PRICE 5 CENTS

BASKETBALL TRIP.

Five Plays R. I., Dean and S. T. S.

The basket ball squad together with Coach Eberle and Manager Adams left Durham last Tuesday noon, yesterday, on a three day trip. While away from home, the basketball five played Dean Academy last night, will line up against Springfield Training School tonight, and against Rhode Island tomorrow evening at Kingston, R. I.

Last season, the squad made practically the same trip on the same dates, with the exception that Brown was played instead of Springfield. A year ago, New Hampshire trimmed Dean on its own floor by the score of 21 to 16, lost to Brown 35-30, and to Rhode Island, 29 to 17.

"Joe" Killourhy, who has been officiating at the home games in Durham will have charge of the game at Rhode Island Thursday evening.

The line-up of the team last night for the beginning of the game was Jones and Bissell, forwards; Sanborn, center; Came and Thompson, baeks. The substitutes who made the trip are Lindquist '15, and Jenness '13. The latter player, although he has been out but a short time, has made good.

NEW SUITS.

On Monday evening, when the names of the basketball squad were posted for the trip this week, Manager Adams gave the successful men new suits, which are exactly the same as they have been in the past.

TRACK SWEATERS.

Last week those members of last year's track team who made their letters and who are still in college were awarded white track sweaters with blue letters. The following men received them: Captain Beach, T. A. Davis, Ham, Jones, Reed, Paulson, Blodgett, H. W. Sanborn, and E. L. Sanborn.

PROGRESS OF SONG BOOK.

The success of the college song book, which the Girls' Executive Council is booming, seems almost assured. The student body and the alumni have already signed advance orders, amounting to a large number. The latter body has subscribed for nearly 100 copies. An informal will be held in the gymnasium Saturday evening for the benefit of the publication, and the girls have sold 170 tickets to date, netting about \$85.00

Prof. Richards was in Boston last Friday making arrangements for the publication of the book.

A number of new songs, composed by the members of the student body have been written, and will make their first appearance, when the book is issued.

It is understood that the sum of \$600 is needed for the publication, and of that sum, nearly \$500 has been raised. The student body is requested to furnish about one hundred more names in order to make the financial end a success.

FOR THE STATE COLLEGE.

Trustees Consider Cost of Running Institution for Next Two Years.

All members of the board of trustees of the State College at Durham were present at the quarterly meeting held in this city today. President Fairchild presented a report upon the expenses of the institution by departments and the estimated cost of conducting them for the next two years. The requests that should be made of the legislature were considered and it was voted to ask for appropriations aggregating \$155,500 to meet the cost of maintenance and the pressing needs for the coming two years.

The purposes of this total are thus summarized: New engineering building, voted at the last session but vetoed by Governor Bass and now recommended by him, \$80,000; for running expenses, including forestry, \$37,082; for tuition of New Hampshire students, \$6,000; for agricultural extension work, \$12,500; for special expenses, \$20,000. The latter is made up of \$2600 for rewiring college buildings urged by an expert electrician for safety against fire; for fire escapes from halls to conform to state law, \$1200; for completion of sewer \$2000; for equipment for and instruction in a domestic science department required for girl students and demanded by the State Grange; for furnishing the attic in Morrill hall for a meeting place for college societies, \$2800; for furnishing and equipping a room in the dairy building for the handling of milk for market \$2000; for a power sprayer \$600.

The income for the current two years was given as follows: Morrill Act, United States government \$100,000; from the state \$37,500; land grant, United States government, \$9600; Conant fund, \$5,500; tuition and fees, \$11,000; real estate rents, \$1,400; Thompson fund, \$63,744; experiment station \$1,200, a total of \$229,974."

—The Manchester Union.

MILITARY DEPARTMENT.

Friday at Drill, the pictures of the band and the four companies were taken on the campus for the Granite.

It has been announced that the indoor meet between the companies will be held the last of March. The Commandant is also planning to have both an indoor and outdoor intercompany rifle meet, besides an outdoor track meet in the spring.

GLEE CLUB PROGRAMME.

The programme will consist of popular college songs mingled with several classic, selections. There will be a cornet solo rendered by Mr. Marie Broginni '15 and vocal solos by Mr. R. M. Sanborn, '13 and Mr. E. L. Blake, '16. The orchestra will render several selections, making a well balanced and pleasing programme.

Priest, Smart and Blodgett are the three men left of the relay team of last season, which competed in the B. A. A. games in Boston. They are out this year for the team. A number of new men are also trying for positions on the team.

The printed schedule of the basketball games has been issued by Manager C. S. Adams. It is printed in folder form this year, instead of the cardboard form.

BEST LECTURE ON PROGRAM.

Thomas Brooks Fletcher As the Speaker.

Last Saturday night, at Thompson hall, a large and appreciative audience listened to a lecture on "The Martyrdom of Fools" by Thomas Brooks Fletcher. Enthusiasts of the Lyceum movement, the influence and activities of which have become national in extent, will at once recognize Mr. Fletcher as the man, than whom at the present day no greater American orator exists, and who, classed with William Jennings Bryan, is known throughout the West as an orator of exceptional ability. His power lies in his delivery, his personality, and his distinctively expressed ideas, and he held the entire attention of the audience from start to finish.

Mr. Fletcher's lecture was a logical discussion of matters that are of vital interest to everyone. It was replete with ideas, originally expressed and applied, which, supplemented by a highly epigrammatic style, and colored by frequent figures and illustrations, made his points all clear, striking and convincing.

He began by a discussion of fools in general. Every man who blunders is by no means a fool. "To blunder is to progress," that is, to test a new theory is far from foolish even though it prove to be a failure, for we find out from it what to avoid in practice in the future.

Fools do not exist without a purpose. We learn something from every fool with whom we come in contact, by observing his particular form of folly.

Some people are conceited fools. This does not mean that conceit always makes a man a fool. On the contrary a little conceit is a good thing. It gives a man confidence in his power, the courage of his convictions. From the conceit of ignorance, however, we learn nothing. These types are the one-idea extremists. Like the fanatical despot of ancient history who decided to have his subjects of uniform height and to that end sawed some of them off a peg and stretched others till he sometimes broke them in two, this type of fool, if an idea succeeds in penetrating his gimlet-proof skull, tortures it on his iron bed of bigotry until it is destroyed.

Fools in general are extremists. Their entire mental existence is merely a physical, psychological, metaphysical, intellectual superficiality.

"Do not be the tail-end type of fool," said Mr. Fletcher, "for unless each man thinks himself he will be to the community as the tail is to the dog, wagged at will."

Often the man is seen at the polls who votes the straight ticket, because his father was a Democrat, and his grandfather, too, and so on back until you find the difference between the Declaration of Independence and a marriage license. Apropos of this, in view of the existing opportunities of every man to obtain an education, in view of the fact that present day institutions of all kinds are trying to apply the principles of Jesus Christ to present

day problems, and on account of the vast importance of the political and social problems that are confronting the American public at the present time, the man who votes the "straight" because his father did is thoroughly crooked and has a heart so black that a piece of charcoal would leave no trace upon it, or he has not caught the spirit of the age.

Now, as in ancient days, it is easier to follow than to establish precedent. Students of history all know that less than a minority have used their brains. Men who thought have been martyred. Today we want true manhood to be thoroughly and nationally developed. More are thinking now however than formerly and the tendency to seek intellectual ragtime is decreasing; consequently the world is growing better. Who says it is not is hurling slander at God, charging that His laws of evolution are failures.

In any case of graft, of which there is so much polluting business and political organizations at the present time, publicity spells remedy. Some, however, say it hurts business: but any business that it hurts is either poorly organized, or rotten.

In regard to discussions Mr. Fletcher said, "It isn't necessary or important to agree. It is, however, important that we listen to and express arguments on every subject of present day interest, and remain friends."

You can always pick out a fool, because we always eventually comes to look like what we think most about; and what we always speaks so loud that nothing else can be heard. A college education does not make fools; it only develops them. "I know that from experience—of other people."

Whenever you feed a desire and satisfy it, you become a martyr to a tendency. Similarly a thought may become an act. Illustrating the natural law of cause and effect, when a man "sows his wild oats," somebody, sometime will pay the penalty of a martyr, reaping possible what his ancestors were sowing before he was born.

In reality there are only two things in the universe that are important; principles, and souls. To keep these pure and untainted, avoid the martyrdom of a fool. When any evil tendency makes its appearance, kill it when it is little, or let it alone.

GLEE CLUB CONCERT.

The Glee Club and orchestra is to hold its first concert of the year in Thompson hall next Friday evening. The club has been rehearsing since the beginning of the year in order to put on the stage this season an extensive and elaborate program. The club this year is a very strong one, composed of a large number from last year's club and many new men.

The concert is to be given previous to a tour of some of the largest cities of this state and Massachusetts. Director Dalgish of Dover again has charge of the club.

O. C. Huse '12, the county Y. M. C. A., secretary of Rockingham County has taken his office in Durham and will conduct his business in the Dean's office.

"Tod" Eberle, the basketball and track team coach, attended a meeting of the Swathamore Alumni, held in Philadelphia last week.

DURHAM, N. H., JAN. 15, 1912.

Thomas Brooks Fletcher has made a deep impression on the student life of the college. He will long be remembered, not only as an orator of remarkable ability, but as a man who dares to speak the truth in expressing his convictions. A man of such rare power we seldom have the privilege to hear.

The profound attention of his hearers bore witness to his mastery of oratory. No truth that he presented is wholly original. No truth that he presented is unknown to the thoughtful student of present day problems. Yet every person who heard him speak seemed to grasp each word and eagerly stretch out for the next one. Leading his audience with him through his successive moods of humor and pathos, he always had entire control over them, evoking at will their applause or their sympathy, and always holding their unfaltering interest.

Accurately did he portray some of the social evils and the corruption of the country, exhorting on the part of men the courage to think independently and to talk of the bad things which can be eliminated only through publicity. True it is, as he said, that the man is a martyr who dares to express a new idea, and there is no better place to find illustrations of this point than in college life. The man who dares to "think much," and to express his thoughts, is inevitably rewarded by inappreciation.

Mr. Fletcher did not hesitate to speak his thoughts about the problems which are so offensive to us but which, nevertheless, it is our duty to study. What is remarkable is that he dealt with them in a manner wholly inoffensive. No text did he use, but the sermon that he preached was a sermon of mighty power.

It is with great pleasure and appreciation that we learn that Rev. Webster, rector of the Holderness School, has written and dedicated a hymn to New Hampshire College. The college has few truer and warmer friends than Dr. Webster. It is recalled that he gave a short address on "Brotherhood" in chapel a few weeks ago.

NO BASEBALL COACH AS YET.

The baseball coach for the coming season has not been chosen as yet. The management attempted to secure the services of James Bannon of Rochester, an old big league player, but was unsuccessful, as Mr. Bannon will probably manage a team in the new league which is being formed in Maine.

William H. Barr of South Natick, Mass., has been elected manager of the Freshman base ball team.

NEW INSTRUCTOR IN CHEMISTRY

Mr. Charles Farnum Whittemore, '11, who has been engaged as assistant in Chemistry here at the college since his graduation, has resigned his position at the college to accept a position with the U. S. Government in the bureau of mines at Denver, Col., where he will take up research work on radium. H. Chester Holden, '12 has been engaged as his successor. While in college Mr. Holden, while an honor man, took a leading part in all college activities. He was president of the athletic association, a varsity basketball man for three years, Captain of basketball in his senior year, captain and physical director in the battalion, president of the student council, vice president of the college club, assistant business manager of the 1912 Granite, for three years a member of the Glee club and of the college choir. He is a member of the Casque and Casket, Alpha Chi Sigma, and Kappa Sigma fraternities.

In chapel last Wednesday, there was distributed copies of the bi-weekly bulletin of "Reading Worth While." These reports are prepared by Prof. Richards, of the English Department.

Prof. F. W. Taylor addressed Farmer's Institutes last week at Freedom, Belmont and Warner, N. H., on the subjects of "Soil Fertility" and "Forage Crops."

Prof. David Lumsden visited East Kingston, N. H., on Jan. 4, where he lectured in the town hall on, "The Evolution of Some of Our Fruits."

DE LAVAL CREAM SEPARATORS

There's no good reason why you should wait till spring before getting one

On the contrary you may buy a DE LAVAL NOW and save half its cost by spring. Moreover, if you can't conveniently pay cash you can buy a DE LAVAL machine on such liberal terms that it will actually pay for itself.

As to your NEED of a separator, if you have the milk of even a single cow to cream you are wasting quantity and quality of product every day you go without one. This waste is usually greatest in cold weather and with cows old in lactation, and it counts most, of course, when butter prices are high. Then with a separator there is always the sweet warm skimmilk, and saving of time and labor, in addition.

When it comes to a choice of separators DE LAVAL superiority is now universally recognized. Those who "know" buy the DE LAVAL to begin with. Those who don't "know" replace their other separator with a DE LAVAL later—thousands of users do that every year. If you already have some other machine the sooner you exchange for a DE LAVAL the better.

Why not start 1913 right in dairying? SEE and TRY a DE LAVAL NOW when you have plenty of time to investigate thoroughly. The nearest DE LAVAL agent will be glad to set up a machine for you and give you a free trial of it.

AWARD OF THE FOOTBALL SWEATERS.

After the chapel last Wednesday, heavy blue V neck sweaters with the large white football "N. H." were given to the men who had won their letters during the past season. Prof. Whoriskey presented them. In his short speech of introduction he said that he hoped that in the near future all the men on the football squad would receive sweaters, and not merely the thirteen men who had excelled as is the case at the present.

Each man was loudly applauded as he came forward to receive his reward. The following received them: Captain Jones, Williams, Willard, Brackett, Bissell, Clark, Corriveau, Holton, Peavey, Woodman, Jenness, Murdoch, Haines, and Manager Lane.

AT CHAPEL

Prof. J. H. Foster addressed the student body at the convocation exercises on Wed. Jan. 8. He spoke upon the subject of "Forestry" with special reference to the White Mountains Forest Reservations. He outlined the work that had been done along this line, and showed the value and importance of such enterprises.

ANIMAL HUSBANDRY TRIP.

The Class in Animal Husbandry, went to Dover on Thursday, Jan. 9 for a practicum in live stock judging. The class, accompanied by Prof. O. L. Eepmany left Durham on the 2.20 train and on arriving in Dover, took the trolley to Granite State Park, which is located between Dover and Rochester. Here, they were given the opportunity to examine Cox's Stables, where some of the fastest trotters and pacers in New England are owned.

Besides viewing the speed animals, they were also shown some excellent draft horses, poultry, and pure bred swine.

FAULTY NOTES.

Recently Prof. F. W. Putman, of the Department of Drawing has been aiding Mr. Chisnell of the Bates Shoe Co., in drawing plans for the rearrangement of the machinery in the company's large factory in Massachusetts. Mr. Chisnell is the inventor of the best cost system for shoe manufacturing known in the country. Mr. Putman is preparing a set of drawing plates correlating mechanical drawing and shop work problems for the Prang Co., of New York.

The Progressive Party of New Hampshire has appointed as chairman of the Sub-committee of Education, Prof. F. E. Cardullo, head of the Mechanical Engineering Department.

Today Prof. J. C. Kendall and Mr. C. W. Stone will deliver addresses at the Fourth Annual Meeting of the Sheep Breeders, Association at Walpole, N. H.

Prof. Taylor also had the honor of addressing the Durham Woman's Club on Friday, Jan. 10, upon the subject, "Old Things and New Things of Agriculture."

President E. T. Fairchild, will address the Granite State Dairymen's Association and State Board of Agriculture in Colebrook, Thurs. Jan. 16., Director J. C. Kindall will also speak on the same evening on the subject of "Some Problems of New England Agriculture."

On the following day, Prof. F. W. Taylor will speak on "Corn as an Essential Factor in Dairying" and Prof. Fred Rasmussen will speak on "The Cost of Milk Production," while Director Kendall will speak on "The Federation of New Hampshire Agricultural Organizations."

ODDS AND ENDS.

The Library, which is now open every evening and Sunday afternoons, is being used more by the student body than ever before. Last Sunday afternoon, a large number enjoyed the new privilege.

Albert Hooper of Berwick, Me., has been elected captain of the freshman basketball team.

A new cut system, which the members of the faculty have been considering for the last two months, will probably be instituted next semester.

A number of the fraternities and other college organizations went to Exeter Saturday noon, where they were photographed for the Granite.

B. R. Wells '10, who is employed by the Western Union T. and T. Co., spent the week end in town.

Modern History.

Modern History of the dairy world reveals these facts.

Sanitation is a constant watchword to those who produce the highest quality products.

Correct dairy sanitation cannot be produced by soap compounds, strong caustic or corrosive chemicals, or inefficient cleaning agents.

The height of dairy cleaning perfection is attained only by Wyandotte Dairyman's Cleaner and Cleanser, the one cleaning agent now used by eighty per cent of the Buttermakers, and by thousands of Dairyman, Milk Dealers, Farmers.

makes modern dairy history really and truly modern. In composition and its cleaning results it is as superior to old fashioned cleaning agents as is modern machinery to those types found in ancient history. And like modern machinery it does more work and better cleaning in less time and with less effort than other dairy cleaning materials.

Furthermore, it costs you no more to use Wyandotte Dairyman's Cleaner and Cleanser than what you now use. It is decidedly to your profit to phone or ask your dealer for a sack or to write your supply man for a keg or barrel.

Why not do it today?
