DR. P. L. REYNOLDS

Basket Ball and Track Coach.

New Hampshire College certainly secured a "ten strike" when Dr. Percy L. Reynolds was engaged to act as coach of the basket ball and track squad. It is not often that a man of his caliber is open for engagement at this time of year but a desire of Dr. Reynolds to give up aviation, in which he has for the past few months been engaged has made it possible for us to secure his services. Thanks are due to Dr. J. H. McCurdy of the Springfield Training School for putting us in touch with such a man.

Dr. Reynolds was active in the inter-scholastic athletic world during his course at Fall River High School and at his graduation acted as assistant physical director for fifteen months at the city Y. M. C. A. During the war with Spain he served in the navy and after his discharge entered the Springfield Training School. While there he was very active in athletics, holding the 100 yards record his first year and the 440 and half mile records his second year. He played on the second football team, and was captain of the school basket ball team during his senior year. For the last two years of his course he acted as assistant to Dr. McCurdy and was instructor in athletics and gymnastics.

During these last two years he was active in professional duties, track, athletics, competing in the middle distances, polevault and the jumps.

After graduation in 1902, Dr. Reynolds went to Augusta, Ga., as physical director in the Y. M. C. A., and at the same time began to study medicine at the University of Georgia, graduating as "M. D." in 1906.

The following September found him at the University of Maine as physical director and university physician, a position which he held for two years. Massachusetts Agricultural College offered further opportunities and Dr. Reynolds went there in 1908 to institute the department of physical education and to coach in track and hockey. His results proved him to be particularly strong in developing men for the cinder path. This past June he terminated his connection with that college, and as has been said, took up aviation in the Wright school, graduated and was in charge of the Harvard Aviation Field for the season. In addition to these things Dr. Reynolds has acted as supervisor of playgrounds at Jersey City, N. J., and at Salem, Mass. He is a member of the "American Physical Director's Association," and also of the "Society of Directors of Physical Education in Colleges."

Coach Reynolds reported last Monday and will be at the college for the remainder of the college year.

GENTLEMEN'S NIGHT.

The Woman's Club of Durham observed Gentlemen's Night last Thursday evening. A very pleasing program was given by George Bartlett Cutter, the singing humorist. A social hour followed the program during which ice cream, cake and coffee were served.

Lo! Now is come our joyful 'st feast!
Let every man be jolly.
Each room with ivy leaves be drest,
And every post with holly.
—Wither; Christmas Carol

CALENDAR.

Wednesday—8.00 p. m. Glee Club and orchestra concert in Thompson hall.

Thursday—8.00 p. m. Casque and Casket meeting at Theta Chi house.

Friday—4.00 p. m. College closes for the Christmas vacation.

BASKETBALL SCHEDULE.

Manager F. G. Fisher '12 of the basketball team, lately resigned, has issued the following schedule for the season:

Jan. 6—Mass. Inst. of Tech. at Durham; Jan. 16—Dean Academy at Franklin, Mass.; Jan. 17—Brown at Providence R. I.; Jan. 18—Rhode Island at Kingston, R. I.; Jan. 20—Boston Univ. Law School at Durham; Feb. 12—Rhode Island at Durham; Feb. 14—Phillips Andover at Andover, Mass.; Feb. 17—Alumni at Durham; Feb. 24—Springfield T. S. at Durham; Feb. 28—Wesleyan at Middletown, Conn; Mar. 5—Dean Academy at Durham; Mar. 9—Soph-Freshman at Durham.

ATHLETIC ASSOCIATION MEETING.

At the meeting of Athletic Association held Wednesday the resignation of Frank G. Fisher '12, as manager of the basket-ball team was accepted. There was however, no new manager elected, and the executive committee will have the right to appoint a manager pro-tem until next semester. Mr. Fisher during his term of managership has proved himself to be a manager of efficiency and his resignation was regretted by the entire student body.

RELAY RACE.

Manager J. H. Batchelder '12 of the track team had arranged a relay race with Rhode Island State College at the B. A. A. indoor meet, February 10, 1912. The team will consist of four men each to run three hundred and ninety yards. The Physical Director and Captain Robin Beach '13 of the track team will have charge of selecting the team.

The students can purchase the following varieties of Christmas plants at the green house: cyclomer, in variety; geraniums; salvia, scarlet; roman hyacinths, narcissus and calla lillies. There is also on hand a good assortment of palms, ferns and other decorative plant.

Prof. B. S. Pickett visited the farm of Robert Faulkner last Saturday. Mr. Faulkner was a member of Gov. Bass's committee appointed to investigate irrigation.

Prof. Pickett is the author of a press article "Comments on Varieties of Apples."

SPEAKS IN BOSTON.

President Gibbs spoke before the meeting of the Massachusetts Schoolmasters' Club held at the City Club in Boston Saturday afternoon. The Boston Globe says:

The address of Dr. William D. Gibbs, president of New Hampshire College, who was the last speaker, was particularly interesting in that it showed the opportunities open nowadays to graduates from the agricultural departments.

In its attempt to follow out its formulated policy, which was originally expressed as the desire to give "liberal and professional education to the industrial classes in the several walks and professions of life," the college has introduced five departments; those of electrical, chemical and mechanical engineering, of agriculture and of the arts and sciences. The officers of the college get offers to place every graduate whom they care to recommend in splendid positions both in the industrial and in the teaching field.

Speaking of agriculture he said: "There are towns in New Hampshire paying twice the tax rate they paid 20 years ago and on less property than at that time. We need to send boys out of our college fit to take this wealth of land we have and develop it into fine farms. For what New England needs is agricultural progress, which has long been lacking."

GLEE CLUB CONCERT.

Tonight in Thompson Hall will be given a concert by the combined Glee Club and Orchestra. This is the first time that a Glee Club concert has ever been given so early in the year, and the event is awaited with much interest by the college as a whole.

The program is as follows:

Opening, Orchestra.

Soldier's Chorus—Glee Club and Orchestra
Quartette—College Quartette
Violin Solo—H. B. Catlin '12
The Lost Chord—Glee Club
Reading—Mrs. W. M. Dalglish
Vocal Solo—R. M. Sanborn, '13.
My Lady Chloe—Glee Club
Nut Brown Maiden—R. A. Knight, '15 and Club

Second Part.

Open up the Gates of Glory—Glee Club
Vocal Solo—J. A. Manter, '12.
Hard times come again no more—H. B. Catlin '12 and Glee Club
Vocal Solo—P. E. Steele 2 yr, '12 and Glee Club
Legend of the Chimes—H. H. Lindquist '15 and Glee Club
Medley of College Songs—Glee Club and Orchestra.

The Durham Sunday School held a very successful entertainment in the church chapel Monday afternoon.

ILLUSTRATED

LECTURE.

George B. Clark Gives Interesting Lecture.

In Thompson Hall on Friday evening, Dec. 15, a large and appreciative audience listened to a most interesting talk on hunting for big game in New Brunswick and Newfoundland, by Geo. B. Clark, collector for the Smithsonian Institute and also for the new Roosevelt museum at Washington. Those who attended enjoyed a rare treat, for the lecture was illustrated by a set of uniquely beautiful stereopticon views, and these, coupled with Mr. Clark's stories of personal experiences and observations in the wilds, presented a lesson in natural history not easily forgotten.

Mr. Clark is a business man, but is also a thorough lover of his avocation. For twenty successive years he has gone on an annual hunt for big game, and on these trips he has secured many live game photographs that are invaluable. The last twelve slides shown at the lecture—colored pictures of live moose in their native haunts, all taken by Mr. Clark in the open at distances of from only twenty-five to fifty feet from the animals, will never be seen on a screen again, as the lot was recently sold for five hundred dollars, with the restriction that they be shown at this lecture only. He is also an enthusiastic sportsman in many other lines, having served as an official at the Harvard-Yale track meet and also at the Exeter-Andover football game this year.

Mr. Clark refused to accept anything for his services. However, he intended to donate the lecture proceeds to the athletic association, thus showing plainly his attitude toward athletics in general and toward this college in particular. Hearing of the fellows who are now sick with typhoid fever, however, he decided to give this money as a benefit for them. When this was announced by President Gibbs in his introduction of the speaker, the applause was long and loud, an enthusiastic demonstration in appreciation of a true sportsman. But Mr. Clark does not stop there. To stimulate increased interest and efforts in track events, he has offered a cup to be known as the Clark cup to the winner of the mile run.

Briefly, he told first of hunting caribou in Newfoundland. On arriving there, he met first a pompous official who presented him with a paper to sign. This proved to be a prayer to the king, and on the payment of a fifty dollar note, his prayer was answered, and he was granted a license which allowed him three stags. Then he went inland into a country where an alien had never before hunted; where the only vegetation was caribou moss and stunted spruce trees, thick at the base and spreading out, but in height only about three or four feet; where there were many lakes high up in the mountains supplied by springs, and literally teeming with red spotted trout,—hundreds of them in which no line was ever

WILLFUL CUTTING.

The average college student is proverbially careless and somewhat thoughtless of consequences. Several years ago the student body decided that it was more powerful than the faculty and the entire college "cut" the two days following Thanksgiving. Some fairly strenuous methods were adopted at that time, and the students were made to see the error of their ways and since then things have gone along smoothly at the similar season of the year. This year, however, after a student body mass meeting vote to shorten the Thanksgiving recess to two days so that time could be saved for a spring vacation, about 60 men once more tried their success at taking a longer holiday. The results seem to be rather unsatisfactory from the standpoint of those men—and right so. It did seem hard to return for one recitation perhaps, but some ruling had to be adhered to, and after that vote at the mass meeting it appears that it was the moral bounden duty of all to return within the time specified by their own decision. We hope that all who have suffered in consequence of this, will take it to heart and say "never again," for it does not pay. The man who butts a stone wall is likely to get his head bruised, and not make any appreciable indentation in the wall.

As the season of the holidays approaches, The New Hampshire draws near to its first Christmas. We are very happy to realize that the sheet has been accepted so readily and with such words of commendation. At this our first opportunity, we wish you a very merry Christmas and happy New Year. May each of our student readers have a "pleasant and profitable" vacation, and return in January ready to put in the last hard work preparatory to the final examinations that are soon to come.

Another sign that things are moving—the present activity of the student welfare committee. It is good that the members of it have begun active work. Such a committee by continuous effort, and by sane suggestions can do unlimited good for the students and to the wayward landlords, if there happen to be any such in Durham.

A. I. E. E.

The first meeting this year of the New Hampshire College Branch of the American Institute of Electrical Engineers was held in Conant hall Dec. 11. At that time H. L. Coburn M., AM.

Soc. M. E., chief designer of the Ambursen Hydraulic Construction Co., of Boston delivered a very interesting lecture on "The Design of Dams." The meeting was well attended.

ATTENDED HEARING.

Prof. Whoriskey and Groves recently attended the first hearing at the State house in Concord, before the special committee of the Educational council appointed to revise the courses of study in the secondary schools of the state. Language was the subject considered at the meeting, and representatives from Dartmouth and the leading high schools and academies of the state were present and participated in the discussion. Three more hearings are to be held during the winter on other subjects now embraced in the courses of study under consideration. The result will probably be a complete revision of the courses now taught, which have been in use for several years, and which are regarded by educators as out of date.

COLLEGE CLUB.

A short business meeting of the college club was held last Wednesday afternoon. It was voted that a business meeting be held during the first week of every month and that club stationary be secured. For the benefit of some who evidently do not know who the club's officers are they are here given: Pres. W. E. Rogers, '12; Vice Pres. H. C. Holden '12; Sec. J. H. Bachelder '12; Treas. A. W. Jenness '13; It is announced that a first class entertainment will be held in the club rooms some evening soon after the Christmas vacation.

THE "TEN DEMANDMENTS."

For gross worldly wisdom it would be difficult to surpass the "Ten Demandments" hanging in one of the many salmors canneries at Steveston, Western Canada:

1. Don't lie. It wastes my time and yours. I am sure to catch you in the end, and that is the wrong end.
2. Watch your work, not the clock. A long day's work makes a long day short; and a short day's work makes my face long.
3. Give me more than I expect, and I will give you more than you expect. I can afford to increase your pay if you increase my profits.
4. You owe so much to yourself you cannot afford to owe anybody else. Keep out of debt, or keep out of my shops.
5. Dishonesty is never an accident. Good men, like good women, never see temptation when they meet it.
6. Mind your own business, and in time you'll have a business of your own to mind.
7. Don't do anything here which hurts your self-respect. An employee who is willing to steal for me is willing to steal from me.
8. It is none of my business what you do at night. But if dissipation affects what you do the next day, and you do half as much as I demand, you'll last half as long as you hoped.
9. Don't tell me what I'd like to hear, but what I ought to hear. I don't want a valet to my vanity, but one for my dollars.
10. Don't kick if I kick. If you're worth while correcting you're worth while keeping. I don't waste time cutting specks out of rotten apples.

DE LAVAL Cream and Butter Triumph as Usual At National Dairy Show

Cream and butter produced through the use of DE LAVAL CREAM SEPARATORS made the usual clean sweep of all Highest Awards at the great National Dairy Show (including the annual convention of the National Buttermakers Association) held in Chicago, October 26th—November 4th, just as has always been the case since the organization of the Association in 1892.

WHOLE MILK CREAMERY BUTTER.

The sweepstakes or highest award in this class was won by A. J. Anderson, Otisco, Minn., with a score of 97.50.

The second highest exhibit winning the silver service set prize, was made by J. L. Wahlstrom, Stark, Minn., with a score of 96.83.

FARM SEPARATOR BUTTER.

The sweepstakes in the gathered cream factory made butter class was won by R. O. Brye, of the Readstown Creamery Co., Readstown, Wis., with a score of 97.33, this prize winning butter being made from the cream of farm patrons using De Laval separators exclusively.

The highest scoring dairy or home made butter exhibit was that of Mrs. Frank Grant, Tonica, Ill., who also recently won first prize at the Illinois State Fair at Springfield.

PRIZE CREAM EXHIBITS.

The highest award for certified cream was made to Nichols Bros., Bloomfield, Ky., with a score of 98.80.

The highest award for market cream was made to O. J. Bailey, Tacoma, Ohio, with a score of 96.

ALL DE LAVAL SEPARATOR MADE.

Each and every one of these highest scoring butter and cream exhibits was the product of a DE LAVAL CREAM SEPARATOR, and this wonderful prize winning record, year after year, for twenty years, is overwhelming and unanswerable proof of DE LAVAL "ALPHA-DISC" superiority to any gravity creaming system or other centrifugal separator.

ALL-ELYSIAN ELEVEN.

Best Football Aggregation of the Ages.

By a "Scout."

A Harvard man, according to one of our exchanges, has picked a unique All-Elysian football eleven, in which the best material of the ages has been chosen. The line-up with a few changes, is as follows:

First Team	Second Team
Mercury, e	e Achilles
William the Conqueror, t	t Ajax
Hercules, g	g Ben Hur
Atlas, c	c Ursus
R. C. Morgan, g	g, Charles Martel
Sampson, t	t, John Ridd
Hiawatha, e	e Brackett
Napoleon, gb	g. b., D'Artagnan
Caesar(captain)hb	hb, Siegfried
(Lancelot)	(Ghengis Kahn)
"Mike" Reardon, fb	fb Sitting Bull

A few words of explanation might be added concerning our selection. For sure and clean handling of the ball, even "Perk" wouldn't stand a show with Atlas at center. For guards, Hercules and Morgan, as bald as the rest of the veteran crew, would make a pair invulnerable. William the Conqueror and Sampson, with his recently raised pompadour, being unsurpassed in boldness and resource, are easily the first choice for tackles.

The ends are well covered by Mercury and Hiawatha, "Any chap able to shoot an arrow and then beat it to the target would be a handy man to get down under punts" and Mercury could certainly get away with the forward passes.

We have chosen for the backfield, Napoleon, Caesar (captain) Lancelot, and Reardon. Bonaparte has countless times shown his ability to run off play. He puts lots of "pep" into the boys. For halfbacks we have chosen Caesar and Lancelot. Caesar has now learned the new game, and he knows how to pick the weak spots when he is hitting the line. We have selected him for captain. Lancelot could take care of all end runs. A man who could disguise himself as a kitchen knave could easily, when occasion demands, assume the role of the referee long enough to score at least once.

For fullback, who could suggest a better man than "Mike." He could not but work in concord with the rest of the backfield, and in consistent ground gaining and steady defensive work, he easily leads. He can also be used as a kicker.

For trainer who could act more ably than Dominic? His faithful service in the past, when in one whole season he has not failed to have plenty of cold water but twice and then it was not his fault for there was no water at all has won for him the respect and esteem of all. Even his military errands do not interfere with his indefatigable service. "Dick" is the unanimous choice for coach, for with his radiant personality and knowledge of the game, he is easily the peer of football. Detective Burns can well assume the duties of scout and we are confident he will encounter no difficulty in sizing up the opposing teams.

FOUNDERS' DAY.

At the regular meeting of the Kappa Sigma fraternity, held last week, F. D. Fuller '92, associate state chemist of Indiana, attached to the Purdue University Experiment Station, was initiated, and during the same evening, Founder's Day was observed. President W. D. Gibbs, Director John C. Kendall, Mr. Fuller, and Dr. A. C. Heffenger of Portsmouth, a retired surgeon of the United States Navy, were among the speakers.

ILLUSTRATED LECTURE.

Concluded from page 1

wet. He told how he got his three
stags, and described some of the habits
and especially the phenomenal fleetness
of foot of these beautiful and graceful
animals.

Then he took his audience on his trip
for moose with Kermit Roosevelt in
New Brunswick. He declared that
no game found anywhere on the globe
could compare in magnificence with the
bull moose of North America. Kermit
somewhat doubted this, but when, in
answer to the guides calling, the first one
came thundering through the woods,
crashing his horns against tree trunks
and bellowing deafeningly, and paused
at the top of the hill just above them,
pawing the earth madly, he was willing
to admit that the only thing in Africa
to equal it would be to be put a pair of
moose horns on a giraffe and then turn
him loose.

In closing, Mr. Clark said: "We
would be better men and women if we
could see more of nature. If you would
lose some of our conceit, if you would
realize the insignificance of man's
artificial existence, go to the wilds, see
nature in its true sublimity, and you will
realize that there is nothing that can
equal the wonderful works of the
Creator."

EQUAL SUFFRAGE ASSOCIATION.

At a meeting held Thursday afternoon
in the church chapel an Equal Suffrage
Association was organized by some of
the women of Durham. Mrs. E. R.
Groves was elected president and Miss
Carrie E. Buzzell secretary-treasurer
The meeting was addressed by Miss
Chase of Andover.

Rabbi Stephen S. Wise, illustrating
a point in his lecture, recently given
under the auspices of the college lecture
course committee, told the following
story:

"I once knew an old Irishman, who
was stricken with the dread disease.
smallpox. He was sick, in fact, very
sick and thought he was going to die.
So he called to his wife and said, "Mary,
go and bring to me the Jewish Rabbi.
I want the last rights of the Church
administered." Thinking he was in a
delirium, his wife replied soothingly,
"All right Pat, but you don't want the
Jewish Rabbi; you want good Father
O'Brien." "No" cried Pat decisively,
"I want the Jewish Rabbi. Do you
think I want Father O'Brien to get the
small pox?"

Would You Board a Dual Purpose
Cow if you Could Get a Dairy
Cow for the Same Money.

is not a cut rate dairy cleaner, but
it does give you a double value at
the same or often times a less price
than you pay for the washing ma-
terial you are now using.

How does it give you double value?
Simply by doing all the cleaning that
other washing materials do and all that
others leave undone.

Most any washing material will clean
milk utensils, separators, churns, pans
bottles, etc., so that they look clean.
But after using such materials if you
give them the germ or bacteria test it
will more often than not show that such
containers contain sufficient bacteria to
thoroughly seed with bacteria the whole
of the new milk with which you subse-
quently fill them.

Apply the same test to these same
containers after washing them with
Wyandotte Dairyman's Cleaner and
Cleanser, which has often been done,
and the number of bacteria found is so
small as to be an almost negligible
quantity.

The fewer the bacteria, the cleaner
and the better the milk, consequently,
milk worth more as milk, as butter, as
cheese and for and all food purposes.

That it pays to use Wyandotte Dairy
man's Cleaner and Cleanser you have
but to ask the Dairy Colleges or any
one of the thousands of dairymen who
use it, or better still—use it yourself.
