

The New Hampshire

VOL. 2, No. 23.

DURHAM, N. H., MARCH 19, 1913

PRICE 5 CENTS

MUSICALE BY BOSTON OCTETTE

Final Number of Lecture Course.

Last Friday evening Mar. 14th in Thompson Hall a concert was given by the now-famous Boston Octette, including the Schuberts. A large and appreciative audience was in attendance, which filled the hall to its capacity and applauded vigorously each and every successive number of the program.

In view of the great success and popularity which the Schuberts in their appearances here in former years, gained their advent this year was looked forward to by all who take advantage of the lecture course with great expectations. If anything, realization in this case exceeded anticipation. Their success of last year was repeated, so that probably in the future the Schuberts will become a staple number of the course.

The sweet voice of the soprano, Miss Blair, captivated all. Her solo work was wonderful and music-lovers will not soon forget her rendition, in conjunction with the entire octette, of the famous prison scene from Verdi's *Il Trovatore*.

The violinist, Miss Werner, was an artist in every sense of the word. The multitudes strained their ears to catch every minute inflection of her richly expressive violin.

Miss Halliday, 'cellist, can also rightfully lay claim to distinction as an artist in her line. Few could desire more of a musical treat than a 'cello solo by Miss Halliday.

The final touch and polish to the trio of instruments is given by Miss Kinsman on the piano. The keys responded to her silvery touch as though imbued with actual animation. A master pianist in every respect was Miss Kinsman. This augmented by these artists, the Schuberts form a combination hard to equal in the musical world. Though every number on program was encored, the Schuberts in their separate numbers were recalled again and again. Each an artist in himself, the blending of the four voices produces wonderful "concord of sweet sound."

The octette, severally, are masters: collectively, they are a music-producing unit that is little short of marvelous. Each does his assigned part, and the result is such delightful harmony as is everyone's joy, and the music-lover's paradise.

The concert was a fitting finale to a lecture course which has gained well-deserved popularity.

Following is the program:
Scenes, (from "Maritana") Wallace
Boston Octette.
Violin solo, (a) "Berceuse," (b) "Mazurka," Joseph Szull
Miss Werner.
Quartette, "Hark the Trumpet,"
Buck
Schubert Quartette.
Tower Scene, (from "Il Trovatore")
Verdi
Boston Octette.

'Cello Solo, "Souvenir de Spa," Servais
Miss Halliday.
Soprano Solo, "Nymphs and Fauns,"
Bemberg
Miss Blair.
Quartette, "Invitation Waltzes,"
Hoffman
The Schuberts.
Instrumental Trio, "Dumky" Dvorak
Scenes (from "Faust,") Gounod
Boston Octette.

PROGRESS ON INTERSCHOLASTIC MEET.

The second annual interscholastic track and field meet, under the auspices of New Hampshire College, has already begun to show signs of being fully as successful as the one of last year. Last year Manchester, Concord, Dover, Arlington, Salem and Worcester, North High School, Colby, Proctor and Pinkerton Academies, and Sanborn Seminary have already entered teams. It is expected that nearly all of the schools which were represented last spring will send teams this year. Last year Manchester High won the meet with Boston English High and Lynn Classical High tied for second place.

Individual gold, silver, and bronze medals will be given for each event, while a large silver cup will be awarded the winning relay team. A handsome silver trophy will be awarded the team, securing the largest number of points which will be held for one year. The cup will become the permanent property of the team which wins the meet three years in succession.

The hospitality of the college will be rendered the visiting teams, and the day will be given up to the entertainment of the visitors.

DATE OF FOUNDER'S NIGHT CHANGED.

Owing to the fact that the orchestra has been engaged for March 21, Founders' Night will be postponed to March 28. As was previously announced, Pres. E. T. Fairchild will give the address.

PHI KAPPA PHI TO BE INSTALLED AT RHODE ISLAND.

The national scholarship fraternity Phi Kappa Phi has recently granted a charter to Rhode Island State College.

"The prime object of this organization is to emphasize scholarship in the thought of college students, to hold fast to the original purpose for which institutions of learning were founded, and to stimulate mental achievement by the prize of membership."

The Phi Kappa Phi was founded in 1898 at the University of Maine and now has chapters in Penn. State College, Mass. "Aggies," Delaware State College, and others.

Mr. A. G. Davis, '12, has resigned his position as assistant in the state moth department, and has accepted a position as teacher of Agriculture and Science at the Hopkinton High School at Contoocook, N. H. Mr. Davis is taking the place of John Pirvers, '07, who has resigned to accept a position in an agricultural school at North Easton, Mass.

MEETING OF MILK INSPECTORS AND PRODUCERS AT STATE COLLEGE.

"The New Hampshire Sanitary Milk Association" has been officially launched in an important meeting, held at New Hampshire College.

The expressed object of the Association is to promote a campaign of education for the betterment of the milk supply of the state and for increased sales of high grade milk.

The movement toward the formation of the association was begun by the delegates, appointed by the Governor to attend the conference, recently held in New York on the State Control of Milk supply.

The delegates who called the meeting at New Hampshire College were Carl O. Seaman, of Manchester, Stanley H. Abbott, of Woodland and Fred Rasmussen, Professor of Dairying at the State College.

At the invitation of the committee and following advice of Secretary Watson of the state board of health, the milk inspectors of New Hampshire also attended.

After adopting a brief constitution the association elected officers as follows: President, Prof. Rasmussen; Secretary and Treasurer, Carl D. Seaman.

DEATH OF DR. DE LAVAL.

Dr. C. G. P. De Laval, inventor of the cream separator died on Feb. 3, in Stockholm, Sweden, his native city, at the age of sixty-seven.

Few men have conferred more lasting benefits upon mankind than Dr. De Laval. The cream separator and the milk tester, both conceived by him, though further developed by others, have alone saved billions of dollars to the world's dairy interests and largely made possible the wide use of dairy products as we know them today.

CHAPEL EXERCISES.

President E. T. Fairchild addressed the student body in chapel on Wednesday, March 12th. He spoke upon the subject, "The Boy is Father of the Man." In his talk, the president related a story, involving incidents in his own life, in which he showed that characteristics, formed in childhood are intensified and strengthened as we pass on into manhood and womanhood.

PROF. ATWATER GIVES LECTURE.

Prof. C. G. Atwater, manager of the Agricultural Department of the American Coal Products Co., New York city, gave a very interesting and instructive lecture before the Agricultural Club last Monday evening, on "Ammonia of Sulphate, Its Source, Production and use as a Fertilizer." The lecture was illustrated by lantern slides and was held in Conant Hall.

BASKET-BALL CAPTAIN.

At a meeting of the N. H. Basketball team last Friday J. H. Thompson '15, was elected captain for the season of 1914. Thompson has now played for two years on the varsity team, and has always proved a valuable man in piling up the scores. The latter part of the present season since he played at forward, "Thommy" developed into a star, and was easily the first choice for the captaincy.

PRES. FAIRCHILD AND PROF. O'KANE AT BANQUET TO- NIGHT.

This evening, March 19th, President E. T. Fairchild and Prof. W. C. O'Kane will be guests of honor at a banquet under the auspices of the Bellamy Club of Dover, N. H. President Fairchild will deliver an address on "New Hampshire College."

WORK OF STATE MOTH DEP'T.

Prof. W. C. O'Kane was in Boston last Monday, completing arrangements for the distributing of parasites of the gypsy and brown tail moths throughout the southern half of New Hampshire. This work is being carried on in connection with the U. S. Department of Agriculture.

Prof. O'Kane is also mailing out about 6,000 copies of a new circular which he has just issued, throughout the state. It is also probable that six or eight hundred will be sent outside of the state.

The State Moth Department has begun the propagation of a fungous disease, which attacks the brown tail caterpillars. This fungous will be bred on a large, scale in about a month and distributed in various places.

LIFE PROBLEMS LECTURE COURSE.

On Wednesday evening, March 12 Rev. Knight delivered a very helpful lecture on, "Social Amusements and the City." Mr. Knight handled the subject in a most able manner, making each point from sound, logical principles, and presenting them a vivid and forceful manner. As he is a man who has seen a great deal of the world, Mr. Knight was able not only to talk from theory but also from experience.

PROF. C. C. STECK SPEAKS AT C. A. MEETING.

Prof. C. C. Steck gave a most helpful talk to the men of the New Hampshire College Christian Association on last Sunday evening. His subject was taken from the early life of Christ, and he laid special emphasis on the point that one of the greatest factors of Christ's success was the fact that he prepared himself for his work before he began it. He said that this principle should be applied to our own American life, where so many able men fall down before their time on account of too great eagerness to start their careers before they are prepared.

INFORMAL HELD IN GYMNASIUM.

A very pleasant informal, under the auspices of the college social committee was held in the gymnasium last Saturday evening. The college orchestra furnished music for the occasion. As this was the first dance since the Sophomore Hop, a large number were present and took advantage of the opportunity.

On the afternoon and evening of March 14th Pres. E. T. Fairchild attended the "Vermont School Conference," held at the University of Vermont in Burlington.

"Entered as second-class matter September 20, 1911, at the post office at Durham, N. H., under the act of March 3, 1879."

DURHAM, N. H., MAR. 19, 1913.

The closing number of the college lecture course was a pleasing climax to the season's attractive program. The excellence of the far-famed Schuberts and the pleasing concerts which they have always afforded will soon come to be traditional. It is a tribute to their popularity of the past that the chapel should be nearly filled with an enthusiastic audience even when Durham's streets hurl forth their season's defiance. It is a greater tribute that every number in an evening's entertainment should not only evoke round after round of applause, but should be encored, not once, but many times.

The committee of the faculty which arranged this year's program has done its duty well. The course has been well patronized, the students have been well satisfied with the programs presented, and the numbers have been chosen with sagacity. We have laughed with the humorist; our emotions have responded to the master orator; Shakesperian comedy has pleased the lovers of dramatic art; we have been swayed by the subtle charms of Orpheus.

From the course we have derived knowledge, amusement, and inspiration.

SIDEWALKS BEING REPAIRED.

In spite of the fact that "Durham mud" still prevails in the village streets, the walks of the college and upper end of the town have been given their annua coat of ashes, and are now in a very creditable condition. Perhaps the warm winter weather has made it possible to remove the ashes at an earlier date than usual; at any rate, the fact that they have been applied this early is appreciated by those who have to travel over the walks.

Three years' course. College graduates are permitted to take the course for the Bachelor's Degree in two years, provided their college courses include certain legal studies (e. g. Constitutional Law etc.), and if they obtain high standing. Special scholarships for college graduates. Address

Dean HOMER ALBERS, 11 Ashburton Place, Boston, Mass.

A house has been sent by parcel post to Chicago where it was to be one of the exhibits at the Clay Products exposition, Feb. 26 to March 8. The building was made from 25,000 bricks, sent from every brick plant in the United States.

John M. Campbell of Passaic, N. J., forwarded the first brick to be used in its construction.

Sending the 25,000 bricks through the mails is done to test the parcel post system. A record was kept of each brick from the time it was mailed until it reached Chicago.

Kaiser Fund For Religion.

Berlin.—A national subscription to be raised in Germany in connection with the celebration of the twenty-fifth anniversary of Emperor William's accession to the throne is to be devoted to missionary work in the German colonies and is to be distributed among all the Christian denominations.

The collect on delivery system is to be added to the parcel post on July 1. In England this provision is a great convenience to city people who order their garden truck from some farmer by telephone and it is delivered by next mail C. O. D.

Feed Your Crops Available Potash

Insoluble plant foods are cheap in the beginning but may be dear in the end. We feel good when we hear that the soil contains enough Potash to raise 5000 crops, but we feel tired when we discover that it will take 1000 years or so to make it available. We will be converted into plant food ourselves long before that.

POTASH

The acids derived from green manure may make insoluble phosphate of lime more available. But the feldspathic Potash in the soil is less soluble in these acids than in the slightly alkaline waters of the best soils. A little soil Potash becomes available yearly, but not enough to provide for profitable crops. Crops have two periods of Potash hunger. One just after germination and the other when starch formation is most rapid—when the grain is filling. Rational fertilization requires ample available Potash at these periods and if you provide it you will find that Potash Pays. Send for our pamphlet on making fertilizers.

DE LAVAL CREAM SEPARATORS

Merit Confidence

CONFIDENCE is one of the most important and satisfactory considerations in every act and interest in life.

There is nothing the dairy farmer buys that is of as great importance to him as the cream separator, which SAVES or LOSES money in quantity and quality of product every time he puts milk through it, TWICE A DAY 365 DAYS IN THE YEAR and lasts from six months to twenty years according to the durability of the machine.

Hence the importance of only making so serious an investment with COMPLETE CONFIDENCE that you are buying THE BEST and that which will LAST LONGEST.

Every man knows what a cream separator is knows that this is true of the DE LAVAL, the original and for thirty years the "WORLD'S STANDARD" cream separator.

Somebody may CLAIM as much for some other separator, but no buyer can possibly have equal CONFIDENCE in its being so.

The new 72 page De Laval Dairy Hand Book, in which important dairy questions are ably discussed by the best authorities, is a book that every cow owner should have. Mailed free upon request if you mention this paper. New 1913 De Laval catalog also mailed upon request Write to nearest office.

Prominent Alumni.

WILTON EVERETT BRITTON '93.

Wilton Everett Britton was born at Marlboro, Mass., Sept. 18, 1868. He is the son of Benjamin Howard and Emma Eliza (Wright) Britton. In 1869 they moved to Gilsum, N. H., where he was brought up on a farm and where he knew how to do all kinds of hard work that goes with farm life. He attended the schools of the town. By studying at home he managed to pass entrance examinations and entered New Hampshire College in the autumn of 1889. He had free tuition, scholarship, and worked as janitor, waited on tables in boarding house, and as assistant in Dartmouth Library to earn money to help pay expenses. During vacations he worked on the farm or at carpentering. During the summer of 1891 he was assistant to Prof. C. M. Weed, then just beginning his work at New Hampshire College. He collected bird and insects and mounted them. He was awarded half of second prize in prize speaking contest in 1890 and was given the Bailey Chemical prize on graduation in 1893. He was editor in chief of the first issue of the first college paper called the "Enaichsec," a predecessor of the "New Hampshire." The class of 1893 was the first to hold graduating exercises at Durham, although the four years were all passed at Hanover. With three classmates he went to Cornell in fall of 1893 and studied horticulture and botany.

May 1, 1894, he was appointed assistant in charge of pot experiments in plant nutrition, Agricultural Experiment Station, New Haven, Connecticut and was appointed Horticulturist Nov. 1, 1894.

He did more or less entomological work as necessary until a law passed in 1901, provided for the position of State Entomologist, and he was appointed July 1, 1901. He was also made entomologist of the station. In 1899 he began taking graduate work in Yale University and received the degree of Ph. D. in 1903. From 1901 to 1906 he was lecturer in entomology in the Yale Forest School.

Mr. Britton has been Associate Editor Journal Economic Entomology since Jan. 1, 1910. He has published a series of eleven annual reports as State Entomologist and more than fifteen Experiment Station Bulletins on insects, besides many separate articles on botanical, horticultural and entomological subjects.

Mr. Britton has done considerable local civic improvement work.

Mr. Britton is a member of American Association Economic Entomologists, (Pres. in 1909).

Entomological Society of America. American Association for the Advancement of Science (Fellow).

Washington Entomological Society (Corresponding member.)
