NEW HAMPSHIRE DEFEATED.

Bowdoin Wins in Game At Brunswick

Outweighed ten pounds to a man the varsity football team met defeat at the hands of Bowdoin, Saturday afternoon at Brunswick, Maine, 17 to 0. Bowdoin used the straight line-bucking game throughout. New Hampshire worked the forward pass to good advantage several times but did not use the open play enough.

In the second period, after consistent gaining, New Hampshire carried the ball to Bowdoin's three-yard line, but all chances of scoring disappeared when the whistle blew for the end of the period.

Bowdoin secured her first touchdown early in the second period after a series of line bucking plays. The second touchdown came in the third period, when Brown with a 15-yard run around the end, and Weatherill with a gain of 48 yards through right tackle brought the ball to New Hampshire's five yard line where it was lost on downs. Woodman attempted to punt out of danger but Brewster broke through and blocked the kick. Beal secured the ball and made the touchdown.

Bowdoin scored her last points when Floyd sent a drop-kick over the bar in the last 10 seconds of play from the 22-yard line.

Considering the amount of the practice, the team showed up fairly well. The line especially did excellent work.

The summary:

New Hampshire	Bowdoin
Corriveau, re	le Beal
Haines, rt	lt Lewis
Reardon, rg	lg, Brewster (Chase)
Murdoek, c	c Barry
Bugbee (Dodge) lg	rg Moulton
Thompson (Bowden) lt	rt Mountfort
Westover le	re Leadbetter (Wood)
Brackett, qb	qb, Brown
Bissell, rhb	lhb, Foster (Pratt)
Hale (Willard) lhb	rhb, La Case (Floyd)
Woodman, fb	fb, Weatherill

Score: Bowdoin 17. Touchdowns, Brown, Beal. Goals from touchdowns, Mountfort, La Case. Goal from field, Floyd. Umpire, Lieut. W. D. Fraser of Fort Williams. Referee, Tom Bragg of Bangor. Headlinesman, John D. Clifford. Time, 9m quarters.

CHAPEL EXERCISES.

At the chapel exercises last Wednesday, Prof. Richard Whoriskey gave an address to the student body on the subject "The Humanism of Victor Hugo." In closing he read of Hugo's masterpieces. The lecture proved interesting as well as instructive.

"Gib" Lane '13, has secured a lucrative position with the Goodrich Rubber Co., at Akron, Ohio.

It is reported that the Sophomores are planning to initiate a number of select candidates from the Freshman Class into the order of "Dogs," in the near future.

ENGINEERING BUILDING.

The work of excavation for the new engineering building is progressing rapidly. Concrete foundations will be put in the latter part of this week.

The main building, which will be of brick with terra cotta trimmings, will have a frontage of 136 feet and a depth of 144 feet.

The contract calls for the completion of the building by the month of August 1914. F. W. Cunningham and Son are the contractors.

FIRST INFORMAL OF THE YEAR.

The first informal of the year was held in the gym last Saturday evening. It proved to be one of the prettiest and best attended dances that have been held for sometime. Over 200 lovers of the terpsichorean art tripped the light fantastic from eight until eleven. Excellent music for the occasion was furnished by the recently augmented College Symphony Orchestra under the leadership of Clarence H. Dresser.

GIRL'S GLEE CLUB.

Effort Being Made To Organize.

An effort is being made to start a girls' glee club. Such an organization would give them an opportunity to contribute toward an increase in the spirit of New Hampshire College.

Trial music has been sent by the Boston Music Company, and it is requested that all girls who sing, will give their names and their voice part to Miss Charbonneau. Like everything else the glee club must be backed by the students to insure success. The President wishes to see this enterprise succeed.

PRACTICE GAME.

Varsity Team Goes To Exeter.

Last Wednesday afternoon the football squad went to Exeter where they had a practice game with the academy team. Coach Tod Eberle took 18 men down. The two teams took turns rushing the ball. Although the Exeter team out weighed New Hampshire they did not pierce the line for any large gains. This practice brought out many weak points among which was the slowness of the secondary defense. Play was stopped at times while the coaches criticised the various plays.

The New Hampshire line-up was as follows: Westover le, Thompson and Bowden lt, Bugbee lg, Murdoek c, Reardon rg, Haines lt, Corriveau, re, Woodman fb, Bissell rhb, Hale lhb, Brackett and Whitehead qb.

CAMPUS NOTES.

While the football team were on their trip to Bowdoin, Saturday the assistant football managers, with the help of a few freshmen, lined off the football field.

The football team journeys to Medford, Mass., Saturday to play the strong Tufts eleven. Last Saturday Tufts defeated Bates, 17 to 7.

George E. McPheters '13 passed the week-end in Durham.

C. O. Brown, '11 has completed his master's degree and is teaching electrical chemistry at the University of Pittsburg where he has a fellowship.

"Entered as second-class matter September 20, 1911, at the post office at Durham, N. H., under the act of March 3, 1879."

DURHAM, N. H., Oct. 1, 1913.

With the beginning of the present collegiate year, a new system of requirements and credit hours is being tried out at New Hampshire. Like every other new enterprise of this nature, it will be watched carefully for the results obtained.

In making a change of this kind, many students in the upper classes are prone to interpret erroneously of the motives for making the decrease in the required number of credit hours. It was not the intention of those who were instrumental in arranging the new schedule to decrease the amount of work done by the students, nor to relax upon the total amount of studying performed. Merely because a student is carrying a lower schedule in hours than formerly, does not necessarily imply that he is to perform a corresponding less amount of studying.

It was the design and purpose of the faculty in making these changes to induce each student to put more time upon the few studies he does take, though they may be less in number, and thereby increase the efficiency of the student along those particular lines. It was thought that in this way the student could put more time and preparation into each subject and, though the number of studies taken would be materially diminished, the student would be better equipped and more thoroughly prepared along the particular lines pursued.

The person who has obtained the erroneous conception that these changes were brought about to make less work for the individual student should eradicate such ideas at once and resolve to put forth his best efforts to bring the standard of the college to that place which it deserves.

NOTICE.

All new men, desiring to "try out" for The New Hampshire Board, report to A. E. Bartlett, '15, for work and instructions.

Director John Kendall of the state experiment station has recently been holding conferences with members of the station staff for the purpose of formulating plans to aid the owners or purchasers of abandoned or neglected farms throughout the state. Many of the beautiful fields of New Hampshire are agriculturally worthless, because they have suffered many years of neglect and abuse. They have been farmed until they have been robbed of all their fertility and the present owners or purchasers of this land are calling upon the station for information as to the means for its regeneration.

Continued on page 3

TRAIN SCHEDULE.

The winter schedule of the B. & M. went into effect last Monday. The trains leaving Durham are as follows:
Week Days.

Durham for Boston—Durham for Dover
 5:51 a.m. 8:09 a. m.
 6:49 9:24
 8:54 10:36
 11:29 11:43
 1:54 p. m. 2:22 p. m.
 2:41 6:08
 5:32 7:21

Sundays.

7:09 a. m. 10:27 a. m.
 2:30 p. m. 7:17 p. m.
 7:47

It will be noticed that the 11:29 train leaves 18 minutes earlier than usual, that the 1:54 is now stopping, that the 2:41 train leaves 28 minutes earlier than formerly, and also that there is a new train at 11:43 for Dover.

CORRECTION

In the last number of "The New Hampshire" it was stated that Ellic S. Townshend recently lost a son. The item should have read Ellice S. Townshend, '07, recently lost her husband, who died of infantile paralysis.

ORCHARD DAY TO BE HELD.

The Horticultural Department is planning to hold an Orchard Day at the college during the latter part of the fall. This will be an exhibition affair which is intended to be helpful and instructive to the farmers of the state as well as to the students of the college. The exact date has not yet been determined, but will probably be held during the latter part of October.

The idea of making moving picture films concerning the college activities has aroused much interest throughout the college as a whole. It is the plan of Prof. Kendall and those helping him to make films that will not only show the special activities and athletic events but to make those that will show the every day life of the undergraduate as well. Films will be made showing the class room work, laboratory work, experiment station plots, and numerous other subjects typical of New Hampshire College. These films, in connection with lantern slides, will be used in the extension work throughout the state and at other times when it is considered feasible to do so. As an advertising medium for the college these films should be invaluable.

For several years the Animal Husbandry Department of the college has been making a special study of the inheritance of sheep. In order to carry on this study further, the college has recently purchased several valuable ewes and a ram from the University of Illinois and from a Vermont breeder. Special attention is being paid to the inheritance of fleece that is obtained by crossing the Rambouillet and the South-down breeds.

At the Rochester Fair last week Prof. Rasmussen judged the dairy products, Prof. Wolfe judged the fruit, and Profs. Jones and Eekman judged the live stock.

W. F. Fiske, ex '00, is now at Entebbe Uganda Protectorate, British East Africa.

Simes Hoyt, '09, is now teaching in Honolulu, Hawaii.

A large number of out of town guests were present at the informal Saturday evening in the gym.

Mrs. Shirley Onderdonk, the donor of Smith Hall has returned from Switzerland and Red Tower is again occupied by the family.

"SAVING THE COST" OF A DE LAVAL Cream Separator.

Almost invariably the man who goes without a separator or buys an inferior one does so to "save the cost" of a De Laval.

No reasoning could possibly be more deceptive. No greater mistake could possibly be made.

The only way to actually save the cost of a De Laval Cream Separator is through the purchase and use of one.

In that way you save the cost the first year, and the same saving goes into your pocket every year afterward for twenty years or more.

Without a separator you don't "save" anything—you waste the cost of a De Laval every year in quantity and quality of product and have nothing to show for it.

And so too with a poor separator, you waste the slight first cost saving over a De Laval half a dozen times over every year and still have only the poor machine in the end.

You "pay" for a De Laval separator every year whether you want to or not. With a De Laval it goes into your pocket every year after the first one. Without a De Laval the same amount goes to waste every year and benefits no one.

Will you pay for your De Laval and have it or go on paying for it every year and not have it?

A new De Laval catalog to be had for the asking may help you to decide.

THE DE LAVAL SEPARATOR CO.,

New York Chicago San Francisco Seattle

Continued from page 2

The ordinary advice given is to purchase live stock and refertilize the fields thru the manure, while the cattle are earning profits for their owners as beef, pork, mutton, wool and milk. To do this on a scale extensive enough to guarantee returns is, however, often beyond the means of the farmer because of the heavy initial outlay. The experiment station is now carrying on a series of comparative tests with red clover, vetch, sweet clover, and other plants, that are available as green manure. These crops can be grown on almost any field and when plowed under enrich the soil materially. Perhaps the most interesting work is that with the sweet clover, for years considered a weed and relegated to road sides and vacant city lots. It is now known to be a plant of great value as a bee forage, probably of great value as green manure and in many respects like the alfalfa of the West.

The land going to waste in New Hampshire can be made profitable and the experiment station proposes to show how and to demonstrate to all doubters. From the "Manchester Union."

New Hampshire College has recently been the receiver of two valuable gifts. One of these is a five hundred dollar power spraying outfit, presented to the Horticultural Department by G. H. Fouché of Peterboro. This donation is especially appreciated because it supplies a long felt need of this department.

The second gift is a modern stump-puller given to the experiment station by Thomas J. Davis, formerly of Durham but at present in Duluth, Minn. It may be recalled that Mr. Davis was the one who a few years ago gave a valuable nut orchard to the college.

Boys' and girls' agricultural clubs are being organized through Cheshire, Hillsboro, Rockingham and Merrimack counties. The purpose of these clubs is to get the younger people interested in agricultural work, and to teach them the different phases of it by means of lectures, experiments and practical demonstrations. L. A. Carlisle, a former graduate of this college, will have charge of this work.

The Library has received from a friend, a gift of four large and handsome folios. They deal with the "History of the Art of Writing."

Samuel I. Morrison who was a student in the two year course last year, recently took high honors in the Young Men's Stock Judging Team at Vermont State Fair. He obtained first prize in horse, beef and dairy cattle judging; second prize in sheep and swine judging, and a special prize for being the best all round judge of live stock. The three prizes totaled up to nearly a hundred dollars. Among Mr. Morrison's competitors were students from Vermont State College, Lynderville Agricultural School and several other agricultural colleges. Not only does his excellent showing bring credit to himself but also to the Animal Husbandry Department of this college where he took the course in stock judging.

Thinking that the Freshmen were going away for their class picture Thursday, the Sophomores had a few trusty detectives shadowing President Harriman of 1913 class. Either the Freshman had cold feet or the tip was a false alarm for no migration was attempted.

Alan Leighton, '12 has returned to Cornell as assistant chemist where he will complete his course for a degree.

George W. Berry, '12, recently married to Miss Alta Hicks, in superintendent of the American Agricultural Chemical Farm, Portsmouth, N. H.

There will be an important meeting of the board of trustees on Oct. 8.

Last Sunday evening, Prof. Forrest E. Cardullo addressed the students in the church chapel. His theme, "The Efficient Life," was one of practical as well as theoretical importance. He chose as an outline for his discourse the following points, from which he brought out facts of intrinsic value and worth: (1) What is a man here for; (2) Common sense, in taking in your conditions and possibilities; (3) Council, seek big men and talk to them; (4) Discipline in knowing thyself and exercising will power and self control; (5) Square deal, are you giving your body a square deal; (6) Records of past achievements and failures; (7) Plan your work; (8) Have standards and schedules; (9) Standardize conditions; (10) Written instructions, so as to know how to do ideal things in an ideal way; (11) A reward, the reward of an efficient life is life itself

Next Sunday afternoon at five o'clock in the church chapel, Mr. Alvin E. Dodd, director of the North Bennet Street Industrial School, Boston Mass., will address the association.

NEWSY NOTES.

Prof. C. E. Curry recently returned from an extended automobile trip to the White Mountains.

Lucien Thompson of Denver, Colorado, secretary for the Board of Trustees of N. H. C., spent his summer here writing the history of Durham in collaboration with E. S. Stackpole and Winthrop S. Meserve. The book will be published next year.

The bachelor faculty who boarded at Smith Hall last year now fill Mrs. Burnham's dining room.

Mabel L. Hayes, '98, is teaching in the high school, at Hanover, N. H.

Miss Mabel E. Townsend, former registrar, N. H. C., is private secretary for Prof. Chase, treasurer of Dartmouth College.

Katherine DeMerritt, '08 returns to her position as head of the French Department in Latin School, Chicago.

John E. Robinson, '12, is in Bristol, R. I., with the Bristol Rubber Co.

They Want Better Milk.

If you ask any Dairy Inspector what to use for cleaning dairy utensils he will say

His mind is set upon bettering milk quality and he knows the cleanliness produced by Wyandotte Dairyman's Cleaner and Cleanser is just the kind necessary to protect milk quality from germs, odors or dirt.

And for the creamery and cheese factory all inspectors advise Wyandotte Dairyman's Cleaner and Cleanser because the last step of the dairy producing business is quite as important as the first, and "Wyandotte" keeps the butter and cheese utensils thoroughly sweet and sanitary.

This "Wyandotte" cleanliness cannot be duplicated by any other cleaning agent, otherwise Dairy Inspectors and Agricultural College Authorities would not recommend it exclusively. "Wyandotte" is made purposely for dairy cleaning and that is why no grease, soapy substances, or strong chemicals are found in it.

You will find it most satisfactory, as well as the most economical cleaning material to use. Ask your dealer for sack or write your supply house for a keg or barrel.
