## 1914 CLASS HOLDS SOPHOMORE HOP.

### Most Successful Dance Held Last Friday.

The sixth annual Sophomore Hop given by the class of 1914 was held last Friday evening in the gymnasium with the largest assembly in the history of the event in attendance. A concert and reception was held from eight till nine o'clock. This was followed by dancing which lasted until two. The matrons and Pres. Brackett were in the receiving line at the reception.

As usual the gymnasium was attractively decorated with a number of palms, ferns, evergreen, bunting and banners. The matrons' corner at one end of the building was especially tastily arrayed, the artistic draping of the college colors, (the American flag and the new battalion Co. A, displayed for the first time.) adding much to its attractiveness.

March:  
March—"Fratt," F. Borth  
Overture—"Hungarian Lustspiel," Dela-Bela  
Medley—"Bits of Renick's Hits," J. B. Lampe  
Xylophone Solo—"American Patrol," Meacham  
Selection—"The Girl of My Dreams," Hoschna  
Characteristic, "Tally-Ho," J. Bernstein

Following this concert the grand march was formed and under the directorship of Marshal R. W. Smart was led by class president W. H. L. Brackett and lady. The marshal was assisted by the following aids; C. G. Paulson, H. R. McCartney, W. E. Arthur, J. E. Davis, L. S. Riford and T. A. Davis. The matrons included: Mrs. C. H. Pettee, Mrs. C. L. Parsons, Mrs. E. J. David, Mrs. T. J. Laton and Mrs. Marcia Sanders.

The committees in charge were as follows:

Executive: W. H. L. Brackett, president; G. L. Ham, vice president; C. J. Dresser, treasurer, Miss L. A. Cole, secretary; H. M. Eastman, G. N. Perkins; R. H. McNeil.

Invitations and Orders: J. E. Davis, chairman; J. P. Hayes, P. M. Blake; N. McCrillis; J. H. Taylor; T. A. Davis.  
Decorations: R. W. Smart, chairman; Miss F. A. Nudd; T. P. Reardon  
Miss L. A. Cole; H. O. Halvorsen; J. A. Tufts; J. R. O'Connor; B. F. Brown; T. A. Davis; M. R. Lambe.

Music: C. J. Dresser, chairman; Miss L. A. Cole; G. L. Ham.

Floor: R. W. Garland, chairman; H. M. Eastman; T. P. Dustin, L. D. Jesseman; A. F. Sargent; F. C. Smith; G. N. Perkins; T. G. Yaxis; R. H. Foss.

Refreshments: Y. G. Key, chairman L. A. Tarbell; R. H. McNeil; R. H. Welch.

#### House Parties Held.

On Saturday all the fraternities held house parties at which dancing and games were enjoyed. Some of them also held sleigh-rides. The parties broke up Sunday afternoon, however.

## NEW HAMPSHIRE BEATS ANDOVER.

### Game Won in Last Three Minutes.

In the most sensational basketball game of the year New Hampshire defeated Andover on the latter's floor by the score 22-20. The game was uninteresting in the first half but in the last period Came, Thompson, and Holden played wonderful basketball, overcoming a lead of ten points and holding the opponents without a score. Holden scored six baskets from the floor one which was the deciding goal of the contest and Thompson in the last few minutes of the game made two spectacular shots from the center.

The game started off slowly with Andover easily taking the lead after a few minutes of play. At the end of the first half the score stood 20-10 and Holden had made all of New Hampshire's points. In the second half the style of play changed. Came at center shot two from the floor and Holden made two free throws count. With three minutes to play Thompson dropped two neat goals from the middle of the floor in rapid succession and with seconds instead of minutes to play Captain Holden clinched the game by a marvelous goal from a difficult angle at the center of the gymnasium. The work of Lowd and Watson at guards speaks for itself for Andover did not score in the second period. The summary:

New Hampshire	Andover
Holden lf	Bickford, lf
Sanborn s, Thompson rf	Washburn rf
Crosby, Came c	Thompson lc
Lowd lg	Heckembourg lg
Watson rg	Dillon rg

Score—New Hampshire 22, Andover 20. Goals from floor—Holden 6, Came 2, Thompson J. 2, Thompson L. 4, fouls—Washburn 4, Holden 2. Referee Hay, Time 20-minute halves.

#### Varsity 43, ALUMNI 14.

Last Saturday afternoon in a desultory but interesting and amusing basketball game before a large audience of guests at the various house parties, the varsity defeated the alumni by the score of 43-14.

The substitutes played during the first period which ended with the score 4-3 in favor of the alumni, but the first team went into the game at the beginning of the second quarter and the game immediately lost its closeness.

The varsity was able to score almost at will, Holden and Jones excelling in floor work and in shooting. Wyman for the Alumni scored three difficult goals from the floor. The summary:

Varsity 43.	Alumni 14
Holden rf	Sughrue rf
Sanborn S., Jones, lf	Wyman lf
Crosby, Sanborn H., c	Johnson c
Thompson rg	Hammond rg
Watson, M., rg	
Came, Lowd lg	Watson A., lg

Goals from floor: Holden 7, Jones 6, Sanborn H. 5, Lowd 2, Watson M. 1, Thompson 1, Wyman 3, Sughrue 2, Johnson 1. Goals from fouls: Wyman 2, Holden 1. Referee Reynolds. Time 20 minutes halves.

The Agricultural club has elected the following officers for the semester: President, Foster; vice president, Smith; Sec., Treas., Knight; Program Committee, Bent, Hadley, Ladd.

## THE NICHOLS MEDAL AWARDED

### Prof. James to Receive It Next March.

The so-called Nichols Medal will be awarded to Prof. Charles James of the chemical department in March at the Spring meeting of the New York section of the American Chemical society and is given to Prof. James on his paper, "Some Rare Earth Compounds," which he read before the March meeting last year. Prof. James will also read another paper before the society this coming March.

It is a large gold medal, bearing the device of an alchemist working at his desk, and represents an allegorical figure of Dr. Faust as portrayed by Goethe. On the reverse side is engraved the name of the donor, of the recipient, and a statement of the reason of the award. The design was drawn by H. B. Weshler and revised by Henry M. Toeh, both of whom had especially in view the correctness of the costume of the alchemist and the finished design is unique.

The medal is given by the New York section of the American Chemical Society from a fund donated by W. H. Nichols. This is the ninth time it has been awarded and is the only medal given strictly for original chemical research in America. As before stated the presentation will take place before the New York section next month.

Prof. James received the degree A. I. C., from University College, London in 1904 and the degree F. I. C., in 1907. Since that time he has been with the New Cransley Iron and Steel Company, England, and the National Refining company of West Chester, N. Y. He came to New Hampshire College in 1906. The Nichols medal is not the only one Prof. James has received for in 1900 he was given the Ramsay Silver medal in chemistry.

Since coming to this institution Prof. James with his quiet manner, and wide scope of chemical knowledge has won not only the deep respect but the admiration and friendship of the entire student body, the individual members of which are only too glad at any time to get a view of his extensive "rare earth" collection or to hear him tell of and explain the results of some new experiment.

#### RIFLE TEAM SHOOT.

The rifle team lost to Maryland week before last. Last week they shot 805 against Massachusetts.

The score:			
Sellers	76	93	169
Paulson	73	92	165
Robinson	72	92	164
Knight	75	80	155
McCrillis	60	92	152
			805

#### AT CHAPEL.

Dr. A. Gooding of Portsmouth gave an interesting and helpful address at chapel last Wednesday on "The Sort Courage We Need Today."

## POULTRY DAY AT NEW HAMPSHIRE COLLEGE.

### Held at Durham, N. H., February 20.

Instructive discussions by practical poultry raisers. Everyone interested in poultry raising attend.

New Hampshire College, through its Extension Service, held a conference for poultry raisers on February 20. Officers of the different local Poultry Organizations in the state and other practical poultry raisers, making a success of their business delivered instructive lectures. Every phase of the subject from incubation to marketing was interestingly treated. There were altogether ten speakers who are authorities on the topics they discussed. There were 100 in attendance.

It was proposed by the officers of the local poultry organizations to form a State Branch of the American Poultry Association at the same time, as there is a crying need for more efficient organization and cooperation amongst poultry raisers in the state.

Two sessions were held, morning and afternoon, the morning one commencing at 9. About fifty visitors were present.

A partial list of the speakers and program follows:

Show Yard Standard in Relation to Utility, Mr. Luther Roblins, Nashua, N. H., Sec. Nashua Poultry Association; Plants and the Marketing of Eggs, Mr. H. C. Shaw, Milford, N. H., Pres. Milford Poultry Association; Standard-bred Poultry and Specialization, Mr. E. W. Cunningham, Exeter, N. H.; Incubation, Brooding and Selling of Day-old Chicks, Mr. E. G. Carlton, Milford, N. H.; Dressing and Marketing Poultry, Mr. H. G. Burns, New Boston, N. H.; Profitable Egg Production, Mr. Louis Demeritt and Mr. E. M. Felker, Dover, N. H.; Diseases of Poultry, Mr. C. W. Larrabee, Madbury, N. H.

#### MY MACKINAW.

E.—The Junior class has recently purchased a mackinaw coat of red plaid for each member. This new custom is the stimulus of the following poem.

A Junior mackinaw I wear,  
And I am in the swin,  
It makes the jealous sophomore stare,  
Gee whiz; I pity him!

He's green with envy I am told,  
He scowls and wags his jaw,  
I prize it more than all my gold,  
My plaided mackinaw.

In comfort, every breath I draw,  
There's lots of room to grow,  
I would not swap my mackinaw,  
For any garb I know.

Now Sophs, withhold that smile, or sneer,  
Abstain from covetous glance.

We'll wear the plaid through senior year,  
And then give you a chance.

E. F. L.

#### A. Z.

At a recent meeting of the Alpha Zeta fraternity, Prof. Brooks gave a talk on the Advance of Agricultural Education; F. G. Fisher spoke on Green House Construction and Management, and A. H. Sawyer read a paper on Sanitary Milk.

### APPRECIATION.

Ten years or even five years ago the present intimate relations between Phillips Exeter Academy and our own institution would have been considered impossible or impracticable. The past few years have given an impetus in all colleges and other large schools to close relations among one another. We are very glad that we can have such close friendship with the Academy and particularly at this time does the New Hampshire desire to express its appreciation of the generous way in which the relay squad was treated and assisted in its recent workouts on the board track. Coach George Connors and Physical Director Ross did much toward making our men feel at home, and thanks are due them as well as to the school authorities.

Some time ago Prof. W. C. O'Kane was appointed to one of the important offices of the commonwealth, that of State Moth Inspector; then, shortly following that came the announcement of the placing of Mr. H. F. Judkins, '11, as his assistant. These two appointments coming so closely together, bring to mind the fact that in the past, offices of public trust and worth seem to have been sidestepped or shunned by men connected with the college. It is good to see men who are a part of the institution willing to accept such positions. Prof. Groves as a member of the State Educational Council has shown how much can be accomplished by one who is willing to put his efforts in for the public welfare.

Others of the faculty and of the Alumni are working in similar capacities and are successful. In the present condition of growth and expansion that the college is undergoing, no opportunity of greater service to the community or state, or of doing some such thing to aid our cause, should be overlooked. Such offers of greater service come as a recognition of ability, and as such, it is the duty of all who have ambition for themselves or for New Hampshire College, to accomplish all that he can as occasion presents itself in public life, in educational circles, in social service or any other of the lines of activity open to live men of the day.

New Hampshire college is to be congratulated in that the Nichols Medal, the only medal given strictly for original chemical research in this country, has now been twice awarded to members of its faculty. In 1905 it was given to Dr. C. L. Parsons for work on the determination of the atomic weight of Beryllium and now it is awarded to Prof. James for work on his Rare-Earths.

### Prominent Alumni.

Continued from page 3

He was born in Derry, N. H., February 26, 1860. He fitted for college at Pinkerton Academy and under a private tutor at Lawrence, Mass. For one year after graduation he managed his father's large farm at Derry, N. H. In 1882 he entered the milk business then conducted by his father, H. P. Hood. When the writer first came to Boston, Mr. Hood was frequently seen in overalls and jumper slinging cans of milk from a milk car. For some years he daily made the run from Derry, N. H., to Boston in charge of a milk car. In 1888 he was taken into partnership with his father and the business was then carried on under the firm name and style of H. P. Hood & Sons.

He displayed great aptitude for the business in which he was engaged and upon its incorporation in 1890, he was made treasurer and general manager. Under his shrewd management the business increased rapidly. Its main office and plant are located in the Charlestown District, Boston, but it has branches in Malden, Lynn, Watertown, Lawrence, Forrest Hills, and Salem in Massachusetts, and Derry and Manchester in New Hampshire.

Maine, New Hampshire, Vermont, New York and Massachusetts milk producers daily send immense quantities of milk to the great mixer at Charlestown. There it is tested by expert chemists, bottled and distributed to thousands of customers in greater Boston.

H. P. Hood & Sons is one of the very largest, if not the largest, milk contractors in New England.

In 1900 Mr. Hood was made President and Treasurer of the company and has since that time chiefly borne the brunt of the executive and financial work of that great corporation.

This corporation also owns and operates a farm of 200 acres at Derry, N. H., There farming upon a large scale is carried on upon modern lines.

To the energy, skill and business sagacity of "Charlie Hood" as he is commonly called, is due the credit for the upbuilding of the great business now conducted by H. P. Hood & Sons.

Though small of stature, C. H. Hood has an iron nerve and a seemingly tireless brain and body. In 30 years he has risen from the humble position of lumper on a milk car to the position of President and Treasurer of a great business corporation with headquarters at the metropolis of New England. He is probably more widely known in New England and more thoroughly discussed than any other alumnus of the college. His great success in business commands respect and admiration.

Notwithstanding his many business cares and responsibilities, he has found time to serve as a member of the School Committee of Somerville, Mass., for several years. He has also been active in the work of the Congregational Church of Somerville.

He is loyal to New Hampshire and to our college and for several years has been a member of the Alumni Visiting Committee.

In 1886 he married Katherine W. Eastman of Derry, N. H., and has four children. He has for several years resided in Somerville, Mass.

**George H. Wilkins, '79.**

George H. Wilkins, M. D., was born in Amherst, N. H., in 1855. He entered New Hampshire College in 1876 and graduated with honor with the class of 1879. He then spent one year in post graduate work in chemistry under Professor Blaupied. He then became a student at New York Homeopathic Medical College and received the degree of M. D. from that college in 1883.

WHY YOU SHOULD INSURE IN  
THE MASSACHUSETTS MUTUAL LIFE INSURANCE COMPANY OF SPRINGFIELD, MASSACHUSETTS.

Because it's a purely MUTUAL COMPANY—and pays dividends ANNUALLY to its policyholders, (Not to stockholders, because we have none.) It's premium rates are low—it's dividends are very large, and its surrender values are extremely liberal—in fact it's "Peerless." Paid up values, cash surrender values, and extended insurance guaranteed after two years premiums have been paid.

It's assets are of the highest class, and it's surplus is ample for all contingencies.

Write us, giving date of birth and kind of policy desired, and we will forward a Specimen Policy for your inspection.

**Prominent Alumni.**

**Frank A. Davis, '86.**

Frank A. Davis '86, is one of the most enthusiastic and energetic supporters of New Hampshire College. He believes in progression and had proved his loyalty by the expenditure of time and money in the interest of his Alma Mater.

He was born in Lee, N. H., August 25, 1866, of old New England stock. He obtained his early education in the schools of his native town and Franklin Academy, Dover, N. H. He entered college at Hanover in 1883 and graduated in 1886.

After graduating he engaged in school teaching and newspaper work until 1890. He entered the U. S. Signal Corps March 4, 1890, and continued there until the formation of the Weather Bureau under the charge of the U. S. Department of Agriculture. Having the choice of a strictly military life in the signal corps, or a position in the new Weather Bureau, he chose the latter. He continued in the Weather Bureau until Sept. 1, 1898. While in the Weather Bureau he was stationed at the most important stations of Boston, Baltimore and New York. He was in charge temporarily of the Manchester, N. H., station in 1892.

While in the government service he studied medicine and was graduated from Boston University School of Medicine in 1898. During the latter part of his junior year he took the Massachusetts State Board Examination, which entitled him to practice medicine in Massachusetts. The same year he also received honorary degree of Bachelor of Medicine from the college for good scholarship. After graduating he did post-graduate work in several of the large hospitals in New York City, then returned to Boston and took up the practice of medicine, which he still continues.

He was president of his class the first year in Medical College. He was president of the New England Electro-Therapeutic Association in 1909. He has served as Chairman of several important committees in various medical societies. He is one of the visiting physicians in charge of the Electrical and X-Ray Department of the Boston Dispensary, the largest out patient institution in Boston. He has published several important papers on various medical subjects. He has contributed numerous poems, short stories, essays, etc., to various papers and magazines.

He has been deeply interested in the recent welfare of the New Hampshire College and has served as Chairman of the Visiting Committee of the Alumni Association for two years. He has been successful in the several activities in which he has been engaged.

He belongs to the Massachusetts Medical Society, American Medical Association, American Roentgen Ray Society, American Electro-Therapeutic Association, and the New England Electro-Therapeutic Association.

He has obtained success through diligent and conscientious effort.

He has lived in Boston's Back Bay district for eleven years. His residence and office at the present time are at Hotel Buckminster, 645 Beacon street. He is not married.

Dr. Davis is a strong man, strong in his profession, strong in his desire to assist in the development of our College. We need the aid of more such men.

**Charles H. Hood, '80.**

The only survivor of the class of 1880 at graduation was Charles Harvey Hood.

Concluded from page 2

He began the practice of medicine at Palmer, Mass., and remained there for 19 years. While at Palmer, he occupied many positions of trust and responsibility, including chairman, Board of Health Chairman, School Committee; President, Library Association; Vice-President, National Bank. He was for years an officer in the Congregational Church and in the several Masonic Associations to which he belonged.

In 1902 he removed to Newton, Mass. where he has since been engaged in the practice of medicine. He is now on the staff of the Newton Hospital and a member of the faculty of Boston University School of Medicine. He also has a large and lucrative practice in Newton and vicinity and has the confidence and esteem of all who know him.

In spite of his successful professional career in Massachusetts, Dr. Wilkins stated that he hopes to become a resident of New Hampshire again before he dies.

In 1889 he married Sadie Stanwood of Brunswick, Maine. They have no children.

The Alumni banquet is to be held tonight at the Hotel Buckminster, Boston.

L. A. Wilson of Colby College and Concord, N. H., has registered as an Arts and Science freshman.

Rev. William Ramsden of Newmarket is taking some of the Sociology and Psychology courses this semester.

Would You Board a Dual Purpose Cow if you Could Get a Dairy Cow for the Same Money.

is not a cut rate dairy cleaner, but it does give you a double value at the same or often times a less price than you pay for the washing material you are now using.

How does it give you double value? Simply by doing all the cleaning that other washing materials do and all that others leave undone.

Most any washing material will clean milk utensils, separators, churns, pans bottles, etc., so that they look clean. But after using such materials if you give them the germ or bacteria test it will more often than not show that such containers contain sufficient bacteria to thoroughly seed with bacteria the whole of the new milk with which you subsequently fill them.

Apply the same test to these same containers after washing them with Wyandotte Dairymen's Cleaner and Cleanser, which has often been done, and the number of bacteria found is so small as to be an almost negligible quantity.

The fewer the bacteria, the cleaner and the better the milk, consequently, milk worth more as milk, as butter, as cheese and for and all food purposes.

That it pays to use Wyandotte Dairy man's Cleaner and Cleanser you have but to ask the Dairy Colleges or any one of the thousands of dairymen who use it, or better still—use it yourself.
