PRICE 5 CENTS

TUFTS 22.

NEW HAMPSHIRE 0

Poor Playing by Our Eleven.

The New Hampshire eleven went down to Medford last Saturday a handful of rooters accompanying the team, and came home a sadder but wiser team. Everybody knows by this time that Tufts won by the score of 23 to 0 and the few who saw the game know just exactly how it was done.

Four of the nine punts which the Blue and White tried were blocked, and the result was close. Two resulted immediately in safeties, one in a touchdown, and the other placed the ball in Tufts' possession within six inches of New Hampshire's goal line. Block punts gave Tufts 16 of the 23 points made in the game. The other seven points were from a touchdown, made by intercepting a forward pass on New Hampshire's 25 yard line.

The punts were blocked exactly the same way each time. The Tufts' ends and sometimes the tackle rushed in, evaded the secondary defense, and blocked the ball just as it left the punter's toe. Then, there was a mad scramble for the ball, with three Tufts' players and one New Hampshire in pursuit. Honors were even, as both teams recovered it twice. New Hampshire was extremely fortunate that two of the punts resulted in safeties, instead of touchdowns.

With the exception of two long forward passes, which were successful Tufts did not gain the amount of ground that the New Hampshire did on rushing. The forward passes were spectacular and were worked directly after the kick off. The quarterback of the Tufts team went across the field, almost on the sidelines, away from the place of scrimmage. In each case, he was unobserved. He obtained the ball on a long forward pass, and twice ran almost the length of the field. Brackett, each time, brought him to the ground and saved touchdowns.

The fighting spirit which was evident in the game against Bates was again displayed. At the beginning of the game, a long forward pass placed the ball in Tufts' possession on New Hampshire's 15 yard line. Tufts made ten yards, carrying in to the five yard line. Here, New Hampshire held for downs, not allowing Tufts to gain an inch.

A number of the college men saw the game, as well as some of the Alumni who live around Boston. While their cheering was not as loud as that of the Tufts' rooters, it could be plainly heard all over the field.

The Game.

Tufts won the toss and chose to receive the kick-off. Jones tried a short kick, which was unsuccessful, Tufts recovering the ball in the forty yard line. The very first play, a long, successful forward pass, carried the ball to within 15 yards of New Hampshire's line. Three plays carried it ten yards

farther, and then New Hampshire held for downs. Woodman's punt was blocked, and Brackett recovered the ball back of the line. It was a safety. Score-Tufts 2, New Hampshire 0.

The ball was placed in scrimmage on the 20 yard line. New Hampshire immediately made the first down on two formations, and then was again forced to punt. Again, the punt was blocked and Richardson of Tufts fell on the ball within six inches of the goal line. Three plays resulted in a touchdown.

Tufts kicked-off to New Hampshire, and the rest of the period saw the ball mostly in New Hampshire's territory.

Second Period.

In the second period, Tufts lost on the first play and then punted to New Hampshire's 20 yard line. New Hampshire's attempt to punt after failure to gain was blocked by the end, and recovered back of the line for another touchdown.

Score—Tufts 16-, New Hampshire 0. Tufts again kicked to New Hampshire. Jones, Jenness and Bissell made ten yards in three formations, and then Jones got off the first successful punt so far in the game. The ball was on Tufts 40 yard line. Hadley skirted right end for 20 yards, a fumble occurred but Tufts recovered for gain of ten yards, and then Jones intercepted a forward pass on New Hampshire's ten yard line. He attempted to punt, but it was blocked. He recovered it back of the line, and the second safety was registered against New Hampshire. Score—Tufts 16, New Hampshire 0.

There was no more scoring in this period. An exchange of punts followed after the ball was placed in scrimmage on the 20 yard line. New Hampshire had carried the ball 40 yards on end rushes by Bissell, Brackett and Jones, and a forward pass to Kiley, when the half ended with the ball in New Hampshire's possession on Tufts 40 yard line.

Third Period.

There was no scoring in the third period. New Hampshire gained about 40 yards, and made first down four times in succession, while Tufts couldn't gain the necessary distance once. Another punt was blocked, but New Hampshire recovered without any damage.

Fourth Period.

During the fourth period, both teams gained about the same amount of ground. Brackett was the chief ground gainer for New Hampshire. New Hampshire worked the forward pass, successfully three out of five times for short gains. The last attempt was costly, as Tufts intercepted it, and made the last touchdown. The pass was unprotected. Final Score—Tufts 23, New Hampshire 0.

Continued on page 4.

Prof. F. W. Taylor recently addressed the "Farmers' Club" of Portland, Me., at a banquet held in that city. This club is composed of bankers, merchants and other business men, who own farms and are interested in agricultural problems. Prof. Taylor spoke to them on "Soil Fertility."

Director John C. Kendall last week attended a cattle-sale in New York state.

FIRST LECTURE TONIGHT.

John Kendrick Bangs to Deliver First Lecture of the Season.

The lecture course committee was extremely fortunate in being able to secure services of John Kendrick Bangs for the course this season. This was one of the last engagements which Mr. Bangs has made for this season, as he is about to make preparations to go to Australia during the coming winter. Also the lecture which he has chosen to give tonight is the most popular one of his selections.

Mr. Bangs spends his summers at Ogunquit, Me. Besides being a lecturer, he is also an author of several important and famous books. Among his contributions, are "The Genial Idiot," "A Glance Ahead," "A Strenuous Day at Oyster Bay," and "House Boat on the Styx."

The subject which he has chosen to deliver tonight is "Salubrities That I Have Met."

DR. E. F. FAIRCHILD ACCEPTS.

Dr. E. F. Fairchild, who was recently chosen by the trustees, to fill the vacancy of president, caused by the resignation of ex-president Gibbs, has decided to accept the position. He will begin his duties here not later than December 1st.

The following is the telegram, sent by Dr. E. F. Fairchild, upon receipt of the message from the college of his election to the presidency;

7.33 a. m. Topeka, Kans.,
C. H. Pette, Durham, N. H.

Will be pleased to accept in accordance with your message of ninth and former letters. I appreciate the unanimous action of trustees; will write on receipt of your letter.

(Signed) E. T. Fairchild.

BREWSTER VS NEW HAMPSHIRE SECOND.

On Saturday afternoon, while the varsity team was playing Tufts' in Medford, the second team played Brewster Academy on the home grounds, and were defeated 14 to 0.

Within five minutes after the game was started, Brewster ploughed through the New Hampshire team for their first touchdown. The goal was then kicked.

After this, New Hampshire stiffened and although the playing was largely in her territory, kept the visitors from scoring again in the first half.

In the third period the "prep" school boys again crossed the line and kicked the goal. This ended the scoring.

New Hampshire attempted the forward pass several times, and worked it for a gain more than once. The Brewster team had the better organization and clearly outplayed the home team.

College and village people wishing to obtain cordwood for delivery as soon as teams become available this fall may place their orders with Prof. J. H. Foster of the Forestry Department, Morrill Hall. Hemlock will be delivered in the village at a price not to exceed \$4.00 per cord and hardwood at \$5.00. These figures may be reduced, depending on the cost of hauling.

NEW HEAD OF PHYSICS DEPT.

William J. Fisher Succeeds Prof. A. F. Nesbit.

In the article on "New Members of the Faculty," which appeared in the second issue of "The New Hampshire," the account of the new professor of Physics was omitted by mistake. The following is a brief resume of his career before coming to New Hampshire College:

Willard J. Fisher was born 1867, Waterford, N. Y., and educated by his father and also at Williston Seminary; A. B. Amherst, 1892; principal of the high school in Medway, Mass., most of the time till 1903, though during that time he spent one year in graduate work in Amherst College and one year in Cornell University; Assistant and Instructor in the Department of Physics Cornell University, 1903 to date, with the exception of 1908-9, when he was at Gottingen.

He holds a Ph. D. from Cornell, 1908, and is a member of the American Physical Society and a fellow of the A. A. A. S. His research work has been along lines of molecular physics, especially the relation of the temperature and the viscosity of gases.

NEW HAMPSHIRE TO BE REPRESENTED AT CHICAGO.

At a special meeting of the agricultural club, held Thursday Oct. 10th, it was definitely decided to send a stock judging team to the Chicago International Show, to be held in Chicago the latter part of this month.

Two years ago, New Hampshire College was represented at this show for the first time. Last year, owing to a lack of funds, the college was not represented. This year, however, the trustees of the college have given \$55 out of their own pockets to start the fund. With this generous contribution from the trustees, and with the financial support of every student and member of the faculty the prospects of sending a team this year are exceedingly bright. The total cost of sending a team will be approximately \$200.

MASS MEETING.

At the conclusion of the chapel exercises, Wednesday Oct. 9, a mass meeting of the students was held. Short speeches were made by Prof. A. E. Richards, Capt. P. C. Jones, Cheer-leader Robin Beach and Coach Tod Eberle. After which Beach led in the cheering. Some new cheers were tried out, which instilled interest and enthusiasm in the student body. These cheers will be rehearsed several times, in order to get the fellows into shape for the Manchester game.

NEW TITLES.

At the regular meeting of the trustees, Wed. Oct. 9, Charles James F. I. C., formerly Associate Professor of Inorganic Chemistry was made Professor of Chemistry; O. L. Eckman, formerly Associate Professor of Animal Husbandry was made Prof. of Animal Husbandry and Charles C. Steek, formerly Assistant in Mathematics was made Assistant Professor of Mathematics.

FRESHMAN ADJUSTMENT.

One of the invaluable accompaniments to an academic education is the development of a deep and lasting college spirit. Of peculiar import in the birth and growth of this true loyalty is timely and correct adjustment to environment on the part of the new student. Not until a freshman realizes that he will be inevitably a freshman for at least one year can he hope to become imbued with lasting college spirit.

How satisfying to a new man is the conviction of the excellence of his preparatory school accomplishments and how gratifying to him is the telling of former deeds of prowess in athletics and phenomenal scholastic records! How quickly can the unchastised freshman appropriate to himself the ways and customs of the extravagant sophomore and even of the more conventional senior! How correctly does he imitate the upper-classman who has allowed himself to cultivate the habits of indifference to study, smoking, profanity, and riotous living!

No college man cares to learn of past achievements, you boastful freshman. Your standing is on the basis of your deportment since you arrived on the campus. Be assured that he who cares to know of your past history will obtain his information from more reliable source than your every day tongue.

The inference is correct also that more estimable in the eyes of his fellow students is the freshman who conforms implicitly to the regulations of the upper classmen than he who spurns the sophomore's guiding hand. May the latter obtain his just reward.

In his saner moments, let the tempted student formulate a mental picture of the man his mother would have him be and let him strive to emulate her ideal. Then will he hesitatingly allow insidious habits to rob him of the fullness of his college career.

A deeper college spirit will surely be exhibited when every freshman is forced to recognize his real status in the college.

INFORMAL IN THE GYM.

The second informal of the season was given in the gymnasium Saturday evening, Oct. 12th. Although the weather was not of the best, there was an unusually large number present. The music was furnished by the New Hampshire College Orchestra, being composed of about ten pieces.

STATE INSTITUTIONS GROWING IN PRESTIGE.

Take it all over the East and the State colleges, with their courses of economic utility and their steadily increasing support from the States treasuries, are gaining in collegiate and athletic strength every year. In the West the State universities have been the the whales for several years and it will not be many decades before New Hampshire, Rhode Island, Massachusetts and (remote possibility Connecticut) State colleges will battle on even terms with Dartmouth, Brown, Harvard and Yale for the supremacy of their respective commonwealth, just as Penn. State does with University of Pennsylvania now. Exact from Manchester Union.

ENGINEERING TRIP.

Last week, Tuesday, the engineering juniors and seniors, conducted by Prof. Cordullo, Mr. Frank McKone and Mr. Durham took a very interesting and instructive trip to the Navy yard at Portsmouth. The power-plant, foundry, machine shops and various other places of interest to the engineers were visited and much of an instructive nature was seen. Much courtesy was shown the party by the Navy Yard officials and those privileges extended by them were greatly appreciated.

CHRISTIAN ASSOCIATION MEETING.

The New Hampshire College Christian Association was addressed last Sunday evening by Prof. Richard Whoriskey on "Tradition." Prof. Whoriskey first showed clearly what tradition meant, and then applied his terms to college cases.

He emphasized the need at New Hampshire of some form of system in our athletics and other activities, hoping that with the proper system, spirit and tradition would come of their own accord.

Prof. F. W. Taylor was in Boston, Thursday, Oct. 10, arranging for the National Corn Show, to be held in Horticultural Hall in that city Nov. 20, to 24. Prof. Taylor is chairman of the committee on arrangements, and has also been selected as one of the judges together with W. P. Brooks of Massachusetts Agricultural College and L. A. Clinton of Connecticut State College.

DE LAVAL CREAM SEPARATORS

Cheapest As Well As Best

Every sensible person wants the **best** of everything, but in many things the best is beyond their means and they must necessarily be content with something less.

In the case of the Cream Separator, however, the **best** is fortunately the **cheapest** as well, and it is of the greatest importance that every buyer of a separator should know this.

Moreover, the **best** is of more importance in the case of the Cream Separator than in anything else, since it means a saving or a waste **twice a day every day in the year** for many years.

It is true that the DE LAVAL Separators cost a little more in first price than some inferior separators, but that counts for nothing against the fact that they **save their cost every year over any other separator**, while they last an average twenty years as compared with an average two years in the case of other separators.

And if first cost is a serious consideration a DE LAVAL machine may be bought on such liberal terms that it will actually **save and pay for itself**.

These are all-important facts which every buyer of a Cream Separator should understand and which every local DE LAVAL agent is glad to explain and demonstrate to the satisfaction of the intending buyer.

If you don't know the nearest DE LAVAL agent please simply address the nearest of our main offices as below.

CORN SHOW TO BE HELD IN BOSTON.

Prof. F. W. Taylor was in Boston Thursday, Oct. 10, at a meeting of the executive committee of the New England Corn Show Association. Arrangements were made to hold the exhibition in Horticultural Hall, Boston, Nov. 19-20. It was also decided to have a student's corn judging contest at the exhibition. Two silver cups will be offered for first and second prizes, respectively. Two years ago, New Hampshire College was represented by a team at this show and won first place. It is hoped that a team will be sent this year.

ALUMNI NOTES.

Henry F. Judkins class of '11 and assistant state entomologist, was married on Saturday Oct. 12, to Miss Alice Cecil Bates of Bradford, Mass. Mrs. Judkins was formerly a teacher in Montpelier Seminary.

Mr. Judkins has obtained a leave of absence for two weeks, after which he will resume his duties here and reside in Durham, in the residence formerly occupied by Dr. P. L. Reynolds.

C. J. Jenness '06 and Miss Mary M. Prescott, daughter of Mr. and Mrs. A. W. Prescott of Haverhill, were recently married at the home of the bride by Rev. F. R. Gruel.

O. F. Bryant '10 and Miss Isabelle Linnell of Wollaston, Mass., were married by Rev. Alan Stockdale of Boston. Present residence is Port Edwards, at the home of the bride.

Mr. Benjamin F. Prowd, 1911, who was physical director at the Borden-town Military Institution of New Jersey last year, has been engaged this season as assistant physical director at the Hill school, located at Pottstown, Pa.

Mr. Clarence M. Lowd and Ralph C. Morgan of the class of 1912 are in the employ of the Western Union Tel. & Tel Co. in Boston, Mass.

Mr. John E. Robinson, 1912, has accepted a position with the India Rubber Co., as chemist in their laboratory at New Brunswick, N. J.

George W. Berry '12 is at present engaged in work at the New Hampshire College in the agricultural department.

Karl P. Mitchell 2 yr. '12 is working in the poultry department of the Whipple Farm, New Boston, N. H.

Alan Leighton '12 is taking up graduate work in Chemistry at Cornell University.

Harwood B. Catlin '12 is instructor in mathematics at Mt. Harmon School for boys, Northfield, Mass.

Paul M. Phillips '12 has charge of the Dairy Department of the Lyman Reformatory School for boys, at Westboro, Mass.

1ST. YEAR TWO YEAR OFFICERS.

The following officers have been elected by the 1st yr. two year class: Pres. J. A. Dodge; Vice Pres. F. A. Paul; Sec. C. L. Bishop; Treas. W. Motret.

Always ready to write at the first stroke without shaking.

That is a vital point which is lacking in ordinary fountain pens. You can readily understand how this is made possible in a Moore when we explain that the pen when not in use lies submerged in ink which keeps it moist and prepared for instant writing, positively eliminating the necessity of shaking.

But that is not all of its strong features. The Moore can be carried in any position without the least fear of leaking. Has a large ink capacity. Always writes freely and evenly, and is easily filled.

Every Moore Non-Leakable Fountain Pen carries with it the most unconditional guarantee.

IN COURT

A witness must be sworn, not only to tell the truth, but the whole truth and nothing but the truth.

In household and dairy

is sworn not only to wash away the dirt and grease, but the whole of the dirt and grease, and nothing but the objectionable matter.

That is, it will easily, thoroughly and harmlessly loosen and dissolve everything that is termed "dirt," but it will not injure your hands, tinware, clothing or anything you wash. It makes no suds but softens even the hardest water. It cleans, sweetens and purifies dishes, clothes, floors and tables, pots, pans, milk cans, and every unclean thing without injury.

The drudgery of cleaning is the only thing Wyandotte Dairyman's Cleaner and Cleanser ever destroys.

INDIAN IN CIRCLE

IN EVERY PACKAGE.

Ask your dealer for a sack or order a barrel or keg from your dairy supply house.
