## SKATING RINK BEING BUILT.

### Athletic Association is Constructing Rink.

The Athletic Association in conjunction with the faculty is building a skating rink in the rear of the gymnasium. The ice surface will cover from two, to two and one half acres and the water will be taken from the reservoir. The depth of the water will not be over four feet in any place.

The original idea was to flood the foot-ball field, but the land in the rear of the gymnasium was considered best, for the purpose, although part is owned by Charles Hoitt. Mr. Hoitt, however, said he would gladly allow the flooding of the land for the use of the students and it was immediately begun.

Prof. Pettee surveyed for the dam which will have to be constructed and Mr. Stone is superintending its construction. An old drain in the land is being removed as well as the stone wall and a line of trees. The pipe leading from the reservoir to the gymnasium will then be tapped and the cold weather will do the rest.

An inter-fraternity hockey league will probably be organized this year. This will develop material so that next year a varsity hockey team can be organized and ice-hockey be added to the athletic sports here at New Hampshire.

#### ANDREW E. MESERVE.

Andrew E. Meserve, a well known business man of this town, passed away Thursday, Nov. 16th as the result of an operation for peritonitis. The funeral services were held at his home on Saturday, Rev. Telephone Taisne officiating. Mr. Meserve had been an active citizen in this town for several years, and his death means a tremendous blow not only to his family but to the whole community as well.

#### A. X. Z.

A regular Alpha Chi Sigma meeting was held Friday evening in Conant hall. After the regular business Philip S. Gowen '12 gave a talk on "The Universal Law" and T. O. Smith, assistant chemist at the Experiment Station, described a new method for the determination of arsenic.

#### BULLETIN OF THE WEEK.

Wednesday—11.45 a. m. Thanks giving Recess begins.

Friday—1:30 p. m. College exercises resumed. 4:00 p. m. Basketball Practice.

Saturday—

Sunday—9.30 a. m. Bible school, church chapel, 10.45 a. m. Morning service at the church. 5:00 p. m. C. A. meeting.

Monday—4:00 p. m. Basketball practice. 7.00 p. m. Agricultural meeting. Morrill hall.

Tuesday—4:00 p. m., basketball practice; 7.00 p. m. Fraternity meetings.

Wednesday—1:30 p. m. "New Hampshire" out.

#### TRACK CAPTAIN.

At a meeting of the track team men held Saturday noon in Thompson Hall, Beach '13 was elected to succeed C. M. Loud '12 as captain of the varsity track team.

Robin Beach comes from South Natick, Mass., and is a graduate of the Natick High School. At this institution he was prominent in athletics having been a member of the school's base ball, football and track teams. In his senior year he was track captain. Here at New Hampshire he made his "N. H." at track last year and holds the college record for the high jump, 5 ft, 4 in., and the hammer throw, 106 ft. He is also prominent in various other activities being vice president of his class, treasurer of the New Hampshire Christian Association, a member of the student council and one of this season's cheer leaders. He was also on the editorial staff of the 1910 Y. M. C. A. hand book.

#### TRACK MANAGER.

John H. Bachelder '12 the newly elected track manager is very popular among the undergraduates and prominent in many college activities. He is a member of the Gamma Theta, Casque and Casket and Senior Skulls societies. In 1909 he received the gold medal in the prize drill and last year he was awarded the prize sword. This year he is major of the cadet battalion. Last year he was elected as one of the assistant managers of the track team and with the experience thus gained he will no doubt make a very efficient manager.

#### ATHLETIC ASSOCIATION MEETING.

An athletic association meeting was held last Wednesday after chapel for the purpose of electing two assistant basketball and two assistant track managers. C. S. Adams '13 of Marlborough and V. E. Leavitt '13 of Laconia were elected to assistant basket ball management and P. C. Gale '13, of Concord and N. D. Paine '13 of Berlin to the assistant track managerships. The resignation of H. R. Tucker '12 as track manager was then accepted and John Bachelder of Concord elected to the position.

#### AT APPLETON ACADEMY.

The lecture course given by the agricultural men of the faculty at Appleton Academy in New Ipswich was concluded Thursday and Friday of last week with two lectures by Professor Rasmussen. This course was opened last March by two lectures by Professor Taylor and two by Professor Pickett. Two lectures were given two weeks ago by Professor Eekman.

The series of lectures has been highly commended and largely attended by the people of New Ipswich and the surrounding towns, and the principal of the academy, Professor H. W. Lewis, is to be congratulated on his enterprise in initiating a series of lectures of this kind.

John Crogan '08 who was a recent Durham visitor has gone to Dallas, Texas as construction superintendent of the Stone Webster Construction Co. which is building a power house there.

## GIVES LAND TO COLLEGE.

### T. J. Davis Gives Land For a Park.

Thomas J. Davis, a lawyer of Duluth, Minn., has given to the college a plot of land of about eight acres situated in the town of Lee. He wishes the place to be called "Davis Park" and the following is copied from the deed:

"The primary inducement for, and purpose of this gift, is the educational value of such a plot, with its present tree growth, no part of which existed there June 1, 1894, and such additional forest as the forestry department of the College shall from time to time establish.

"The secondary purpose is found in the hope that on one day in each following October during the productive life of the trees I have set, which it is believed should in the ordinary course of nature be fully two centuries, such of the student body of the College, together with members of the faculty and their families as may value the privilege, shall enjoy a nutting party in this park; that this annual event may be eventually come to be commonly known in the college annals as "Davis Park Day;" that in the ten secular days next following such Davis Park Day the pupils and teachers in the two public schools nearest this park shall annually have a like undisturbed opportunity there; all to the end that out of the day dreams of these youths and children perhaps once in a generation one shall materialize in the form of a bigger, better, more lasting and far-reaching effort to increase the sum of the world's happiness.

"Each of the present trees represents in the concrete a sacrifice of personal pleasure, needed rest from labor, honorable ambition, or other proper attainment which the time, thought and money used would have yielded. It has been a labor of love, as a memorial of my parents, Nathaniel G., and Elizabeth (Jones) Davis."

Mr. Davis has annually given \$15 to the college for use in buying prizes to be given the short course men best fitted in stock judging.

#### ALPHA ALPHA ALPHA INITIATION.

Saturday evening November 25, the Alpha Alpha Alpha sorority held its initiation at Grange hall. The seven initiates were: Miss Nettie Finley, Dover; Miss Alice Hoitt and Miss Carrie Hoitt, Durham; Miss Ann Hopkins, Miss Mary Murphy, Somersworth; Miss Marion Nash, Dover; Miss Helen Plummer, Rollinsford. After the initiation an inviting banquet was served to the sorority and its guests.

The society was exceedingly fortunate to have present a number of alumni. The visitors were: Mrs. Gibbs, Miss Margaret DeMeritt '11, Durham; Miss Olive Hatch '11, Dover; Miss Mabel Hayes, Durham; Miss Rena Young, Newmarket, Miss Sara Pettee '08, Durham; Miss Edna Brown '09, Rye Beach; Miss Helen McKone, Dover.

#### ARTICLE BY PROF. J. H. FOSTER.

It is my belief that most students do not take their future seriously enough. I do not wish to moralize or to call attention to features of general welfare of which we may all be amiss. I have reference only to the planning and shaping of professional careers based on the make up of the individual. In this regard there should be two periods in a student's college career. The first period includes perhaps the first half of his life in college; the second includes the remainder of his course. Analysis of one's capabilities should begin with the freshman and be carried through his sophomore year. It is not so easy for the freshman to do this as for the sophomore since the freshman has not yet begun to appreciate what the world holds forth to him and he is busy learning the fundamentals of whatever his future work may be. But the sophomore is beginning to see the light. He is nearer the time when he must shape his career and elect the branches of study he wishes to pursue. If he has properly studied his own inclinations and capabilities and has decided according to his best judgment and knowledge of himself, he will be able to enter the second period with his eye on the future that lies beyond the college, and with his mind alert for information which will teach him how to direct his actions after graduation.

This world is full of good advice and of well informed people who are eager to give others the benefit of the knowledge gained by experience. The junior and senior should be looking for all this. Too often when graduation approaches, they only begin to wonder after all just what they are going to do. Why not accumulate during the years before graduation a fund of information and facts about every conceivable line of work which there is a possibility of his entering? This can be done by investigation, reading, meeting people, and of possible travelling; at all times reasoning and digesting this information and making it serve his later ends.

One of the features of scientific management, about which so much is now being said, is for the employer to adjust the workers with relation to occupation so that each may be devoting his mind of his strength to that for which he is most fitted. In the same way, a college student, thinking as an employer, should be studying his own capabilities in order to shape his career in harmony with them.

Half of the game is in selecting a goal with judgment and foresight, and the other half is in keeping that goal in sight. There is a story of a freshman who once tacked a "V" over the door of his room where he could see it when he went to bed at night and when he awoke in the morning. This letter stood for valedictory and during all his four years this student kept the goal in sight. In the end he won. It is always easier to accomplish a purpose when the mind is fixed upon it with resolution and determination. It is always more interesting to tramp or drive through the country when there is a definite object in view. So it is that a larger measure of success in establishing one's self in life is assured if a student analyzes himself and his prospects early in his college

### CONCERNING WARNINGS.

The mid-semester warnings have come as they generally do and have left some of us happy, some of us reasonably well satisfied, and others of us feeling a heavy burden on our shoulders. Those who thought that no hours preparation per day would suffice as well as X hours, found to their dismay that he who would pass must study. But then—no one has "flunked out" yet, and the half semester before us is enough to help those who are willing to take the advice to get their work up and passed off at examination time.

Figures have been compiled at the Dean's office to show the relative standing of the classes for the past three semesters, and these show facts that are decidedly satisfactory in nearly all cases. These figures give the percent of men who have been warned that they are below passing in over seven credit hours. They show an increase in the senior class from 0% last year to 2½% this year; in the junior class, a decrease from 32% to 8%; in the sophomore class, an increase from 23% to 24%; in the freshman class a decrease from 20% to 17%; in the second year two-year class, 0% each year; in the first year two-year class, an increase from 9% to 14%. A most marked improvement is seen in the standing of the present junior class over their sophomore standing of last year, especially is this to be commended when the difficulty of the junior engineering year is taken into account. The freshman class is showing the result of the high standard of admission that was applied this year, while the two year course seems to be showing a greater percent of men who are unfitted to keep up with the work. Many of the men who enter this course are fitted for higher work, but those who are not are sufficient to bring down the average grade of the class.

Here is a comparison of the grades of last year and of this, showing a general average for the four year classes and the two-year classes; there has been a decrease in the four year classes from 21¼% to 12 7-8%, almost cut in two, while the figures show an increase from 4½% to 7% in the two-year group.

In the percentages for the past three semesters which are appended, only those representing the first semester of the year have been used in the comparison made above. All three show the same tendency, however.

Men receiving over seven hours warnings:

1st Sem. 1910-11.—Seniors 0%; Juniors 32%; Sophomores 23%; Freshmen 20%; Second year, Two-year 0%; First year, Two-year 9%.

2d Sem. 1910-11—Seniors 0%; Juniors 17%; Sophomores 11%; Freshmen 12%; Second year, Two-year 0%; First year, Two-year 25%.

1st. Sem. 1911-12—Seniors 2½%; Juniors 8%; Sophomores 24%; Freshmen 17%; Second year, Two-year 0%; First year, Two-year 14%.

### AN ACKNOWLEDGMENT.

The New Hampshire wishes to thank Mr. Charles Hoitt for his kindness in allowing the college to flood a portion of his land for skating purposes. The student body thoroughly appreciate this kind service of one of its public-minded citizens.

As has been mentioned before in these columns, the old system of daily (tri-weekly as we had it) chapel exercises was found unsatisfactory here as elsewhere. After due consideration the weekly Convocation was substituted. Under this method of a twenty-five minute meeting each Wednesday noon there has been felt to be an advance over the old system. Gathering to hear a speaker once a week for this period affords a good opportunity for the dropping of good seed for thought. These short addresses when rightly used, and generally that is the case, give us new ideas of points of life, or at least old points in new dresses. So far the ideal Chapel system for a college is undiscovered, but we feel that until that is done, we are far ahead of the old system so much in vogue in our sister colleges.

The resignation of H. R. Tucker from the position of track manager is to be regretted, since his untiring efforts alone made possible the existence of track athletics as a major branch of sport here at New Hampshire. A.L.

It is confidentially reported that the Dean has received many letters from fond parents in regard to warnings sent to their offsprings.

### CONVOCATION EXERCISES.

November 22d Dr. Z. W. Kemp, principal of Sanborn Seminary spoke at the regular chapel exercises. He stated the close connection existing between that preparatory school and New Hampshire College and mentioned an optimistic prophecy that in twenty-five years, this college would have more influence on the development of the state than Dartmouth now has.

In addition Dr. Kemp outlined those essentials of character necessary in every life, in order that that life, should fulfill all requisites for the attainment of the highest ideals that might be striven for by the ideal citizen. He closed with the sentence: "Live upright, straight-forward, sober and godly lives and you will gain success for yourself and for your state."

# De Laval CREAM SEPARATOR Saves Its Cost Every Year

Occasionally the intending buyer of a cream separator who has but a small amount of ready cash to invest is tempted to put his money into one of the so-called "cheap" machines which are being largely advertised.

Why pay your hard earned money for a "cheap" trashy machine when you can buy a reliable DE LAVAL upon such liberal terms that

**IT WILL MORE THAN EARN  
ITS COST WHILE YOU ARE  
PAYING FOR IT.**

When you buy a DE LAVAL you have positive assurance that your machine will be good for at least twenty years of service, during which time it will save every possible dollar for you and earn its original cost over and over again.

If you purchase the so-called "cheap" separator you must pay cash in advance and then take the chance of the machine becoming worthless after a year or two of use, to say nothing of the cream it will waste while it does last—all of which means that you have virtually thrown away the money invested in the cheap separator and wasted your time, labor and product in the bargain.

The DE LAVAL separator pays for itself. It runs easier, skims cleaner and lasts longer than any other cream separator.

Be sure and see the local DE LAVAL agent and try a DE LAVAL before you buy any cream separator.

### ATTENDED MEETING IN OHIO.

Pres. Gibbs, Director Kendall and Prof. Taylor returned to Durham last week from Columbus, O., where they had been in attendance at the meeting of the American Association of Agriculture Colleges and Experiment Stations.

Pres. Gibbs was president of the section on "College Work and Administration" and was appointed for this year on the committee of the general association on "College Organization and Policy." Prof. Taylor spoke before the Farm Management Association on "Subject Matter for the Course in Farm Management."

The meeting was attended by college president, deans and professors from all parts of the United States and Canada. The principal item under discussion was "Government Aid for Secondary Education in Agriculture, Mechanic Arts and Domestic Science and also for Agricultural Extension Work. Bills already before Congress were discussed in this connection and the association decided to go before Congress and try to secure needed legislation in this direction

### CHANGE OF NAME.

The W. H. A. society has been changed to the Greek letter sorority Alpha Alpha Alpha.

### EXPERIMENT STATION BULLETIN.

The following bulletins have been recently published by the Experiment Station, under the supervision of J. C. Kendall, director of extension work: "Extension Work of the New Hampshire College and Experiment Station", J. C. Kendall; "Full Management of Laying Hens," T. R. Arkell; "Care of Sheep during the Breeding Season," T. R. Arkell; "Weevils in Beans," W. C. O'Kane; "The Feeding Stuffs Inspection for 1911," B. E. Curry and T. O. Smith.

Professor Rasmussen recently spoke before the Winnisquam Grange at Lockmere on, "How to Increase Profits in Dairying," and before the Olive Branch at Hebron on "Farm Butter Making".

Perry J. Burbeck, who was graduated from the electrical engineering department last June, has secured a very important position with a corporation in Oakland, California, formed to develop the water power in four counties east of San Francisco. Mr. Burbeck, having shown special proficiency in the course on hydro-electric development while in college is well fitted to fill the position.

Mr. David Lumsden, instructor in horticulture and landscape gardening, has been appointed chairman of the standing committee on "Education" at the annual State Grange meeting to be held in Manchester, Dec. 19-22.

The Alpha Zeta fraternity held its second meeting of the month Wednesday evening November 22. C. H. Hadley was elected scribe in place of Fisher resigned because of numerous other duties. Several of the faculty members were present and plans were discussed for booming the four year agricultural courses. Changes in required subjects which would tend to improve the courses were also talked over at considerable length.

Professor F. W. Taylor judged corn and gave an address upon "The Selection and Culture of Corn" at the Vermont Corn Show, November 24 and 25, held at Windsor, Vermont, under the auspices of the Windsor County Y. M. C. A.

Prof. Rasmussen spoke at Appleton Academy last Thursday on "How to Increase the Profits in Dairying" and "Cooperation in Agriculture."

# "How Much Better That Is!"

This is a remark made by one college man to another, when looking at our new Fall Suits. Our ready for service clothing has so much more style, so many more beautiful lines in the construction of the chest and shoulders of the coats that it is noticeable compared with those in made to order garments. There was a time when the majority of well dressed men had to go to a tailor to have their clothes made and made right. Today the best dressers are buying our kind of clothes. Look at the difference in men dressed in our suits of nice quality compared with a made to order suit that costs all the way from \$5 to 10 more. There is no use to buy a made to order suit, unless you are willing to pay from \$45.00 up, when you can buy our kind of nice fitting garments from \$15.00 up. Let us show you and you will see the difference.

career and then directs his energies toward the accomplishment of his object. If all would do this, then there would be fewer misfits in business life and greater happiness and success in the professions that men follow.

#### SLIDE RULE LECTURE.

A course consisting of four, two and a half hour lectures, is being given to the sophomore engineering students on the use of the slide rule. Prof. Hewitt of the electrical engineering department has been given charge of this work. This course will meet the long felt needs of the engineering students. No extra time will be required of the students taking this work as the course is made possible by taking two drawing periods and two shop-work periods.

#### BASKETBALL PRACTICE.

The first week of practice, under the direction of Captain Holden, has been a strenuous one. Judging from the speed of the men out for the team, to date, a fast team will be developed. The varsity men of last year are showing their old time form. Captain Holden is faster than ever this year, while Jones is showing his old time form. Sanborn at center is living up to expectations as is Watson at guard.

Of the other men out for the team, those who have proven of varsity calibre are Swasey, who is playing a fast game at guard, Lowd, Came, and Fernald. Came appears to be the best man of the freshmen who are trying out for the team. The following men have reported for practice during the last week: Captain Holden, H. W. Sanborn, M. S. Watson, P. C. Jones, G. A. McPheters, C. M. Lowd, P. C. Gale, S. Sanborn, J. S. Elliott, J. F. Thompson, E. L. Sanborn, B. B. Fernald, R. E. Came, F. S. Swasey, G. F. Cobleigh, H. V. Bent, P. M. Phillips, G. W. Berry, J. H. Bachelder, R. E. Haines, Y. G. Key, C. W. Scott, I. C. Story, W. C. Krook, and T. J. Twomey.

#### CONFERENCE IN DOVER

The fifth annual Boys' Conference for the state of New Hampshire was held by the State Young Men's Christian Association in Dover, November 24-26. New Hampshire College was well represented by a large delegation from the student Christian Association. H. R. Tucker had an important part in making arrangements for the convention and he also delivered an illustrated lecture on "Camp Life".

At the banquet, attended by over four hundred boys and young men from all over the state the college orchestra furnished very creditable music, while Clarence J. Dresser was the conference organist, officiating at all of the services. The following men attended the convention: H. R. Tucker, R. H. Knight, A. Leighton, P. C. Jones, R. Beach, P. A. Foster, G. F. Lane, J. E. Ladd, M. G. Eastman, P. C. Gale, D. W. Ladd, C. J. Dresser, T. G. Yaxis, G. N. Perkins, W. H. L. Brackett, C. R. Heath, R. W. Smart, F. J. Hobbs, W. S. Bartlett, C. A. Reed, H. A. Lindquist, A. L. Murdoch, A. E. Grant, J. S. Elliott, S. H. Fogg, C. H. York, P. Woods, H. R. McCartney.

Prof. Groves has been appointed a director of the New Hampshire Branch of the American School Peace Association.

#### IF BACTERIA WERE AS EASILY SEEN AS GNATS.

If bacteria were as easily seen as gnats no one would need to tell you how much superior

was to other washing materials. But because bacteria cannot be seen by the unaided eye, and because you have always believed things to be clean that looked clean, you do not appreciate how Wyandotte Dairyman's Cleaner and Cleanser does an immense amount of cleaning that you are apt to overlook.

To every Dairyman, be he the owner of one cow, or the owner of many, a dairy cleaner is a necessity and it should be one that will not only remove the dirt and objectionable matter that can be seen, but the invisible bacteria as well.

Ask your dealer for a small sack.
