Basket Ball and Track Coach.

New Hampshire College certainly secured a "trifecta" when Dr. Percy L. Reynolds was engaged to act as coach of the basket ball and track squad. It is not often that a man of his caliber is open for engagement at this time of year but a desire of Dr. Reynolds to give up aviation, in which he has for the past few months been engaged has made it possible for us to secure his services. Thanks are due to Dr. J. H. McCurdy of the Springfield Training School for putting us in touch with such a man.

Dr. Reynolds was active in the inter-school athletic world during his course at Fall River High School and at his graduation acted as assistant physi-
can. Two years at the city's Y. M. C. A. During the war with Spain he served in the navy and after his discharge entered the Springfield Training School. While there he was very active in athletics, holding the 400 yards record his first year and the 440 and half mile record his second year. He played on the second football team, and was captain of the school basketball team during his senior year. For the last two years of his course he acted as principal and was instructor in athletics and gym-
nastics.

During these last two years he was active in professional duties, track, athletics, competing in the middle dis-
tance events, in which he jumped the jump. After graduation in 1905, Dr. Rey-

GARIOFIS

BASKETBALL SCHEDULE.

Manager F. G. Fisher '12 of the basket-
ball team, lately resigned, has issued the following schedule for the season:

- Jan. 6—Mass. Inst. of Tech. at Dur-
ham; Jan. 16—Dean Academy at Frank-
oburg; Jan. 17—Brown at Providence

- Jan. 20—Boston Univ. Law School at Durham; Feb. 12—Rhode Island at Dur-
ham; Feb. 14—Phillips Academy at Andover, Mass.; Feb. 17—Alumni at Durham; Feb. 24—Springfield T. S. at Durham; Feb. 29—

day evening. A very pleasing program

was given by George Bartlett Cutter, the rectors of Physical Education in Col-
leges."

and to coach in track and hockey. His
same time began to study medicine at
the University of Georgia, graduating
in their native haunts, all taken by
Mr. Clark in the open at distances of
for five hundred dollars, with the re-
stitution of the speaker, the applause
was long and loud, an enthusiastic de-
monstration in appreciation of a true
sportsman. But Mr. Clark does not
stop there. To stimulate increased
interest and efforts in track events, he
has offered a cup to be known as the
Clark cup to the winner of the mile run.

Brieferly, he told first of hunting camp
at Middlesex, a real hunter with reluc-
drees of them in which no line was ever

so as the desire to give "liberal and prof-
education and professional education to the in-
dustrial classes in the several walks and professions of life," the college has
introduced five departments; those of
electrical, chemical and mechanical
engineering, of agriculture and of the
arts and sciences. The officers of the
college confers to place every gradu-
ate whom they care to recommend in
splendid positions both in the industrial
and in the teaching field.

Speaking of agriculture he said:
"There are towns in New Hampshire
paying twice the tax rate they paid 20
years ago and on less property than
that at time. We need to send boys
out of our college fit to take this
land we have and develop
it into fine farms. For what New Eng-
land needs is agricultural progress,
which has long been lacking.

GLEE CLUB CONCERT.

Tonight in Thompson Hall will be
given a concert by the combined Glee
Club and Orchestra. This is for the first
time that a Glee Club concert has ever
been given so early in the year, and
the event is awaited with much interest
by the college as a whole.

The program is as follows:

Opening, Orchestra.
Soldier's Chorus—Glee Club and
Orchestra.

Quartette—College Quartette—"The Lost Chord"—Glee Club Reading—Mrs. W. M. Dalgliesh who was the last speaker, was particu-
larly interesting in that it showed the
opportunities open nowadays to gradu-
ates from the agricultural departments.
In its attempt to follow out its for-
mulated policy, which was originally
expressed as the desire to give "liberal
and professional education to the in-
dustrial classes in the several walks and professions of life," the college has
introduced five departments; those of
electrical, chemical and mechanical
engineering, of agriculture and of the
arts and sciences. The officers of the
college confers to place every gradu-
ate whom they care to recommend in
splendid positions both in the industrial
and in the teaching field.

ATTENDED HEARING.

Prof. Whoriskey and Groves recently attended the first hearing of the body of the State house in Concord, before the special committee of the Educational council appointed to revise the courses of study in the secondary schools of the state.

Language was the subject considered at the meeting, and representatives of a Dartmouth and the leading high schools and academies of the state were present and participated in the discussion.

Three more hearings are to be held during the winter on other subjects now embraced in the courses of study under consideration.

The result will probably be a complete revision of the courses now taught, which have been in use for several years, and which are regarded by educators as out of date.

COLLEGE CLUB.

A short business meeting of the college club was held last Wednesday afternoon. It was voted that a business meeting be held during the first week of every month and that club stationery be secured.

For the benefit of some who evidently do not know who the club's affairs are, they are here given.

W. E. Rogers, '12; Vice Pres. H. C. Holden '12; Sec. J. H. Bachelder '12; Treasurer, A. W. Jenness '13.

It is announced that a first class entertainment will be held in the club rooms some evening soon after the Christmas vacation.

THE "TEN DEMANDMENTS.""/

For gross worldly wisdom it would be difficult to surpass the "Ten Demandments" long shown to one of the many salmon factories at St. Stephen, Western Canada:

1. Don't lie. It wastes your time and yours. I am sure to catch you in the end, and that is the wrong end.
2. Watch your work, not the clock.
3. Give me more than I expect, and I will give you more than you expect.
4. You owe so much to yourself that you can afford to owe anybody else.
5. Dishonesty is never an accident.
6. Mind your own business, and leave that of others alone.
7. Don't do anything here which would shock the conscience of the man who pays for it, and which would shock you.
8. It is none of my business what you do at night. But if dissipation affects what you do the next day, I don't want to have friends who don't have a conscience.
9. Don't tell me what you think of my business, but what I ought to hear. I don't want a valet to own anything for me, much less a confidential friend.
10. Don't kick if I kick. If you're worth correcting you're worth keeping. I don't waste time cutting coupons out of rotten apples.

**ALL-ELYSIAN ELEVEN.**

Best Football Aggregation of the Ages.

By a “Scout.”

A Harvard man, according to one of our exchanges, has picked a unique All-Elsonian football eleven, in which the best material of the ages has been chosen. The line-up with a few changes, is as follows:

**First Team**
- **Quarterback:** William the Conquerer, t.
- **Halfbacks:** Sampson, t; and Morgan, as bald as the rest of the veteran crew, would make a pair invaluable. William the Conquerer and Sampson, with his recently raised pompadour, being unsurpassed in boldness and resource, are easily the first choice for tackles.

**Second Team**
- **Fullback:** Sitting Bull.
- **Halfbacks:** Mike, “Any chap able to disguise himself as a kitchen knave and pass as a football player, must have a lot of pep to go with him,” was the unanimous choice for fullback. He puts lots of “pep” into the boys.

**Back Field**
- **Quarterback:** Mike Jones (captain) Launcelot. Caesar has now learned the new game, and he knows how to pass. He puts lots of “pep” into the boys.
- **Halfbacks:** Dave Burns (captain) Launcelot. Launcelot can well assume the duties of scout and leader. Burns, with his radiant personality and knowledge of the game, he is easily leads. He can also be used as a kicker.
- **Backs:** Franklin Sq., t, and Launcelot. Caesar has now learned the new game, and he knows how to pass. For halfbacks we have chosen Caesar and Launcelot. Caesar has now learned the new game, and he knows how to pass. For halfbacks we have chosen Caesar and Launcelot. Caesar has now learned the new game, and he knows how to pass.

**Line**
- **Center:** Brother Jones, t.
- **Guard:** Brother Jones, t.
- **Fullback:** Brother Jones, t.
- **Left Tackle:** Brother Jones, t.
- **Right Tackle:** Brother Jones, t.
- **Left End:** Brother Jones, t.
- **Right End:** Brother Jones, t.

For trainer who could act more ably during the picnic and in the field, we name Caesar as the unanimous choice.

**OFFICIALS**
- **Head Coach:** Brother Jones.
- **Chairman of the Board:** Brother Jones.
- **Manager:** Brother Jones.

**FOUNDEES’ DAY**

At the regular meeting of the Kappa Sigma fraternity, held last week, P. D. Fuller, ’92, associate state chemist of Indiana, attached to the Purdue University Experiment Station, was initiated, and during the same evening, Founders’ Day, was observed. President W. D. Gibbs, Director John C. Kendall, Mr. Fuller, and Dr. A. C. Hiawatha of Portsmouth, a retired surgeon of the United States Navy, were among the speakers.

**DE LAVAL CREAM and Butter Triumph as Usual At National Dairy Show**

Cream and butter produced through the use of DE LAVAL CREAM SEPARATORS made the usual clean sweep of all Highest Awards at the great National Dairy Show (including the annual convention of the National Buttermakers Association) held in Chicago, October 26th—November 4th, just as has always been the case since the organization of the Association in 1892.

**WHOLE MILK CREAMERY BUTTER**

The sweepstakes or highest award in this class was won by A. J. Anderson, Oshkosh, Minn., with a score of 97.56.

The second highest exhibit winning the silver service set prize, was made by J. L. Wahlstrom, Stark, Minn., with a score of 97.33, this prize winning butter being made from the cream of farm patrons using De Laval separators exclusively.

**FARM SEPARATOR BUTTER**

The sweepstakes in the gathered cream factory made butter class was won by R. O. Brys, of the Readstown Creamery Co., Readstown, Wisc., with a score of 97.44, this prize winning butter being made from the cream of farm patrons using De Laval separators exclusively.

The highest scoring dairy or home made butter exhibit was that of Mrs. Frank Grant, Tonica, I11., who also recently won first prize at the Illinois State Fair at Springfield.

**PRIZE CREAM EXHIBITS**

The highest award for certified cream was made to Nichols Bros., Bloomfield, Ky., with a score of 88.89.

The highest award for market cream was made to O. J. Bailey, Tacoma, Ohio, with a score of 96.

**ALL DE LAVAL SEPARATOR MADE**

Each and every one of these highest scoring butter and cream exhibits was the product of a DE LAVAL CREAM SEPARATOR, and this wonderful prize winning record, year after year, for twenty years, is overwhelming and unanswerable proof of DE LAVAL “ALPHA-DISC” superiority to any gravity creaming system or other centrifugal separator.

Concluded from page 1

ig. He told how he got his three

stags, and described some of the habits

and especially the phenomenal fleetness

of foot of these beautiful and graceful

animals.

Then he took his audience on his trip

for moose with Kermit Roosevelt in

New Brunswick. He declared that

no game found anywhere on the globe

could compete in magnificence with the

bull moose of North America. Kermit

somewhat doubted this, but when, in

answer to the guides calling, the first

one came thundering through the woods,

crashing his horns against tree trunks

and being deadly, and paused

at the top of the hill just above them,

pawing the earth madly, he was willing

to admit that the only thing in Africa

equal to it would be to let a pair of

moose horns on a giraffe and then turn

him loose.

In closing, Mr. Clark said: "We

would be better men and women if we

could see more of nature. If you would

lose some of our conceit, if you would

realize the insignificance of man's

artificial existence, go to the wilds, see

nature in its true sublimity, and you will

realize that there is nothing that can

equal the wonderful works of the

Creator."

EQUAL SUFFRAGE ASSOCIATION.

At a meeting held Thursday afternoon

in the church chapel an Equal Suffrage

Association was organized by some of

the women of Durham. Mrs. E. E.

Grovos was elected president and Miss

Carrie E. Buzzell secretary-treasurer.

The meeting was addressed by Miss

Chase of Andover.

Rabbi Stephen S. Wise, illustrating

a point in his lecture, recently given

under the auspices of the college lecture

course committee, told the following

story:

"I once knew an old Irishman, who

was stricken with the dread disease

smallpox. He was sick, in fact, very

sick and thought he was going to die.

So he called to his wife and said, "Mary,

I go and bring to me the Jewish Rabbi.

I want the last rights of the Church

administered." Thinking he was in a

delirium, his wife replied soothingly

"All right Pat, but don't you want the

Jewish Rabbi; you want good Father

O'Brien." "No" cried Pat decisively.

"I want the Jewish Rabbi. Do you

think I want Father O'Brien to get the

small pox?"

Would You Board a Dual Purpose

Cow if You Could Get a Dairy Cow

for the Same Money.

Wyandotte

is not a cut rate dairy cleaner, but it
does give you a double value at the same or often times a less price

than you pay for the washing ma-

terial you are now using.

How does it give you double value?

Simply by doing all the cleaning that

other washing materials do and all that

others leave undone.

Most any washing material will clean

dish uillets, separators, churns, pans

bottles, etc., so that they look clean.

But after using such materials if you

give them the germ or bacteria test it

will more often than not show that such

containers contain sufficient bacteria to

thoroughly seed with bacteria the whole

of the new milk with which you subse-

quently fill them.

Apply the same test to these same

containers after washing them with

Wyandotte Dairyman's Cleaner and

Cleanser, which has often been done,

and the number of bacteria is found so

small as to be an almost negligible

quantity.

The fewer the bacteria, the cleaner

and the better the milk, consequently,

milk worth more as milk, as butter, as

cheese and for all food purposes.

That it pays to use Wyandotte Dairyman's Cleaner and Cleanser you have

but to ask the Dairy Colleges or clean one of the thousands of dairymen who

use it, or better still—use it yourself.
