

The New Hampshire.

Vol. 3, No. 2.

DURHAM, N. H., SEPTEMBER 24, 1913

PRICE 5 CENTS

FOOTBALL TEAM ROUNDING INTO SHAPE.

Squad Now Totals Forty-Eight Men.

During the past week many new men have come out for football practice and the squad now numbers forty-eight men. This is the largest number of candidates that have ever been out.

The cold rain of Friday and Saturday put a check on the practice although about twenty men were out Friday and went through a hard practice.

A first and a second team will be picked out this week and scrimmage will start. "The men are coming along fast and Coach Eberle should have a team whipped into shape by Saturday that will push Bowdoin to the limit.

Murdock who played in the back field last year has been shifted to center and is showing up well. Hale, captain of last year's eleven at Brewster Academy, is showing speed in the back field. "Chuck" Davis is playing in Clark's place at end. Clark is expected back this week and will start practice immediately.

The first scrimmage of the season was held Monday afternoon. The line-up of the teams was as follows:

1st Team	2nd Team.
Davis, c, le	re Westover
Thompson, lt	rt, Kennett
Bugbee, lg	rg, Huse
Murdock, c	c Smith
Bowden, rg	lg, Thomas
Haines, rt	lt, Bent
Corriveau, re	le, Mosher
Hale, lhb	rhb Willard
Woodman, fb	fb Howard
Bissell, rhb	lhb Brown
Brackett, qb	qb, Hazen

J. H. CAHILL TO SUCCEED G. H. DOUHAM.

The engineering department has been fortunate in securing such an able man to succeed G. H. Douham in the machine and forging department. His successor will be Mr. J. H. Cahill of Waterbury, Conn. Mr. Cahill comes to New Hampshire highly recommended, having previously been employed by the Taft-Pierce Mfg. Co., of Woonsocket, R. I. The Alco Motor Car Co., of Providence, R. I.; Smith Premier Typewriter Co., of Syracuse, N. Y.; and the National Cash Register Co., of Dayton, Ohio.

PROF. CARDULLO TO DELIVER LECTURE.

Prof. Forrest E. Cardullo of the Mechanical Engineering Dep't. is to lecture before the Graduate School of Business, Administration of Harvard University on Oct. 13th. and 15th. His subject will be "Power, Plant and Other Equipment."

NEW SELEROSCOPE FOR ENGINEERING DEPT.

The Mechanical Engineering Dep't. has recently purchased a new Shore Scleroscope. This instrument is used for testing the hardness of steel without injuring its quality. It contains a hammer with a diamond point, which causes indentations to be made on soft metals, while the harder metals will resist the point.

L. A. Carlisle will have charge of the Boy's and Girls' Club Work and will assume his work the first of the year.

FIRE BREAKS OUT.

Alarm Calls Student Body to President Fairchild's House.

At 10.30 a. m., last Thursday a small fire was discovered in the basement of President Fairchild's residence. The alarm was rung and practically the entire student body responded.

The fire proved to be nothing more than a smudge and was easily extinguished.

The need of a fire drill for just such emergencies showed itself. After the sounding of the alarm a few students got the college hose wagon out. The hose however was is connected in to small sections and it would have taken considerable time to couple this together.

Since this occurrence Professor Cardullo has posted a list of fire regulations. Students have been assigned to perform certain duties in case of a fire while the main body are to form in their regular companies and await orders.

John D. Clark, '03, professor of Chemistry at the University of Mexico is on a year's leave of absence. At present he is located at the University of California.

ALUMNI NOTES.

Wesley E. Davis, '13 is working with the Western Union Telegraph Co.

Wendell P. Davis, 2 yr. '12 is working for a milk testing association in northern New Hampshire.

Charles H. Rogers, '13 is at head of the manual training department in the Franklin High School.

Philip C. Jones, '13, is Y. M. C. A. secretary with headquarters at Claremont, N. H., doing community work.

Perley A. Foster, '13, is Y. M. C. A. secretary for Sullivan County, New Hampshire, with headquarters at Newport.

George A. McPheters, '13, is assistant overseer of the playgrounds in Portsmouth, N. H. He is acting as "cop."

Ralph M. Sanborn, '13, is teaching in the high school at Wilton, Me.

Thomas J. Twomey, '13, is taking graduate work in chemistry at Cornell University.

M. Gale Eastman, '13, is an agricultural expert in Sullivan County with headquarters at Newport, N. H.

Merton M. Cory, '08, who recently visited Durham, has received from N. H. C., the degree of (E. E.) for which he prepared thesis on "Commercial Power Engineering." He is teaching electrical engineering in Michigan Agricultural College.

Regina O'Connor, '13, is teaching in Dixfield, Me.

Van Leavitt, '13, has a fine position as superintendent of a large estate in Southampton, Long Island.

Winifred Hodgdon, '13, is attending Burdett College, Boston, where she takes a secretarial course.

Harriet Locke, '13, will spend part of the year doing settlement work in Boston.

Lawrence Carlisle, ('08) is unmarried and teaching high school in Jefferson, N. H.

Mrs. Arthur F. Nesbit, wife of Prof. Nesbit of Pittsburg University spent part of her vacation in Durham.

Harold Robinson, '13 has the position of graduate assistant in Massachusetts Agricultural College.

N. H. C LOSES WARM FRIEND

Hon. Albert Demeritt Accidentally Shot.

On the morning of Aug. 22, Hon. Albert Demeritt was accidentally shot by a gun while getting over a fence. He had left the house early in the morning to hunt woodchucks and was found about eight o'clock lying dead on one side of a fence, while the gun was found on the other side. An ugly wound was found on his head and death was evidently instantaneous. Apparently, he was killed about six o'clock in the morning.

Mr. Demeritt leaves a widow and three children, a son and two daughters, all three being graduates of New Hampshire College. He was always very prominent in the business and educational interprises of his town and state and ever manifested a profound interest in New Hampshire College. He had served the town of Durham as representative for a number of terms and was always very active in the legislature, having been a member of the committee on appropriations and delivering many eloquent speeches. It was chiefly through Mr. Demeritt's work and influence that New Hampshire College received its appropriation last winter for the new engineering building.

Mr. Demeritt was a trustee of the college and also of the public library. The college conferred upon him the honorary degree of master of arts. He was for nine years a member of the board of education in the town of Durham; also a member of State Historical Society, Granger and Iythian Knight. He was also a justice of the peace and quorum and had served the town of Durham as moderator for nearly twenty years. The loss of such a distinguished citizen will be keenly felt not only by the college and town of Durham but by the whole state of New Hampshire

STOCK JUDGING TEAM.

Candidates for the stock judging team, to represent the college at the students' judging contest at Brockton Fair, are now being tried out. Prof. O. L. Eckman, as in previous years, has charge of coaching the men. The first meeting was held last Friday afternoon in Morrill Hall, where Prof. Eckman showed several lantern slides of various dairy animals. The more important features were brought out and discussed. This week the men are meeting nearly every day and judging specimens in the basement of Morrill Hall.

N. H. C. A.

Last Sunday afternoon, Prof. J. H. Foster addressed the New Hampshire College Christain Association on the subject of "A Rich Full Life." Prof. Foster treated this subject from several phases, which had made impressions upon his own life. Special music was furnished by a student quartette.

IN MEMORIAM.

In appreciation of the long and efficient service and faithful interest in New Hampshire College, The New Hampshire wishes to express, in behalf of the faculty, students, and friends of the institution, their gratitude and appreciation towards their co-worker and friend, the late Hon. Albert Demeritt. Ever interested in her achievements and always eager and willing to do all in his power to further the best interests of the college, Mr. Demeritt leaves behind him a name which will be honored and cherished by faculty, students, and friends of the college for generations to come. We extend to his family our sincerest sympathy in their bereavement

NOTICE.

In case of fire in any building notify the fireman at the power house immediately and then ring the fire signal.

To ring the fire signal, toll the bell three times at intervals of 5 or 6 seconds. The bell rope is in the clock room. Keys to the clock room may be found with the fireman and the purchasing agent.

When the fire signal is rung, every male student not having other fire duties shall repair immediately to Conant Hall in order to take the hose to the scene of the fire. To find the location of the fire, inquire of the fireman at the power house.

Upon arriving at the scene of the fire, students not having specific duties will fall in and form in their regular companies, under the command of the company officers and await such instruction as may be given. Students in Company D will report at the barn in order to procure tools and ladders.

The following students will have special duties and will not report to Company officers.

Pipemen, to report at the scene of the fire. Reardon, T. P. Capt.; Paulson, C. G.; Sanborn, E. L.; Yaxis, T. G.; Swett, E. F.; Rines, C. F.

Hydrant squad. To report at hydrant nearest the scene of fire. Bent, H. V. Capt.; Dustin, T. P.; Wilder, W. W. Linquist, H.; Manter, F. S.; Corriveau, P. E.

Fire room squad. To report at fire room. Place, W. R. Capt.; Smith, F. C. Perkins, G. M.; Dresser, C. J.

To report at Thompson Hall. Haines R. E. Capt.; Knight, R. A.; Odione, B. G.; Ham, G. L.

To report at Morrill Hall. Jesseman, L. D. Capt.; Brogini, M. P.; Bugbeem R. J.; Crockett, D. P.

Students having special duties will report immediately to me for instructions.

The New Hampshire College Song Book, the only publication containing words and music complete of all the college songs, and also an inimitable assortment of the standard college and patriotic melodies, may now be procured from Prof. Richards. Every freshman should supply himself with a copy as soon as possible.

A new re-enforced concrete dam has been constructed across Oyster river at the site of the old wooden dam near the bridge.

The new dam was made possible through the generosity of Mrs. Edith Onderdonk who paid the entire cost of the construction.

The work has been under the supervision of Prof. C. E. Hewitt.

DURHAM, N. H., SEPT. 24, 1913.

The football season is on again! New Hampshire College is to be commended on the spirit shown by the students, and especially the new men, in coming out for the team. The number of men in football togs during the past week is ample evidence of the enthusiasm and spirit which the undergraduates are taking in the development of a creditable team. While not everyone can be assured of a place on the 'varsity eleven, every man who comes out to practice can be assured, in the inner courts of his own heart, that he played a part, and a most essential one, too, in the making and developing of the team which represents his alma mater. What ever victories she may win or whatever laurels she may secure, the man who plays on the second and third elevens may justly claim a rightful share in each and every one.

While at present all of the suits are being used and the prospects bright for developing a winning team, under the skillful supervision of Coach Eberle, let not the new recruit become discouraged and disheartened after the first few days of practice. The football man must expect to have lame muscles and bruised bones during the first few days of work. Such things are a part of the game and he who would succeed in this sport must accept them as a part of the game.

Although it is of utmost importance to have a strong second team to develop a winning eleven, there is one thing which every student can do regardless of his physical ability, and that is to cheer on the side lines. The person who has never participated in any athletic sport can hardly realize the importance of this most essential feature. This is a duty and privilege which is within the grasp of every true, loyal student of New Hampshire College. Let every student in the institution be ready to answer the calls of the cheer leaders, and perform their part towards raising the athletic prowess of their alma mater to a higher level.

New Hampshire College has this year the largest freshman class in its history. There are about 110 '17 students registered to date, of whom a little more than 30 per cent are girls. The two year 1915 class have about 46 registered. These figures show a very wholesome growth in the college, but, with increased facilities, we may expect a still larger registration the coming year.

R. O. Lovell has gone to the University of Pittsburgh to secure an A. B. degree. He made the trip out by motorcycle.

Among the additions to the faculty made during the past summer are the following:

Miss Helen Thompson, director of Home Economics, and formerly instructor of this subject at Lincoln College, Illinois and at Rhode Island State College.

Mr. W. E. Stokes (of Madison, Wisconsin) assistant in Agronomy. Mr. Stokes is taking Mr. App's place for the year, Mr. App being away on leave of absence.

Mr. H. C. Sudder, from Spokane, Washington, instructor in English.

Miss Marion Templeton, from Exeter and a graduate of Wellesley, assistant in Botany.

Mr. John J. Davies, from Cornell University, instructor in Physics.

NEWSY NOTES.

The freshmen should show their spirit and turn out when the manager of the foot ball team needs help.

Rochester High and Worcester Academy are among the schools negotiating for a game with the Freshman football team.

The first informal of the year will be held in the Gym next Saturday. Have you got a girl yet?

In place of physical culture the young women of the college are to have a course in hygiene. This will come at 2.30 p. m., on Wednesdays. Dean Thompson will give the lectures.

A boot blacking stand, with three chairs, has been opened up in the block. This fills a long felt want.

The foot-ball team journeys to Brunswick, Saturday, to play Bowdoin. The student body will assemble at the station to give them a send-off.

NEW DEPARTMENT OF ECONOMICS.

By action of the Board of Trustees in June a new department of Economics was created of which Professor Guy C. Smith is now the head. This department includes the courses in economics which were formerly a part of the Department of Political Science.

FRESHMAN OFFICERS.

President R. E. Came of the Junior Class called the freshmen together at four o'clock last Tuesday for the purpose of electing officers. Following are the results: President, N. J. Harriman; Vice President, R. L. Nelson; Secretary, Miss Chase; Treasurer, J. M. MacDonald.

SOPHOMORE ELECTIONS.

At a meeting of the Sophomore class held Thursday afternoon, the following officers were elected; President, R. J. Bugbee; Vice President, Miss A. Charbonneau; Secretary, W. H. Barr; Treasurer, C. S. Pettee.

JUNIOR ELECTIONS.

The class of 1915 met Friday afternoon, and elected the following officers for the ensuing year: President, R. E. Came; Vice President, Z. L. Murdock; Secretary, Caroline Hoitt; Treasurer, J. Hobbs.

At a meeting of the College Club, Sept. 16, 1913, the following officers were elected for the ensuing year: Pres., J. H. Annis, 1914; V. P., W. S. Bartlett 1915; Sec., I. C. Story, 1915; Treas., W. F. Farker, 1915. Ex. Com. Pres., Taylor; Prof. Whoriskey; B. B. Fernald, 1915.

Ben Proud '11 visited the College last week. L. W. Bennett '11 is still taking graduate work at Cornell.

"SAVING THE COST" OF A DE LAVAL Cream Separator.

Almost invariably the man who goes without a separator or buys an inferior one does so to "save the cost" of a De Laval.

No reasoning could possibly be more deceptive. No greater mistake could possibly be made.

The only way to actually save the cost of a De Laval Cream Separator is through the purchase and use of one.

In that way you save the cost the first year, and the same saving goes into your pocket every year afterward for twenty years or more.

Without a separator you don't "save" anything — you waste the cost of a De Laval every year in quantity and quality of product and have nothing to show for it.

And so too with a poor separator, you waste the slight first cost saving over a De Laval half a dozen times over every year and still have only the poor machine in the end.

You "pay" for a De Laval separator every year whether you want to or not. With a De Laval it goes into your pocket every year after the first one. Without a De Laval the same amount goes to waste every year and benefits no one.

Will you pay for your De Laval and have it or go on paying for it every year and not have it?

A new De Laval catalog to be had for the asking may help you to decide.

Prominent Alumni.

WILTON EVERETT BRITTON '93.

Wilton Everett Britton was born at Marlboro, Mass., Sept. 18, 1868. He is the son of Benjamin Howard and Emma Eliza (Wright) Britton. In 1869 they moved to Gilsun, N. H., where he was brought up on a farm and where he knew how to do all kinds of hard work that goes with farm life. He attended the schools of the town. By studying at home he managed to pass entrance examinations and entered New Hampshire College in the autumn of 1889. He had free tuition, scholarship, and worked as janitor, waited on tables in boarding houses, and as assistant in Dartmouth Library to earn money to help pay expenses. During vacations he worked on the farm or at carpentering. During the summer of 1891 he was assistant of Prof. C. M. Weed, then just beginning his work at New Hampshire College. He collected birds and insects and mounted them. He was awarded half of second prize in prize speaking contest in 1890 and was given the Bailey Chemical prize on graduation in 1893. He was editor in chief of the first issue of the first college paper called the "Enaichsee," a predecessor of the "New Hampshire." The class of 1893 was the first to hold graduating exercises at Durham, although the four years were all passed at Hanover. With three classmates he went to Cornell in the fall of 1893 and studied horticulture and botany.

May 1, 1894, he was appointed assistant in charge of pot experiments in plant nutrition, Agricultural Experiment Station, New Haven, Connecticut, and was appointed Horticulturist Nov. 1, 1894.

He did more or less entomological work as necessary until a law passed in 1901, provided for the position of State Entomologist, and he was appointed July 1, 1901. He was also made entomologist of the Station. In 1899 he began taking graduate work in Yale University and received the degree of Ph. D. in 1903. From 1901 to 1905 he was lecturer in entomology in the Yale Forest School.

Mr. Britton has been Associate Editor of Journal of Economic Entomology since Jan. 1, 1910. He has published a series of eleven annual reports as State Entomologist and more than fifteen Experiment Station Bulletins on insects, besides many separate articles on botanical, horticultural and entomological subjects.

Mr. Britton has done considerable local civic improvement work:

American Association Economic Entomologists, (Pres. in 1909).

Entomological Society of America.
American Association for the Advancement of Science (Fellow).

Washington Entomological Society (Corresponding member.)
Connecticut Botanical Society.

Sigma Xi (Yale Chapter.)
Pres. Edgewood Civic Association in 1908-1909.

Pres. Donald G. Mitchell Memorial Library since founded in 1901.

Member New Hampshire College Alumni Association.

Member Yale Alumni Association of New Haven.

Mr. Britton was married April 30, 1895, to Bertha Madeline Perkins, of Surry, N. H.

NEWS AND NOTES.

Ellia S. Townshend '07 recently lost her son, Dana Hazen, who died of infantile paralysis, the latter part of August at White River, Vt.

Frank Wiggin Randall, '07, district manager for the Central Hudson Gas and Electric Co., of Poughkeepsie, N. Y., and Mrs. Randall visited the college last Thursday. Mr. Randall joined the Theta Chi Fraternity.

Mr. H. H. Falmer of Georgetown, Mass., is assisting Prof. Fisher in the Physics department this year. Mr. Palmer is a graduate of M. I. T. in the class of '09, has had three years experience with the Physics department of M. I. T., and one year as assistant instructor in Wakefield High School at Wakefield, Mass. Registration in the department has increased by about 6%, and all seats are filled.

Prof. Woolf reports that notwithstanding the extremely dry weather of this summer, the fruit trees and plants on the college grounds have made good growth and have produced crops equal to or above the average. A small crop of strawberries was harvested, a very fair crop of plums and grapes. The variety apple orchards are doing well and will yield valuable data as well as specimens for class work.

Prof. Rasmussen has just completed a bulletin on "The Cost of Milk Production" which will soon be published and which he says ought to be of great value to dairy students.

Soil fertility and crop rotation work has just been commenced in Rockingham and Strafford Counties under the direction of Prof. Kendall.

A. W. Benner, one of our alumni, who has had charge of the South Lyndeboro Cow Testing Association, will start on similar demonstration work in Grafton County.

The Extensive Service is working up a set of films on college activities, field meets, and demonstration work, which, if considered feasible and practical will be placed in the hands of some reliable moving picture circuit in the effort to further advertise our college.

Three cow testing associations will be started immediately in Grafton County.

They Want Better Milk.

If you ask any Dairy Inspector what to use for cleaning dairy utensils he will say

His mind is set upon bettering milk quality and he knows the cleanliness produced by Wyandotte Dairyman's Cleaner and Cleanser is just the kind necessary to protect milk quality from germs, odors or dirt.

And for the creamery and cheese factory all inspectors advise Wyandotte Dairyman's Cleaner and Cleanser because the last step of the dairy producing business is quite as important as the first, and "Wyandotte" keeps the butter and cheese utensils thoroughly sweet and sanitary.

This "Wyandotte" cleanliness cannot be duplicated by any other cleaning agent, otherwise Dairy Inspectors and Agricultural College Authorities would not recommend it exclusively. "Wyandotte" is made purposely for dairy cleaning and that is why no grease, soapy substances, or strong chemicals are found in it.

You will find it most satisfactory, as well as the most economical cleaning material to use. Ask your dealer for sack or write your supply house for a keg or barrel.
