DURHAM, NH – Mitt Romney continues to lead a congested field for the 2012 Republican nomination for President among New Hampshire Republicans. However, the great majority of voters are undecided about who they will eventually support.

These findings are based on the latest **WMUR Granite State Poll**,\* conducted by the University of New Hampshire Survey Center. Eight hundred ninety-seven (897) randomly selected New Hampshire adults were interviewed by telephone between April 15 and May 2, 2011. The margin of sampling error for the survey is +/- 3.3%. Included in the sample were 416 likely 2012 Republican Primary voters (margin of sampling error +/- 4.8%) and 303 likely 2012 Democratic Primary voters (margin of sampling error +/- 5.6%).

#### Republican Primary

The 2012 New Hampshire primary campaign heated up in April as several people declared themselves as candidates for the Republican nomination and several others have strongly hinted that they would run. But because primary elections are extremely volatile, any measure of voter preference this far in advance of the election is not indicative of the eventual outcome.

Among likely Republican Primary voters, former Massachusetts governor Mitt Romney, the 2008 New Hampshire runner-up, has consistently been the most popular candidate. In the most recent WMUR Granite State Poll, 36% of likely Republican Primary voters said they would vote for Romney, who has been above 35% most of the time since February 2009. Businessman Donald Trump, who has made the national news recently questioning Barack Obama's birthplace, has moved up to second place with 11%, followed by former New York City Mayor Rudy Giuliani (7%), former Arkansas governor Mike Huckabee (6%), Texas Congressman and 2008 candidate Ron Paul (6%), 2008 Vice Presidential candidate Sarah Palin (4%), former Speaker of the House Newt Gingrich (4%), Minnesota Congresswoman Michelle Bachmann (4%), former Minnesota governor Tim Pawlenty (2%), and Indiana governor Mitch Daniels (2%).

It is critical to point out that primary voters behave very differently than general election voters where there are no party cues to rely on, and almost all will vote for their party's eventual presidential candidate, no matter who that might be. Most primary voters do not settle on a choice until the very end of the campaign, so early poll numbers are a better gauge of a candidate's popularity now than an indication of who voters will end up supporting. In the most recent poll, 79% of likely Republican primary voters say they are still trying to decide who they will eventually vote for in 2012, 16% are leaning toward a candidate, and only 5% say they have definitely decided who they will vote for.

### NH 2012 GOP Presidential Primary – Likely Republican Primary Voters

### Favorability Ratings

Support for Republican candidates is currently based almost exclusively on their name recognition and favorability ratings. Mitt Romney consistently has had the highest favorability ratings among all likely Republican candidates. Currently, 70% of likely Republican primary voters say they have a favorable opinion of Romney. Romney's net favorability rating, the percentage who have a favorable opinion of him minus the percentage who have an unfavorable opinion, is a very high +49%.

Rudy Giuliani continues to be the second most popular Republican candidate with a net favorability rating of +30%, followed by Tim Pawlenty (+26%), Mike Huckabee (+13%), Rick Santorum (+12%), Mitch Daniels (+8%), and Ron Paul (+1%). The least popular Republicans are Newt Gingrich (-2%), Michelle Bachmann (-3%), John Huntsman (-3%), former New Mexico Governor Gary Johnson (-5%), Sarah Palin (-13%), and Donald Trump (-14%).

### NH 2012 GOP Presidential Primary – Candidate Favorability Ratings (% Favorable)

### A Democratic Primary?

While no Democrat has indicated that they plan to challenge President Barack Obama in 2012, his rather low job approval ratings may attract another Democrat, should they fall lower. When asked if they plan to vote for Obama in the 2012 New Hampshire Democratic primary, 69% of likely New Hampshire Democratic Primary voters say they do plan to vote for Obama, 9% say they plan to vote for some other candidate, and 22% are undecided about what they will do.

### Undeclared Voters

New Hampshire has a semi-closed primary, in that Undeclared voters (often called independents) can choose to vote in either the Democratic or Republican primary at the polls. Because it does not appear that there will be a Democratic challenger to President Obama, it is not a surprise that most undeclared voters say they plan to vote in the Republican primary. Currently, 48% of undeclared voters say they will vote in the Republican primary, 28% say they will vote in the Democratic primary, and 24% are unsure.

## Granite State Poll Methodology

These findings are based on the latest WMUR Granite State Poll, conducted by the University of New Hampshire Survey Center. These findings are based on the latest **WMUR Granite State Poll**, conducted by the University of New Hampshire Survey Center. Eight hundred ninety-seven (897) randomly selected New Hampshire adults were interviewed by telephone between April 15 and May 2, 2011. The margin of sampling error for the survey is +/- 3.3%. Included in the sample were 416 likely 2012 Republican Primary voters (margin of sampling error +/- 4.8%) and 303 likely 2012 Democratic Primary voters (margin of sampling error +/- 5.6%).

The data have been weighted to adjust for numbers of adults and telephone lines within households, respondent sex, and region of the state. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response.
