RISK

Health, Safety & Environment

Volume 5 1994 Number 4

Linda-Jo Schierow, *Comparison of Environmental Risk Provisions in the 103d Congress*

Dr. Schierow, an Analyst in Environmental Policy with the Congressional Research Service, presents a tabulated summary of comparable provisions in several bills with special attention to the Risk Assessment Improvement Act of 1994. 283

Ann Bostrom, M. Granger Morgan, Jack Adams & Indira Nair, *Preferences for Exposure Control of Power-Frequency Fields among Lay Opinion Leaders*

The authors report on surveys, differing according to focus on remedial costs, of Pittsburgh-area adults indicating beliefs about possible health effects of electromagnetic fields and the acceptability of options for reducing or eliminating the potential impact. 295

James F. Short, Jr., *Trace Substances, Science and Law: Perspectives from the Social Sciences*

Using advances in analytical technology as a point of departure, Dr. Short reviews what social science research reveals about perceptions, decisionmaking processes and behaviors of organizations and individuals who try to cope with risk and uncertainty. 319

Ute J. Dymon, *Mapping — The Missing Link in Reducing Risk under SARA III*

Dr. Dymon explains how maps can, e.g., hasten effective community responses to natural and artificial hazards and laments widespread failure to prepare and use hazard maps more extensively. 337
