to improve over the past year. Currently, 50% of New Hampshire adults have a favorable opinion of Ayotte, 25% have an unfavorable opinion of her, 8% are neutral and 17% don’t know enough about her to say. Ayotte’s net favorability rating is +25%, which is up from +21% in April. She remains very popular among Republicans (net favorability rating of +60%), and is somewhat popular among independents (+14%) and Democrats (+3%).

### Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center. Six hundred and sixty-nine (669) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between June 19 and July 1, 2014. The margin of sampling error for the survey is +/- 3.8 percent. The sample included 509 likely voters (with a +/- 4.3 percent margin of sampling error).

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may sum to just above or below 100%. Respondent numbers in each demographic may not equal the total respondent number due to respondents choosing not to answer some demographic questions.

### Granite State Poll, Summer 2014 Demographics

<b>Sex</b>	<b>N</b>	<b>%</b>	<b>Region</b>	<b>N</b>	<b>%</b>
