This Prefatory Matter is brought to you for free and open access by the University of New Hampshire – School of Law at University of New Hampshire Scholars' Repository. It has been accepted for inclusion in RISK: Health, Safety & Environment (1990-2002) by an authorized editor of University of New Hampshire Scholars' Repository. For more information, please contact ellen.phillips@law.unh.edu.

RISK

Health, Safety & Environment

Volume 7

1996

Number 4

Comments

Andrew F. Fritzsche, *The Moral Dilemma in the Social Management of Risks*

Dr. Fritzsche offers data seen as demonstrating that irrational fears can lead to grotesque imbalances in social efforts devoted to preventing fatalities.

291

Ralph M. Perhac, Jr., *Does Risk Aversion Make a Case for Conservatism?*

Dr. Perhac argues that risk aversion, alone, and assuming it is justifiable, does not support the preferability of overstating, as opposed to understating, mean risk.

297

Articles

Shaul Feller & Michael Maharik, *Risk Criteria for Approving or Rejecting Field Tests of High-Performance Weapons*

Because details are classified and participation by affected populations is limited, military test ranges impose difficult challenges on those responsible for their safety. Here, the authors catalog some of those challenges and suggest ways to address them.

305

Adam M. Finkel, *Comparing Risks Thoughtfully*

Dr. Finkel argues that comparing risks is neither impossible nor immoral — but is nonetheless very difficult. He then discusses two major pitfalls of making such comparisons, one commonly cited and one routinely ignored, before sketching a framework for improving them.

325

Paul B. Thompson & Wesley Dean, *Competing Conceptions of Risk*

Recent literature is said to reflect growing acknowledgment of multiple conceptions of risk but often to obscure an important distinction. Building on work of Kristin Shrader-Frechette, the authors explore the potential for debate over competing philosophical conceptions of risk.
