## FOUNDER'S NIGHT OBSERVED.

### Hon. H. L. Boutwell '82 Delivers Address.

Last Friday evening in Thompson Hall were held the first formal exercises in commemoration of Founder's Night. H. L. Boutwell '82, Pres. Gibbs and the officers of the four classes were on the platform. H. R. Tucker '12, president of the senior class, officiated as chairman of the evening. The program consisted of an introduction by Pres. Tucker, a review of the current year's progress by Pres. Gibbs, and the "Significance of the Land Grant College" by H. L. Boutwell, the speaker of the evening, followed by songs and cheers by "the entire company."

Pres. Tucker in his introductory remarks spoke of "New Hampshire," what it means to the students, and the duty they owe to its founders. He explained the purpose of Founder's Night, and briefly, he analyzed and expressed that which every New Hampshire man is proud to feel, New Hampshire spirit.

Pres. Gibbs explained, first, the real value of our college traditions. These are the connecting links between the past and the present, and their value cannot be over-appreciated. The observance of Founder's Night is, therefore, a fitting tribute to those who established our college.

In his review of the college, the President gave much statistical information, showing the recent, rapid progress of the college. The faculty has been increased by seven new instructors whose aggregate salaries are \$8,300. There have been 37 increases in salary, averaging \$204 each, and there have been seven promotions in title. Three resignations have been received and one has been lost through death.

During the year the college has acquired 79.5 acres of land. There are 320 students registered this year as compared with 280 of a year ago. A \$6,000 horse barn has been built and \$3,000 worth of live stock has been purchased. A change has also been made in the board of trustees; where formerly there was only one, there are now three alumni trustees. One department has been divided into two; a department of English and that of Sociology and Psychology; and one new course has been added, that in manual arts.

The Nichols Medal for scientific research in chemistry was recently awarded to Prof. James. By this the college gained the rare distinction of being the only institution to twice receive within its walls this important prize.

On the whole, there has been a decided improvement in the right direction. "We have drawn students from many colleges; among them, Yale, Colby, Pennsylvania State, Trinity, Tufts, Dartmouth, Norwich, University of Maine and Massachusetts." We have cause to be proud of the rapid growth of our institution."

Hon. H. L. Boutwell was then introduced. He said in part: "It is with pleasure that I greet you this even-

ing at the first Founder's Night. As a trustee of this college, I am proud of my position; proud because I am an alumnus of this college; proud because it is a college representing the industrial classes; proud because it is the people's college.

"I am not a founder of it, but I found this college thirty odd years ago. I well remember Prof. Pettee at that time, now Dean Pettee, whose black eyes seemed to pierce one's very soul. I remember also Prof. Scott, a student, then, a student now, and I know that the college owes much to Dean Pettee and Prof. Scott. (Applause.)

"I came here back in 1878, a typical specimen of unsophisticated rural verdure. I hired a room with another student at Culver Hall, and worked out at odd jobs during my spare hours, much as the majority of students did at that time. We came to this college from the common people, to prepare to enter the industrial world, not as craftsmen, but as directors of craftsmen.

"Dartmouth, whose name is dear to the hearts of all its graduates, stands for different principles than does New Hampshire. Dartmouth stands for the old order of things; New Hampshire, for the new. Dartmouth represents things of the past; New Hampshire, of the present. Dartmouth deals more especially with the classic side of learning; New Hampshire, with the scientific. Dartmouth prepares men for the profession, such as law, theology, and medicine; New Hampshire, for the industries. Dartmouth appeals to the sons of the wealthy classes; to New Hampshire are attracted the industrial classes, the representative classes of the community.

"Standing, thus, for such diverse principles, when the college were together, differences occasionally arose between the students of the two factions. In the settlement of these differences the insolence of some of the wealthy snobs was often squelched, and they learned that the horny handed sons of toil could fight, if they did know little Latin and less Greek. The removal of the State College from Hanover, therefore, was wise.

"The Land Grant College was not a conception of the state of New Hampshire. The foundations of this movement were laid in the year 1862, when Lincoln signed the so-called Morrill Act. This act provided that the states accepting the proposition of the government should provide a college to teach agriculture and the mechanics arts, and that it should provide a liberal and practical education for the industrial classes.

"By this act, New Hampshire received \$150,000 worth of land and thereby gained an annual income of \$4,800. In 1890 a second Morrill Act was passed, increasing the annuity and thereby making the annual income of New Hampshire College \$25,000. In 1891, the grant was increased by \$50,000, so that we now receive annually from the United States government, \$70,000.

"A government of this kind depends essentially and primarily upon the intelligence of its people. All through the letters of Washington, Lincoln, Jefferson, Madison, and the other presidents and statesmen of former times, runs the cry for universal education. The necessity of it has long been appreciated and the state in-

Continued on page 4

## HARRY E. BARNARD SUCCESSFUL.

### N. H. Graduate Named to Succeed Dr. Wiley

Dr. Harvey W. Wiley, chief of the bureau of chemistry in the department of chemistry in the department of agriculture, has resigned his position and it is suggested in Washington that Dr. Harry E. Barnard '99 will be recommended to Pres. Taft as his successor. Dr. Barnard was formerly state chemist of New Hampshire and is at present chief of the bureau of chemistry of Indiana. He is one of the foremost advocates of pure foods in the country.

Dr. Barnard, was for years in the storm center when the concerns who desired to defy the Indiana law brought suit against the state authorities to prevent the exclusion of their goods, manufactured in violation of the pure food regulations of the state pure food board.

This was the case where the Remsen board was permitted to be called out to Indiana to testify in favor of the adulterators and against the state authorities. Doctor Wiley was then prevented from giving his testimony, and Doctor Barnard was compelled to come to Washington, only to be prevented from getting Doctor Wiley's deposition in the usual manner. He had to go into the district court and sue out a writ of mandamus before he could finally get Doctor Wiley's important evidence in the case.

Doctor Barnard is a graduate of the New Hampshire college, and has been identified with state food and drug inspection and administration since 1901, when he was appointed chemist in charge of the state laboratory, later going to Indiana. He has served on numerous important boards, and is a member of many scientific societies.

### ENTHUSIASTIC MEETING.

At a meeting of the College Club held last Thursday afternoon it was voted that a committee be appointed to assure the disposition of athletic trophies in the trophy room in the gymnasium. Another committee, consisting of J. A. Manter, C. G. Paulson, P. A. Foster, C. S. Adams, W. Quimby, and P. C. Jones, was chosen, to arrange for a sing-out to be held in the club room next month. Owing to the fact that the freshmen were out of town at the time of the meeting, there were only ten men present.

### DID NOT ENTER.

There were two reasons why New Hampshire men did not enter the indoor track meet, which was held in Newmarket last Monday evening. The athletic committee refused to let the track team run under the name of the college. It was planned then by some members to enter the meet and run unattached. Friday, however, notice was received that the A. A. U., in which almost every member of the squad is registered, did not sanction the meet.

### FRESHMEN DEFEATED.

#### Attempt to Escape Sophomores Unsuccessful.

The world-beating freshmen have at last met defeat at the hands of the erstwhile sleepy sophomores. Last Thursday morning the latter class defeated the attempt of the 1915 men to leave town successfully for their first class banquet which was held at the Wentworth Hotel, Haverhill, Mass. The sophomores captured nine men, or the necessary ten percent of the class to win their first class contest of the year. The freshmen were unable to keep silent and at four o'clock in the morning the all night vigil of 1914 was rewarded.

A momentary gleam of subdued light escapes from a window of the crescent and is gone. Snatches of hated conversation wafted hither and yon on the wings of the air. But wait! What are those four shadows peering out into the inky blackness? Now dusky forms appear above the sill, every muscle and sinew tense with the suspense of that tragic moment, risking their very lives in one supreme act of courage. They hesitate. They leap but the watchful Arabs of 1914 silently fold their arms about them and tie them down to peaceful rest.

Yonder in the realms of Edgerly's and Hayes' domain four more loyal freshmen stealthily creep down the stairs and out into the night. A muffled command and Corporal Reed leads his followers to the main thoroughfare of historic Durham. With true military cadence they march down the dark and silent street, glancing neither to the front nor behind. Boldly they now face Garland's Platoon of seasoned marines. The battle waxes hot, but the gallant hand of freshmen is captured and escorted to Fort Beta Phi.

The bugle peals forth its resounding call. A deathlike silence for a moment reigns supreme. The roll is called and nine husky freshmen fail to respond. Dismay controls the assemblage. 1915 has at last tasted of the bitter cup of defeat.

After the banquet the following toasts were given: "Athletics," R. E. Came; "Co-eds," A. E. Bartlett; "New Hampshire," J. F. Hobbs; "Class Spirit," M. J. Brogini; "1914-1915," J. T. Thompson. E. E. Watson, president of the class, acted as toastmaster.

### HOCKEY RINK NEXT YEAR PERHAPS.

Present plans indicate that hockey will receive an early start next season. The dam, with which there was so much trouble this year, will be constructed before the ground is frozen. This year, with a poorly constructed dam, and unpropitious weather, it was found impossible to play any of interfraternity games, scheduled by Casque and Casket. It is hoped next year that the schedule will be completed.

### ANNUAL MEETING.

At the annual meeting of the Christian Association held last Monday evening the following officers were elected for the coming year: President, P. C. Jones '13; First Vice-President, M. G. Eastman '13; Second Vice-President, J. M. Bodwell 2 yr '13; Secretary, H. V. Bent '14; Treasurer, P. A. Foster '13.

"Entered as second-class matter September 20, 1911, at the post office at Durham, N. H., under the act of March 3, 1879."

DURHAM, N. H., MAR. 20, 1912.

Disappointment and failure in well regulated proportions are good for the mental condition of all of us. Continued unbroken success will in the best minds and composite bodies have a tendency to the belief that that person or body is infallible. The freshman class has been unusually successful in its efforts since entering college, but the interclass basketball game proved too much for one or two who endeavored to show just what they could do by painting numerals on convenient posts. That sort of childish trick should not be recognized by the class, and the least that can be done is to remove the works of art. Again on last Thursday the class of 1915 was doomed to defeat while starting on its class banquet. Ten good men were gathered in mainly because someone was careless in his engineering. We say that disappointment in proper proportion is good for the best of us. It has been good for the class of 1915; it should only serve to make its members realize that they are as fallible as the other classes and that the more the care and cooperation in planning an affair, the more the success that will be theirs.

## BULLETIN FOR THE WEEK.

Thursday—7.00 p. m. Rehearsal of Glee Club at College Club room.

Friday—8.00 p. m. at Thompson Hall, lecture by Prof. Donald McMillan. Music by the College orchestra.

Monday—8.00 p. m. at Conant Hall, meeting of the N. H. C. branch of the American Institute of Electrical Engineers.

## DOVER SUPERINTENDENT SPEAKS.

Superintendent E. W. Butterfield of the Dover public schools addressed the Christian Association meeting Sunday March 17 upon "The Value of the Educator of Today." His remarks were of the opinions, which he has formed from actual experience, and were clearly and interestingly expressed.

## DELEGATE TO CONFERENCE.

Last Monday evening the Christian Association voted to send P. C. Jones, president-elect, to the Eastern Presidents' Conference, to be held in New Haven March 21-24.

Last Thursday noon President Gibbs addressed the students of Portsmouth High School on "New Hampshire College."

## Prominent Alumni.

Allen Hazen '85.

Allen Hazen, son of Charles D. and Abbie Coleman Hazen, was born at Hartford, Vt., August 28, 1869. His early life was spent on his father's farm. He graduated from New Hampshire College in 1885, being then not quite 16 years of age. He is probably the youngest man who has ever graduated from the College. After graduation he attended Massachusetts Institute of Technology.

From 1888 to 1893 he was in charge of Lawrence Experiment Station of the Massachusetts State Board of Health, and while there investigated matters relating to water and sewage purification. In 1893 he was in charge of sewage disposal of World's Columbian exposition at Chicago. The following year he spent in European travel and study, and upon his return to this country in 1895, he formed a partnership with Albert F. Noyes and engaged in general engineering business in Boston. Upon the death of Mr. Noyes in 1896, he removed to New York and continued in private practice as consulting engineer, and in 1904 formed the partnership of Hazen & Whipple, Consulting Civil Engineers for matters relating to domestic water supply and sewerage.

He has advised with reference to these matters in a large number of cities in the United States and Canada, notably New York, Pittsburgh, Washington, St. Louis, Minneapolis, Denver, San Francisco, Ottawa, Ontario, Winnipeg, Man, Indianapolis, Grand Rapids, Austin, Texas, Augusta, Me., Hartford, Conn., Springfield and Lynn, Mass., and Toledo Ohio. He has designed engineering works, among them water filtration plants for Albany, N. Y., Yonkers, Washington, D. C., Toronto, Ontario and many other smaller places. In 1908-1909, he designed an entirely new water supply for Springfield, Mass., and advised on its construction, the total cost of the work being about \$2,000,000.

In 1907 he went to Australia to advise the City of Brisbane as to its water supply. In 1909 he was a member of the Engineering Commission appointed by President Roosevelt to accompany President Taft to the Isthmus of Panama to report on progress and general conditions there.

He is the author of "Filtration of Public Water Supplies," 3 editions; "Clean Water and How to Get It." In collaboration with Prof. Williams, "Hydraulic Tables." Chapters in American Civil Engineers Pocket Book, also many technical and other articles.

He is a member of American Society of Civil Engineers, Boston Society of Civil Engineers, Canadian Society of Civil Engineers, American Water Works Association, New England Water Works Association, American Public Health Association, American Institute of Consulting Engineers.

He is also a member of Engineers Club; Technology Club, N. Y. & Boston; National Club of Toronto; Appalachian Mountain club.

It is hardly necessary to say anything of Mr. Hazen's career except to call attention to the foregoing facts. His reputation as an engineer is not confined to this country alone, but is known throughout the civilized world. It would be hard indeed to find an expert of higher standing upon the matters of sewage disposal and water supply.

He is still a young man, yet he has already attained a professional standing

# DE LAVAL CREAM SEPARATOR

## New Automatic Oiling

The most important Cream Separator improvement since the introduction of the present type of De Laval machines.

The new automatic oiling De Laval Cream Separators are now being supplied in all sizes, and this improvement constitutes another great step forward in cream separator construction—the one thing possible in betterment of the previous De Laval machines of the present type.

The new system of De Laval automatic oiling is distinctively different from any other splash or spray system in that there is a constant regulated feed of fresh oil and discharge of used oil. Other splash systems use the same oil over and over, until it soon does more harm than good.

In the new automatically oiled De Laval machines, all gears shafts and bearings practically float in a mist like spray of oil and literally never touch each other during their operation.

De Laval agents will be glad to exhibit the new machines and demonstrate the working of the new automatic oiling system, which more than ever enhances De Laval superiority in every feature of cream separator practicability.

which makes him a conspicuous figure among learned and scientific men. The Alumni who knew him during his college days are exceedingly proud of his career. Every alumnus points to him as a conspicuous example of real success in life. An institution of learning would be proud to number him among her graduates.

Ever modest in demeanor, naturally of a retiring disposition, possessed of a great natural aptitude for high class work, he quickly and easily outstripped the most of his fellows and now holds the position of leader among Consulting Civil Engineers.

January 1, 1903, he married Elizabeth McConway of Pittsburgh, Pennsylvania. They have four children, Martha, Ruth, Abigail and Richard.

Mr. Hazen resides at Dobbs Ferry, New York.

### INTER-COMPANY TRACK MEET.

March 28 is the date set for the inter-company meet. It will be held in the gymnasium under the auspices of the military department. The preliminary trials in the intercompany relay races, and long distance runs will be held March 21 during drill period.

Suitable medals and ribbons will be awarded the men who win places in the meet. The individual, winning the highest number of points, will be given a gold medal; the second, highest, a silver one; and the third, a bronze. Winners of individual events, and members of winning teams will receive ribbons suitably marked.

Each company will have a distinctive color, which will be worn by its representatives, in order to distinguish them. Co. A has chosen blue; Co. B, green; Co. C, red; and Co. D, purple.

The evening's schedule will consist of 600 and 1000 yards, and 1 mile runs; four lap relay, 6 lap relay, and 11 lap relay, open to teams of each company; 25 yard dash, shop put, running high jump, and pole vault; Butts Manual with music with squads of 8 men from each company; calisthenics by squads of eight men from each company, and optional apparatus work by individuals from each company and band.

The captains of each company, together with the major and the commandant constitute the general committee in charge, while each company will elect its own committee, if it has not already done so, to arrange for the company entries.

### COMEDY AND TRAGEDY.

Last Friday evening, the class in Dramatic Criticism, accompanied by Prof. E. J. David of the English department, attended the presentation, in Exeter by the Harvard chapter of the Delta Upsilon fraternity, of "Ralph Roister Doister," the first English comedy, written by Nicholas Udall.

The freshmen were excused from college exercises last Friday afternoon, in order to attend the production of Romeo and Juliet in Dover, N. H.

On account of ill health Prof. E. R. Groves has resigned from the position of chairman of the publicity committee.

Among the new books recently added to the library is "America's National Game" by A. G. Spalding.

On March 14, Lieutenant G. W. Edgerly tendered at his home a banquet to the commissioned officers of the cadet battalion.

Last Sunday afternoon a quartette, consisting of J. A. Manter, H. R. Tucker, G. F. Lane, and H. H. Lindquist, sang at a men's meeting in the Orpheum Theatre, Dover, N. H.

Concluded from page 1

stitution is the solution of the problem, as it appeals not to certain classes alone, but to the community at large. The proposition was not at first looked upon with favor by the majority of the farmers, but public sentiment has changed, and is still changing, for the better. Brains are now appreciated as being valuable in any occupation.

"The state college has had yet another broadening effect on the community in general, in that it tends to destroy class distinction. The man educated along scientific lines is now recognized as occupying a position on the same social level with the professional man.

"The land grant college is for the industrial classes. It is to enable every able bodied man to obtain an education. It is that every man may build foundation that will sustain a successful life, that this college has been established."

## FRESHMAN RESTRICTIONS.

At a meeting of the two year 1913 class, held last week, it was voted that the next entering two year class should be compelled to wear distinguishing caps. This will be a new custom but will be of great assistance to the other classes as well as to the wearers.

## BASKET BALL LETTERS.

The following have been awarded their letters in basketball for the season, which has just closed: Holden '12, Watson '12, Lowd '12, H. Sanborn '13, Jones '13, Came '15, and Thompson '15. F. G. Fisher, Manager's N. H.

## A REAL SANITARY CLEANSER.

No imitation of a sanitary cleaner in a dairy can take the place of a real sanitary dairy cleaner. When it comes to protecting the milk from the dangerous enemy, bacteria, and toward warding off contamination by odors and germs, nothing can give the same assurance as a real sanitary dairy cleaner.

has created a place for itself in every dairy, whether large or small, for it is the only cleaner which is both sanitary in composition and sanitary in its cleaning.

Each particle of Wyandotte Dairyman's Cleaner and Cleanser is cleansing. You can depend upon it to clean thoroughly without a trace of injury to the surface to which it is applied. Nor will it leave a slight film of grease or caustic as do soaps, soap powders, sal soda and lye. It is sanitary in every respect.

You buy Wyandotte Dairyman's Cleaner and Cleanser knowing that it has no substitutes. No other cleaner will satisfy after you have once become used to the clean, wholesome conditions so easily attained with its use.

You take the initial step, ask your dealer for a sack or write your supply house for a barrel; we will do our part by guaranteeing complete satisfaction.
