DURHAM, NH – Most voters are far from making up their minds about who to vote for in the 2016 New Hampshire Primary. Hillary Clinton remains the clear favorite among New Hampshire Democrats but there is no clear leader among Republicans.

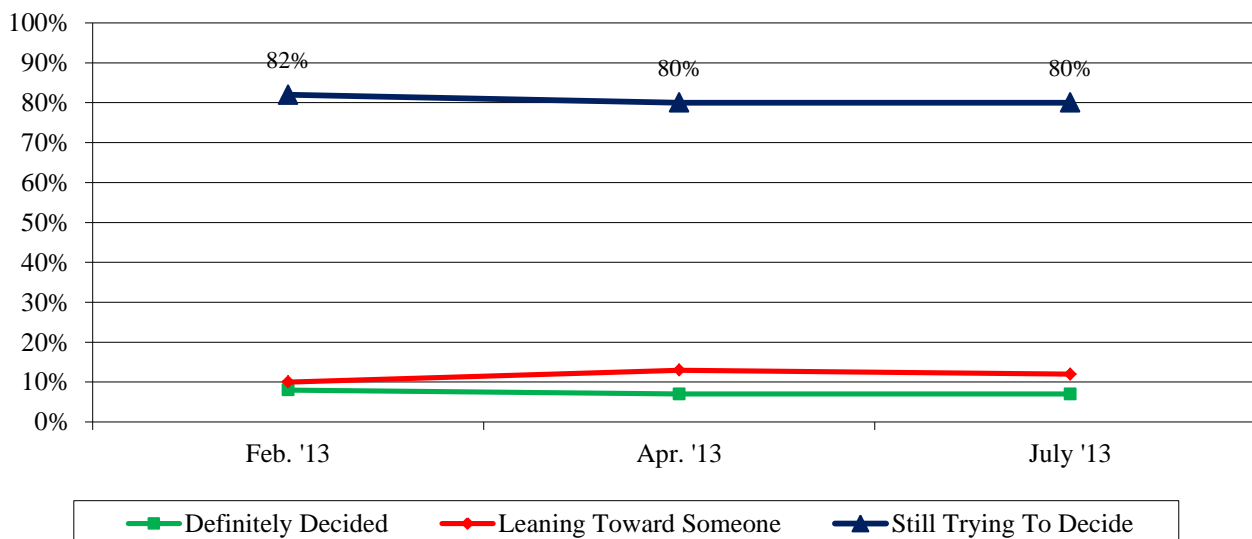

These findings are based on the latest **WMUR Granite State Poll**,\* conducted by the University of New Hampshire Survey Center. Five hundred and sixteen (516) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between July 18 and July 29, 2013. The margin of sampling error for the survey is +/- 4.3 percent. Included in the sample were 200 likely 2016 Republican Primary voters (margin of sampling error +/- 6.9%) and 190 likely 2016 Democratic Primary voters (margin of sampling error +/- 7.1%).

#### Two and a Half Years To Go ...

Although it is two and a half years before the First in the Nation New Hampshire Presidential Primary, prospective Republican and Democratic candidates have already been testing the waters here for presidential runs in 2016. While many of the candidates tested will decide not to run, and others may enter who are not tested, candidates who are the early identified frontrunners have typically won past New Hampshire primaries.

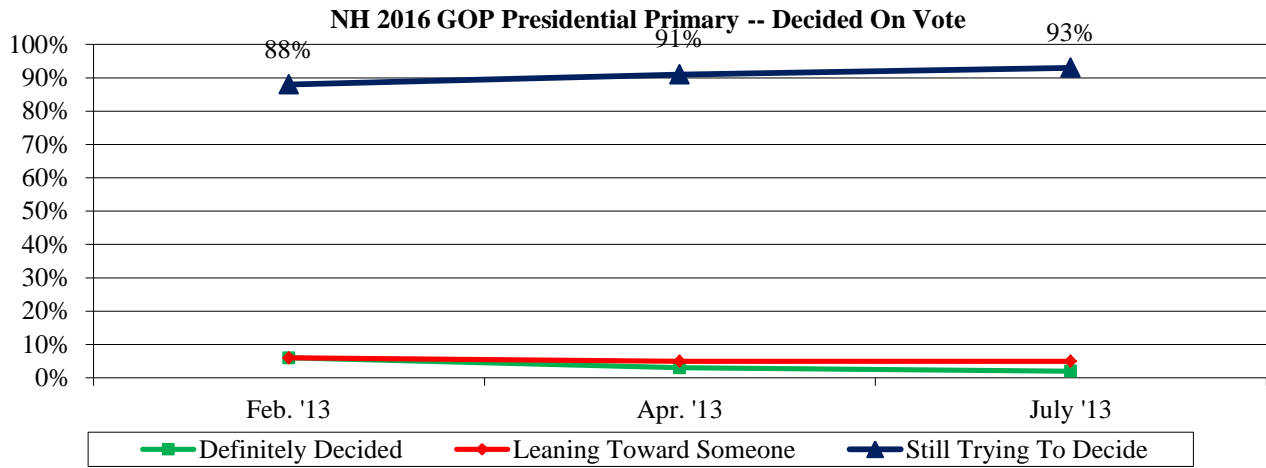

New Hampshire primary voters typically decide who they will vote for in the last weeks of the campaign and it is no surprise that very few voters currently have made up their minds about who they will support in 2016. The great majority of prospective primary voters, 80% of Democrats and 93% of Republicans, say they are still trying to decide who to support.

NH 2016 DEM Presidential Primary -- Decided On Vote

\* We ask that this copyrighted information be referred to as *the Granite State Poll*, sponsored by WMUR-TV, and conducted by the University of New Hampshire Survey Center.

Republican voters are more undecided (93%) than Democrats. This is likely because the field is more open than the Democratic field and lacks a GOP frontrunner, such as Mitt Romney in the 2012 cycle.

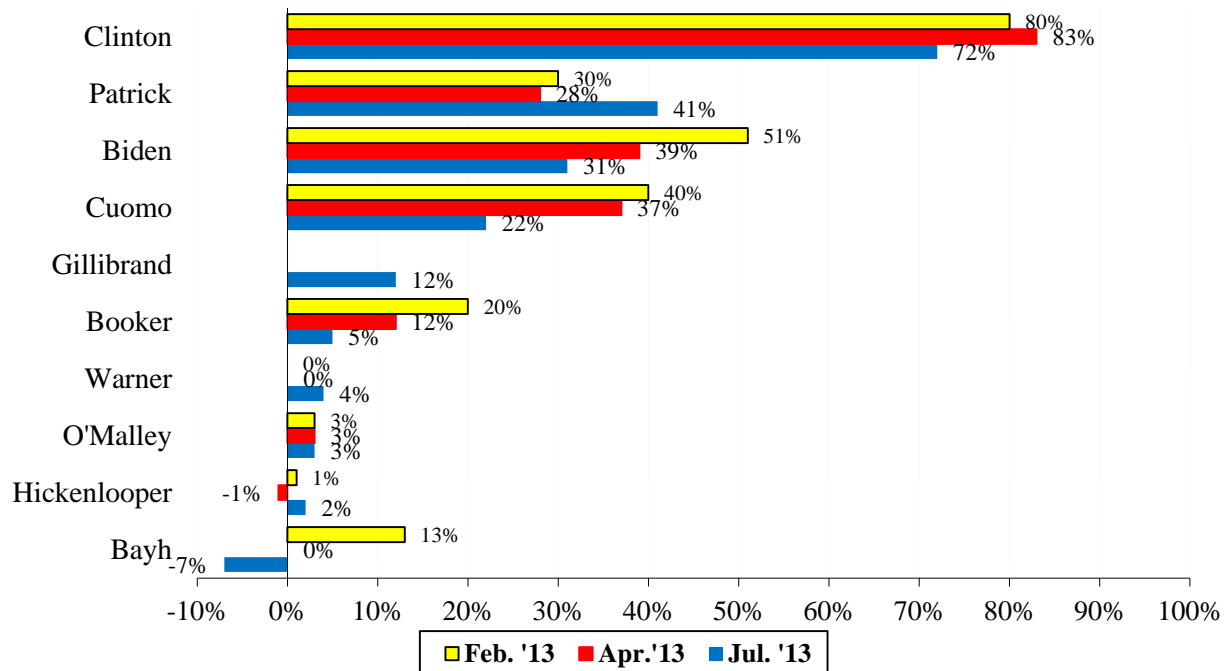

### Democratic Favorability Ratings

Former Secretary of State and 2008 New Hampshire Primary winner Hillary Clinton is the most popular potential candidate among likely New Hampshire Democratic Primary voters. The great majority of likely Democratic Primary voters, 85%, have a favorable opinion of Clinton, only 13% have an unfavorable opinion of her, and 2% are neutral or unsure. Her net favorability rating, the percentage who have a favorable opinion minus those who have an unfavorable opinion, is an extremely high +72%.

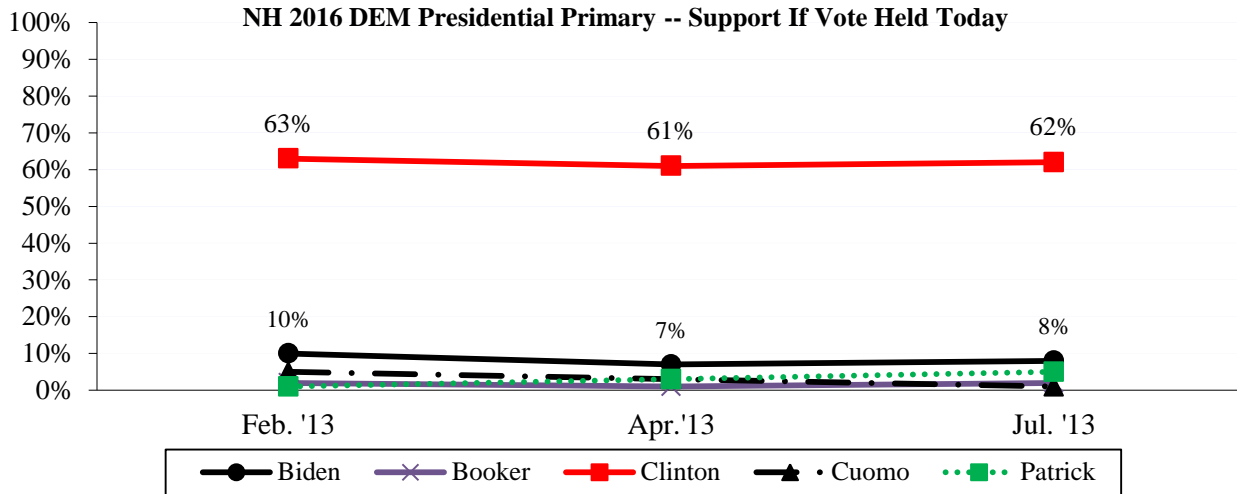

The other potential Democratic candidates that have moderate net favorability ratings include Massachusetts Governor Deval Patrick (+41%), Vice President Joe Biden (+31%), and New York Governor Andrew Cuomo (+22%). Meanwhile, New York Senator Kirsten Gillibrand (+12%), Newark Mayor Cory Booker (+5%), Virginia Senator Mark Warner (+4%), Maryland Governor Martin O'Malley (+3%), Colorado Governor John Hickenlooper (+2%) and former Indiana Senator Evan Bayh (-7%) are less well known and have much lower net favorability ratings.

### NH 2016 DEM Presidential Primary – Net Favorability Ratings

### 2016 NH Democratic Primary

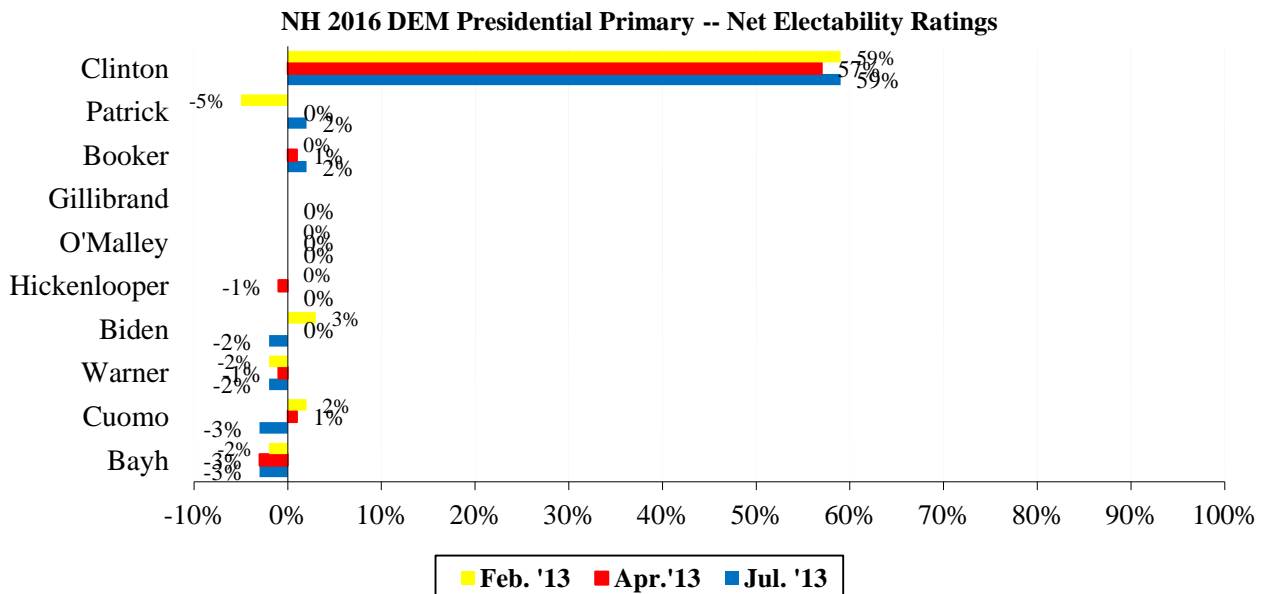

Although the primary will not be held until early 2016, Clinton also continues to be the clear current favorite among Democratic voters. In July 2013, 62% of likely Democratic Primary voters say they would vote for Clinton if the election were held today, 8% prefer Joe Biden, 5% favor Deval Patrick, 2% prefer Cory Booker and 1% prefer Andrew Cuomo. All other potential candidates mentioned received less than 1% support and 19% say they are undecided.

### Most Unpopular Democrat Candidate

When asked which potential candidate they would NOT vote for under any circumstance, 10% of likely Democratic Primary voters say they would not vote for Biden, 4% would not vote for Cuomo, 3% would not vote for Clinton, 3% would not vote for Bayh, 3% would not vote for Patrick, 2% would not vote Warner, 3% say they would not vote for some other candidate, 26% think that all of the prospective candidates are acceptable, and 46% are unsure.

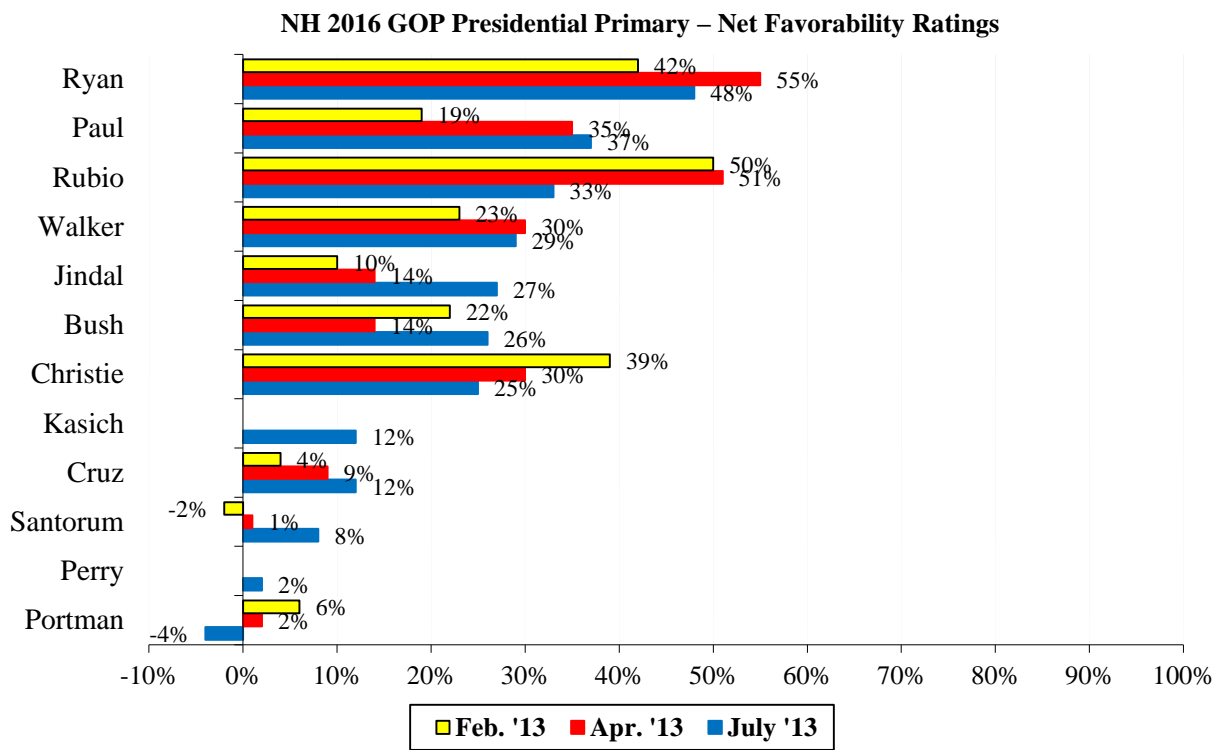

Hillary Clinton has a wide lead in net electability (calculated by taking the percentage of those who support a candidate and subtracting the percentage who would not vote for that candidate under any circumstance). Corey Booker (+2%) and Deval Patrick (+2%) are the only candidates to have positive net electability while Kirsten Gillibrand (0%), Martin O'Malley (0%), John Hickenlooper (0%), Joe Biden (-2%), Mark Warner (-2%), Andrew Cuomo (-2%), Andrew Cuomo (-3%) and Evan Bayh (-3%) all have either neutral or negative ratings.

## GOP Favorability Ratings

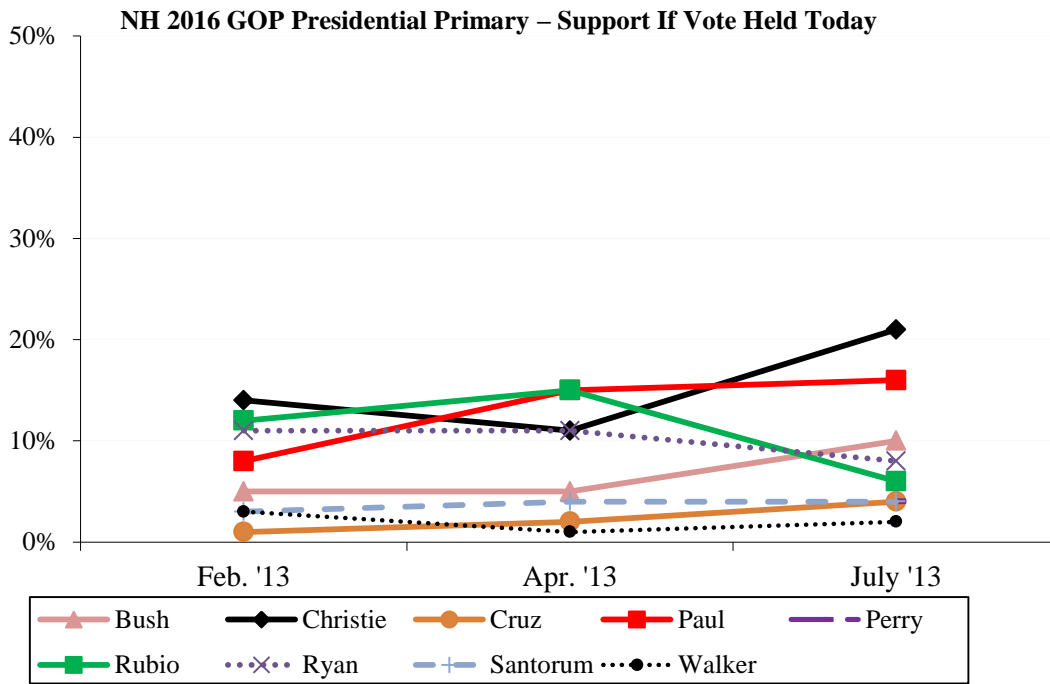

Wisconsin Congressman Paul Ryan, the GOP Vice Presidential candidate in 2012, has the highest net favorability for the second consecutive Granite State Poll. He is viewed favorably by 66% of likely Republican Primary voters, 18% have an unfavorable opinion of him, and 16% are neutral or don't know. Ryan's net favorability rating is at +48%. Other GOP candidates with moderate favorability ratings include Kentucky Senator Rand Paul (+37%), Florida Senator Marco Rubio (+33%), Wisconsin Governor Scott Walker (+29%), Louisiana Governor Bobby Jindal (+27%), Former Florida Governor Jeb Bush (+26%) and New Jersey Governor Chris Christie (+25%). Ohio Governor John Kasich (+12%), Texas Senator Ted Cruz (+12%) and Ohio Senator Rob Portman (-4%) have low net favorability ratings, but they also are not well known. Meanwhile Former Pennsylvania Rick Santorum (+8%) and Texas Governor Rick Perry (+2%) have low net favorability ratings, despite most Republican Primary voters knowing them from their presidential runs in 2012.

"Rubio and Christie have seen their net favorability ratings drop significantly – Rubio's has dropped 18 percentage points since April and Christie's has dropped 14 percentage points since February," said Andrew Smith, Director of the UNH Survey Center. "These drops are indications that Rubio and Christie have alienated significant segments of the Republican base." Paul and Jindal have seen the greatest increases in net favorability.

### 2016 NH Republican Primary

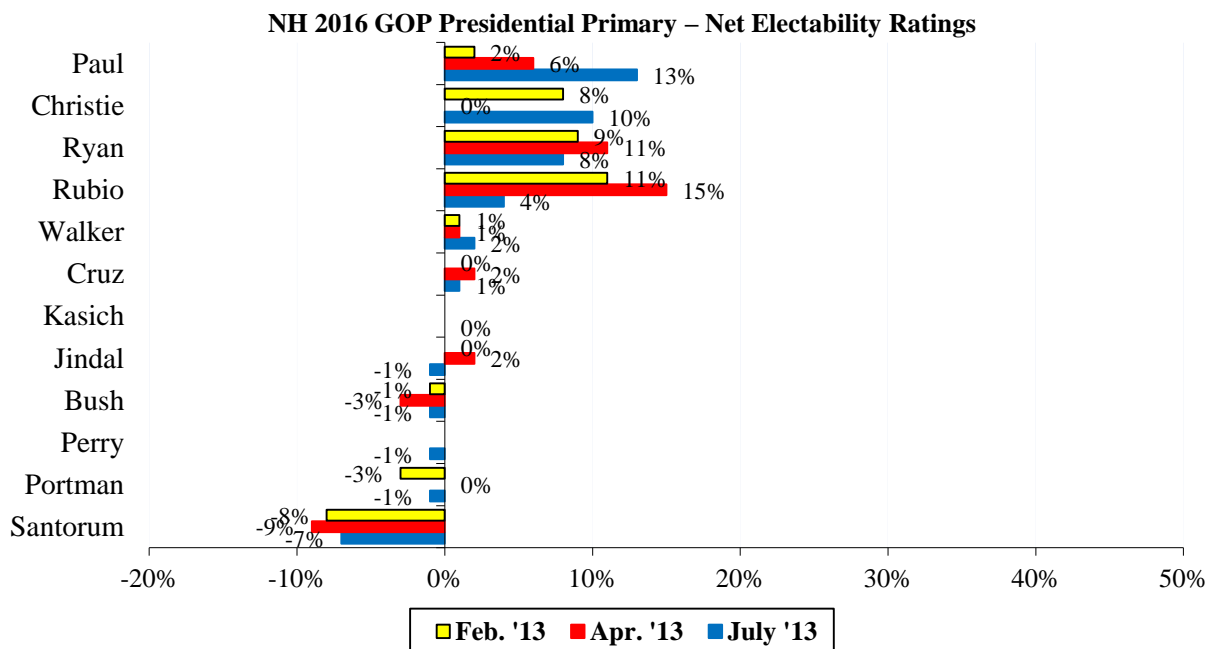

There is no clear frontrunner among Republicans and there is no clear second place finisher from 2012 who would typically wear the front-runner mantle. Among likely Republican Primary voters, 21% say they would vote for Christie if the election were held today, 16% would vote for Paul, 10% for Jeb Bush, 8% for Ryan, 6% for Rubio, 4% for Cruz, 4% for Santorum, 4% for Perry, and 2% for Walker. All other potential candidates receive less than 1% support, and 20% say they are undecided.

### Most Unpopular Republican Candidate

When asked which candidate they would NOT vote for under any circumstance, 11% of likely Republican Primary voters say they would not vote for Bush, 11% would not vote for Christie, 11% would not vote for Santorum, 5% would not vote for Perry, 3% would not vote for Paul, 3% would not vote for Cruz, 2% would not vote for Rubio, 1% would not vote for Portman, 1% would not vote for Jindal, 25% think all the prospective candidates are acceptable, and 25% are unsure.

Unlike on the Democratic side, there is no clear cut favorite on the Republican side when it comes to net electability. Rand Paul (+13%) leads the field while Christie (+10%), Ryan (+8%), Rubio (+4%), Walker (2%) and Cruz (1%) also registered positive net electability ratings. Meanwhile Kasich (0%), Jindal (-1%), Bush (-1%), Perry (-1%), Portman (-1%) and Santorum (-7%) had ratings that were either neutral or negative.

## Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center. Five hundred and sixteen (516) randomly selected New Hampshire adults were interviewed by landline and cellular telephone between July 18 and July 29, 2013. The margin of sampling error for the survey is +/- 4.3 percent. Included in the sample were 200 likely 2016 Republican Primary voters (margin of sampling error +/- 6.8%) and 190 likely 2016 Democratic Primary voters (margin of sampling error +/- 7.1%).

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, age, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.

### Decided Who to Vote for in 2016 GOP Primary? (Likely NH GOP Primary Voters)
