SUCCESSFUL BIBLE STUDY CAMPAIGN.

Over Half the Students Have Enrolled.

The New Hampshire Christian Association Bible study committee with T. J. Yaris '13 as chairman has been conducting a Bible study campaign which has been very successful. To date 167 men have been enrolled in the three courses to be given this year. There are 167 men divided among five groups. Sixty-five are fraternity men, 21 non-fraternity upperclassmen, 13 two-year 1912, 36 two-year 1911, and 35 freshmen. The fraternity men will study, "The Life of Christ," the non-fraternity men and 2-year '12, "The Social Significance of the Teachings of Jesus," while the freshmen and 2-year '13 men will study, "The Life of Paul." The courses are to cover a series of twelve lessons. The classes are to be made up of small groups led by one professor and in the fall will be given to each class before giving a lesson to a group. The leaders of the various groups are as follows:

Normal Groups: Prof. Brooks, Prof. Smith, Mr. Taisne.

The leaders of the various groups are as follows:

Physical Activity.

A. T. A. PLEDGES.

The following men are pledged to the Alpha Tau Alpha fraternity: Horse Converse, Blodgett, W. E. Bartlett, Barr, R. W. Parsons, Noble, W. H. Robinson, Nottage, B. B. Smith, Professor Pottorf, Graham, Bodwell, and E. A. Smith.

P. C. JONES—FOOTBALL CAPTAIN.

In electing P. C. Jones '13, of Milton, captain of the football team for the season of 1911 the team is assured of having as a leader one of the best athletes in the college, who has been in college during the past two years. He prepared for college at the Irving School, Barrytown-on-the-Hudson, New York, where he was actively associated with athletics, playing on the baseball, football, and basketball teams. He was also active in literary and class circles. Since entering college Jones has played for three years on the football team at end and in the back field in which position his versatility has made him a valuable man. For the past two years he has also played on the basketball team where his quickness on the bosses and in the field has helped the team many times in basketball last year he showed himself to be a strong, fast, ready player. Although he has not gotten his letters in track, Jones has been a member of the track team and has won several points for the college in that branch of sport. In religious circles Captain Jones is a member of the fore and rear of the Secretary of the Christian Association, in which position he expends the energy that he shows on the field. He is also Managing Editor of "The New Hampshire," secretary of the Athletic Association, and takes an active part in all other college activities. He is a member of the Kappa Sigma fraternity and of Campus and Casket.

WINTER DAIRY SCHOOL.

Seventeenth Annual Announcement by New Hampshire College.

The following announcement has been made by the college.

The 17th annual dairy school at New Hampshire college opens Tuesday, November 22, 1911, 8 a.m. and closes Friday, December 2, 1911, 12 noon. The school offers instruction in dairy farming and creamery and farm husbandry. This year's work on farms for being given a strong course to dairy farmers. This course includes a study of such subjects as the growing of profitable crops for dairy cattle, the judging, feeding and breeding of dairy cattle, and a study of factors influencing the quality of the milk from the time it leaves the cow until it reaches the consumer. The work in making sourdairy is given in the use of the score card in dairy inspection. With the new dairy building completed and equipped the school offers excellent opportunities for giving instruction in practical dairy work. Milk and cream are received from over forty farms assuring sufficient material for practice and demonstration. The practical work in milk testing, milk inspection, and in the farm dairy milk in the creamery, training and experience for men who desire to take up commercial dairy work in milk plants, creameries as dairy or milk inspectors. Address Dairy Department, New Hampshire college, Durham, N. H.

FRATERNITY INITIATIONS.

DURHAM, N. H., NOV. 22, 1911.

WHY NOT?
This is the day when every bustling section, state, city or town is adopting a slogan. From all parts of our land there seems to be business or agricultural opportunity some pamphlets and cards telling of the advantages of that particular section. From California come magazines setting forth an attractive and convincing manner the manifold ways of obtaining success there; from Oregon and Washington come a like quantity of material from the remuneration districts also they come. Los Angeles, Duluth, Detroit, and many of the mid-western cities are doing this advertising and are doing it so well that fine results are obtained. Then we come to our own state and find ours, the city of Manchester, waking up to this sort of thing. Our state paper, the Union, which is published there, has adopted a slogan, "Come to Manchester"; and it keeps before the eyes of its readers. If these things are bringing results, as they surely now, why should we not adopt a similar one for the college? We desire to place "New Hampshire" fully in the eyes of all residents of the state, that every person may know of the college, of its situation, its buildings, its apparatus, its faculty, its students, its activities and its needs. We desire to place the institution before their eyes so well and so thoroughly that no student graduating from a preparatory school within the borders of the Granite state, shall choose his college without perforce knowing all about him or her. The last step in this direction is for the Alma mater to slip by without a word. It is our duty, not to mention the value of the alumni column is quite likely to be far from satisfactory to us and to you.

LECTURE COURSE.
The lecture course tickets are out. Now is the time for every student who possibly can do so to purchase one. It is true that the committee has found it necessary to raise the price to seventy-five cents, but for the attractions offered the price is truly small. Admission to the concert by Vinder's band or that of the Schubert's with their ladies quartette is well worth the price of the ticket, not to mention the brilliancy of the lecturers by Rabbi Wise, Dr. Hartman, or Mr. Clark. Now is the time to get on the lecture wagon and ride through the season cheaply; tickets can be bought for a single lecture cost you much more.

SCHEDULES INDEXED.
In the registrar's office there has been instituted a card index of the residence halls of all the students with the exception of a few who have neglected to submit their schedules, and from this index may be easily determined where any student is to be found. This system has already proven efficient and of value to those who have used it. Its employment is encouraged by the Dean.

FIRST LECTURE.
To Be Held Next Tuesday Evening.
Rabbi Stephen S. Wise, the noted orator of New York, is to be the first speaker in the lecture course, which begins next Tuesday evening. The subject is yet to be announced.

ODDS AND ENDS.
The new seats in the Physics lecture room greatly improve its appearance. Prof. H. M. Rasmussen spoke lately to the Durham Woman's Club on "Civics." Dr. W. W. Hayes.

A PURELY MUTUAL COMPANY.
The policies issued by the Massachusetts Mutual Life Insurance Company, are purely mutual and much more liberal than those of other companies. The premium rates are LOW and the dividends are paid annually on the anniversary of the policy. Paid up insurance, Cash surrender values, and extended insurance are guaranteed after two years premiums have been paid. If you want the best there is in life insurance, send for the specimen policy and your copy of the Massachusetts Mutual Life Insurance Company for your inspection. Compare it with policies issued by other Companies that do business in the State. Dollars will be convinced that IT IS THE BEST.

De Laval CREAM SEPARATOR

Saves Its Cost Every Year

Occasionally the intending buyer of a cream separator who has but a small amount of ready cash to invest is tempted to put his money into one of the so-called “cheap” machines which are being largely advertised.

Why pay your hard earned money for a “cheap” trashy machine when you can buy a reliable DE LAVAL upon such liberal terms that

IT WILL MORE THAN EARN ITS COST WHILE YOU ARE PAYING FOR IT.

When you buy a DE LAVAL you have positive assurance that your machine will be good for at least twenty years of service, during which time it will save every possible dollar for you and earn its original cost over and over again.

If you purchase the so-called “cheap” separator you must pay cash in advance and then take the chance of the machine becoming worthless after a year or two of use, to say nothing of the cream it will waste while it does last—all of which means that you have virtually thrown away the money invested in the cheap separator and wasted your time, labor and product in the bargain.

The DE LAVAL separator pays for itself. It runs easier, skims cleaner and lasts longer than any other cream separator.

THE SMALL VERSUS THE LARGE COLLEGE.

Many times during the last four years it has been the thought of the writer that he has been peculiarly fortunate in getting his undergraduate training at a small college. There are six reasons for this feeling:

1. The isolation between students, faculty and officers of administration is closer in the small college.
2. There is a spirit of love for the institution fostered in every student.
3. The opportunity to make a larger number of life friendships is greater.
4. The opportunity for social life is much greater.
5. The small college man is much better rounded-out for his life work.
6. The expense of living in the small college is about one half.

In explanation of these six reasons, the following may be said:

The large college man, until his senior year, in his laboratory and recreation work meets a younger and less experienced instructor than in the small college where heads of departments are usually closely associated with students in all courses. The large college man sees his professor only in lectures except perhaps in more advanced courses. As for meeting the officers of administration, the student in the large college rarely comes in contact with them.

The spirit of love for the institution is fostered into the small college man whether he will or not. If he can possibly come out for the team he is forced to by his self-respect. In the large college the ardent spirit of self-sacrifice is felt mainly by a few. Often a student will not know the name of a single man on a varsity team in the large college, he may be so completely remote from the activities of the team which represents the institution.

In the small college the circle of one’s friends is larger and more constant, resulting in a larger list of life friendships. In the large college for the student outside the fraternities, the list of one’s friends may be limited to one’s table mates at boarding house.

For the large college man his social life is narrow unless he pushes himself forward to a great extent. In the small college, men are expected to call and be entertained at the homes of their instructors and professors and to enter more closely into the family life of the community. In the large college, while the houses are just as open, the advantages of the resulting social life is not felt so keenly and many students are narrowed in their social life at a time when habits of life and thought are fast becoming fixed.

The small college man is usually much more rounded out socially and perhaps better equipped to meet the affairs of life than is the large college man. He is familiar, through closer association, with more lines of work and gets into more activities outside his curriculum from choice rather than from necessity.

Lastly, the yearly expense of the average student in a large university is about $800 which would be the upper extreme for the small college men. To the writer, it would seem to be ideal for the average student to go through a small college and then enter a large university that if he has been a fair student in the small college, he is just as well equipped and in many cases better equipped for advanced study than the graduate of the large college.

It has been a source of much pleasure to the writer that the standing of all New Hampshire men at Cornell has been very high, that they have been well equipped and have taken positions that

SMALL COLLEGE VS THE LARGE COLLEGE.

Concluded from page 1

with the best of Cornell's own post-graduates when they have completed their work for advanced degrees. No New Hampshire man needs feed for a moment that his training is inadequate. He is just as good the day he graduates as the best of the large college graduates. He can realize that he can spend one more year at a university to round out his training, acquire poise and self-confidence at no greater expense for the five years training, four at the small college and one at the university, than he would have incurred in getting his baccalaureate degree at the large college.

NEW COURSE.

A Normal Manual Arts Course Added to the Arts and Science Division.

A so-called Normal Manual Arts course has been added to the Arts and Science division. The course is designed to fit for teachers of manual training, and, with the idea that such a teacher may not only teach manual training but other subjects, a large amount of regular A & S work is required and the student is also allowed 20 points electives. There will be several special courses in wood-work, iron-work, and in forcing, besides a course in the junior year on "Theory and Administration of Manual Training." The rest of the course is made up of both regular A & S and engineering subjects except for the electives. There is just one rule governing these electives, that is: "Of the 20 hours elective not less than six must be in a natural science and not less than three in group i. of the group system of elective studies. As the freshmen work is no different from that of the regular A & S, division, any '15 man may register for the course before next fall without trouble if he so desires.

CHANGE OF TITLE.

Hereafter the so-called Agricultural, Arts and Science, and Engineering Courses will be known as the Agricultural Arts and Science and Engineering Divisions and the term course will designate various subdivisions of the three divisions as, for example, the Electrical Engineering Course, the Normal Manual Arts Course etc.

The faculty has arranged to give all freshmen a short course in "Library Practice."

RIFLE CLUB MEETING.

The following officers were elected at the Rifle Club meeting held Monday afternoon of last week: President, Alan Leighton '12; vice-pres., A. J. Leighton, '12; secretary, C. M. Neal, '12; treasurer, M. Gale Eastman '13; captain, Stephen De Meritt '12. The club will enter a team in the N. R. A. matches this year and with an early start and good practice should stand well with the teams from other colleges.

Dean Pet tee has been enjoying a ten days' vacation. During this time he attended the 25th anniversary of the formation of the Grange at Hinsdale. Prof. Pet tee was the first master of that grange.
