TEAM MAKES BETTER SHOWING.

But is Defeated by the Maine Team.

On Oct. 7, in a hard fought contest at Orono, Me., the New Hampshire football team lost to the University of Maine by the score of 12 to 0. 'The game was marked throughout by spirited fighting by the whole team and had not been for the phenomenal ability of Maine's punter, the score would have been much more even, for what the opponents gained by kicking, New Hampshire of Maine's punter, the score would have been more even, for what the opponents gained by kicking, New Hampshire.

Swasey and Jones made long end runs and the running back of punts by the latter was remarkable. Perkins played his usual star game on the defense and was run a close second by Haines. The whole team played aggressive football and not less than four Maine men were removed from the game on account of injuries.

New Hampshire had all the better of the play in the first quarter. At the start, Swasey on a cross-cut made thirty yards around left end and Jones followed with twenty around right. Maine held for downs. She then punted it back into her territory. In the last minute of play, Lovel missed a try at field goal from the 35 yard line.

Maine had the advantage in the second quarter, scoring the ball in New Hampshire territory. New Hampshire had for downs several times, however, by finally Shephard of Maine holding for downs several times, however, by finally Shephard of Maine holding for two downs. In the last minute of play, Lovel missed a try at field goal from the 35 yard line.

In the third quarter, New Hampshire again had the stronger team and kept the ball in her opponent's territory, but after a fumble by New Hampshire, which Maine recovered, the latter quarterback ran 45 yards, when he was downed by Jones on the 20 yard line. Held for downs, Shephard kicked another goal from the field. The first half ended with the score, Maine 0, New Hampshire 0.

The fourth period was a fierce struggle from beginning to end. Maine made two successful forward passes and then, within striking distance, slowly hemorrhaged the ball to the two yard line, where it was run for a touchdown. A down on an end run, Maine's half back crossed the line, knolling out Captain Loyal, who attempted to tackle him. Shephard kicked the goal. Jones replaced Loyal and Loyal played the quarterback's position in the first half. Maine kept the ball in New Hampshire's territory for the rest of the period, but was unable to cross the line again. The final score was, Maine 12, New Hampshire 0.

U. S. SHIP WISCONSIN 6; NEW HAMPSHIRE SECOND 5.

Last Saturday the football team representing the U. S. S. Wisconsin came to Durham and in a rugged and rather absorbing exhibition defeated our second eleven 6 to 5.

Webb was easily the best ground gainer that the Wisconsin boys had, while Foster and McCartney did good work for the second team.

RECEPTION AT CHURCH.

Annual Reception to New Men held Friday.

In spite of the indescribable weather a large number of college men and townspeople attended the annual freshman reception held in the vestry of the Durham Congregational church last Friday evening.

During the first hour Mr. and Mrs. Talmie, Mrs. Simpson and Deaconess McMonigle were received. At the same time a card of friends of Maine guests were busy trying to guess the names of New Hampshire towns, which were cleverly pictured and hung on the walls. Halves of picture post cards were also distributed, and everyone attempted to find his "other half." After several pieces had been played by the college orchestra Mr. Talmie spoke a few words of welcome. H. R. Catlin gave a violin solo and H. R. Tucker read Rudyard Kipling's poem, "If." Following another selection by the orchestra the pictures to the towns read were ice-cream and cake served. There followed an enjoyable social before the affair was brought to a close.

U. O. F. HAS NEW PRESIDENT.

Guy Potter Benton, A. M., D. D., L. D. L., was inaugurated as the 12th president of the University of Vermont on Friday last. He succeeds the late Rev. Dr. Mathew H. Bueckman, whose death ended a college administration extending over a period of more than a quarter of a century.

PRESENTS MINERALS TO COLLEGE.

Mrs. G. L. Green of Concord, N. H., has presented the college with a collection of arc and valuable minerals. At present the minerals are in the mineralogy laboratory, but later some of the finest specimens will be placed in the cases at Thompson Hall.

A. X. E. MEETING.

A regular meeting of the A. X. E. Fraternity was held last Thursday evening in the college club. After the regular business was over, Mr. A. BEYER, the new assistant professor of chemistry, presented the club with a specimen of the rarest specimens will be placed in the cases at Thompson Hall.

RIFLE CLUB.

The first meeting of the rifle club was held in the gymnastic last Thursday afternoon with a small number present. The younger members of the faculty were cleverly pictured and hung about the orchestra the answers to the pictured guest were busy trying to guess the names of New Hampshire towns.

A regular meeting of the A. X. E. Fraternity was held last Thursday evening in the college club. After the regular business was over, Mr. A. BEYER, the new assistant professor of chemistry, presented the club with a specimen of the rarest specimens will be placed in the cases at Thompson Hall.
Every man has a selfish streak in him mental matter, but the others are stronger. This selfishness creeps out in college life as often as elsewhere. One instance which is noticeable very lately was at the time when the football team went on the trip to Brown. The cheer leader posted a notice for all to be at the station and cheer the team off at seven in the morning. Not over fifty appeared! The hour was a little early for some of us perhaps. Those extra thirty minutes of sleep, however, should have been sacrificed in order to show the men of the spirit that overcomes such small personal matter, it is the call of the student body. You would have been only too glad to have been in Foster's stock judging trials, securing third in the judging trials, securing third place in the judging trials, securing third place among the adherents to the older college. New Hampshire College is so near and is doing superior work in the lines which most of our boys want, I expect that as now, Dartmouth will attract from our section those who are interested in its social advantages or athletic renown and those who wish a literary course or one leading to the professions; while New Hampshire will continue to draw the boys who wish mechanical, agricultural and engineering courses. E. W. Butterfield.

If you have a base ball, football or other trophy that should be in the trophy case give it to W. E. Rogers at once. He is not a personal duty, it is a COLLEGE duty. DO IT NOW.

The Tufts Freshman this year posted posters for the benefit of the Sophomore Some of the rules laid down to the Sophomore is that such a nature that a Sophomore must obey them or run the risk of being classed as a Freshman. Every one is wondering what the second-year men will do about it.

The New Hampshire stock judging team, under the leadership of Prof. O. L. Emlen, left on Wednesday, Oct. 4, for Brooklyn Fair. The team, composed of M. G. Rustman, B. E. Batchelder, L. B. Smith, and P. E. Steele, made a very creditable showing in the judging trials, securing third place. Connecticut and Massachusetts obtained first and second respectively.

A PURELY MUTUAL COMPANY.

The policies issued by the Massachusetts Mutual Life Insurance Company are purely mutual and much more liberal than those of the other companies. The dividends are large, and they are paid half annually, in addition to a cash surrender value. The company has been in existence for over sixty years, and has paid large dividends every year. For a description of the company, and also of the policies issued by it, see F. P. MORRISON, 374 Congress St., Boston, Mass. The Marshall Press, Dover, N. H.

98% of the World's Creameries Use
De Laval Cream Separators

Ten years ago there were a dozen different makes of creamery or factory separators in use. Today over 98 per cent of the world's creameries use DE LAVAL separators exclusively. It means a difference of several thousand dollars a year whether a DE LAVAL or some other make of separator is used in a creamery.

Exactly the same differences exist, on a smaller scale, in the use of farm separators. Owing to the fact, however, that most farm users do not keep as accurate records as the creameryman, they do not appreciate just what the difference between a good and a poor separator means to them in dollars and cents. Nine times out of ten the farmer can't tell whether or not he is wasting $50 to $100 a year in quantity and quality of product through the use of an inferior cream separator.

If you were in need of legal advice, you would go to a lawyer. If you had a toothache you would see a dentist. Why? Because these men are all specialists in their line, and you rely upon their judgement and skill. If you were sick you would consult a doctor. If you had the toothache you would consult a dentist. Why? Because these men are all specialists in their line, and you rely upon their judgement and skill.

The benevolent bacteria of buttermilk recommended by M. Metchnikoff, a director of the Pasteur Institute, Paris, as a promoter of longevity, have received a strong reinforcement in the palatable bacteria of sour milk in the form of ice cream. This is not ordinary sour milk, however, and home experiments with these bacteria are not recommended.

Business engagements have compelled W. A. Larned to give up the ideas of being a member of the American tennis team, which by defeating the English team, was the right to play against the Australian team for the Dwight Davis trophy.

The new ocean liner Aquitania which is being built at Clydebank, Scotland, for the Cunard company, will be the largest in the world. She will be 900 feet long, 10 feet longer than the German liner Imperator, which will be ready for service in the spring of 1914, and will accommodate 4000 passengers. From the Thompson Hall to the new railroad station is about 900 feet.

The International Congress of Applied Chemistry will meet in Washington, September 4. Prof. James who is recognized as the authority in the United States on rare earths, has been invited to give a paper before the congress.

Three hundred students are now recognized as leaders in the Sweater trade.

The work I have done for the different fraternities has always pleased Mme. Curie, the famous woman scientist, began her career as a student in Paris in the humble capacity of an assistant in a chemical laboratory. She soon proved herself worthy of better things, and became one of the most brilliant and original of the laboratory's workers. Eventually she married a fellow-student, and together, through years of poverty and discouragement, they worked out the epoch making discovery of radium.

We are well known to college men as leaders in the Sweater trade.

COLLEGE NOTES.

Prof. Arkell acted as a judge at the Plymouth Fair last week.
L. Watson Pike, ex'14 of Haverhill was a college visitor this week.
Prof. Richard Whoriskey Jr., has been elected faculty adviser of the College Club.
Prof. Charles James returned to Durham Sunday after a summer spent in England.
Prof. Guy C. Smith has rented the stone house across the Oyster river owned by Mrs. Wendell of Dover.
Pres. W. D. Gibbs attended the inauguration of Dr. Guy P. Benton at the University of Vermont, last Friday.
Mr. Charles C. Stock has taken up his residence at the old Gleason house which has been recently remodeled by Charles Smart.

The freshman class has elected Earle R. Watson, president; Armond L. Murdock, vice president; Miss Alice J. Rott, secretary; and Lester S. Langley, treasurer.

The senior class in mechanical engineering is engaged in designing a new type of testing machine in which the complicated weighing mechanism is omitted.

Prof. B. S. Pickett is the author of a bulletin just issued by the government. The title is "Fruit Bud Formation, Progress, and Investigations in 1908, 1909, and 1910."

Mrs. Edward H. Adams has moved from the old Sullivan house, which has just come again into the possession of the Sullivan family, to the house owned by Mrs. Wendell of Dover.

The College Bull, Figgis's Flower Fox (OY 19) won a third prize at the Breckenridge Fair. The bull's dam, Fole's Flower O'Dreamwoold took the champion sweepstakes in the Jersey line.

On September 23, Lieutenant G. W. Edgley of the Military Department received his commission as first lieutenant. His assignment to the 5th U. S. Infantry was received three days later.

The public board has just had several pictures of the different buildings, taken by Mr. Lamonde. These pictures are to be framed and sent to various high schools throughout the state.

And J. W. E. Company C, '12 have been appointed first and second lieutenants, respectively in Company D.

IF BACTERIA WERE AS EASILY SEEN AS GNATS.

IF bacteria were as easily seen as gnats no one would need to tell you how much superior was to other washing materials.

But because bacteria cannot be seen by the unaided eye, and because you have always believed things to be clean that looked clean, you do not appreciate how Wyandotte Dairymaer's Cleaner and Cleanser does an immense amount of cleaning that you are apt to overlook.

To every Dairymaer, be he the owner of one cow, or the owner of many, a dairy cleaner is a necessity and it should be one that will not only remove the dirt and objectionable matter that can be seen, but the invisible bacteria as well.

Ask your dealer for a small sack.
