DURHAM, N. H., JANUARY 17, 1941. 12

PRICE 5 CENTS

BAND CONCERT

BY VICTOR.

Well Rendered Program
Warmly Received.

Last Saturday evening in Thompson Hall the patronizers of the Lecture Course were afforded an excellent musical program rendered by Victor and his Venetian Band, assisted by Miss Evangeline Hiltz, a soprano soloist. The entertainment consisted of both classical and popular selections and their rendition under the leadership of Signor Victor was highly commendable. The audience was the largest of the season and its reception of the program was enthusiastic.

The "Overture from William Tell" and the famous "Sextette from Lucia di Lammermoor" were especially well played while in sharp contrast, "Alexander's Ragtime Band" and a medley of "Sunny South Songs" met with popular appreciation. Miss Hiltz also proved to be an excellent soloist and was heartily approved. The program:

March—American Beauties Victor
Overture—Zampa Herold
Cornet Solo—Shubert's Serenade
Signor Victor.

Soprano Solo—Aria. Charmant Oiseau.
David

Flute Obligato

Miss Evangeline Hiltz.

Grand Selection—Carmen. Bizet
Solo by Signori Ricci, Perillo, Vento.

INTERMISSION.

Overture—William Tell Rossini
Celebrated Sextette—Lucia di Lammermoor
Donizetti

Solo by Signori Melano, Ippolito,
DeMarinis, Perillo, Abbruzzese,
Verni.

Soprano Solo—Waltz. Primavera.
Strauss

Miss Evangeline Hiltz.

A Tone Poem.—The Sunny South.
Lampe

COACH CARNEY GOES TO EXETER.

John J. Carney, who coached New Hampshire in baseball for the last two years has accepted the position of coach at Phillips Exeter Academy for next season, which indicates his ability to turn out a good team. Mr. Carney has been successful at the college and the students regret that he will not have charge of baseball in the spring. Eleven applications for the position have already been made but to date there has been no selection.

N. H. C. A. MEETING.

At the Christian Association meeting held last Sunday afternoon Dr. J. H. McCurdy of Springfield Training School spoke on "Physical Directing as a Life Work." Dr. McCurdy is one of the foremost physical educators of the country holding the position as head of the department of physical training at the training college. His talk was interesting and his presentation of the advantage of his vocation were clearly outlined. Sixty-three men were in attendance.

TRUSTEE MEETING.

A regular quarterly trustee meeting was held last Wednesday. The following trustees were present: Hon. Warren Brown, Hampton Falls; Hon. George H. Bingham, Manchester; Hon. Edward H. Wason, Nashua, Richard W. Sullo-way, Franklin; Hon. Rosecrans W. Pillsbury, Londonderry; Hon. H. L. Boutwell, Malden, Mass., and Harold E. Hardy, Hollis.

Aside from the regular routine business the board voted to buy the land opposite Thompson hall, owned by Mr. Charles Hoitt, and Prof. Foster read a report on the college forest. They voted also to accept Davis Park, a plot of land in Lee and to give Dr. C. L. Parsons a leave of absence of one year from October 1911. They also drew up the following tribute to the good work Dr. Parsons has done for this institution:

We, the members of the Board of Trustees of the New Hampshire College, hereby express, by unanimous vote, our deep appreciation of the splendid service rendered the institution and the state by Professor C. L. Parsons. Coming to the college directly after his graduation from Cornell University, he has given twenty-three of the best years of his life not only toward building up the chemical department to its present high state of efficiency, but he has always given freely of his energy and means in loyal support of the institution as a whole.

It is a source of gratification to us also that the high character of his work has commanded world wide recognition from fellow members of his profession.

While we deeply regret his loss to the college and to the state, we rejoice with him in the broader opportunities that have come to him in the service of the nation.

He goes from us with our hearty good will and our best wishes for his continued success.

The land to be purchased is a plot of 13½ acres extending from Smith hall to the gymnasium in one direction and from the road to Pettee Creek in the other. On this land stand two unsightly buildings, the removal of which will greatly beautify the campus. The new skating rink is also on this land.

The report of Prof. Foster was accepted and he was placed in charge of the college forest.

BASKETBALL TRIP.

Yesterday the basketball team left for a four days' trip to Massachusetts and Rhode Island for games with Dean Academy, Brown and Rhode Island. Brown has a strong team this year but the New Hampshire men will probably repeat the performance of last year and hold their opponents to a small score. Rhode Island again has Sullivan and Doll in the lineup and this pair is hard to beat on their own floor. Saturday night the team plays Boston University Law School at Durham.

NEW ASSISTANT.

Mr. John Muth has been engaged as assistant in the college greenhouses. Mr. Muth is a graduate of the Gerard Adrian van Swieten Garden College of Frederiksoord, Holland.

W. W. Burroughs '10 and E. H. Burroughs were recent college visitors.

N. H. STATE 21, DEAN 16.

In one of the fastest games played at Franklin this season the New Hampshire College five defeated Dean Academy in the Dean gym last night 21 to 16. This makes the third straight win for the New Hampshire team, and it was the first time that Dean has been beaten on its own floor this year. Although referee Murphy called 26 fouls on the Dean team, New Hampshire State was able to score only five goals from fouls. The summary:

N. H. State	Dean Academy
H. Jones rf	lb Merrifield
Holden lf	rb P. Jones
Sanborn c	c Tormey
Watson rb	lf Kelley
Lowd, Kane lb	rf Rice

Score, New Hampshire 21, Dean Academy 16. Goals from floor, Sanborn 4, Holden 2, H. Jones, Kane, Rice, 3, Kelley, Tormey, Merrifield, P. Jones. Goals from fouls, Holden 5, Merrifield 2. Referee, Murphy. Timer, Reynolds. Attendance 200.

BASKETBALL.

Last Friday night in a practice game with St. Anselms, New Hampshire was victorious 27 to 21. The game was rough throughout. The proceeds went toward the hospital fund for the men in the hospitals.

New Hampshire.	St. Anselms.
Holden rf	lb McCarty
Jones lf	rb Haggerty, Leahy
Sanborn c	c Winkler
Watson rb	lf Kellar
Lowd lb	rf Derby

Score—New Hampshire 27, St. Anselms 21. Goals from floor, Holden 5, Jones 4, Sanborn 3, Derby 5, Winkler, Kellar, Leahy. Goals from fouls, Holden 3, Kellar 5. Referee Killourby. Timer, Tucker. Time 10 and 20 minute periods.

TO THE ALUMNI.

Every year it is absolutely necessary to go over the files and see that there is no error. Many men have changed their occupations, address, etc., without letting the dean of this college or myself know concerning the changes. This has been due in some instances to thoughtlessness, to the fact that I have not made it sufficiently clear that I wish this and perhaps in a few cases to a lack of realization of the advisability and importance of so doing.

However I do request that every man who may see this notice and has ever been connected with this institution will drop me a postal giving me full information of all facts concerning himself which I should know.

Respectfully, your assistant secretary,
Frank E. McKone.

A NOTE.

The following note was left at a fraternity house by one of the members of Victor's band. This musician had been in America but ten months:

"If we might explain to you we would like to tell many kind words, because everyone of young man of this college they are all of the best gentleman very kind and honest, the their manner it is very affable and cortese. We leave from here very sorry. We left many friends. We wish good-look with best regards to them."

M. B. MANN '84.

The standing and ability of Moses B. Mann '84 has been distinctly recognized by the United States Customs Officials. He has recently been appointed, together with the Surveyor of the Port of Boston and Naval Officer Lyford of Concord, N. H., as a committee to classify and reorganize the Inspectors of Customs and other officers under the control of the Surveyor of the Port.

Mr. Mann is one of our successful alumni. His career in the Customs Service of Boston strikingly illustrates the success which attends merit, intelligence and persistent and faithful attention to duty. His successful career may well serve as an inspiration to New Hampshire farmers' sons of the present generation.

He was born in the little town of Benton, N. H., in 1865. His early education was obtained in the district schools of Benton and Woodville and Newbury Seminary.

He entered New Hampshire College at the age of sixteen and graduated with honor in 1884. For several years he was a successful teacher in the schools of New Hampshire. In 1887 he was appointed a clerk in the naval office at Boston while the late Henry O. Kent was naval officer. His work meeting with the approval of his superiors, two years later he was promoted to the position of weigher live years later he was made an inspector of customs and served in this position for sixteen years; during the later part of which he supervised the work of a large part of the inspectors force.

Upon the death of Deputy Surveyor Duchesney he was appointed by the Secretary of the Treasury deputy-surveyor of the port of Boston, this being the highest non-political office which could be given him in the Surveyors Department.

His various promotions all came in recognition of faithful and efficient public service.

During the past 25 years he has been a resident of Malden, Mass. He has recently purchased a delightful home on Greystone Road where he now resides with his wife and three children.

Although not yet fifty years of age, he occupies a commanding official position and is honored and respected by all who know him.

RIFLE CLUB SCHEUDLE.

The schedule of the matches of the New Hampshire College Rifle club is as follows: Jan. 6—Princeton; Jan. 13—Pennsylvania; Jan. 20—Veterinary Surgeons; Jan. 27—Delaware; Feb. 3—Harvard; Feb. 10—Maryland; Feb. 17—Massachusetts; Feb. 24—West Virginia; March 2—North Georgia; March 9—Norwich; March 16,—Louisiana.

As was the custom last year each team shoots on its own indoor range and the scores are telegraphed to the N. R. A. headquarters at Washington. Ten men shoot in each match but only the five highest scores count for record. Each man shoots 20 shots at the regulation target, 10 shots standing and 10 prone. The highest possible score is 200 per man.

In the first match New Hampshire made 776 points. In the record 817. The scores of the opposing teams have not been received here yet however.

WORTH YOUR TRYING.

One of the attainments that every college man should acquire as a part of his four or more years' experience in an institution of learning, is the ability to stand upon his feet before a company of people and talk without undue embarrassment. Not enough of the graduates of colleges where debating and public speaking are not given prominent places, think of this thing seriously until perhaps in after years, they are brought into an awkward predicament by being unexpectedly called upon to speak.

A fellow says that he "cannot talk" that he "has nothing to say," and in fact he very often rises and shows that apparently he has not. He is nervous; his feet are always shifting, he stands on one and then on the other; his hands are in the way, they are picking at his coat or fumbling in his pockets; he talks to the floor, his sentences are broken and his thinking jerky. Many an older man finds himself in just this condition all because he did not begin soon enough to master self command. As one enters college he will find there almost unlimited opportunities to help himself to develop into a least a passable speaker. He will have opportunities in class-meeting, in fraternity meeting, in club, in athletic or mass-meeting, and in the class-room in special courses pertaining to this subject. In fact there are almost unlimited ways for one to begin by uttering perhaps no more than a sentence—but that sentence is a beginning.

Many a man has entered upon his college days as badly off or worse than the writer has pictured it, and by simply taking advantage of everything, has perfected himself so that he can face an audience and have as clear a line of thought as he would have if he were at his desk writing the words that he is uttering.

The hardest step is the first—the beginning, and it may take real bravery to stand up the first time or the second or the third, but persistence every time that the opportunity presents itself will soon make a noticeable difference. As soon as this is seen, improvement comes fast. None of us has the defects to overcome that Demosthenes had, and yet he became the greatest of orators. He had just the qualities that we have spoken of; a strong will, a decent intellect, and a mountain of "sand." To us here it is but one form of cowardice to always say, "I can't," but think; it is not so? Just so surely as you graduate from college become a teacher, a business man, an engineer, an agriculturalist, or enter any other

BULLETIN FOR THE WEEK.

Wednesday 7.30 p. m.—Alpha Zeta meeting; New Hampshire-Brown game. 7.00 N. H. Rifle Club shoot. Opponent Veterinary Surgeons.

Thursday 7.00 p. m.—Glee Club rehearsal at College Club room. New Hampshire—Rhode Island game at Kingston.

Friday 7.00 p. m.—Orchestra rehearsal at College Club room. 7.00 p. m. Alpha Chi Sigma meeting at Conant hall.

Saturday—New Hampshire plays Boston University Law School at Durham.

Sunday—Professor Groves speaker at C. A. Meeting on "Opportunities for Social Work."

Tuesday—Mid-year exams begin.

line of effort, the very fact of your being a college graduate is going to bring you to places where it will be impossible for you to say "no." Then your college will be judged somewhat by you; no one wishes for an adverse judgement.

Here at New Hampshire your opportunities are excellent for obtaining a fair degree of self-possession. We are a small college and every man may have his word to say if he so desires. There is at least one course in the curriculum that takes up this side of education, and which should be made obligatory for every candidate for a degree. Make it your way to take this course as early as possible.

Remember, that as a graduate of a college you will often be called upon; that you owe it to yourself and to your friends to do decently well; that by overcoming your weakness you are strengthening your character; and that by neglecting this through fear, you are showing a little streak of cowardice. It may be a terrible strain at first, but try it—you are only in the same position as that occupied by countless men before you. They have overcome it; you can if you will.

Through the courtesy of H. L. Boutwell '82, the New Hampshire will be able to publish a series of biographies of some of our most prominent alumni. The series of articles, the first of which is published in this issue is of particular interest to the student body since each article will give the under-graduate some idea of experiences that may come to him after he has started on his life work.

ON THE POPULARITY OF DRILL.

In order to ascertain the popularity of the military department here at New Hampshire the commandant, First Lieutenant G. W. Edgerly, 5th Inf. U. S. A., has taken a secret vote of every man connected with the department on the question: "Should the Military Department be maintained at New Hampshire, or should it be abolished." Seventy-seven per cent of the two hundred and twenty-eight votes cast were in favor of maintaining the military department. The vote by classes:

	For Maintenance	For Abolition
1915	42	17
1914	38	18
1913	31	8
1912	9	1
Two Yr '13	39	3
Two Yr '12	16	5
	175	52

John G. Powers '07 is instructor in science and agriculture at the Hopkinton High School, Hopkinton, N. H. The course in agriculture which he is teaching, was started this year.

Educational Trains

now bring the facts from the Experiment Station direct to the Farmer.

The Experiment Station men are anxious to discuss the questions of most value to the people along the routes. Ask them to bring along an exhibit of fertilizer materials and to tell you how to get the most plant-food for your money. Recently one train gave demonstrations of actual fertilizer mixing. Soon many will do so. Take your fertilizer dealer to these trains. Ask him to sell **Potash Salts** and brands containing six to ten per cent. Potash. We shall be glad to send you, free, pamphlets prepared by the best practical authorities on fertilizers for various crops and soils. Write today, mentioning crops and soils that you wish to improve.

**WHY YOU SHOULD INSURE IN
THE MASSACHUSETTS MUTUAL LIFE INSURANCE COMPANY OF SPRINGFIELD, MASSACHUSETTS.**

Because it's a purely MUTUAL COMPANY—and pays dividends ANNUALLY to its policyholders, (Not to stockholders, because we have none.) It's premium rates are low—it's dividends are very large, and its surrender values are extremely liberal—in fact it's "Peerless." Paid up values, cash surrender values, and extended insurance guaranteed after two years premiums have been paid.

Its assets are of the highest class, and its surplus is ample for all contingencies. Write us, giving date of birth and kind of policy desired, and we will forward a Specimen Policy for your inspection.

DE LAVAL CREAM SEPARATOR

Now Is the Time to Buy and Start the New Year Right.

There is no good reason to defer the purchase of a DE LAVAL cream separator until Spring. On the contrary you may buy one now and save half its cost meanwhile. Moreover, if you can't conveniently pay cash you can buy a DE LAVAL machine on such liberal terms that it will actually pay for itself.

As to YOUR need of a centrifugal separator, if you have the milk of even a single cow to cream you are wasting quantity and quality of product every day you go without one. This waste is usually greatest with cold weather and cows old in lactation, and it counts most, of course, when butter prices are high. Then there is always the sweet skimmilk and saving of time and labor in addition.

When it comes to a choice of separators DE LAVAL superiority is now universally recognized. Those who "know" buy the DE LAVAL to begin with. Those who don't replace their other separator with a DE LAVAL later—thousands of users do that every year. If YOU already have some other machine the sooner YOU exchange it for a DE LAVAL the better.

Why not start 1912 right in dairying? TRY a DE LAVAL machine for your own satisfaction if nothing else. See the nearest DE LAVAL agent or write us direct and we'll do the rest.

RESUME OF PROF. FOSTER'S REPORT MADE TO TRUSTEES.

As is reported in another column the President and Board of Trustees have recently accepted and approved a report on the college wood lot made by Prof. Foster. The data for this report and a forest map, were collected by the classes in forestry 1, 3 and 32. The map is drawn to the scale of 200 feet to the mile and shows the different types of forest, clearings, roads, streams and boundaries. The report includes a description and discussion of the various types with a statement concerning the treatment which each should be given in order to bring about the best forest conditions in the future. Table one of the report gives the average stand per acre for hemlock and pine in board feet and for hardwoods in cords in each of the types described and shown on the map. The record table gives the total stand for each type and for the whole tract. It may be of interest perhaps to state that the total amount of pine and hemlock estimated to be somewhat over two million feet. The balance of the report consists of a statement concerning the market conditions and the recommendations.

In general the recommendations as outlined form the basis for a definite future policy in handling the woodlot. The most immediate need is shown to be a general cleaning up of the forest and the disposal of all slack, brush and dead and decaying wood. Next, there should be a reduction in the amount of hemlock in order that it will not crowd out the young pine and in the future become the dominant species. The hard-woods should sooner or later be removed and replaced with pine and other more valuable conifers. Finally the over-mature and deteriorating pines and hemlocks should be taken out from time to time in such a way that the character of the timber will not be changed and in order to prevent actual money loss.

Prof. Foster's idea is that the college wood lot should be maintained as a demonstration forest where various systems of cutting and forest management are in progress, where a variety of types can be developed both naturally and artificially by planting and where many different species of trees, those from other parts of the country and abroad as well as the native New England trees, may be grown under natural forest conditions. A fund will be established for improvement work from the sale of wood and timber, the roads improved and connected at the west side and the tract made as accessible, instructive and interesting as possible. It will then be of much value to students at the college and to people throughout the state.

The report also contains a brief statement concerning the conditions and future management of Davis Park. Chestnut, pine, catalpax and bass wood have been planted in the park and within the next few years the lot will be planted with various species of conifers which are adopted to the local conditions

STATE FEED INSPECTION.

J. E. Robinson and H. B. Tuttle
returned to college last week after travel
ing about the state as Ins pectors of Feed-
ing Stuffs. Mr. Tuttle covered the
territory south of Concord while Mr.
Robinson had the northern territory.
Together they collected over 160
samples of feed stuffs, without dupli-
cates. This is one of the most thorough
feed inspections ever made.

Prof. C. E. Hewitt attended an
engineer's dinner at Hotel Somerset,
Boston, Monday evening, January 15.
The engineering societies joining in
this dinner were as follows: Boston
Society of Civil Engineers, American
Institute of Electrical Engineers, Am-
erican Society of Mechanical En-
gineers.

Prof. C. E. Hewitt will speak before
the Strafford County Teacher's As-
sociation, Friday January 19 on the
"Significance of the Land Grant
College."

**Would You Board a Dual Purpose
Cow if you Could Get a Dairy
Cow for the Same Money.**

is not a cut rate dairy cleaner, but
it does give you a double value at
the same or often times a less price
than you pay for the washing ma-
terial you are now using.

How does it give you double value?
Simply by doing all the cleaning that
other washing materials do and all that
others leave undone.

Most any washing material will clean
milk utensils, separators, churns, pans
bottles, etc., so that they look clean.
But after using such materials if you
give them the germ or bacteria test it
will more often than not show that such
containers contain sufficient bacteria to
thoroughly seed with bacteria the whole
of the new milk with which you subse-
quently fill them.

Apply the same test to these same
containers after washing them with
Wyandotte Dairyman's Cleaner and
Cleanser, which has often been done,
and the number of bacteria found is so
small as to be an almost negligible
quantity.

The fewer the bacteria, the cleaner
and the better the milk, consequently,
milk worth more as milk, as butter, as
cheese and for and all food purposes.

That it pays to use Wyandotte Dairy
man's Cleaner and Cleanser you have
but to ask the Dairy Colleges or any
one of the thousands of dairymen who
use it, or better still—use it yourself.
