FOUNDER'S NIGHT OBSERVED.

Hon. H. L. Boutwell '82 Delivers Address.

Last Friday evening in Thompson Hall were held the first formal exercises in commemoration of Founder's Night. H. L. Boutwell '82, Pres. Gibbs and the officers of the four classes were on the platform. The president of the senior class, officiated as chairman of the evening. The program consisted of a serenade by the Allen Choral, and President Boutwell, the speaker of the evening, followed by songs and exercises by "the entire company."

President Boutwell's introductory remarks spoke of "New Hampshire," what it means to the students, and the duty they owe to its founders. He explained the purpose of Founder's Night, and briefly expressed that, by New Hampshire man is proud to feel, New Hampshire spirit. Pres. Gibbs explained, first, the real value of the exercises. There are the connecting links between the past and the present, and their value cannot be over-emphasized.

"In reviewing the past in Founder's Night, it is, therefore, a fitting tribute to those who established our college."

In his review of the college, the President gave much statistical information, showing the recent, rapid progress of the college. The faculty has been increased by seven new instructors whose aggregate salaries are $5,000. There have been 27 increases in salary, averaging $304 each, and there have been seven promotions in title. Three resignations have been received and three have been lost through death.

During the year the college has acquired 79.5 acres of land. There are 330 students registered this year as compared with 280 a year ago. A $6,000 horse barn has been built and $1,000 worth of live stock has been purchased. A change has also been made in increasing the title of seven new instructors.

The Nichols Medal for scientific research in chemistry was recently awarded to Prof. James. This was the case where the Remsen board was permitted to be called out to Indians to testify in favor of the adorationists and against the state authorities. Doctor Willey was then prevented from giving his testimony, Doctor Barnard was permitted to come to Washington, only to be prevented from getting Doctor Willey's deposition in the usual manner. He had to go into the district court and sue out a writ of mandamus before he finally got Doctor Willey's important evidence in the case.

Doctor Barnard is a graduate of the New Hampshire college, and has been identified with state food and drug inspection and administration since 1901, when he was appointed chemist of the state laboratory, later going to Indiana. He has served on numerous important boards, and is a member of many scientific societies.

ENTHUSIASTIC MEETING.

At a meeting of the College Club held last Thursday afternoon it was voted that a committee be appointed to arrange the disposition of athletic trophies in the trophy room in the gymnasium. Another committee, consisting of J. A. MaHar, C. G. Paulson, P. C. Adams, W. Quimby, and P. C. Jones '13; First Vice-President, M. G. Benton, '13; Secretary, H. V. Bent '14; Treasurer, P. A. Foster '13.

FRESHMEN DEFEATED.

The world-burning freshmen have at last met defeat, at the hands of the erstwhile sleepy sophomores. Last Thursday morning the latter class defeated the 1915 men, who had left campus Tuesday in a state of unrest.

During the January term the 1915 men had been unable to keep silent and at four o'clock in the morning they had gone out to all the places of business in the city and been unable to get the key to the college.

A momentary gleam of subdued light escapes from a window of the college and is gone. Sketches of heated conversation one wafted hither and yon on the wings of the air. But wait! What are those, white hoary fingers, which have got into the inky blackness? Now dusky forms appear above the all, every muscle and sinew taut with the suspense of that tragic moment, risking their very lives in one supreme act of courage. They break, they burst, but the watchful Arabs of 1914 only fold their arms about them and tie them down to peaceful rest.

In the realms of Edgerton's and Hayes' domain four more loyal freshmen steadfastly crept down the stairs and out into the night. A modified condition and Corporal Reed leads his followers to the main thoroughfare while the rest of the military cadets march down the dark and silent street, giving neither to the front nor behind. Boldly they now face Garland's Platoon of seacoast marines. The battle waxes hot, but the gallant band of freshmen captured and escorted to Fort Belknap.

The bugle peaks forth its resounding call. A deaklike silence for a moment reigns supreme. The roll is called and nine husky freshmen fail to respond. Dismay controls the assembly. 1915 is left at last tasted of the bitter cup of defeat.

After the banquet the following toasts were made: H. H. Banner, Executive Committee: "Co-ed," A. E. Bartlett; "New Hampshire," J. P. Hobbs; "Class Spirit," M. G. Benton; "1914-1915," J. T. Thompson. H. V. Benton, president of the class, acted as toastmaster.

HOKEY RINK NEXT YEAR PERHAPS.

Present plans indicate that hockey will receive an early start next season. The dam, with which there was so much excitement before the ground is frozen, this year, with a poorly constructed dam, and unpleasant weather, it was found impossible to play any of interfraternity games, scheduled by Casper and Caslot. It is hoped next year that the schedule will be completed.

ANNUAL MEETING.

At the annual meeting of the Chris- 

tians held last Monday evening the following officers were elected for the coming year: President, P. C. Jones '13; First Vice-President, M. G. Paulson '13; Second Vice-President, J. M. Bodwell 2 yr '13; Secretary, H. V. Bent '14; Treasurer, P. A. Foster '13.
DOVER SUPERINTENDENT SPEAKS.

Superintendent E. W. Butterfield of the Dover public schools addressed the Christian Association meeting Sunday March 17, upon "The Value of the Educator of Today." His remarks were of the opinions, which he has formed from his early life was spent on his father's farm. He graduated from New Hampshire College in 1885, being then not quite 16 years of age. He is probably the youngest man who has ever graduated from the College. After graduation he formed a partnership with Albert F. Hazen, 1869. He removed to New York and continued in private practice as consulting engineer, and in 1904 formed the partnership of Hazen & Whipple, Consulting Civil Engineers for matters relating to domestic water supply and sewage.

He has advised with reference to those matters in a large number of cities in the United States and Canada, notably New York, Pittsburgh, Washington, St. Louis, Minneapolis, Denver, San Francisco, Ottawa, Ontario, Winnipeg, Man, Indianapolis, Grand Rapids, Austin, Texas, Austin, Me, Hartford, Conn., Springfield and Lynn, Mass., and Toledo, Ohio. He has designed engineering works, among them water filtration plants for Albany, N. Y., Yonkers, Washington, D. C., Toronto, Ontario and many other smaller places. In 1906-1909, he designed an entirely new water supply for Springfield, Mass., and advised on its construction, the total cost of the work being about $22,000,000. In 1907 he went to Australia to advise the City of Brisbane as to its water supply. In 1903 he was a member of the Engineering Commission appointed by President Roosevelt to accompany the President's mission to Mexico and to the Isthmus of Panama to report on progress and general conditions there. He is the author of "Filtration of Public Water Supplies," 3 editions; "Clean Water and How to Get It." In collaboration with Prof. Williams, "Hydraulic Tables." Chapters in American Civil Engineers Pocket Book, also many technical and other articles. He is a member of American Society of Civil Engineers, Boston Society of Civil Engineers, Canadian Society of Civil Engineers, American Water Works Association, New England Water Works Association, American Public Health Association, American Institute of Consulting Engineers. He is also a member of Engineers Club; Technology Club, N. Y. & Boston; National Club of Toronto; Appalachian Mountain club.

DELEGATE TO CONFERENCE.

Last Monday evening the Christian Association voted to send P. C. Jones, Eastern President, to the Eastern Presidents' Conference, to be held in New Haven March 21-24.

Last Thursday noon President Gibbs addressed the students of Portsmouth High School on "New Hampshire College."
New Automatic Oiling

The most important Cream Separator improvement since the introduction of the present type of De Laval machines.

The new automatic oiling De Laval Cream Separators are now being supplied in all sizes, and this improvement constitutes another great step forward in cream separator construction—the one thing possible in betterment of the previous De Laval machines of the present type.

The new system of De Laval automatic oiling is distinctly different from any other splash or spray system in that there is a constant regulated feed of fresh oil and discharge of used oil. Other splash systems use the same oil over and over, until it soon does more harm than good.

In the new automatically oiled De Laval machines, all gears shafts and bearings practically float in a mist like spray of oil and literally never touch each other during their operation.

De Laval agents will be glad to exhibit the new machines and demonstrate the working of the new automatic oiling system, which more than ever enhances De Laval superiority in every feature of cream separator practicability.

which makes him a conspicuous figure among learned and scientific men. The Alumni who knew him during his college days are exceedingly proud of his career. Every alumnus points to him as a conspicuous example of real success in life. An institution of learning would be proud to number him among its graduates.

Ever modest in demeanor, naturally of a retiring disposition, possessed of a great natural aptitude for high class work, he quietly and easily outstripped the most of his fellows and now holds the position of leader among Consulting Civil Engineers.

January 1, 1903, he married Elizabeth McConway of Pittsburgh, Pennsylvania. They have four children, Martha, Ruth, Abigail and Richard.

Mr. Hazen resides at Dobbs Ferry, New York.

INTER-COMPANY TRACK MEET.

March 28 is the date set for the inter-company meet. It will be held in the gymnasium under the auspices of the military department. The preliminary trials in the intercompany relay races, and long distance runs will be held March 21 during drill period.

Suitable medals and ribbons will be awarded the men who win places in the meet. The individual, winning the highest number of points, will be given a gold medal; the second, highest, a silver one; and the third, a bronze. Winners of individual events, and members of winning teams will receive ribbons suitably marked.

Each company will have a distinctive color, which will be worn by its representatives, in order to distinguish them. Co. A has chosen blue; Co. B, green; Co. C, red; and Co. D, purple.

The evening’s schedule will consist of 600 and 1000 yards, and 1 mile runs; four lap relay, 6 lap relay, and 11 lap relay, open to teams of each company; 25 yard dash, shop put, running high jump, and pole vault; Butts Manual, written by Nicholas Udall.

Co. A has chosen blue; Co. B, green; Co. C, red; and Co. D, purple.

The captains of each company, together with the major and the commandant constitute the general committee in charge, while each company will elect its own committee, if it has not already done so, to arrange for the company entries.

COMEDY AND TRAGEDY.

Last Friday evening, the class in Dramatic Criticism, accompanied by Prof. E. J. David of the English department, attended the presentation, in Exeter by the Harvard chapter of the Delta Upsilon fraternity, of "Ralph Roister Doister," the first English comedy, written by Nicholas Udall.

The freshmen were excused from college exercises last Friday afternoon, in order to attend the production of Romeo and Juliet in Dover, N. H.

On account of ill health Prof. E. R. Grove has resigned from the position of chairman of the publicity committee.

The work I have done for the different fraternities has always pleased

situation is the solution of the problem, as it appeals not to certain classes alone,
but to the community at large. The prosperity was not at first looked upon
with favor by the majority of the farmers, but public sentiment has changed,
and is still changing, for the better.

Brains are now appreciated as being
valuable in any occupation.

The state college has had yet another
broadening effect on the community in
general, in that it tends to destroy class
distinction. The man educated along
scientific lines is now recognized as
occupying a position on the same social
level with the professional man.

“The land grant college is for the
industrial classes. It is to enable every
able bodied man to obtain an educa-
tion. It is that every man may build a
foundation that will sustain a success-
ful life, that this college has been estab-
lished.”

FRESHMAN RESTRICTIONS.

At a meeting of the two year 1913
class, held last week, it was voted that
the next entering two year class should
be compelled to wear distinguishing
caps. This will be a new custom but

A REAL
SANITARY CLEANSER.

No imitation of a sanitary cleaner in
a dairy will take the place of a
real sanitary dairy cleaner. When
it comes to protecting the milk
from the dangerous enemy, bacteria,
and to warding off contamination
by odors and gloms, nothing
can give the same assurance as a
real sanitary dairy cleaner.

has created a place for itself in
every dairy, whether large or
small, for it is the only cleaner
which is 100 per cent in com-
position and sanitary in its clean-
ing.

Each particle of Wyandotte
Dairymen's Cleaner and Cleanser
is cleansing. You can depend
upon it to clean thoroughly with-
out a trace of injury to the surface
to which it is applied. Nor will it
leave a slight film of grime or
sanitary to do soap, soap powders,
sal soda and lye. It is sanitary in
every respect.

You buy Wyandotte Dairymen’s
Cleaner and Cleanser knowing that it
has no substitutes. No other cleaner
will satisfy after you have once be-
come used to the clean, wholesome
conditions so easily attained with its
use.

You take the initial step, ask your
dealer for a sample or write your
supply house for a barrel; we will do our part
by guaranteeing complete satisfaction.
