PRICE 5 CENTS

SPRINGFIELD DEFEATED.

New Hampshire Wins 5 to 3.

In a hard fought game, Saturday, New Hampshire defeated Springfield Y. M. C. A. college 5 to 3. The game was called at the end of the sixth inning on account of rain. The six innings were played in a drizzle which made good baseball an impossibility.

New Hampshire scored in the first, fifth and sixth innings, while Springfield secured her three runs in the third. In the first after Brackett grounded out, Fernald got his base on balls and on a wild throw to first he made the circuit scoring the first run. McPheters was hit by a pitched ball and Jones was safe on a neat sacrifice; Welch laid down a grounder to short stop which Fountain fumbled and the bases were full. Burbee proved equal to the occasion, slamming out a pretty two base hit, scoring McPheters and Jones. Cram flied out and Reardon ended the inning by fanning. In the third Springfield scored three runs on a couple of base on balls and a three bagger by Fountain. New Hampshire scored again in the fifth. Fernald fouled to Smith but McPheters drew a base after being hit for the second time. He stole second and then third, scoring on Jones' long fly to right. Welch struck out. Cram scored one more in the sixth and the game was called with bases full.

The summary:

New Hampshire	bh	po	a	e
Brackett ss	1	1	3	0
Fernald cf	0	2	0	0
McPheters 2b	1	2	2	0
Jones 3b	0	0	1	0
Welsh c	0	5	0	0
Burbee rf	1	1	0	0
Cram	0	5	0	0
Reardon lf	0	1	0	0
Paulson p	0	1	1	1

Springfield	bh	po	a	e
Weilt cf	0	0	0	0
Deihl lf	0	1	0	0
Chiettick 2b	0	0	0	0
Fountain ss	1	0	4	1
Kelley 1b	0	7	0	0
Campbell 3b	0	2	3	0
Haskins rf	0	2	0	0
Smith c	0	5	1	0
Stone p	0	0	0	0

New Hampshire	3	0	0	1	1	—	5
Springfield	0	0	3	0	0	—	3

Three base hit—Fountain; two base hit, Burbee; base on balls, off Paulson 5; off Stone 5; struck out, by Paulson 5, by Stone 3. Hit by pitched ball, McPheters 2. Time 1 hr. 15 min. Umpire Quinlan.

PROF. E. R. GROVES TO LECTURE IN IDAHO.

Prof. E. R. Groves is to lecture at the summer session of the State Normal School in Lewiston, Idaho, during the month of July, after finishing his lectures at the Washington State College.

COURSE IN DOMESTIC SCIENCE TO BE INSTALLED AT NEW HAMPSHIRE COLLEGE.

A complete 4 year course in Domestic Science will be offered by New Hampshire College at the beginning of the next college year. Announcement has just been made by the college authorities that arrangements for the course have progressed to the point where it is fully assured. It is believed that this addition to the curriculum of the State College will be the most important advance in educational matters in the state of New Hampshire in recent years.

The course will be an equal of those now offered at noteworthy educational institutions in other parts of the country. It will provide not only broad cultural training but technical studies in the subjects immediately related to domestic science and the other branches of home economics.

Through the installation of this course the young women of New Hampshire and of the other states in the upper part of New England will have opportunity for the first time of securing modern, advanced training in the economics of the home. Up to this time such a course as will now be given in New Hampshire College has not been available at any point nearer than Massachusetts. Hundreds of young women have been compelled to forego the advantage of one of the most deservedly popular movements in college education of the present day, unless recourse was had to the opportunities offered by another state.

The remarkable development in the teaching of home economics and the splendid opportunities that this has opened up for young women are matters of general knowledge. Not only does such a course provide the fundamental home training that will be of greatest value to a young woman who will later conduct a home of her own, but because of the academic studies included in the course, it gives a young woman the equivalent of a broad college education with appropriate technical features added. In addition to this, for such young women as desire to take up teaching or professional work adequate training in domestic science opens the door to immediate and most remunerative positions. There is a tremendous and increasing demand for graduates adequately trained in domestic science and domestic art. Not only are they needed for teaching the same subject in other schools, but for work as professional dietitians and as institutional housekeepers of the highest grade.

There is no other line of scientific or professional work in which immediate salary of such attractive size are available for graduates. It is not uncommon for positions paying \$1600 to \$1800 to be opened to young women who have just completed their work in college and with brief experience many such women command salaries as high as \$2500.00 or \$3,000.00. Purely from the side of opportunity for independent income, modern training in home economics is one of the most remarkably efficient aids ever developed in technical education.

The new course at New Hampshire State College will be thorough and complete. Announcement has not yet been made of the head of the new department but it is stated by the college authorities that the woman to be selected will be one

ANNUAL SPRING HOUSE PARTIES.

Durham A Mecca For Many Famous New England Beauties.

From Friday afternoon the 16th to 2.30 p. m. Sunday, the annual spring house parties at the various fraternities at the college were in progress. The program carried out generally, though varied somewhat by the different houses, was this: first, was the game Friday afternoon with Springfield Y. M. C. A. College; in the evening the Casque and Casket dance at the gymnasium; on Saturday an outing down the bay, including a motor-boat trip to Portsmouth; Saturday evening was given for holding private dances at each of the frats; and Sunday forenoon was mostly used for rest and recuperation after the extended festivities of the two days immediately preceding.

With the exception of a cold rain on Friday afternoon, which finally necessitated the game being called in the last of the seventh inning, excellent weather favored the pleasure seekers. Saturday was an ideal day for an outing and Sunday forenoon was equally warm and pleasant.

The Casque and Casket dance was one of the most enjoyable soires that has been seen for some time. Promptly at 8:30 the melodious tones of the College Orchestra pealed forth in measured harmony, and immediately there responded two hundred merry devotees of Terpsichore. The dance continued until nearly one o'clock, and every minute was enjoyable.

Every one was out for a good time and all agree that the whole affair was a howling success.

COMMENCEMENT REUNIONS.

The class of 1909 will hold a reunion at Durham June 7 and 8 this year. L. D. Ackerman, chemist with Hodd Rubber Co., and president of 1909 will be on hand and wishes to see all of the old boys back. Already P. E. Ellsworth "Hop" Lougee and H. S. Townsend have written that they expect to be present.

The old members of Casque and Casket are planning a similar reunion on June 7 and 8. Of the sixty odd members the returns would indicate that 15 or 20 will put in an appearance.

INTER-CLASS MEET TO BE HELD MAY 23.

The annual inter-class track and field meet will be held on the College Campus on Friday afternoon May 23rd. Owing to house parties being held on the 16th it was necessary to postpone it, and as the 23rd seemed to be the most feasible time, it will be held on that date.

ELECTIVE COMMITTEE ABOLISHED.

The elective committee of the college has been abolished. A committee, consisting of seven members of the faculty are now at work on arranging schedules. It is hoped that this arrangement will do away with a great deal of the confusion and conflicts of "making out" schedules, which has been so characteristic in the past.

REPORT OF COMMITTEE ON HOURS REQUIRED FOR GRADUATION.

In conference with the report of the committee, chosen to suggest changes in the credit hours, necessary for graduation from the four year courses, the requirements for graduation have been changed, so that they now stand as follows: Arts and Science 122; Agricultural 130; all Engineering courses 134. The passing mark for major subjects in the Arts and Science Course has also been changed from 60 per cent to 70 per cent. The committee also recommended that subjects come as often as possible during the week, and that no conflicts be allowed if it were possible to avoid them.

The report of the committee in part is as follows:

This committee has understood as its purpose the study of the question as to the number of hours that should be required for graduation in the Agricultural, Arts and Science, and Engineering Courses, for the purpose of recommending to the faculty such changes of requirements as appear desirable.

The Committee has observed the following principles in its deliberations; that a proper investigation of this subject requires a careful comparison of our requirements in the different courses with the requirements of similar institutions; that the purpose of reducing the hours required for graduation in the several courses is the better fulfilment of the pedagogical function of the institution.

The proposed reduction of hours, indicates, not the expectation of less efficient preparation by the student for life, but a superior equipment than at present because of a better observation of pedagogical laws in the college courses as a result of greater concentration of studies, better correlation between studies, more sequence between subjects and a clearer progress from subject to subject than at present.

A peculiar problem of considerable importance consists in the relation of the Arts and Science Course to the other courses. We have found almost everywhere less hours required for graduation from this course than from the others. We also have found that this policy meets the approval of most arts and science faculties. We believe that the requiring of as many hours for graduation in a general course as in a strictly professional course is not to be justified, but we do maintain that an attempt should be made to equalize by some qualitative standard the difference between the courses.

CAMPUS IMPROVED.

For the past month, work has been progressing rapidly on the improvement of the college grounds. Several buildings have been removed or torn down and grades have been filled in, while many of the rougher places have been burned over. The campus is now in excellent condition, and with the trees and various kinds of shrubbery coming into their glory, the college grounds are almost ideal.

Next Monday, May 26, is the date set for government inspection.

W. R. Place '14 has been appointed assistant track manager to succeed H. R. McCartney, resigned.

"Entered as second-class matter September 20, 1911, at the post office at Durham, N. H., under the act of March 3, 1879."

DURHAM, N. H., MAY 21, 1913.

The inauguration of President Fairchild, one of the biggest events in the history of the college, makes the day memorable to those who attended the exercises. The pre-arranged plans were well executed in every detail, making our new president's official acceptance of his office favorable in its attending circumstances. As he accepts the many duties and responsibilities of his position may he feel that students, faculty and alumni alike are with him, striving to make New Hampshire the college which our State deserves. President Fairchild, you have our deepest respect and on every occasion you shall have our loyal support.

PREPARATIONS MADE FOR INAUGURATION.

Yesterday the Sophomore class was excused from classes in order to assist in decorating the various college buildings preparatory to inauguration, which is to be held today. The gymnasium, where the main addresses are being given has been trimmed with blue and white bunting and hemlock bows. Prof. Fisher and Miss Caroline Black had charge of the decorations in this building, while Prof. J. H. Gourley supervised the trimming of Morrill Hall, where luncheon was served today. A large platform, composed of several sections, has been built for the gymnasium. This platform will be removable and will be used on public occasions, such as commencement festivities, etc.

FRESHMAN BASEBALL GAME.

This afternoon the freshman baseball team is scheduled to play Rochester High School on the college campus.

M. G. Eastman, '13, has accepted a position as agricultural agent and adviser in Sullivan County, N. H. "Gale" will have his office in Newport and will begin his duties after graduating from college next June.

of marked attainment in this field and a teacher capable of developing the course to highest efficiency. The attitude of the college is to secure the best, in the belief that the course is of such importance to the young women of the State that they are entitled to the highest obtainable efficiency in the head of the new department.

It is expected that the department will be located, for the current year, in Thompson Hall, which is the administration building of the college group of buildings. There is a large room in this building which can readily be fitted up as laboratory for the current season. An additional room will be provided for lectures and recitations. These facilities, it is expected, will care for the first year's work, especially since the room mentioned is of unusually large size and has admirable light.

With the construction of the new engineering building provided for by the state legislature, work on which will begin soon, additional room will be made available for the new department. It is expected that by this means further laboratory space and lecture facilities will be afforded so that as the new course enters its second year with increasing numbers the facilities provided for it will be ample.

Entrance requirements for the new course will doubtless be the same as those now prevailing in the other 4-year courses. High school certificates will admit students under ordinary conditions or in lieu of a certificate the student can enter by passing satisfactory examinations in subjects covered by ordinary high school courses.

The outline of the new course provides both broad general training and special technical studies immediately concerned with domestic science and art.

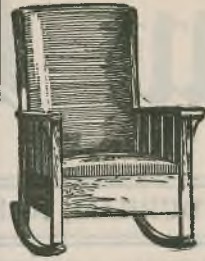

It is expected that students in the new course will be required to take general subjects along the following lines:

English and English Composition; one modern language, either French or German; a course in physiology and Hygiene; work in General Economics; complete work in Chemistry, which is considered the foundation of much of the advanced work that will be given in domestic science proper; Zoology or Botany, which also are fundamental studies; and probably a course in Bacteriology.

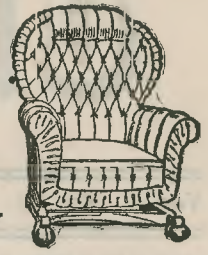

After completing a part of those general studies the student will begin special training in domestic science and domestic art. These special subjects it is planned will include the following:

Foods, their composition and nutritive value and the fundamental principles of cooking; house construction and sanitation; household management; the commercial manufacture of foods and the laws and principles regulating the sale of manufactured foods, including laws concerning adulteration; household finance, together with systems of household bookkeeping; the main facts of banking and related subjects; the planning and preparation of meals; an advanced course in the chemistry of nutrition, following the general course in chemistry and leading to special work in the principles governing the preparation of foods for invalids and for children. In subjects that are properly classed with domestic art it is planned to give work as follows: The principles of house furnishings and decorations; the fundamentals of textiles, including design, dye and weave of fabrics and the adaptability to various uses; the design and the drafting of garments and the methods of manufacturing the same, both in factory and by hand.

The addition of the new course to the

DE LAVAL CREAM SEPARATORS

TIME TESTED

If a member of your family were dangerously ill you wouldn't think of calling in an inexperienced doctor?

Certainly not! You would call a physician, who had built up a reputation, a man with experience and a successful practice.

Why not use the same care and common sense in your selection of a cream separator?

Every little while you hear of some new cream separator, claiming to be a "world beater," and just as good as the De Laval but a little cheaper.

These "mushroom" machines stay in the limelight only until they are "found wanting" by the users and in a short time drop out of sight.

It takes years of experience to build a "good" cream separator. More than 30 years of experiments and experience have made the De Laval pre-eminently the best machine on the market for the separation of cream from milk.

Even were other concerns not prevented by the De Laval patents from making a machine exactly like the De Laval they could not build as good a machine as the De Laval, because they all lack the De Laval manufacturing experience and organization.

If you buy a De Laval you run no risk of dissatisfaction or loss. It's time tested and time proven. Why experiment? Why take chances with an inferior machine when you KNOW that the De Laval is the BEST MACHINE FOR YOU TO BUY?

The new 72 page De Laval Dairy Hand Book, in which important dairy questions are ably discussed by the best authorities, is a book that every cow owner should have. Mailed free upon request if you mention this paper. New 1913 De Laval catalog also mailed upon request Write to nearest office.

COURSE IN DOMESTIC SCIENCE Concluded from page 2

curriculum of the State College is largely to the credit of Dr. E. T. Fairchild, the new president of the institution, who is an earnest advocate of the belief that training offered by the state to its young people should take as much account of the needs of its young women as it does of the demands of its young men. In the words of the president, "the state is not doing its duty to the young people within its care until it provides training for its young women as adequate to their needs as the training offered for many years to the young men."

The popularity of the new course among the young women of the state and of surrounding states is beyond question. There has been reported a widespread demand for the addition of this department to the curriculum of the State College for a number of years. It is felt that New Hampshire has made a strong move in taking the lead among the upper New England states in providing the new department.

SURPRISE FRIENDS BY ANNOUNCING MARRIAGE.

Mr. Philip Foster and Miss Della Worster Quietly Married Last March.

There will be many a surprised Doverite when it is learned that on March 20, 1913, Della Olivia Worster, daughter of Mr. and Mrs. John R. Worster of 47 Ham street became the wife of Philip Clement Foster, son of the late Mr. and Mrs. Charles G. Foster of this city. They were married at Roxbury, Mass., by Rev. Charles V. Bowman, pastor of the Congregational Church of the Massachusetts city. Mr. Foster left on April 14 for Sheridan, Wyoming, where he is now connected with the Sheridan Enterprise, in the editorial and news department. He was formerly connected with The Democrat. He graduated from the Dover High School in 1910, and spent a year in the Worcester Polytechnic Institute. Mrs. Foster is a graduate of the Dover High School and has spent three years at the New Hampshire State College. She left this morning for Sheridan, to join her husband, and will arrive there on Saturday of this week.

Both the bride and groom completely fooled their many friends in Dover, and laments are heard on all sides that the information could not have leaked out earlier, while the couple were at home. Yet, regardless of the "unfair" manner in which they have been used, the hundreds of friends of "Phil" and his bride wish them long and unbroken happiness in their wedded life.

"Foster's Daily Democrat."

Taking advantage of small opportunities is the easiest way of attaining larger ones in the end of the route.

Lyle S. Drew, '12, has been a visitor in college during the past few days. The seniors began wearing their caps and gowns yesterday, May 20th.

NEW HAMPSHIRE LOSES TO ST. ANSELMN'S.

College Boys from Manchester Spring Surprise.

Last Wednesday afternoon on the college diamond, St. Anselm's College of Manchester defeated New Hampshire by the score of 6 to 2. Weak hitting by the home team was the chief cause of the defeat. For a while it looked like a shut out, but finally Capt. Brackett got on the bases and succeeded in scoring.

Adams started the box work for New Hampshire and was hit freely; he was relieved by Bissell, who finished the game. The opposing pitcher had the New Hampshire batters at his mercy, striking out ten men and allowing but two hits. Fernald's throw from center field to the plat cut off one run. Both teams were at a disadvantage, as the game was played in the face of a driving wind. O'Connor of last year's New Hampshire nine starred for the visitors, playing a fine fielding game and securing three hits.

Prof. Kendall reports, some new and important bulletins will soon arrive from the press, among them one on "Farm Survey" of particular moment to the N. H. farmer.

Wilton, N. H., witnessed a few fertilizer tests in charge of Prof. Gourley.

Opportunities.

"There is a tide in the affairs of men," admits a wise writer, "but there is no gulf stream setting forever in one direction." The man who grows careless and self-confident because of success will soon find that no current of prosperity will take the place of thought and effort, and no one need think "luck" is so persistently against him that he is destined to failure whatever he does. There are opportunities and there are misfortunes, but there is no gulf stream of luck, good or bad.

Wealth of Knowledge.

There is no wealth like unto knowledge, for thieves cannot steal it.—Burmese Proverb.

Paris "One Hundred" Club.

The newly formed "One Hundred club" in Paris accepts only persons who, in addition to having traveled at least 40,000 miles by motor car, are well-known gourmets. One of the conditions of membership is that every initiate, in order to pay homage to the noble art of cooking, is pledged to reveal to his fellow members the name of the most humble tavern in which he has received an enjoyable repast.

BROKEN RECORDS.

All records of dairy sanitation were broken and are now held by

"Wyandotte" is a cleaner cleaner, it always shows a lower bacterial count, it cleans more utensil surface per quantity used, it gives the dairy a more sanitary tone and its cost of using is always less in the end—these are the facts always claimed and you find them true no matter with what cleaning agent you may wish to compare "Wyandotte."

After a thorough investigation all Dairy Colleges know these facts to be the truth, for they use and recommend only Wyandotte Dairyman's Cleaner and Cleanser. To prove these facts to your own satisfaction ask your dealer for a sack or write your supply dealer for a keg or barrel.
