PRICE 5 CENTS

"PYGMALION AND GALATEA"

Drama to be Given Saturday Evening.

The Greek play, "Pygmalion and Galatea," is to be presented in Thompson Hall next Saturday evening at eight o'clock. This play will be under the auspices of the Tri Alpha Sorority, and the proceeds will be given to the "College Song Book Fund." The cast of characters will include some of the best actors and actresses in college. Considerable time and labor has been devoted to the play, and in justice to the cause, every student should make a special effort to be present. Prof. A. E. Richards has labored hard in coaching the characters, and the results Saturday evening will no doubt justify his efforts. The college orchestra will furnish music that evening before the play and between the acts. The trio, consisting of 1st and 2nd violins and viola by Wiegel, Blake and Bugbee, will furnish the music called for in the play. The following is the cast of characters:

Pygmalion,	P. A. Foster
	Sculptor.
Chrysos,	R. I. McCartney
	Patron of the Arts.
Lucippe,	A. L. Murdoch
	Soldier.
Mimos	D. P. Crockett
	Pygmalion's Slave.
Agesimos,	R. A. Knight
	Chrysos' Slave.
Cynisea,	Miss H. W. Plumer
	Pygmalion's Wife.
Daphne	Miss H. E. Locke
	Chrysos' Wife.
Myrine	Miss W. Hodgdon
	Pygmalion's Sister.
Galatea,	Miss M. E. Gillespie
	Statue.
Assistants (Prof. A. E. Richards, Prof. W. J. Fisher.)	

REVIEW OF SEASON SUMMARY OF BASKETBALL GAMES.

New Hampshire's basketball games closed about two weeks ago, and now the present interest is in track and baseball. Before the season is forgotten, however, it might be best to review the results of the season.

The team won five and lost five games, the victories being over Rhode Island, Dean Academy, Springfield Training School, Cushing Academy, and M. I. T. '14. Defeats were received from Springfield Training School, Rhode Island, Williams, Wesleyan and Dean Academy.

The scores were as follows:

N. H. 55	M. I. T. '14 23
N. N. 44	Dean 25
N. H. 23	R. I. 24
N. H. 19	S. T. S 51
N. H. 22	Wesleyan 55
N. H. 19	Williams 41
N. H. 40	R. I. 28
N. H. 47	Cushing 13
N. H. 34	S. T. S 27
N. H. 18	Dean 18

New Hampshire scored a total of 321 points to the opponents 305. Dean

Academy was trimmed on its own floor and then nicely returned the compliment to New Hampshire in the last game of the season. Springfield and Rhode Island also won on their floors, but New Hampshire, in the two best games of the year, landed victories when those fives were played here. Williams and Wesleyan won from the team on their own floors.

At a meeting of the executive committee of the athletic association, the following were awarded their letters:

Captain P. C. Jones, H. W. Sanborn, R. E. Came, J. F. Thompson. A. W. Jenness, D. W. Bissell and H. H. Lindquist. The season started with Jones and Bissell as forwards, Sanborn, center and Thompson and Came guards. This combination played the first six games. Towards the last of the season, Coach Eberle made a change, which improved the team play. He shifted Thompson to forward in place of Bissell, and placed Jenness in guard. This combination only met with one defeat.

Captain Jones, Came, Thompson and Sanborn were the old men left from last year. Bissell, Jenness and Lindquist were the new men to make their letters. Captain Jones played a brilliant and consistent game during the season. He led the team in the total number of baskets from the floor, shooting 42. Thompson was a close second with 38. The latter's playing was perhaps the best of the many of those on the team. In three games at forward he caged 25 baskets. Sanborn, was third with 33, and Bissell, fourth with 18. The others were as follows: Lindquist 8, Came 9. Sanborn shot 25 out of 52 chances from fouls.

About a week ago, the team chose Thompson as its leader for next season. He should make a good captain. Jones, Jenness and Sanborn will graduate in June, leaving Captain Thompson for next season, Came, Bissell and Lindquist. Sanborn's absence at center will be felt, as he has played in that position four years. Jenness's position at guard will also leave a big hole in the team. Coach Eberle discovered him late in the season and he proved to be a very valuable addition. It is needless to remark the college will miss keenly the services of Captain Jones.

The class game brought out the fact that there is some promising material in the freshman class. With the men left for next year, and other material which will be on hand, there is no reason to expect that next season's five will not be as fast as that of the present season.

RHODE ISLAND ABOLISHED BASKET BALL.

The season, just closed, marks the end of basket ball at Rhode Island State College. This statement was officially announced last week. The reason given was the fact that so many of the New England institutions are abolishing the sport it was necessary to take long trips in order to secure games. This incurred a large expense, in addition to paying large guarantees in obtaining home games. This being the case, the sport proved a losing proposition from a financial point of view, and in view of the fact, the institution has decided to drop the sport.

While it has not been announced, it is probable that hockey or indoor track will take its place.

PRESIDENT FAIRCHILD.

Guest of Honor at Meeting in Dover, Interesting Address on State Colleges.

An interesting discussion and analysis of the tremendous possibilities of modern State Colleges was set forth by Dr. E. T. Fairchild, President of New Hampshire State College, at a big meeting at the Bellamy Club, in Dover.

The meeting was held in the assembly hall of the Bellamy Club's rooms and was attended by a large number of representative business and professional men of Dover and by some visitors from out of town.

The address of Dr. Fairchild, while informal and man-to-man in its nature, brought out facts of general interest to all citizens of the Granite State. Tracing the growth of the New Hampshire State institution from its thirty students and seven professors of twenty years ago, to the three hundred and fifty-four students and forty-two teachers of today, the speaker showed how this growth is a part of a recent and important movement in the so-called higher education.

New Hampshire State College, like the similar institutions in other states, has it in its power to be of remarkable service to the rank and file of the people in the state. The training that young men can get at this college is not only of such a nature as to fit them for a wider and higher outlook on life, but is adapted to lead them toward success in their life work. The state colleges have but recently begun to grow to the stature of their opportunities. It is their privilege to directly serve the young people who must go from them into the business of winning their own bread and butter.

President Fairchild showed what such service may mean to the people of a state and what New Hampshire College is now coming to mean to the people of New Hampshire. It is growing phenomenally like its sisters in other states, because of the almost measureless field that lies before it, a field as big as the immense opportunities themselves that open up each year for the graduates of the state colleges.

DELEGATION VISITS COLLEGE

On last Friday, March 21, a delegation from the legislature paid a visit to the college. The delegation consisted of sixteen persons, some of them being members of the House of Representatives and some being from the Senate. Among the delegation was Dr. Britton, Speaker of the House of Representatives. On arriving at the station at 9.23, they were met by Representative DeMerit, President Fairchild and other members of the faculty. They were escorted through the various buildings, where classes were being held and given an opportunity to get into closer touch with the work of the institution and become acquainted with its pressing needs.

At the Chapel exercises on Wednesday, March 19th, Prof. E. R. Groves gave a short but extremely interesting talk upon the subject, "What Makes Social Life Distinctive?" He stated that the twentieth century was certain to see the greatest advancement in social life and science of any in the world's history so far, and cited reasons why this would be true.

COMMUNICATION FROM PRES. FAIRCHILD CONCERNING "CUTS."

In the enforcement of the new rules governing student absences it is essential that uniformity prevail among instructors.

To the end of securing both clearness and fairness, the following interpretation of the rules is deemed necessary:

1. A student is responsible for all the work of a course.
2. An absence or "cut" means solely an absence from a meeting of the class, and is a matter entirely distinct from the work represented by that period.
3. The rules allow a definite member unquestioned "cuts" in the belief that, in the average, a student may safely miss attendance on a certain percentage of classes. The allowed "cuts" are not given as a favor. When they are exhausted it is assumed that the student may miss other meetings of a class only at the peril of seriously lowering his record. The safe, or allowed number of cuts may be exhausted through sickness, through late registration, or voluntarily; the circumstances do not alter the fundamental basis of the allowance. When once the allowed cuts are used they are definitely and finally exhausted.
4. There are necessarily two grades of makeups.

In the case of allowed "cuts" the student may voluntarily make up such work as is represented by the preparation for the period in question; or in the case of laboratory periods he may do equivalent record of daily grades. If he does not do so, his daily record must for remain without grade for the periods in question. He is responsible for the work, and liable for it in the final. In the case of laboratory work his total record will be short by whatever he has missed, although such shortage may not be sufficient to seriously lower his grade.

In the case of all further counts the makeup is assumed to represent both the work of preparation for a period and the additional work, knowledge or inspiration represented by the meeting of the class. The assignment of a makeup by the instructor should be carefully arranged in accordance with the basis. There is no just idea of penalty to the student. He may rightly be asked to do what other members of the class did in preparation, and such further work as will most closely equal what his actual attendance would have meant to him; no more and no less.

5. The makeup of a cut, allowed or otherwise, cannot cancel the absence on the records, although it may give the student a satisfactory grade for the period in question.

6. Tardiness. It is expected that the number of cases of tardiness shall be kept as nearly as possible at a minimum. In securing this desired result, however, it should be recognized that tardiness is not infrequently a necessity. A personal and friendly interview on the subject will often secure the best results. President.

Prof. Bliss Perry, of the English Department of Harvard University, has been engaged to deliver the address to the senior class on Commencement day next June. Dr. Lemuel H. Murlin, President of Boston University, has also been secured to deliver the baccalaureate sermon to the student-body on the Sunday preceeding commencement.

DURHAM, N. H., MAR. 26, 1913.

Next Friday night the College will observe Founder's Day by holding a mass meeting of students, alumni, and faculty. The celebration of a year ago is vivid in the minds of those who attended the exercises, but the program arranged for Friday night totally eclipses the one formerly held, both in the customary student contributions to it and in the new features. The best part of the evening's enjoyment will undoubtedly be in listening to the address of the evening by President Fairchild, who has never failed to gratify our highest expectations but this feature cannot add more to a man's college spirit than can a free expression of the loyalty he has for his alma mater. Every student should not only deepen his loyalty for our college by attending the exercises of Founder's Day, but should, by loosing his repressed enthusiasm, contribute to our collective college spirit.

MR. E. H. WEBSTER VISITS COLLEGE.

Mr. E. H. Webster, one of the most distinguished dairy men in the United States, visited New Hampshire College on March 20th and 21st. Mr. Webster is at present an associate editor of the "Hoarde's Dairymen" of Fort Atkinson, Wis. For several years, he was engaged in dairy interests in the state of Kansas, where he became well acquainted with Pres. Fairchild, with whom he had several dealings in various business affairs. During his visit, Mr. Webster gave a talk in one of the classes in Dairying on "The Opportunities of the Dairy Industry."

LIFE PROBLEMS LECTURE COURSE.

"The Family and the Church" was the subject of the sixth number on the "Life Problems Lecture Course" which was held last Wednesday evening in Conant Hall. The speaker was Rev. F. T. Knight and the well known, able and pleasing manner in which he treats whatever subject he undertakes brought out the largest audience so far this season.

His fundamental object was to prove that the family and not the individual was the unit of society, and to point out the relationship that should exist between the family and the church. In so doing, he showed how the former had come down from the very beginning as the unit of society, and how sacred it was considered by Christ himself. Likewise he showed that the church today was not a mere place for worship as was the idea formerly, but rather an institution whose function it was to "educate and spiritualize the family, thereby making the community in which it is situated, stronger, purer and nobler." The closing thought that he left in the minds of those present was the duty that they, as individuals, had in connection with the family and the church.

Feed Your Crops Available Potash

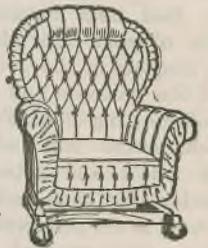

Insoluble plant foods are cheap in the beginning but may be dear in the end. We feel good when we hear that the soil contains enough Potash to raise 5000 crops, but we feel tired when we discover that it will take 1000 years or so to make it available. We will be converted into plant food ourselves long before that.

POTASH The acids derived from green manure may make insoluble phosphate of lime more available. But the feldspathic Potash in the soil is less soluble in these acids than in the slightly alkaline waters of the best soils. A little soil Potash becomes available yearly, but not enough to provide for profitable crops. Crops have two periods of Potash hunger. One just after germination and the other when starch formation is most rapid—when the grain is filling. Rational fertilization requires ample available Potash at these periods and if you provide it you will find that Potash Pays. Send for our pamphlet on making fertilizers.

DE LAVAL CREAM SEPARATORS

Merit Confidence

CONFIDENCE is one of the most important and satisfactory considerations in every act and interest in life.

There is nothing the dairy farmer buys that is of as great importance to him as the cream separator, which SAVES or LOSES money in quantity and quality of product every time he puts milk through it, TWICE A DAY 365 DAYS IN THE YEAR and lasts from six months to twenty years according to the durability of the machine.

Hence the importance of only making so serious an investment with COMPLETE CONFIDENCE that you are buying THE BEST and that which will LAST LONGEST.

Every man knows what a cream separator is knows that this is true of the DE LAVAL, the original and for thirty years the "WORLD'S STANDARD" cream separator.

Somebody may CLAIM as much for some other separator, but no buyer can possibly have equal CONFIDENCE in its being so.

The new 72 page De Laval Dairy Hand Book, in which important dairy questions are ably discussed by the best authorities, is a book that every cow owner should have. Mailed free upon request if you mention this paper. New 1913 De Laval catalog also mailed upon request Write to nearest office.

VICTOR HUGO STICKNEY, '81

Many inquiries have been made by the older graduates of New Hampshire College concerning the welfare of Stickney '81. His athletic form, keen mind and wonderful self-possession betokened a brilliant future. He chose the wild and woolly West for his field of action and therefore reports of his doings have seldom come to hand. Recently, however, we have received information which enables us to prepare a short sketch.

Victor Hugo Stickney came to New Hampshire College from Tyson, Vermont, where he was born in 1856. He graduated with honor, being one of the commencement speakers. During his senior year he was also a student at Dartmouth Medical College and was thus able to complete his medical education. In 1883 he received the degree of M. D. from Dartmouth College. He located in Dickinson, North Dakota, in September of 1883 and there began the practice of medicine. Unlike his brother, Ex-Gov. Stickney of Vermont, he has never sought political honor or had political honor thrust upon him. He was, however, interested in all that pertained to the welfare of Dickinson, becoming a director of the bank there, and was otherwise interested in the industrial, commercial and social development of North Dakota. He has, however, at all times been a medical man. He soon acquired a lucrative practice which as he says "has always enabled him to have the price of a shave in his jeans."

One who knows him best has unqualifiedly pronounced his life a success. In 1886 he was made Line Surgeon for the Yellowstone Division of the Northern Pacific Railway, a position which he still holds. He is an honored and respected member of the medical profession in his own state and has represented its medical society in the American Medical Association for the past ten years and is still representing them. During the past year he has been doing some work for the American Medical Association along the lines of public education as a speaker before public gatherings. He has been complimented and encouraged in this field of work by the trustees and has been asked to continue in it. This, it is quite probable, he will do.

He says that he has always cultivated cheerfulness and even now, at the age of 57 years, "still likes to play with the boys."

It is reported that in addition to his large practice as physician and surgeon, he was for years heavily interested in cattle raising and in that laid the foundation for a successful future.

Probably no graduate of the College has gained a higher standard as a physician and surgeon than Dr. Stickney. Although largely out of touch with New Hampshire College, he still has a keen interest in its graduates, especially those who have received their degrees at Hanover. He writes "Kindly remember me to any of the old school fellows or friends of the old days that you may meet." He will undoubtedly give a cordial welcome to any graduate of the Institution who would find it convenient to call upon him at Dickinson.

In October 1885 he married Margaret Hayes of Plymouth, Vermont. They have two daughters.

FOUNDERS' NIGHT.

The second annual Founders' Night will be observed in Thompson Hall next Friday evening at eight o'clock. Those who attended last year will remember the enthusiasm aroused and the new interest created on that evening. Last year the Hon. H. L. Boutwell, '82, delivered the address of the evening on, "The Significance of the Land Grant College." His remarks were most fitting for such an occasion. This year it is hoped that the event will be even a greater success. President E. T. Fairchild will deliver the address. The college orchestra will furnish music during the evening, and it will afford a grand opportunity for every student in college to get into closer touch with the institution and obtain a deeper meaning of its traditions.

PROF. ECKMAN GIVES LECTURES.

On March 18, Prof. O. L. Eckman gave an address to the White Mountains Holstein Breeder's Association at Littleton, N. H. This organization has just recently been started and is a very flourishing association. On the evening of the same day, Prof. Eckman spoke to the Bethlehem Grange, giving an illustrated lecture on "Judging the Dairy Cow" to a large and appreciative audience.
