FOOTBALL

SCHEDULE.

Four Games at Home Arranged.

Manager John E. Davis has completed the schedule of next year's football team, with the exception of September 27, at which time a practice game will undoubtedly be arranged for with one of the warship teams.

No change over last fall's schedule is noted, except that the game with Norwich has been dropped. With the exception of one, all the games are home ones. This is done so that the members of the athletic association may get their money's worth.

The schedule is as follows:

- Sept. 27 Open.
- Oct. 4 Tufts at Medford.
- Oct. 11 Bates at Durham.
- Oct. 18 Worcester Poly Tech at Durham.
- Oct. 25 Boston College at Durham.
- Nov. 1 Rhode Island at Durham.
- Nov. 8 Mass. Aggies at Manchester.

BASEBALL PRACTICE.

The inclement weather of the past week has kept the baseball team from getting in as much practice as they had counted on. Coach "Jimmie" Bannon was down Tuesday and looked over the material. The squad has been split into a first and second team and short games are played every afternoon. The men are improving rapidly and will be in fine shape for the first game. It is still too early to predict a possible line-up as the coach has not had time to look the various men over.

TRACK.

During the past week the cinder track has been scraped and graded preparatory to covering with a coat of cinders. The track has been resurveyed and altered to make it just a quarter mile track. Hitherto it has been a few yards too long. A much needed board track support has been put in.

The track candidates have been taking a rest since the inter-company meet, but will be out on the cinder track as soon as repairs are finished.

BASEBALL.

Saturday afternoon the Kappa Sigma team defeated the Crecents by a score of 15 to 2. The game was very one sided as the score indicates and was called off at the end of the fifth inning. The batteries for Kappa Sigma were Yates and Gale; for the Crescents, Graham and Bugbee. Umpires: On bases Brackett, on balls, Hobbs.

NEW TENNIS COURT.

The Landscape Gardening Department of the College are now building a tennis court directly back of Smith Hall. This court is to be for the exclusive use of the young women of the college.

THE LIFE PROBLEMS LECTURE COURSE.

Last Friday evening, April 4th, Prof. E. R. Groves delivered a talk before an audience of college men that filled the lecture room to the limit. His subject, "Sex and Life. Sex and Manhood," was treated from a psychological point of view; a point of view, although of extreme importance, is very often overlooked and neglected. While prof. Groves treated impressively the relation of this problem to health and religion, the greater share of the lecture was devoted in showing that sex instinct was the very root of many human emotions such as love, affection, cruelty and others. Thus was this instinct presented in a manner that clearly emphasized its own importance.

The last part of the lecture was taken up in answering practical questions. At the beginning it was stated that the aim of the talk was three fold; to deal with normal cases, to speak from a popular and not a scientific standpoint, and to be helpful. These three conditions were admirably fulfilled, especially the last one.

The next lecture of the course will be held next Wednesday evening, April 9th. At this time Dr. F. A. Davis of Boston will speak on the subject, "Sex and Religion. The Relation of the Physical and Spiritual Natures." The popularity and value of these lectures has rapidly spread throughout the student body and a large attendance is assured.

PROF. GROVES TO ATTEND CONFERENCE.

Prof. E. R. Groves is to speak at a "Rural Life Conference," to be held in Pullman, Wash., under the auspices of the Washington State College on June 18, 19 and 20. The conference will be primarily a Northwest affair, and will be attended by people from Washington, Oregon, and Idaho. Other speakers besides Prof. Groves will include Mayor Hindley of Spokane, Governor Lister of Washington, Governor West of Oregon, and Governor Haines of Idaho. Farmers and representatives of farmers' organizations throughout the Northwestern part of the United States will be present, the purpose of the conference being to improve the rural conditions of that section of the country.

In addition to speaking at the Rural Life Convention, Prof. Groves will teach a course in Rural Sociology at the summer session of the Washington State College. This course will be open only to teachers and ministers, and will consist of an advanced course, pertaining to the sociological side of rural problems. The course will extend through the latter part of June and first of July.

NEW MEN TAKEN ON BOARD.

At a meeting of "The New Hampshire" board on April 2, the resignation of H. C. Hill, '14 who has left the college, was received and accepted. At the same meeting, P. S. Ward, '16, was elected sporting editor to fill the vacancy, caused by the resignation of T. J. Twomey, and G. C. Bishop 2 yr., '14, was elected as an associate member of the board.

INTER-COMPANY

MEET.

Company B Winner of Contest.

The annual inter-company indoor track meet was held in the gymnasium last Wednesday evening. Company B won the meet with a total of 34½ points; Company C took second place with 29; Company A third with 15; and Company D fourth with 11½.

The individual gold medal, given to the man scoring the highest number of points, was won by Clark '15 with a total of 28 points. Smart '14 and Paulson '15 were tied for second place, each having 16 points. Smart won the toss-up and was awarded the silver medal, while Paulson was given the bronze medal. Clark scored his points by finishing first in the 1000 yard run and the mile. He also was a member of Company B's relay and calisthenic teams.

Before the events were run off the band gave short but well rendered concert under the direction of A. F. Nevers. The events were interspersed with selections by the band.

The meet was a decided success in every respect and the officials are to be congratulated for the excellent manner in which the events were run off. Practically the entire student body turned out and the winners of each event were lustily cheered.

Several indoor records were broken including the pole vault, mile run, 1000 yard run, high jump and the shot put. In the pole vault Hurd '16 succeeded in clearing 9 feet, 6 inches which betters last years mark by two inches. Clark '15 lowered the record of the mile run by 7 and 2-5 econds, his time being 5 minutes, 11 and 1-5 seconds. He also did the 1000 yard run in 2.35 and 2-5 which is 18 and 1-5 seconds faster than last year. Blodgett 2 year '13 and Steele '16 cleared the bar at 5 feet, three inches in the high jump, last year's record being 5 feet 3-4 inches. Bugbee '16 heaved the shot for a distance of 41 feet, 6 and 3-4 inches lowering last years mark which was 39 feet.

In the six lap relay race Companies B and D ran for first place while Companies A and C ran for second place. Company B had any easy time winning from Company D but the race between A and C was very close with Company A finally nosing out a winner.

The following is the result of the events:

Semi-final-25 yard dash, first heat: Won by Woodman, Co. D; second Hooper Co. C; Time 3 and 2-5 seconds.

Second heat: Won by Sellers, Co. A; Second, Reed, Co. C; Time 3 and 4-5 seconds.

Calisthics: Won by Co. C; second, Co. B; third, Co. A.

25 yard dash, final: Won by Sellers, Co. A; second Hooper, Co. C; third, Woodman, Co. D. Time: 3 and 3-5 seconds.

Apparatus Work: Won by Paulson, band; second, Hobbs, Co. B; third, Hooper, Co. C; fourth, Campbell, Co. C.

Shot Put: Won by Bugbee, Co. B;

second, Woodman, Co. D; third, Thompson, Co. C. Distance: 41 ft. 6 3-4 in.

Running High Jump: First, Steele, Co. A and Plodgett, Co. D third, Pettee, Co. B. Height: 5 ft. 3 in.

Pole Vault: Won by Hurd Co. C; second, Welsh, Co. C; third, Smart, Co. B and Huse Co. D. Height: 9 ft., 6 in.

1000 yd. run: Won by Clark, Co. B; second, Watson, Co. C; third, Tufts, Co. C. Time: 2.35 2-5.

600 yd run: Won by Smart, Co. B; second, Heath, Co. A.; third, Watson, Co. C. Time: 1.36 2-5.

Mile Run: Won by Clark, Co. B; second, Paulson, band; third, Roberts, Co. C; fourth, Ward, band, fifth, Arthur, Co. A. Time: 5.11 1-5 6 lap relay: Won by Co. A; second, Co. D; third, Co. A. Time: 4.58 2-5.

The officials were as follows:—Judges—Geo. S. Connors, John Carney, G. M. Webster; Starter, Tod Eberle; Timers, H. C. Holden and P. C. Jones; Measurers, R. Beach, N. D. Paine, W. Krook and A. W. Jenness; Scorer, S. Sanborn; Announcer, T. J. Twomey.

AGRICULTURAL DEPT. CONDUCTING EXPERIMENTS.

The agricultural department of the college is now engaged in numerous experiments. One of them is being conducted by Horticultural dep. in the Woodman Orchard, where an experiment in fruit bud formation is being carried on. George W. Berry, '12 has been engaged to assist in the work of the department.

Prof. F. W. Taylor, of the Agronomy Department, is carrying out an experiment in, "Water as a Limiting Factor in the Production of Corn in Humid Climates."

Dr. O. R. Butler is also performing an experiment in the Botany Department on, "Physiological Studies of the Apple." This experiment was started by Prof. Brooks several years ago, and is now being completed by Dr. Butler.

Director J. C. Kendall recently gave an address before the East Kingston Grange on "New Hampshire Agriculture."

Prof. F. W. Taylor addressed an audience in Derry Village, N. H., on the subject of "Better Crops."

Prof. W. H. Wolff was recently called to his home in Bermuda by a telegram, saying that his father was dangerously ill. Before reaching home, however, his father died. Prof. Wolff remained at home three days, attending his father's estate and settling up his affairs.

"AGGIE" DANCE.

An informal dance, under the auspices of the Agricultural Club and the College Social Committee, was held in the gymnasium last Saturday evening, April 5. The college orchestra rendered their customary high class music. A very good number of people were present and a general good time enjoyed. The proceeds of the evening will be used towards defraying the expenses of judging teams.

R. E. Skinner, '12, is now employed by New Hampshire College, collecting fertilizer samples throughout the state.

C. W. Kemp, '11, and A. Y. Woods, '12, were recent visitors at the college.

DURHAM, N. H., APRIL 9, 1913.

It is not strange that college students, supposedly sophisticated and of broad mentality, should not appreciate or even understand the whimsical newspaper accounts of a college function? In such a situation of intellectual barrenness among those who persist in misunderstanding the motives of those who grace the press with their productions, heroic efforts should be made to irrigate, for it is a shame not to utilize the immeasurable potential fertility of the genius who misdirects his superior intelligence. College publications represent an attempt to cross the border of trite and conventional expressions into the realm of conservative originality. These same publications are indeed the marks of the progressive nature of the student body. Marred by the grammatical and rhetorical mistakes of hasty composition and uncorrected typographical errors, the column of a college paper nevertheless accompany with considerable regularity and persistency the advancement of the students in intellect and aggressiveness. The discouraging feature of the disparaging criticisms of the columns of "The New Hampshire" is not the censure itself but the fact that inappreciation is by those who are unquestionably endowed with an abundance of brains.

Why should a news item be condemned because one word is misspelled? Why does the man who uses an occasional expression which has not been subjected to the wear and tear of the ages, have to undergo the adversity of those whom he has depicted with considerable leniency? It is because our viewpoint is as stationary as Gibraltar. We see not ourselves as other see us, nor do we think twice before we speak. Let him who thinks he is suffering from

the sarcasm of the press practice introspection for one short moment and he will immediately realize that what to him is intense ridicule is but the gentlest of descriptions, the highest of compliments, and not the scathing composition from the mild pen of one who pictures literally the thoughts that clamor for expression.

BASEBALL CLUBS START.

The recent warm weather has induced several of the fraternities and boarding clubs to organize their baseball teams. During the past week, the Zeta Epsilon Zeta Fraternity played the Crescents, the Zetas winning 13 to 12. A little later in the week the Crescents "crossed bats" with the Beta Phi Fraternity, the Betas winning 10 to 5. It is expected that other clubs will organize their teams shortly, and that a series of games will be played among the several fraternities and boarding clubs.

PRIZE CONTEST.

Preparatory Schools From All Points In The State Will Compete In Prize Reading Contest.

The English Department of New Hampshire College announces the date of the second annual prize reading contest to be May 9th. The regulations of the contest will be practically similar to those of last year except that representatives from preparatory schools in New Hampshire only will be admitted. The entries will be entertained by the college under-graduates, and will have a good opportunity to see the institution and its activities, as the contest will occur on the eve of the interscholastic track meet. The contest of last year was most successful and a large number of entries from all parts of the state are expected.

Preliminary trials will be held at three o'clock in the afternoon, Prof. A. E. Richards, of the English Department, acting as judge. The finals will take place at eight o'clock in the evening. The English department will appoint three judges who will award the three prizes of fifteen dollars, ten dollars and five dollars.

There is a difference between fruit growing and forestry yet most of the directions for fruit growing are directions for producing rapid wood growth only. This means coming into bearing late and irregular bearing on account of lack of enough available mineral plant food to raise a crop of fruit and to set strong fruit buds in the same season.

POTASH

Two years before the trees are expected to come into bearing the annual application of minerals should begin, using 50 to 100 pounds Murrate of Potash and 100 to 200 pounds of bone, acid phosphate or basic slag per acre. Potash improves the flavor, shipping quality and keeping power as well as the yield of fruits. Write us for Potash prices and for free books with formulas and directions.

DE LAVAL CREAM SEPARATORS

TIME TESTED

If a member of your family were dangerously ill you wouldn't think of calling in an inexperienced doctor?

Certainly not! You would call a physician, who had built up a reputation, a man with experience and a successful practice.

Why not use the same care and common sense in your selection of a cream separator?

Every little while you hear of some new cream separator, claiming to be a "world beater," and just as good as the De Laval but a little cheaper.

These "mushroom" machines stay in the limelight only until they are "found wanting" by the users and in a short time drop out of sight.

It takes years of experience to build a "good" cream separator. More than 30 years of experiments and experience have made the De Laval pre-eminently the best machine on the market for the separation of cream from milk.

Even were other concerns not prevented by the De Laval patents from making a machine exactly

like the De Laval they could not build as good a machine as the De Laval, because they all lack the De Laval manufacturing experience and organization.

If you buy a De Laval you run no risk of dissatisfaction or loss. It's time tested and time proven. Why experiment? Why take chances with an inferior machine when you KNOW that the De Laval is the BEST MACHINE FOR YOU TO BUY?

The new 72 page De Laval Dairy Hand Book, in which important dairy questions are ably discussed by the best authorities, is a book that every cow owner should have. Mailed free upon request if you mention this paper. New 1913 De Laval catalog also mailed upon request Write to nearest office.

EXTENSION DEPARTMENT ACTIVE.

Director Kendall Making Elaborate Plans in Extension Service Work.

The extension service of the college will this year constitute one of the chief phases of the work of the institution.

Director Kendall has already planned an extensive campaign throughout the state to be carried out during the spring months. Among the new bulletins which are now being published, are the following: "Planting the Apple Orchard," a thirty-six page bulletin by Prof. Wolff; and "Soiling Crops and Summer Soilage," a circular by Prof. Taylor; in addition to those are several bulletins which are still in the printer's hands.

Besides issuing bulletins and delivering addresses, the department is planning to give about a dozen orchard demonstrations in pruning and spraying trees. The demonstration work of the college is one of the most efficient means of carrying the practical as well as theoretical side of the agricultural work of the college to the people who are unable to attend the institution. The orchard demonstration consists of informal talks to farmers, after which the actual work of pruning and spraying is carried on under the direct supervision of the one giving the demonstration. As each part of the work is performed, the reasons and probable effects are explained to the farmers. The work already carried on along these lines has proved to be of immense value to various communities throughout state, and has served not only in aiding the people, but in advertising the institution as well.

This year the extension department has proposed to give orchard demonstrations in pruning and spraying in these places: Apr. 8, at Chester and Derry Apr. 9, at Salem Depot; Apr. 12, at North Hampton; Apr. 14, at Amherst; Apr. 15, at Hancock; Apr. 16, at Wolfeboro; Apr. 17, at Nashua; Apr. 18, at East Sutton; Apr. 19, at Claremont; Apr. 22, at Hudson; and Apr. 23 at Dunbarton.

Another feature of the extension work is the student demonstration work. During the latter part of last month, the extension service co-operated with the Y. M. C. A., of Sullivan County and sent students to Meriden and New London. J. E. Ladd and R. E. Batchelder gave demonstrations in orcharding and dairying respectively. The mornings were spent in talks and addresses, while the afternoons were spent in practical work in pruning and judging live stock.

Still another phase of the extension work is the co-operation with the various county farms of the state in conducting Experimental work.
