

THE WMUR NEW HAMPSHIRE PRIMARY POLL

THE UNIVERSITY OF NEW HAMPSHIRE

January 8, 2012

ROMNEY LOOKS FOR COMFORTABLE WIN IN NH, 2ND PLACE UP FOR GRABS

By: Andrew E. Smith, Ph.D.
UNH Survey Center
603-862-2226
www.unh.edu/survey-center

DURHAM, NH – Mitt Romney is poised to win the New Hampshire Primary by a wide margin, but the race for second place is being hotly contested by Ron Paul, Jon Huntsman, Rick Santorum, and Newt Gingrich. However, less than half of likely Republican primary voters say they have definitely decided who they will support.

These findings are based on the latest **WMUR New Hampshire Primary Poll**,* conducted by the University of New Hampshire Survey Center. Four hundred sixty-one (461) randomly selected likely New Hampshire Republican Primary voters were interviewed by telephone between January 5 and January 8, 2012. The margin of sampling error for the survey is +/- 4.6%.

Republican Primary

In the final WMUR New Hampshire Primary poll, Mitt Romney holds a 24 percentage point lead over his closest rival -- 41% of likely Republican Primary voters said they would vote for Romney. But there is a fierce battle for second and third place with Ron Paul getting 17% of the vote, followed by Jon Huntsman (11%), Rick Santorum (11%), and Newt Gingrich (8%).

“All of the candidates behind Romney have a good chance finishing anywhere between second and fifth place,” said Andrew Smith, Director of the UNH Survey Center. “New Hampshire voters historically have made up their minds in the final days before the election and campaign activities in the final days matter, but this will be harder for Gingrich and Santorum as they are not running ads in the campaign’s final days.” Rick Perry (1%), Buddy Roemer (1%), and Michele Bachmann (1%) each get 1% of the vote.

But while there are only three days until the Primary, voters are taking their time deciding who they will support, though likely NH Republican Primary voters have begun to solidify their support. In the most recent poll, 44% say they have definitely decided who they are going to vote for, 27% are leaning towards a candidate, and 29% are still trying to decide.

When undecided voters are allocated to the candidate they are most likely to support, Romney finishes with 43% of the vote, followed by Paul (18%), Huntsman (14%), Santorum (12%), and Gingrich (9%). “Romney has a solid lead, but predicting the results of the New Hampshire primary with two days of campaigning to go, and with more than half of voters still making up their minds, is a nearly impossible task,” said Smith.

NH 2012 GOP Presidential Primary – Likely Republican Primary Voters

Shape of the Electorate

New Hampshire has a “semi-closed” primary in which registered Republicans can only vote in the Republican Primary while people who are registered Undeclared, commonly referred to as “Independents,” can choose which primary they wish to vote in. While the bulk of the primary electorate is made up of registered Republicans (57%), the remainder consists of undeclared voters who self-identify as Republicans (20%), undeclared voters who say they are completely independent of either party (13%), and undeclared voters who self-identify as Democrats (10%).

Party Registration & Party Self-Identification

Among Registered Republicans, Romney leads with 48%, followed by Paul (14%), and Santorum (14%). Among those undeclared voters who identify as Republicans, Romney leads with 44%, followed by Paul (17%), and Santorum (11%). Paul does best among Undeclared voters who identify as independents with 30%, followed by Huntsman (24%), and Romney (24%). And among Undeclared voters who identify as Democrats, Huntsman does best with 39%, followed by Romney (23%), and Paul (16%).

Expected To Win NH Primary

Romney has been doing his best to build a sense of inevitability in winning the nomination by focusing on President Obama and not his fellow Republicans, and voters seem to recognize this. Currently, three-quarters of likely Republican primary voters (78%) think Romney will win the New Hampshire Primary, 5% think Paul will win, 2% think Santorum will win, 2% think Huntsman will win, and 1% think Gingrich will win. Most Romney supporters (95%) think he will win, but so do 74% of Gingrich supporters, 76% of Huntsman supporters, 65% of Santorum supporters, and 53% of Paul supporters.

Who Will Win NH?

Best Chance To Beat Obama

Another indicator of a candidate's strength in a primary election is how well they are expected to do against the other party's nominee. When asked which candidate has the best chance of defeating President Obama in November, 55% of likely Republican Primary voters name Romney, followed by Gingrich (6%), Paul (6%), Santorum (5%), and Huntsman (4%).

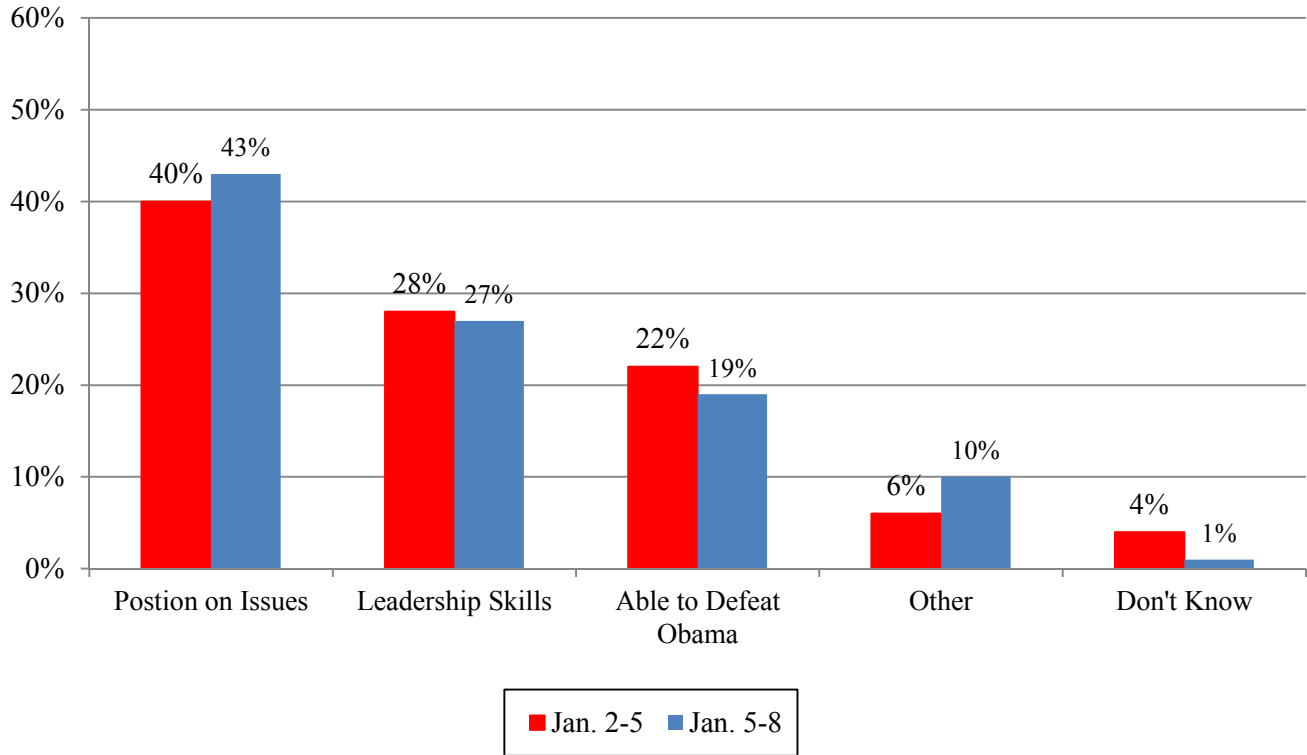

Who Has The Best Chance To Beat Barack Obama?

Candidate Characteristics

Likely New Hampshire Republican Primary voters were asked which of the characteristics of the candidates was most important to them when deciding who to support. Currently, 43% said that the candidates' position on issues was most important, followed by their leadership skills (27%), and their ability to defeat President Obama in the November general election (19%), while 10% cited some other characteristic and 1% did not know.

Importance of Candidate Characteristics

Granite State Poll Methodology

These findings are based on the latest WMUR New Hampshire Primary Poll, conducted by the University of New Hampshire Survey Center. Four hundred sixty-one (461) randomly selected likely New Hampshire Republican Primary voters were interviewed by telephone between January 5 and January 8, 2012. The margin of sampling error for the survey is +/- 4.6%.

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.
