VOL. I, No. 27.

DURHAM, N. H., APRIL 17, 1912.

PRICE 5 CENTS

PRESENTATION OF MEDALS.

Awards Are Made at Parade.

At a formation which was a modification and combination of the parade and review prescribed by the drill regulations, held at the regular drill period last Friday, the individual prizes for the inter-company meet and gallery shoot were awarded by the commandant and his staff. The evolutions of the battalion were at the same time a farewell drill for the senior two year men whose absence in the military department will be keenly felt.

At the presentation exercises the various company commanders received the ribbons worn by men in their charge and with an expression on the part of the commandant of hearty appreciation of the co-operation and support of the various officers in making the inter-company contests successful, the following awards of individual medals were made: Inter-company meet, gold, J. S. Elliott, '15; silver, R. A. Priest, 2nd yr., '13; bronze, W. H. L. Brackett, '14, (Priest won from Brackett on a draw, from tie for second place).

Inter-company shoot:—gold, P. R. Crosby, '12; silver, P. T. Sellers, '14; bronze, C. H. Batchelder.

FIELD MANEUVERS.

By vote of the faculty April 25 will be given over for a field day for the Military Department. Plans are now being formulated for extensive manoeuvres. E. VanD. Murphy of the 18th infantry, stationed at Concord, N. H., in militia service, is expected to be present.

H. H. SCUDDER MARRIED.

H. H. Scudder, editor of the Spokane Sportsman, who was at one time stationed at the New Hampshire experiment station and was instructor in English at the college, was recently married.

ALUMNA MARRIED.

Announcements have just been received of the marriage of Miss Marietta Drew '11 to Mr. I. A. Hinkley of Norwich, Conn. While in college Miss Drew was very popular and interested in all social activities. She is a member of the Pi Kappa Sorority.

AT CHAPEL.

The chapel speaker last week was Prof. William Kent, M. E., E. Sc., whose handbook is well-known to all engineering men. He spoke on the improvement of the educational matters, academic administration, and the efficiency of the student in college.

VACATION IN ENGLAND.

John C. Morgan '13, is to spend the summer with Professor Charles James in England, sailing from Boston on June 11.

THESES CHOSEN

The theses which are to be prepared this year by the candidates for degrees who have elected to do so, have the following subjects: Miss Margaret De Meritt, Sphaeropsis Malorum and the Leaf Spot of Apples; H. L. Whittemore, Synopsi of the Mammals of New Hampshire; J. A. Manter, A study of the Food Habits of New Hampshire Vertebrates; P. D. Buckminster, The Preparation of Calcium-Thio-Arsenate Solution; H. R. Tucker, A Sociological Study of the Student Christian Association; A. G. Davis, The Effects of Different Methods of Cultivation and Fertilization of the Wood Growth of Apple Trees; R. Skinner, The Relation of Bee Keeping to Fruit Growing; H. B. Tuttle, The Evolution of the Geranium; M. S. Watson, A Working Plan for a Demonstration Orchard near Manchester, N. H.; H. C. Holden, Equilibrium in the System Samarium Sulphate, Sodium Sulphate, and Water and a Method for the Estimation of Samarium; A. Leighton, Investigation in Photochemistry; J. E. Robinson, The Atomic Weight of Europium Oxalonitrate; R. H. Tucker, New Compounds of Lanthanum; P. L. Gowen, The Separation of Yttrium and Erbium; G. W. Berry, The Efficiency of Commercial Nitro-Cultures for Inoculating Soils; F. G. Fisher, The Evolution of the Carnation; P. M. Phillips, A Model New Hampshire Dairy Farm; A. H. Sawyer, A Model Dairy Barn for Willow Cottage Farm.

NEW OCCILOGRAPH.

The Electrical Engineering Department has recently ordered from the General Electric Co., a valuable oscillograph which is to be temporarily installed in the calibrating laboratory. Charles P. Steinmetz, a great electrical engineer, has stated that the progress to be made in this study in the next decade will be made by this instrument. It will be the finest that the department possesses.

OPENING OF COLLEGE.

College exercises will begin one week from today at 8 a. m., On account of the intervening vacation the New Hampshire will be omitted next week.

ATTENDS MEETING.

On April 9 Professor F. E. Cardullo attended a meeting of the Society for the Promotion of the Science of Management, held at the Civil Engineers' Club of Boston, Mass.

SEPARATION OF YTTRIUM.

Professor Charles James and Charles F. Whittemore '11, assistant in chemistry, have completed the preparation of a paper on The Quantitative Determination of the Separation of Yttrium which is to be published in the journal of the American Chemical Society.

The School for Social Workers which is affiliated with Simmons College has just received a donation from the Russell Sage Foundation to provide a second year of training for advanced students who have shown a special aptitude for social work.

ROOSEVELT RALLY.

Col. Winston Churchill Speaks.

Last Friday evening in Thompson Hall a political rally was held by the Roosevelt faction of the Republican party. The speaker of the evening was Col. Winston Churchill, and he was ably assisted by Col. Cutter of Nashua, N. H.

President Smith Sanborn, of the New Hampshire College Roosevelt Club, was chairman of the evening, and he introduced as the first speaker, Mr. Cutter. The latter outlined the situation vividly, giving a brief history of the Republican party, its successes and failures, and graphically describing the situation as it is at the present time. Mr. Cutter is an energetic orator with unbounded courage of his convictions.

Col. Churchill then spoke. He also briefly outlined the history of the Republican party, and then described the situation and its significance. His was a well planned speech, and was well worth hearing. He described the existing contest between the two factions of the Republican party as a fight of "the assumption and establishment of individual responsibility versus trusteeship." "Hence," says Col. Churchill, "the election of Col. Theodore Roosevelt is the only sane solution of the problem."

DR. SEERLEY LECTURES.

Last Sunday afternoon Dr. F. N. Seerley of Springfield T. S. gave in the church chapel one of the most practical educational, and inspiring addresses that the students have had the privilege of hearing, on the subject "Sex Hygiene." The speaker's personal method of delivery and the evident courage of his convictions, with his wide knowledge of physiology and psychology, enabled him to hold the close attention of a chapel full of students and faculty for over an hour and a half.

At the close of the address, immediately after supper, Dr. Seerley spoke to approximately fifty fellows, at the Kappa Sigma house, upon the inflection of destructive diseases, repeating the same talk immediately afterwards to a similar number of students at the Theta Chi house.

The Christian Association was extremely fortunate in securing the services of Dr. Seerley who has, since last October, spoken 144 times upon some subject relating to sanitary and moral prophylaxis besides carrying on his regular work at the training school.

ARTICLE IN TRANSCRIPT.

Professor Charles W. Scott has recently written a history of the new education as it existed in New England before the Land Grant Colleges came, entitled "Early Industrial Schools", which was published in the Boston Evening Transcript on April 10. The author's exhaustive study of the history of industrial education has enabled him to present a comprehensive dissertation on his subject.

GLEE CLUB CONCERT.

Last night the combined Glee Club and Orchestra gave an informal concert in Thompson Hall, which was very satisfactory. The solo work of Mr. Sanborn and the reading by Mr. Murdoch are deserving of especial mention. It is safe to say that this concert will leave a good impression at every place visited on the approaching tour. The program was as follows:

1, Orchestra, "Minuet", Paderewski; 2, "Evening Song in Camp", Kremser, Glee Club; 3, "Give me the Waltz"; 4, "Over the Banister", Messrs. Sanborn and Manter; 5, "Sunday School Scholar"; 6, Violin solo, "Nocturne, op. 9 No. 2" Chopin, Mr. Catlin; 7, Selection, Quartet, Messrs. Knight, Lindquist, Manter, Sanborn; 8, "Open up the Gates of Glory", Geibel; 9, Humorous reading, Mr. Murdoch; 10, "Vive l'Armour", Mr. Catlin and Club; 11, "Landlord Fill the Flowing Bowl"; 12 "Stein Song," Mr. Sanborn and Club; 13, "Bingo," Intermission, Sextette from Lucia, Donizetti, Orchestra. 1, "To the Bravest"; 2, Vocal solo, "Neptune", Pietri, Mr. Sanborn and Club; 3, "Roll, Jordan, Roll"; 4, "Mary and Martha"; 5, Selection, College Quartet; 6, "Legend of the Chimes", De Koven, Mr. Lindquist and Club; 7, "That Little Peach", Neidlinger; 8, "Carve dat "Possum"; 9, "Nut Brown Maiden"; 10, Goodnight Ladies." Followed by the N. H. College Hymn and a long "New Hampshire." Finale: "Guardmount Patrol", Eilenberg, Orchestra.

APRIL FOOL'S PARTY

Last Saturday evening the annual April party under the auspices of the Social committee was held in the gymnasium. The affair was not as largely attended as formerly but the paucity of couples did not impair the success of the evening. At the intermission in the dancing all those present gathered in the College Club room where several popular and college songs were rendered by the entire company, under the leadership of H. B. Catlin '12. The college orchestra furnished music. At intermission the following prizes were awarded: Biggest fool, S. H. Fogg '15; funniest costume, first, Alan Leighton; second, Miss Locke '13; third, J. R. Mason '15.

Best representation, first, men, G. F. Lane '13; second, G. A. McPheters '13; third, J. F. Hobbs, '15; first, women, M. E. Gillespie '13; second, W. F. Hodgdon '13; third, M. E. Lord '13.

Daintiest costume, Miss F. V. Cole '12; best entertainer, G. N. Perkins '14; greatest hot-air artist among the faculty, Prof. F. W. Putnam.

Most popular man among the co-eds, G. F. Lane '13; most popular co-ed, E. G. Donnelly '12; biggest would-be sport in college, W. E. Arthur '14; best dancer among the co-eds, E. G. Donnelly '12.

The members of the orchestra were each given a pair of silk socks as a token of gratitude for their services.

READINGS FROM BROWNING.

In response to a request from several members of the faculty and some of the students, Professor Richard Whoriskey, Jr., will render selected readings from Browning in the library at eight o'clock on May 7.

DURHAM, N. H., APRIL 17, 1912.

This week sees another group of men leave our halls to go into the world of the farm and there endeavor to put into practice the things that they have gleaned while here. We refer to the Two-Year class in agriculture which completes its course with the graduation exercises of tomorrow. They entered two years ago, the largest class of short-course men in the history of the institution, and have in a large majority of cases worked hard and carried themselves in a manner befitting the situation. Their intensive course in practical agricultural problems has fitted them admirably to go back to the farm and there to relegate the old-fashioned notions, that have prevailed for generations, to the soil garret where they belong. The New Hampshire wishes the best success to each of these short-course men.

POLITICS.

The interest displayed in the present presidential campaign is a new thing for the college. Heretofore students have not taken particular partisan attitude concerning the platforms or the candidates. Such interest as is now shown amongst us is one of our hopeful outlooks.

To be sure many of the men are frivolous in the part in which they are talking or acting, and many of them are not basing their judgment upon the issues at hand, but rather upon the personality of the men or their backers in this section. But cast this aside, and beneath the surface there has awakened in the minds of a majority of the students a deep and well founded feeling regarding the situation. The factions are thus gaining knowledge that every citizen should have—that of the political issues and their bearing upon the government at large; they are in debate and in conversation developing their power to think for themselves; they are in fact preparing themselves for a better citizenship against the time when each will be taking his place in the world—industrial, or political.

We welcome The Roosevelt Club with the rally of last Friday night, we welcome the Taft Club and hope that it may also arrange for one or more rallies, we would welcome a Wilson Club with rallies for its man and the policies of his party. All have their niche to fill and all are to be greeted for the message resulting in a better thinking citizenship among college men.

Harvard leads in the number of graduates who become authors at the completion of their course.

PONCE DE LEON

Ponce de Leon was a Spanish gentleman who was endowed with a romantic temperament and a name which no one has been able to pronounce without starting at least six feet back of the tape. While Ponce de Leon was living at home it became the custom to address him by standing on one leg and sneezing three times in rapid fire formation.

SHOES.

One of the neatest articles of genuine, unspoiled and double-distilled torture ever put on the market was the old narrow-gauge dress shoe with a needle-point toe, which had to be clamped on in the midst of a series of pious ejaculations on the part of the clampee. A man's foot never went to sleep in one of these shoes for any extended period, and a dinner guest who could wear a pair of them throughout an evening of social bliss without standing on one foot most of the time in an attitude of suppressed emotion was of the stuff of which heroes are compounded.

THE DIARY.

One of the most humiliating and flesh-creeping experiences in the world is to have a wife with no great amount of humor in her system read aloud to the children the diary her husband kept while courting her. If this won't make a hard-headed business man feel like crawling under the center table and chewing the castors off the pianola, nothing will. As usually compiled, the diary of a sixteen year old boy makes an unexpurgated edition of Balzac look as tame as a meek husband in the corset department.

BALDNESS.

The bald-headed man is a shining mark for the predatory fly which loves to congregate on his knob and there hold gentle converse. Some men become so sensitive in their bald spot that they can tell at once whether a fly is standing on his hind feet or is squaring away for the evening meal.

William F. Garcelon, graduate manager of the Harvard Athletic Association, has an article under the caption "Expenditures for Athletics" in the March number of the Harvard Graduates' Magazine. In the article Mr. Garcelon points out the tendency to curtail expenditures and the educating of the captains, managers and players to the truth that extravagance leads to inefficiency.

That college graduates outlive non-graduates is indicated from statistics recently compiled for the new alumni directory for the University of Wisconsin.

At a recent banquet of the University of Pennsylvania Club of New York City, several plans were discussed for the erection of a new chapel in order to remedy the over-crowded seating capacity at present existing at the University. It was estimated that approximately \$600,000 would be required for this project.

WHY YOU SHOULD INSURE IN
THE MASSACHUSETTS MUTUAL LIFE INSURANCE COMPANY OF SPRINGFIELD, MASSACHUSETTS.

Because it's a purely MUTUAL COMPANY—and pays dividends ANNUALLY to its policyholders, (Not to stockholders, because we have none.) It's premium rates are low—its dividends are very large, and its surrender values are extremely liberal—in fact it's "Peerless." Paid up values, cash surrender values, and extended insurance guaranteed after two years premiums have been paid. Its assets are of the highest class, and its surplus is ample for all contingencies. Write us, giving date of birth and kind of policy desired, and we will forward a Specimen Policy for your inspection.

DE LAVAL CREAM SEPARATOR

THEIR GREAT SIMPLICITY.

De Laval Cream Separators excel other separators not only in thoroughness of separation, sanitary cleanliness, ease of running and durability—but as well in their great simplicity.

There is nothing about the operation, cleaning, adjustment or repair of a modern De Laval Cream Separator which requires expert knowledge or special tools.

Nor are there any parts of which adjustment is frequently necessary to maintain good running or to conform to varying conditions in the every-day use of a cream separator.

There is no need to fit and adjust parts to get them together right. They are so made that they cannot help go together right. All bearings and bushings are easy to replace. There are no complicated springs, keys, ball bearings or other fittings, that only an expert can properly adjust.

A person who has never touched a separator before, can, if need be, unassemble a modern De Laval machine down to the last part within a few minutes and then reassemble it again as quickly. This is something which cannot be done outside a shop with any other separator.

The only way to properly understand and appreciate De Laval superiority to other separators, is to look over, and better still to try, a 1912 De Laval machine. Every De Laval agent is glad to afford prospective buyers the opportunity to see and try a De Laval Separator.

EDWIN P. DEWEY 82.

Edwin P. Dewey was born at Hanover, N. H., June 9, 1859. His father owned a small farm, but infirmities acquired as a soldier during the Civil War made him a semi-invalid during many years of his later life. He was therefore unable to assist his son to any appreciable extent in acquiring an education. It was necessary for Edwin P. Dewey to acquire his education by his own exertions or not at all.

He attended the District Schools of Hanover and later the High School at Lebanon, N. H. In the spring of 1880 he entered the class of '82 of New Hampshire College and graduated with high honor in 1882, being specially strong in mathematics.

He began to help himself as early as 1875 and for some time was employed in the woolen mill at Newport, N. H. Later he worked on the farm, managed his grandfather's saw-mill, taught the District School and did anything and everything that came to hand, always having in mind a strong desire for a higher education.

After graduating from college he spent a year at the Thayer School for Civil Engineering. In 1883 he entered the Engineering Department of the City of Boston and was engaged in the construction of the great Outfall Sewer at Moon Island and Reservoir in Boston Harbor. In 1885 he was employed by the United States Coast Survey as computer adjusting the secondary triangulations over portions of Maine, New Hampshire and Massachusetts. In the fall of 1885 he was elected principal of the Mascella Street Home School in the City of Boston and held that position until 1891. From 1891 to 1894 he was engaged in civil engineering, a part of the time in the employ of the Boston & Maine railroad and later as a member of the engineering corps of the City of Boston and the City of Malden. During this period he was also first assistant to H. L. Boutwell, 1882, at the Eliot Evening School in the City of Boston.

Owing to the failing health of his wife he went to Pasadena, California, in 1894 and in the next eight years was engaged chiefly in real estate enterprises and general engineering work.

In 1902 he accepted the position of Deputy City Engineer of the rapidly growing City of Long Beach, Cal. He held this position for four years and then resigned to accept the amnagement of the Harbor Iron Works at Long Beach. In 1908 he was elected City Engineer of Long Beach, Cal., and now holds that position.

Long Beach, California, is rapidly becoming a beach resort for Southern California. It has a beautiful harbor and many other natural attractions. When Mr. Dewey entered the service of the City in 1902 it was scarcely more than a country village. Today it is a city of substantial size and widely known as the one great winter resort of Southern California. The development of a rapidly growing city placed large burdens upon the City Engineer. These burdens not only related to the construction of streets and boulevards, but also involved important public works such as the installation of a new water system, a sewer system with the sewage carried far out to sea, the construction of a great breakwater in the harbor of Long Beach, the draining of great tracts of land adjoining Long

Beach, the construction of docks, piers, quays, bulk heads, sea walls, etc.

His work as a municipal engineer has made him famous. His articles have been published in the Engineering News and many other papers and periodicals throughout the west and to some extent have been copied into engineering journals of the East.

His work in the development of Long Beach has been so varied and so successfully performed that he is everywhere in California accorded the leader among municipal engineers.

In a recent issue of a leading California newspaper appears a long interview with Mr. Dewey upon municipal questions, at the end of which the editor makes this statement:

"With the adoption of the new charter he was appointed chief engineer of the city. He is considered one of the most expert municipal civil engineers in the state."

As a side issue, Mr. Dewey has been interested in the development of an orange grove a few miles from Los Angeles. In company with a civil engineer friend he discovered a spot on the great Mojave Desert where water could be obtained by drilling. The drilling was successful and soon thereafter great fields of alfalfa were growing where but a short time before little could be found but cacti and rattle snakes.

Mr. Dewey has been prominent in Masonic circles, having been Master of his Lodge, Inspector of the 45th Masonic District and he now holds the position of High Priest of the Royal Arch Chapter located in that section.

In 1891 Mr. Dewey married Emma A. Philbrick. She died in Pasadena, California in 1899. In 1904 he married Louise Martin.

He owns and occupies a beautiful home at Long Beach, California, where he would be delighted to receive visits from his old college friends.

TRUSTEE MEETING.

At the meeting of the trustees held Wednesday, April 10, it was voted to accept the offer of the Boston and Maine Railroad to sell a small strip of land to the college, comprising about one and a half acres and situated between the lot recently purchased from Mr. Hoyt and the gymnasium. It was also voted to establish a department of forestry at the experiment station under the direction of Prof. Foster.

ABLE TO DO WHAT NONE OF THE OTHERS CAN DO.

had a beginning no more illustrious than hundreds of other cleaning materials, but it had the necessary qualities to be a success from the very start. These necessary qualities stand out distinctly when Wyandotte Dairyman's Cleaner and Cleanser is used.

That is why every non-user of Wyandotte Dairyman's Cleaner and Cleanser is so thoroughly impressed when he gives it a first trial. He has been accustomed to a certain degree of cleanliness, obtained with some other cleaner, but when he is brot face to face with perfect sanitary cleanliness such as Wyandotte Dairyman's Cleaner and Cleanser always produces, it is then he realizes that Wyandotte Dairyman's Cleaner and Cleanser is able to do what none of the others can do.

Wyandotte Dairyman's Cleaner and Cleanser has never been likened to any other cleaner. It does not admit of comparison. And no dairyman can truthfully say he has secured as good results with some other material as can be obtained with Wyandotte Dairyman's Cleaner and Cleanser, because Wyandotte Dairyman's Cleaner and Cleanser has ingredients wholly unlike and vastly superior to any other dairy cleaning agent now in use.

All we ask is for you to give Wyandotte Dairyman's Cleaner and Cleanser a trial. It will prove itself to be the most economical as well as the very best. Ask your dealer for a sack or write your supply man for a keg or bbl.
