## REVIEW OF FOOTBALL SEASON

### Prospects for the Team Next Year.

The football season has ended. While in percentage of games won the team has not been as successful this year as was expected, there has developed on the field a stronger feeling of loyalty to New Hampshire than has ever before existed. Crippled at the outset by the loss of several of the strongest men; checked in the middle of the season by changes in the coaching system, the team exhibited at the time of final testing a remarkable spirit of aggressive determination.

The first game with Bates, resulting in a 6 to 6 tie, promised a winning eleven but on the eve of the Brown game injuries to Brackett and Pettengill darkened our prospects, and an inferior team was beaten 56 to 0. Without Pettengill Davidson, Crosby, or Brackett the team made a plucky fight on the following Saturday, but the men from the Pine Tree state scored one touchdown and two goals from the field. A week later Springfield Training School proved superior to our men, winning by a 28 to 0 score.

Boston College, however, was an easy victim in the second home game of the season and was beaten by the score 12 to 0. A practice game with the U. S. S. North Carolina was also won 11 to 0. On October 28 Rhode Island came to Durham with the best team in its history, having held Brown to two touchdowns and having beaten Maine, Massachusetts, Norwich, and Tufts. In the first three periods of the game New Hampshire completely out-played the men from the baby state, but in the last minute of play, after Rhode Island had made a touchdown on a fluke, their quarterback kicked a dropkick, winning the game by the score 9 to 8.

The game with Massachusetts was lost by one touchdown and a dropkick. In the first six minutes of play the powerful "Aggie" line rushed the lighter one half the length of the field for a touchdown. Outweighed and out-classed generally, however, the weaker team came back strong, fighting valiantly until the final sounding of the timer's whistle. In view of the overwhelming weight of the Massachusetts team, the New Hampshire players are to be commended for an 8 to 0 score.

Captain Lowd has proven to be an able leader, playing a truly wonderful game during the last part of the season. His line plunging was the feature of the Rhode Island game while his defensive work at Manchester was sensational. Manager Berry has also proved efficient in performing the duties of his office.

Of the men who made their letters this season those who will be lost by graduation are Captain Lowd, Swasey, Morgan, Crosby, Perkins, and Pettengill. There remain for a nucleus for next year Jenness, Jones, Foster, Brackett, Kiley Haines, and Willard who who their letters this season. Included in the list of promising men who have played this year on the second team, getting into some of the varsity games are Williams,

Leach, Reardon, McCartney, Jenkins, Reed, Davis, Hobbs, and Lambe. With such a squad from which to pick a team next year and with an able coach, New Hampshire should be well represented in football.

### N. H.'S AWARDED.

The executive committee of the Athletic Association has announced the list of thirteen men who are awarded their "N. H." in football for the season which just closed. According to an amendment adopted for this year, the thirteen men who play the largest number of minutes in the last two games and the manager shall be awarded their letters. The list of men is as follows: Capt. C. M. Lowd, Clinton, Mass.; I. C. Perkins, '12, Kennebunkport, Me.; Fred H. Swasey, Berwick, Me.; R. C. Morgan, '12, Concord; A. W. Jenness, '13, Dover; P. C. Crosby, '12, Amesbury, Mass.; P. A. Williard, '13, West Union, Mass.; J. E. Kiley, '15, Concord; P. C. Jones, '13, Milton; W. L. Brackett, '14, Portsmouth; R. E. Haines, '15, Tilton; J. B. Pettengill, '12, Dover; P. A. Foster, '13, Claremont; and Manager G. W. Berry of Stratham.

### ALPHA CHI SIGMA.

A regular meeting of the A. X. E. Fraternity was held last Thursday evening. After the regular routine business Prof. James gave an interesting talk on the properties of some of the rare earths. This was followed by a most excellent report by J. E. Robinson '12 on "Radio-Activity."

### AGRICULTURAL NEWS.

At the regular meeting of the Agricultural Club held Monday evening Nov. 6 the following program was rendered: Vegetable Growers Association of America, Mr. Lumsden; New England Fruit Show, A. G. Davis; Industrial Exposition in Boston, Hadley; Agricultural News, Coombs and Bell; Value of Keeping Close Accounts, Field and Skinner; Current Events, Ober.

The teams representing New Hampshire at the New England Fruit Show won third place in judging and tied Manchester for second place in packing. Maine secured first in both judging and packing, while Connecticut was second in judging and didn't enter a packing team. Massachusetts, usually our strongest rival, was last in judging.

M. S. Watson of N. H. was high man in the packing contest.

The scores for the judging contest follow: Maine, Bartlett 64, Dunlap 25, Jones 32, total 121. Conn.; Clarke 50, Healey 23, Lazem 39, total 112. N. H.; Berry, 55, Sawyer 35, Skinner 15, total 105. Mass.; Clapp 27, Garkell 29, Harlow 36, total 92.

Chester S. Wendell '09, M. E. Harvard Graduate School of Applied Science, is stationed at Hackensack, N. J., with the Public Service Electric Co.

Prof. F. C. Moore attended the fall meeting of the Association of Mathematics Teachers of New England. The meeting was held in Boston on Oct. 28.

Prof. E. R. Groves has been asked by the state department of education to serve on the committee to revise the regulations governing the state teachers' examinations.

## FRESHMEN 14 SOPHOMORES 0.

### First Year Men Outplay Their Oponents.

A week ago today, the freshman won the annual class football game from the sophomores by the score of 14 to 0, and then celebrated their victory in the evening with a rousing bonfire on the hill, adjoining the library.

Davis, Haines, Watson and the ends excelled for the freshmen. Davis was a consistent ground gainer, Haines ploughed the line through for long gains, and Watson generally made his distance on tackle plays. The freshman ends drove back the plays of their opponents many times for large losses. The sophomores played a scrappy game, but were outelassed.

The sophomores won the toss and chose the goal favored by the wind. Thompson kicked off. The "sophs" could not gain and punted, only to recover the ball after two plays on a fumble. The sophomore class again punted and again obtained the ball for the second time on a fumble. A few minutes before the end of the period, the freshman held for downs on their own 35 yard line. From here during the last of the first period and the first part of the second, they carried the ball over for a touchdown. Davis' end run of 35 yards was the indirect means of the score. Haines kicked the goal.

The sophomores kicked-off to the freshman, who immediately punted. Unable to make any ground, the sophomore returned the punt. Plunges by Haines and Watson carried the ball to the 25 yard line, where Thompson kicked a neat goal. The half ended in less than a minute later. Score 1915, 9, 1914, 0.

The results of the second half were decidedly in favor of the freshmen. At the beginning they rushed the ball to the sophomore's two yard line, where they were held for downs. The sophomores recovered the punt on their own 40 yard line. They had to punt again and the freshmen obtained the ball on their own forty yard line. In three plays they carried the ball ten yards and the period ended. The ball was almost in the middle of the field. In the next period, the freshman carried the ball over the line, only to fumble on the last play, a sophomore recovering the ball for a touchback. The sophomores punted from the 25 yard line. A few rushes carried the ball to the 40 yard lines and then Haines slipped through center for the freshmen for a long run and a touchdown. A few minutes later, the game ended with the score 14 to 0 in favor of the entering class.

### Summary.

FRESHMEN SopHOMORES  
Reed, re . . . . . le, Lamb

Umpire—Jones. Field Judge—Crosby. Touch-  
downs—Haines 2; goals, Davis; goal from field,  
Thompson. Time 4-9 minute periods.

### GIFT TO FORESTRY DEPT.

The Department of Forestry has just received from Mrs. G. L. Green of Concord, aunt of Alan Leighton of the senior class, an excellent collection of native and tropical woods. There are over 150 pieces altogether, mostly of uniform size, about ten inches by two inches. It is planned to arrange the specimens on the wall of the forestry class room where they will serve as an ornamental feature and can be readily examined by classes in the identification of woods.

### TO SUCCEED PROF. SLATE.

Mr. Frank App, a graduate of the Pennsylvania State College last June, has accepted the position as assistant in Agronomy to succeed Prof. Slate who is now at the University of Maine. Mr. App had some experience teaching before entering college and served as instructor during his senior year. He reported for duty last Friday.

### DR. PARSONS MAKES SEVERAL TRIPS.

Prof. C. L. Parsons, recently elected chief mineral chemist of the Bureau of Mines, will retain his headquarters in Durham for some months, using this place as a basis for trips to various parts of the country while planning the development of the work and of the new laboratories to be built in Washington.

He has been on a trip to Illinois and Wisconsin and the following news has been received from the New Hampshire Alumni at the University of Illinois. He returned on Saturday.

He has already made two trips and is at present making a western tour. Montreal, Ottawa, Toronto and Niagara were included on the first trip. During the record trip he was in Syracuse where he spoke to the students of Syracuse University and visited the works of the Solvay Process Company and the Halcomb Steel Company. From there he went to Ithica where he spoke at Cornell and to Schenectady where he visited the research laboratory and work of the General Electric Company.

### BATTALION OFFICERS MEET.

The Battalion officers met with the commandant last Wednesday evening and discussed a new plan for the awarding of the colors. The new scheme is to award the colors, not only for the best drilled company, but to allow athletics to count in the end. To carry out this plan it will be necessary to hold on inter-company gymnastic meet this winter and also a track meet next spring. It is thought that this scheme will not only make drill more interesting on account of the competition but will help develop athletics here at the college.

Inspector of Dams, A. R. McKinn of Albany, N. Y., who has charge of the inspection of all the dams in New York state pronounces the Collier's dam absolutely safe and furthermore says, "The dam is an excellent example of concrete work and is as good a form of dam as could have been constructed." This is of interest to New Hampshire men for this dam is the work of Prof. C. E. Hewitt of the E. E. Department who had full charge of its design and construction.

### DEVELOPING THE EXECUTIVE.

Every college year brings out many more times than one the remark: "There is no one else to do it." If this is so, and there is generally reason to doubt the statement, there would be at that point a weak place in the college. It is true in all places that when a man is found who is willing to do the work that is placed upon him, he is given as much as he can or will carry—and then asked to take some more. This is true in college as well as in business life; perhaps it may be said to be more true in the former than in the latter, for to many men in college voting for a man to take a position is more the getting of it done than the placing of the right man in office. This fault can never be fully corrected so long as young men remain as they are as a class—carefree, careless, rollicking and semi-thoughtless. It would not be natural for a student body to sit as a jury of twelve upon the qualifications of this man as manager of team so-and-so, or of that man as president of the Utopian Debating Club. They may and are expected to vote on all occasions with the proper thought as to the weight of their ballot. However, place this phase as high as you please, and still there is a large percentage who will fail to see just their responsibility.

If we accept the above as true, then to those men already in office of various kinds, comes the idea of their responsibility. Each of these presidents, chairmen, or managers has a power that can be wielded to the great advantage of the student body. The manner in which this can be carried out is not so very difficult, but it does make it necessary that the men in power be of the thoughtful conscientious kind. The solution is this: to practically all of the executive positions of college life there come opportunities to nominate or to propose men for other office in college, class, or fraternity life. These opportunities are sacred trusts and every man proposed should be passed through a mental catechism. Has he the ability to stick to a thing? Is he too easily discouraged? Has he any personality? Has he ever been tested on smaller pieces of work? Has he ever shown any executive power? Does he give attention to detail as shown in his college or other work? In short is he the man who can fill the position for which he is nominated, appointed or elected? These questions answered fairly will at once throw some candidates into the scrap heap, while it will bring to the fore some other who fulfills a majority of the qualifications, of which

those pertaining to executive and detail are the most important.

This attitude is believed to be the one taken by most New Hampshire men, but the details of thought along this line should be forcibly before us at all times. Not only should men in office think of these things carefully and analytically, every man voting should on all occasions give due consideration to the questions and thoughts herein set forth. Thorough application of this idea will take away the last atom of truth in the statement that there are not men for the positions. There will be men enough and they will be in the place for which they are fitted.

The following is taken from a letter by C. H. Harrison a former professor at this institution who is at Pullman, Wash., and refers to an article printed in the "New Hampshire." The article by Boutwell is very good. It is a shame though that the eastern states do not support their state institutions better. At the last session of the legislature here they passed a mill tax bill which will provide for the state schools. The University at Seattle gets 42½ one hundreds and the college here 35 one hundreds of a mill, and the balance is divided between the three normal schools of the state. It is estimated that the college here will receive about \$325,000 annually. And of course as the population and the wealth of the state increases the income for the university and the college will grow in proportion.

The sophomore-freshman football game has been played and won. The victory was clean-cut and decisive, the celebration was fine; even so, members of 1915, do not let the blue cap with the white button shrink and shrink until only an aureole of bushy hair is seen in its place. 'Tis one thing to be successful, and another not to have success take away reason. Anyone can be swelled headed but it takes a man to keep normal under stress of continued victory. Be ye men.

Dr. C. L. Parsons, formerly head of the Department of Chemistry at New Hampshire visited the University of Illinois Nov. 3 and 4. Friday evening, Nov. 3, he was entertained at a dinner given by the chemistry faculty, and later delivered an address under the auspices of Zeta chapter of Alpha Chi Sigma on "Mineral Wastes, The Chemists' Opportunity." A large audience attended. Saturday noon he was entertained at a luncheon given by the New Hampshire Alumni in Urbana, Ill., at the University club. Among those present were Prof. H. F. Moore '98, Mrs. H. F. Moore '99, W. F. Langelier '09, W. S. Abbott '10, H. P. Corson '10, O. A. Arozian '11, and Prof. and Mrs. A. M. Buck formerly of New Hampshire. Saturday evening he was a guest at the initiation banquet of Alpha Chi Sigma, the professional chemical fraternity.

Prof. E. R. Groves spoke in Portsmouth recently on "Psychology and Business."

### A PURELY MUTUAL COMPANY.

The policies issued by the Massachusetts Mutual Life Insurance Company, are purely mutual and much more liberal than those of other Companies. The premium rates are LOW the dividends are large, and they are paid annually on the anniversary of the policy. Paid up Insurance, Cash Surrender Values, and Extended Insurance are guaranteed after two years premiums have been paid. If you want THE BEST THERE IS IN LIFE INSURANCE, send us your name and address, date of birth, kind of policy desired, and we will mail you a Specimen Policy of the Massachusetts Mutual Life Insurance Company for your inspection. Compare it with policies issued by other Companies that do business on the Annual Dividend Plan, we feel confident that you will be convinced. THAT IT IS THE BEST.

# 98% OF THE WORLD'S CREAMERIES USE De Laval CREAM SEPARATORS

Ten years ago there were a dozen different makes of creamery or factory separators in use. Today over 98 per cent. of the world's creameries use DE LAVAL separators exclusively.

It means a difference of several thousand dollars a year whether a DE LAVAL or some other make of separator is used in a creamery.

Exactly the same differences exist, on a smaller scale, in the use of farm separators. Owing to the fact, however, that most farm users do not keep as accurate records as the creameryman, they do not appreciate just what the difference between a good and a poor separator means to them in dollars and cents. Nine times out of ten the farmer can't tell whether or not he is wasting \$50 to \$100 a year in quantity and quality of product through the use of an inferior cream separator.

If you were in need of legal advice, you would go to a lawyer.

If you were sick you would consult a doctor. If you had the toothache you would see a dentist. Why? Because these men are all specialists in their line, and you rely upon their judgement and skill. When it comes to buying a separator why not profit by the experience of the creamery man? His experience qualifies him to advise you correctly. He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent. of the world's creameries use DE LAVAL exclusively.

There can be no better recommendation for the DE LAVAL cream separator than the fact that the men who make the separation of milk a business use the DE LAVAL to the practical exclusion of all other makes.

## ODDS AND ENDS.

Rev. Alan Stockdale, who is so favorably known by students and alumni of New Hampshire College, showed in his sermon at Tremont Temple last Sunday, that he is an enthusiast in base ball. Among other things he said: "The game is never lost. Were any of you at the American League ball grounds on that memorable 30th of May when the Athletics and the Red Sox were playing? It was the ninth inning, the score was 5-1 against us. There were two men out. Speaker was at the bat. The umpire called one ball, two balls, three balls, one strike, two strikes. Speaker got a hit. He ran it out. There was a rally, the score was tied. The game was won in the tenth inning, and we went home hammering our hats to pieces."

When Mr. Stockdale got through with his description of the game, the men in the audience were cheering, as they do when they are on the bleachers. As soon as he could make himself heard, he said in a weak voice, "I should like to see men going out of church hammering their hats to pieces because of some home run and rally that had happened there."

Larned, the grand old man in American tennis, has consented to captain the American tennis team in its endeavor to bring back to America the Dwight Davis international tennis trophy. The other two members of the team are Beals Wright of Boston and McLaughlin, the young champion of the Pacific coast. The team left the early part of last week for Australia and will be on the ocean about one month. The games will be played around Christmas. During the match the players will have to protect their heads from the sun, for it is usually as hot in the Australian summer season as it was in New England the first ten days in July.

That the name "New Hampshire" is a powerful asset was proved by the number of people who visited the New Hampshire college exhibit at the Industrial exhibition in Boston this past month. Many of them said to the attendants, "I live in New Hampshire," or "I used to live in New Hampshire." The same thought seemed to be expressed frequently on the side lines during the Rhode Island game when men who probably had no direct interest in the college were heard to say repeatedly at the beginning of the fourth period, "They can't beat us now."

Action taken by the Eastern Inter collegiate Basketball Association at its meeting in New York recently makes it possible to determine a national championship five. The Eastern champions will meet the winners of the series for the Western title, and the matches for the first time will have the American college championship as an incentive.

Dr. Hendricks, a former instructor in physics at New Hampshire College, was a guest of Prof. Groves on October 27 and 28. Since being graduated from Harvard Medical school two years ago, Dr. Hendricks has been specializing in psychiatry at the McLean asylum in Massachusetts.

A book by Caspa Whitney, the author who passed the summer at Durham Point, has been added to the library. It is entitled "Jungle Trails and Jungle People."

The Sophomores of the Massachusetts Institute of Technology have voted to refrain from any hazing of the Freshmen.

### DEPUTATION TEAM.

The Christian Association Deputation Team spent the week-end at Pinkerton Academy, Derry. On Friday evening an entertainment was given to the students and on Sunday H. R. Tucker and P. C. Jones spoke to the young men of the town. The team was cordially entertained by A. S. Colby, '11; and Miss M. A. Drew, '11. Next Saturday the deputation will go to Milton to offer a similar program.

### ALUMNI NOTES.

H. B. Tuttle has just returned to college after four weeks passed in Vermont. During this time he packed apples in Corinth.

J. Harry Priest '08 and Miss Ruth Almy of Schenectady, N. Y., were united in marriage on Oct. 11. They will reside at 602 Union street, Schenectady.

Bernard Ayers Lougee 1909 and Miss Annie Pauline Weldon were married Thursday, October 12th in Pittsfield. Mr. Lougee is with the Pittsfield Light and Power Company.

Frank H. Bills '10, instructor in mathematics and civil engineering at Rhode Island College, was recently elected vice-president of "The Tavern Hall Club" of Kingston, R. I.

Elmer E. Lyon, N. H. '01, was elected Oct. 16 as Superintendent of Education of St. Tammany Parish County, Louisiana. He will have over 60 white teachers and 30 colored ones under his charge. Mr. Lyon was not a candidate for the place, but nevertheless he received 7 out of 9 votes against an active candidate, and he has accepted the position to take effect as soon as his successor at Rugby Academy, New Orleans, is chosen.

The 61 students sent this year to this country by the government of China have not followed the custom of years previous, when by far the great majority went to Harvard and Technology. This year the distribution is as follows: University of Michigan 16, University of Wisconsin 13, University of Illinois 8, Colorado school of mines 5, Cornell University 5, Purdue university 3, Massachusetts Institute of Technology 3, University of California 2, Harvard University 2, Michigan college of mines, University of Virginia, Columbia University and Johns Hopkins University, one each.

### 'F BACTERIA WERE AS EASILY SEEN AS GNATS.

If bacteria were as easily seen as gnats no one would need to tell you how much superior

was to other washing materials. But because bacteria cannot be seen by the unaided eye, and because you have always believed things to be clean that looked clean, you do not appreciate how Wyandotte Dairyman's Cleaner and Cleanser does an immense amount of cleaning that you are apt to overlook.

To every Dairyman, be he the owner of one cow, or the owner of many, a dairy cleaner is a necessity and it should be one that will not only remove the dirt and objectionable matter that can be seen, but the invisible bacteria as well.

Ask your dealer for a small sack.
