EXTENSION WORK OF COLLEGE.

Many Types of Publicity Utilized.

The extensive use by the state newspapers of articles written by professors of the college, dealing with current topics of vital importance to the advancement of the state, has caused much comment concerning the publicity work carried on by the institution. This work is of such diversified nature and so wide in its influence that it seems fitting to explain its essential features in order that students and others interested may know its scope. The policy of the faculty committee on publicity is to have New Hampshire College ably represented in every activity of the commonwealth, with publicity methods of publishing the advantages of the college and experiment station. The New Hampshire Tilton Sem., and the high schools of the state, by President Gibbs, is a part of this work of the correlation of the secondary schools with the higher in the state.

One of the methods employed in bringing the college before the public at large, is through the daily and weekly periodicals, of such articles as: "The Necessity of a Textile School in New Hampshire", by Prof. F. E. Cardullo; "Trade Schools," by Prof. F. W. Putnam; "Social Life at New Hampshire College," by Prof. R. Whoriskey; and "Military Training as a Developer of Character," by Lieutenant O. W. Edgerly. One word of caution must needs convince their readers that New Hampshire possesses a state institution which is well adapted to the training of the modern soldier.

Of just as wide influence is the work that is being done by representatives of the college faculty, in bringing before granges and other progressive associations in the state, through the weekly "The New Hampshire," by Prof. F. W. Putnam, and the "New Hampshire College" and "New Hampshire College", by Prof. R. Whoriskey, and "New Hampshire College", by Prof. O. W. Edgerly. The last named work has been so popular that it has been translated into French and German.

At the banquet Saturday evening President Hall gave the address of welcome and Chas. Wiese '13 gave the response. Prof. F. W. Taylor acted as toast-master. Various toasts were responded to by the following old men of the college and experiment station: Prof. O. L. Eckman, Huse, Converse, Blodgett, Wiegel, Barr, Pascoe, Robie, W. H. Robinson, Norton, Bell, Sawyer, York, Priest, Graham, Bodwell and A. E. Smith. The following old men were back from the trip: H. R. Tucker '12, O. F. Lane '13, P. C. Jones '13, L. F. Brown '14, H. A. Lindsley '14, W. S. Bartlett '15 and L. S. Crafts '15.

The Agriculturist's lands are to him now as our own individual fields of productive resources are to us. Are the farmer's acres his to be drained of their last atom of richness? Shall he turn the fertile fields that he received from the soil of its fertility. Similarly should we preserve our moral energies. We owe a heritage to our progeny equal in fertility to that which has descended to us. If we waste or drain these funds we are falsely and unfortunately to betray a trust.

"With reference to plant life we may extend a similar analysis to the plant life, the tendency of science today is to produce a plant that will not be suscep­tible to unfavorable influences. Hence there is an increasing efficiency in useful plants. So also is mankind becoming better. Men are not now ruled by the more curer and more brutal impulses to which men of the past were subject. This demonstrates that cither is a growing immunity from temptation, and consequently from sin."

A. T. A. INITIATION.

The initiation and banquet of the Alpha Tau Alpha Fraternity was held on Friday and Saturday evening last week with a very satisfactory reception by all, on both occasions. At the banquet Saturday evening President Hall gave the address of welcome and Chas. Wiese '13 gave the response. Prof. F. W. Taylor acted as toast-master. Various toasts were responded to by the following men: H. V. Bent and Howard W. Sanborn were also present.

The Ladies' Aid Society of the Durham Congregational Church held a successful Christmas fair in the church vestry last week.

ALPHA CHI SIGMA.

A regular meeting of the Alpha Chi Sigma fraternity was held last Friday evening in the student lounge in the hall. D. B. Keys '12, O. F. Lane '13 and P. C. Jones '13 spoke of the fraternity's work in the college and experiment station. The following old men were back from the trip: H. R. Tucker '12, O. F. Lane '13, P. C. Jones '13, L. F. Brown '14, H. A. Lindsley '14, W. S. Bartlett '15 and L. S. Crafts '15.

GLEE CLUB CONCERT.

On Wednesday evening, Dec. 20th, a concert will be given in Thompson Hall by the Glee Club, assisted by the college orchestra. The songs to be rendered are chosen with a view to the fitting of every taste. The lovers of true art in music will be satisfied for the program is replete with classical numbers. Those who appreciate the more popular college airs will also be pleased, for there is to be no disparity of clever and "catchy" songs. The ability of our orchestra is well known to all of us, and we may be assured it will be at its best in accompanying the vocal selections as well as in the rendition of classic overtures. In short, the concert is to be an event that no one can afford to miss.

Chemists Curry and Smith expect to have ready in time for the Christmas season a bulletin on "A Rapid Method for the Determination of Soluble Arsenie in Food." The results of their tests will be published in the Journal of the American Chemical Society. The C. R. B. Co. will publish a paper on "A Rapid Method for the Determination of Soluble Arsenie in Food." The results of their tests will be published in the Journal of the American Chemical Society. The C. R. The Manual Arts Course.

In instituting a Normal Manual Arts Course, the object of which is to prepare men and women particularly for teaching in and supervising institutions where manual subjects are taught, the instructors have taken a pioneer step. A careful study of the statistical monograph issued by the Department of the Interior and entitled "Instruction in the Manual Arts in the United States," fails to sight one such course in the country. It is understood that the colleges giving instruction in the Manual Arts, but it is natural to infer that the courses are taught much the same as at our own institution at the present time—to give a general knowledge of doing such things mechanically and perhaps correctly, but not clearly understanding the reasons or laws which underlie the project. Both are essential to proper education.

In the four years course laid out by the committee, the several phases of preparation necessary for the teacher to be given due consideration. Briefly, the ground covered is this:

1. The American Agricultural Chemical Company.
92 State St., Boston, Mass.

2. The Neal Printing Company.

4. The Maxwell Print Company.

5. The American Hotel Sanitary Company.

A PURESLEY MUTUAL COMPANY.

The policies issued by the Massachusetts Mutual Life Insurance Company, are purely mutual and much more liberal than those of other companies. This is because the dividends are large, and they are paid at regular intervals. The dividends are divided among the policyholders. The policyholders are, therefore, the owners of the company.

The American Hotel Sanitary Company.

13TH ANNIVERSARY OF HISTORIC EVENT.

One hundred and thirty-seven years ago today was an important date in the history of the American nation. This date should also be of especial importance to the people of Durham; for, it was at this time that the early inhabitants of this town displayed their patriotism, and showed the kind of metal of which they were made by striking the first real blow for independence.

The circumstances which brought about this act are often neglected by present day historians; they are, however, deserving of an important place, since this was the first resort to arms in the American Revolution.

On Dec. 13, 1774, Paul Revere delivered a message to General Sullivan, of this town, stating that the King of England had forbidden the importation of arms and ammunition into the colonies and also, that troops had been ordered to occupy the city of Portsmouth and to reinforce the garrison located at Fort William and Mary in Portsmouth Harbor.

Immediately Sullivan collected a small band of men from Durham and vicinity, and that night after dark they sailed down the Oyster River to the fort, in a gondola. Removing their boots in spite of the cold weather, so as not to make the slightest noise, they scaled the walls of the fort. The little garrison was so completely surprised that they were unable to make any effectual resistance. The fort was captured and the colors hauled down. The victorious band secured as spoil one hundred kegs of powder with the same number of muskets. These were borne to Durham and the powder was hidden under the church pulpit. The church was then located near Sullivan’s house. A part of the gunpowder was later conveyed to Charlestown, Mass., in an ox-cart, and was there used to good advantage against the British troops at Bunker Hill.

This act, performed by citizens of Durham was one of extreme daring and bravery; for, by attacking a royal fort and hauling down their king’s flag, they had committed treason in one of its worst forms, if England should come out as victorious. However, when a short time after that, they were declared guilty, they responded by making a bonfire in which they destroyed all their uniforms, insignia, etc., which had been given them by the mother-country. This expiation, though trifling in itself, revealed the spirit with which the American colonies were ready to fight in behalf of their country. And it is of especial interest to the people of Durham as it shows that their ancestors were not afraid to take the initiative, and strike the first blow for national independence.

AT SCAMMEL GRANGE.

The following officers for nineteen years were elected by the Scammell Grange of Durham: Master, David Lumedden; Overseer, Wilbert C. Cheesey; Lecturer, Wm. H. Wolf; Steward, Wayne Langley; assistant steward, Chas. H. Hadley Jr., chaplain, Albert E. Grant; treasurer, Frederick W. Taylor; secretary, Harrie E. Rand; gatekeeper, Stephen P. Cheesey; Ceres Miss M. Florence Lumedden; pomona, Miss Carrie E. Hoitt; Flora, Miss E. Letts; Miss M. Florence Lumedden; pomona, Miss Carrie E. Hoitt; Flora, Miss E. Willey; lady ass’t. Steward, Mrs. Harrie Rand; usherette, Mrs. Albert E. Grant.

W. L. Slate formerly assistant in an engraving at New Hampshire College, now of the University of Maine, was a visitor recently in Durham.

Prof. Pelletier and Jackson were door hunting in Campton recently.

This is a remark made by one college man to another, when looking at our new Fall Suits. Our ready for service clothing has so much more style, so many more beautiful lines in the construction of the chest and shoulders of the coats that it is noticeable compared with those made to order garments. There was a time when the majority of well dressed men had to go to a tailor to have their clothes made and made right. Today the best buyers are wearing our kind of clothes. Look at the difference in men dressed in our suits of nice quality compared with a made to order suit that costs all the way from $5 to 10 more. There is no use to buy a made to order suit, unless you are willing to pay from $45.00 up, when you can buy our kind of nice fitting garments from $15.00 up. Let us show you and you will see the difference.
