Technical Report

Field Period: June 11 to June 14, 2013

Hours: 10 a.m. to 9 p.m.

Median Completion Time: 7 minutes

Sample Size: 755 randomly selected MA adults (RDD)
508 randomly selected Massachusetts likely voters in the 2013 special Senate Election (RDD)

Sampling Error: +/- 3.6% (all respondents)
+/- 4.3% (likely voters)

Response Rate (AAPOR #4): 16%

The data have been weighted by the number of voters in a household and the number of telephone numbers at which a household can be reached in order to equalize the chances of an individual MA voter being selected. The data have also been weighted by the sex and race of the respondent and the region of the state based on the American Community Survey conducted by the US Census and past election results.
