Prospects for the Team Next Year.

The football season has ended. While in percentage of games won the team has not been as successful this year as was expected, there has developed on the field a stronger feeling of loyalty to New Hampshire than has ever before existed. Crippled at the outset by the loss of several of the strongest men, obstacles have held back the winning spirit.

The first game with Bates, resulting in a tie with a promising eleven but on the eve of the Brown game injuries to Brackett and Pettengill darkened the prospects and an inferior team was beaten 56 to 0. Without Pettengill Davidson, Crosby, or Brackett the team made a plucky fight on the following Saturday but Durham and Tree state scored one touchdown and two goals from the field. A week later St. Joseph's College, however, an easy victim in the second home game of the season and was beaten by the score 12 to 0. The U. S. N. R. S. North Carolina was also won 11 to 0. On October 28 Rhode Island came to Durham with the best team in its history, but held Brown to two touchdowns and having beaten Maine, Massachusetts, Norwicht, and Tufts. In the first three periods of the game New Hampshire completely out-played the men from the baby state, but in the last minute of play, after Rhode Island had made a touchdown on a fumble, their quarterback kicked a dropkick, winning the game by the score 9 to 8.

The game with Massachusetts was lost by one touchdown and a dropkick. In the first six minutes of play the powerful "Aggie" line rushed the lighter one half the length of the field for a touchdown. Outweighed and outclassed generally, however, the weaker team came back strong, fighting valiantly until the final sounding of the quarter's whistle. In view of the overwhelming weight of the Massachusetts team, the New Hampshire players are to be commended for scoring as many points.

Captain Lowd has proven to be an able leader, playing a truly wonderful game during the last part of the season. He has been an inspiration to the team with the feature of the Rhode Island game while his defensive work at Manchester was sensational. The rest of the team is expected to do well next year. Included in the list of promising men who have played this year on the second team, getting into some of the varsity games are Williams, Leach, Readon, McCarthy, Jenkins, Reed, Davis, Hobbs, and Lambe. Williams is a student from which the team next year and with an able coach, New Hampshire should be well represented in football.

N. H.'S AWARDED.

The executive committee of the Athletic Association has announced the list of thirteen men who are awarded "I" in football for the fall session, with the following list which just closed. According to an amendment adopted for this year, the thirteen men who play the largest number of minutes in the last two games and the manager shall be awarded their letters. The list of men is as follows: Capt. C. M. Lowd, Clinton, Mass.; J. C. Perkins, '12, Kennebunkport, Me.; Fred. W. Swasey, Berlin, Me.; R. C. Morrisson, '12, Concord; A. W. Jenness, '13, Dover; P. C. Crosby, '12, Amesbury, Mass.; A. W. Williams, '13, West Union, Mass.; J. J. Thoreau, '13, Concord; P. C. Jones, '11, Milton; W. L. Brackett, '14, Portsmouth; R. E. Brackett, '12, Dover; P. A. Foster, '13, Claremont; and Manager G. W. Berry of Stratham.

ALPHA CHI SIGMA.

A regular meeting of the A. X. E. Fraternity was held last Thursday evening. After the regular meeting President James gave an interesting talk on the properties of some of the rare earths. This was followed by the announcement of the following members of the senior class, an excellent collection of young men and a large group of sophomores.

FRESHMEN 14

SOPHOMORES 0

First Year Men Outplay Their Opponents.

A week ago today, the freshman won the annual class football game from the sophomores by the score of 14 to 0, and then celebrated their victory in the evening with a rousing bonfire on the hill, adorning the adjoining laburnum. Davis, Watson and the ends excelled for the freshmen. Davis was a consistent ground gainer, Haines and Watson generally made his distance on tackle plays. The freshmen ends also made the plays of the quarter, many times for large losses. The sophomores played a sporadic game, but the ends were outstanding.

The sophomores won the toss and chose the goal favored by the wind. Thompson kicked off. The "soph." could not gain and punished, only to recover the ball after two plays on a fumble. The sophomore class again gained and again obtained the ball and the second time on a fumble. A few minutes before the end of the period, the freshmen held for downs on their own 35 yard line. From here during the last of the first period and the first part of the second, they carried the ball, and over for a touchdown. Davis' end run of 35 yards was the indirect means of the score. Haines kicked the goal.

The sophomores kicked off and the freshmen, who immediately punted. Unable to make any ground, the sophomores returned the punt. Plunges by Haines and Watson carried the ball to the 25 yard line, where Thompson kicked a 25 yard field goal. The sophomore class again gained, only to have the ball stopped on their own 35 yard line. From here they gained and Thompson kicked a 35 yard field goal.

The results of the second half were decisive in favor of the freshmen. At the beginning they rushed the ball to the sophomore's two yard line, where they were held for downs. The sophomores recovered the punt on their own 40 yard line. They had to punt again and the freshmen obtained the ball on their own forty yard line. In three plays they carried the ball ten yards and the period ended. The ball was turned over on downs, the sophomores making a good punt. In the next period, the freshman carried the ball over the line, only to fumble on the last play, a sophomore recovering the ball for a touchback. The sophomores punished from the 25 yard line. They carried the ball 40 yard lines and then Haines slipped through for the freshees for a touchdown and a touchback. A few minutes later the game ended with the score 14 to 0 in favor of the entering class.

Summary.

GIFT TO FORESTY DEPT.

The Department of Forestry has just received from Mrs. G. L. Green of Concord, aunt of Alan Leighton of the senior class, an excellent collection of native and tropical woods. There are over 150 pieces altogether, mostly of uniform size, all cut 2 by 3 inches. It is planned to arrange the specimens on the wall of the forestry class room where they will serve as an ornamental feature and can be readily examined by classes in the identification of woods.

TO SUCCEED PROF. S L A T E.

Mr. Frank App, a graduate of the Pennsylvania State College last June, has accepted the position as assistant in the Department of Agriculture now at the University of Maine. Mr. App had some experience teaching in the winter and also a short term at a teacher training school.

DR. PARSONS MAKES SEVERAL TRIPS.

Prof. C. L. Parsons, recently elected chief mineral chemist of the Bureau of Mines, will retain his headquarters in Durham for some months, using this place as a basis for trips to various parts of the country while planning the development of the laboratories to be built in Washington. He has been on a trip to Illinois and Wisconsin and has been received from the New Hampshire Alumni at the University of Illinois. He returned on Saturday.

He has already made two trips and is at present making a western tour. Montreal, Ottawa, Toronto and Niagara Falls were included on the first trip. During the record trip he was in Syracuse where he spoke to the students of Syracuse University and visited the works of the Solvay Process Company and the Halcomb Steel Company. From there he went to Ithaca where he spoke to a Cornell and to Schenectady where he visited the research laboratory and work of the General Electric Company.

BATTALION OFFICERS MEET.

The Battalions officers met with the commandant last Wednesday evening and discussed a new plan for the awarding of the medals. The new scheme is to award the colors, not only for the best drilled company, but also to allow additional medals to be awarded for the efficiency of officers and non-commissioned men. The new scheme is to award the colors, not only for the best drilled company, but also to allow additional medals to be awarded for the efficiency of officers and non-commissioned men.

 Inspector of Dams, A. R. McKinnon of Albany, N. Y., who has charge of the inspection of all the dams in New York state presented his report. All the dams are absolutely safe and furthermore states, "The dam is an excellent example of the construction of which I think it was not only the dam as could have been constructed." This is of interest to New Hampshire men for this dam is the work of Prof. C. E. Hewitt of the E. D. Department who had full charge of its design and construction.
The following is taken from a letter by C. H. Harrison, a former professor at this institution, who is at Pullman, Wash., and refers to an article printed in the "New Hampshire." The article by Boutwell is very good. It is a swelled headed but it takes a man to be successful, and another not to have success. It is one thing to be successful; the man who can fill the position for which they are fitted.

Ten years ago there were a dozen different makes of creamery or factory separators in use. Today over 98 per cent of the world's creameries use DE LAVAL separators exclusively.

It means a difference of several thousand dollars a year whether a DE LAVAL or some other make of separator is used in a creamery.

Exactly the same differences exist, on a smaller scale, in the use of farm separators. Owing to the fact, however, that most farm users do not keep as accurate records as the creameryman, they do not appreciate just what the difference between a good and a poor separator means to them in dollars and cents. Nine times out of ten the farmer can't tell whether or not he is wasting $50 to $100 a year in quantity and quality of product through the use of an inferior cream separator.

If you were in need of legal advice, you would go to a lawyer. If you had the toothache you would see a dentist. Why? Because these men are all of the creamery man? His experience qualifies him to advise you correctly. He makes.

When it comes to buying a separator why not profit by the experience of these men who make the separation of milk? The men who make the separator are the practical recommendation for the DE LAVAL cream separator. It means to them in dollars and cents. Nine times out of ten the separator will give you the best service and know.

THIS PAPER WAS MONOTYPED AT THIS OFFICE.

Re:- Alan Stockdale, who is so favorably known by students and alumni of New Hampshire College, showed in his sermon at Tremont Temple last Sunday, that he is an enthusiast in baseball. Among other things he said: "The game is never lost. Were any of you at the American League ball grounds on that memorable 30th of May when the Athletics and the Red Sox were playing? It was the ninth inning, the score was 5-1 against us. There were two men out. Speaker was at the bat. The umpire called one ball, two balls, three balls, one strike, two strikes, Speaker got a hit. He ran it out. There was a rally, the score was tied. The game was won in the tenth inning and we went home hammering our hats to pieces."

When Mr. Stockdale got through with his description of the game, the men in the audience were cheering, as they do when they are on the bleachers. As soon as he could make himself heard, he said in a weak voice: "I should like to see men going out of church hammering their hats to pieces because of some home run and rally that had happened there."

Larmed, the grand old man in American tennis, has consented to captain the American tennis team in its endeavor to bring back to America the Davis International tennis trophy. The other two members of the team are Beals Wright of Boston and McLaughlin, the young champion of the Pacific coast. The team left the early part of last week for Australia and will be on the ocean about one month. The games will be played around Christmas. During the matches the players will have to protect their heads from the sun, for it is usually as hot in the Australian summer season as it was in New England the first ten days of July.

That the name "New Hampshire" is a powerful asset was proved by the number of people who visited the New Hampshire college exhibit at the Industrial exhibition in Boston this past month. Many of them said to the attendants, "I live in New Hampshire," or "I used to live in New Hampshire." The same thought seemed to be expressed frequently on the side lines during the Rhode Island game when men who probably had no direct interest in the college were heard to say repeatedly at the beginning of the fourth period, "They can't beat us now." Action taken by the Eastern Inter collegiate Basketball Association at its meeting in New York recently makes it possible to determine a national championship five. The Eastern champions will meet the winners of the series for the Western title, and the matches for the first time will have the American college championship as an incentive.

Dr. Hendricks, a former instructor in physics at New Hampshire College, showed in his sermon at Tremont Temple last Sunday, that he is an enthusiast in baseball. Among other things he said: "The game is never lost. Were any of you at the American League ball grounds on that memorable 30th of May when the Athletics and the Red Sox were playing? It was the ninth inning, the score was 5-1 against us. There were two men out. Speaker was at the bat. The umpire called one ball, two balls, three balls, one strike, two strikes, Speaker got a hit. Dealers in Good Clothes and Shoes.

FOOTBALL GAME.

On last Friday the 2 yr. 1912 class football team defeated the 2 yr. 1913 team by the score of 12 to 0. Swasey starred for the winners making both touchdowns while Jenkins excelled for the freshmen.

EXERCISES SUSPENDED.

On next Saturday college exercises will be suspended. This is a joy vote of the faculty in accordance with a demand of the student body for a holiday after fraternity initiations.
