CHAPEL EXERCISES.

Principal Harlan M. Bisbee of the Robinson Seminary at Exeter was the speaker at chapel, Wednesday, April 15th. His subject was "The Choice of the Best." Through various appropriate examples he showed that in all the various activities of life it is not sufficient merely to select what is good, but that instead one should endeavor always to choose the best. Mr. Bisbee declares himself to be an ardent believer in the future growth and prosperity of this institution, and said that he could give no better advice to any young man or woman of New Hampshire than to secure that education, which is so vital to his future success, at the university of his state.

STUDY FLOOD CONDITIONS IN COLLEGE LABORATORY.

Experiments are being made at the mechanical engineering laboratory of the Ohio State University to determine the flow of water under flood conditions and to estimate the obstruction offered by piers and bridge approaches.

The laboratory contains a 250 h. O. engine, which drives a large centrifugal pump capable of delivering 14,000 gallons of water per minute. The water is made to flow through a long flume in which obstructions are arranged so as to produce as far as possible flood conditions of flow. It is expected that these experiments will greatly aid in the solution of some of the perplexing problems arising in connection with water flow under unusual and abnormal conditions.

Director J. C. Kendall of the New Hampshire State Experiment Station has returned to Durham from the recent dairy conference at Littleton, very much gratified at the interest taken by the dairymen of the northern part of the state in that meeting. Mr. Kendall says that the conference sessions were attended not at all by townspeople exclusively, but by dairymen from all over the northern section of New Hampshire.

The address by Senator J. W. Prentiss, president of the Cheshire County Holstein Breeders' Association, of Alstead, was not given because he was occupied in a series of milk production record observations. Senator Prentiss, like many other dairymen in New Hampshire, is keeping an accurate record of his cows.

Director Kendall says that there are many indications which point to material improvement in the dairy industry in the state, the farmers showing more and more interest in modern methods and general stock improvement.

John M. Jones, of the Animal Husbandry department, is expecting in the near future a visit from Dr. C. B. Davenport of the Carnegie Institute of Washington, D. C. Dr. Davenport is the director of the department of experimental evolution and is coming to New Hampshire College to investigate a series of experiments conducted by Mr. Jones with sheep of the Rambouillet-Hampshire cross. The experiments are part of an elaborate investigation into the laws of heredity.

Dr. A. E. Richards of the department of English is making preparations for the third annual inter-scholastic prize speaking contest, which will be held at the college on Friday evening May 8.

PHYLLIS'S INHERITANCE.

Clever Drama By Student Talent.

Phyllis's Inheritance, a comedy in three acts, was presented last Monday evening in Thompson Hall under the auspices of the Tri Alpha Sorority. The cast was announced in the last week's issue of the New Hampshire except that owing to Mr. Montgomery's illness his part was taken by Mr. John Thompson.

The plot centered about the efforts of Mrs. Phyllis Morningside, played by Miss Murphy, to obtain her uncle's legacy, which she can secure only by marrying his adopted son. Her only clue as to his identity is that his initials are P. M. and that he is soon to call upon her. The fact that she is several times deceived by the appearance of various gentlemen of the same initials gives rise to numerous comic situations. The mystery is finally solved by the discovery that the adopted son is none other than her own husband.

Miss Mary Murphy in the leading role interpreted her part with characteristic excellence. W. S. Bartlett, as her husband, did full justice to his part. The clever work of the remainder of the case was shown by the evident enjoyment of the large audience. The College Orchestra rendered selections in its usual pleasing manner.

The interest of the girls in the athletics of the College is shown by the fact that the proceeds of this entertainment are to be donated to the fund for the construction of new bleachers for the Athletic field.

INTERCOLLEGIATE NOTES.

A book called "Athletic Training" has just appeared at Penn. It is a collection of various articles by the late Mike Murphy compiled and edited by Edward R. Bushnell, sporting editor of the "Press." The book contains 30 illustrations and is especially devoted to the study of track.

American colleges are not democratic as is the wont of collegians to boast, according to Edwin E. Sloson, the Columbia School of Journalism.

Students at Columbia are making a desperate effort to have football put back upon the calendar of sports. The faculty ruled football out several years ago.

INTER FRATERNITY MEET.

In order to get all the available track material in the college out Coach Powers held an interfraternity meet last Friday. A large representation from each fraternity competed and much new material brought out. The Beta Phi fraternity won the meet, the non-frats were second and Kappa Sigma's third. No records were broken but the time was fast in all the events considering the soft condition of the track.

DARTMOUTH WINS.

Triple Play Features Well Played Game.

In the opening baseball game of the season Tuesday April 14, Dartmouth managed to squeeze out a victory over New Hampshire State by the score of 2 to 1. Although the New Hampshire team had only been out of doors two days they played mid-season baseball that prophecies a winning team this year.

The fielding of New Hampshire was far superior to that of the up state collegians and had their batting eyes been a little better they would have easily won.

The feature of the game was a triple play pulled off by the locals in the first inning. With a Dartmouth man on first and second and nobody out. Loudon made a clean hit over second. Fernald fielded the ball and relayed it home via second base catching one man; from there Welch threw to first catching Loudon off the base while Brackett made it three by receiving a perfect throw from Cram and catching Sullivan at third. A little later in the game Cram and Capt. Brackett pulled off a snappy double play.

Bissell was on the firing line for New Hampshire and although touched up at times he kept the hits well scattered. Willard and Parrett were Dartmouth's slab artists and kept the New Hampshire batters guessing throughout the game.

Hazen was the only man that seemed to solve the opposing pitches he getting a clean double and a single.

FINAL NUMBER OF LECTURE COURSES.

Rogers and Grilley, The Feature.

As a fitting finale to an excellent assortment of musical and literary entertainments which the Lecture Course Committee has this year provided, Rogers and Grilley presented to a large audience in Thompson Hall last Saturday evening a delightful mixture of harp music and monologues. Each was an artist in his particular line, and together they formed one of the most entertaining teams imaginable.

Grilley's impersonation of an old man relating reminiscences of his boyhood days was a masterful piece of work, and it showed his wonderful skill especially in his clever use of varying facial expression. "Janny Cordeau," a French Canadian dialect piece, kept everyone in a continuous roar of side-splitting laughter, and the various other selections were all equally well executed.

If Grilley was clever with his tongue, so also was Rogers a skillful artist with the harp. From the difficult blending of two distinct melodies, through descriptive overtures to the delicate shading of tone in a harp classic by Thomas, Mr. Rogers gave an excellent entertainment.

Several numbers were rendered together, and this produced a very pleasing effect. A large crowd was in attendance, and the College Orchestra furnished music before the regular program was commenced.

Copies of the new college catalogue have come from the printers. The new catalogue has been the result of a thorough revision made first by President Fairechild and later by a faculty committee headed by Professor E. R. Groves. The arrangement of the text has been altered, the schedule omitted, and the description of courses brought up to date. The book shows many new lines of work for students next year and shows also that this year, exclusive of the one-week students, the total enrollment is 403, and that there are now fifty members of the faculty.

Prof. Fred Rasmussen of the dairy department, who is also secretary of the Granite State Dairymen's Association, announces that the association is going to do its share in teaching the coming generation in New Hampshire to grow corn.

L. A. Carlisle, of the state experiment station extension department, is organizing boy's clubs all over the state, county secretaries of the Y. M. C. A., are doing work of the same sort and boys are being taught how to grow corn in the various schools and academies that have agricultural courses. In order to get a comparison of the results, the state dairy association has decided to offer prizes for the best corn grown by boys exhibited at the annual meeting of the association the time and place of which will be announced later. This state-wide contest will be open to boys under 18 years of age and the state will be divided into two zones, the northern to include Carroll, Grafton and Coos counties, and the southern, Rockingham, Strafford, Belknap, Merrimack, Sullivan, Hillsborough and Cheshire counties. There will be \$6 \$3, \$2 and \$1, prizes in each zone and a \$25 silver cup will be given the boy exhibiting the best 10-ear sample of corn.

COOPERATION AT NEW HAMPSHIRE COLLEGE.

The cooperative movement goes along with increasing momentum the world over. It grows because it is profitable, because it brings people into association, because it brings the democratic spirit into business.

The principles of cooperation have been applied to all kinds of business; they have been applied to both the producer and the consumer with increasing success, while cooperative rural credit is gaining in prestige every day. Let us look for a moment at one phase of this subject, the College Cooperative Associations. Harvard first established a cooperative store in 1882, which has proved so great a success that similar stores have been established at several other American universities such as, Yale, Princeton, Wisconsin, etc.

Why cannot New Hampshire College with her fraternities, her boarding clubs, dormitory, faculty and increasing student body have such a cooperative store as the Harvard one? We could have a central association made up of each unit, which would furnish to each those supplies which it needs. This same central association could become a branch bank of the Strafford National Bank of Dover and thus give the College people banking facilities.

As in any such business organization working capital is necessary therefore each unit would be obliged to subscribe for a definite and equal amount of capital stock. On this capital stock outstanding, a stated amount of interest would be paid, the remaining profits could either be put into a surplus fund or dividends could be declared and divided on the amount of business done.

It would be democratic by giving an equal vote to every member, and equitable by giving all the profits to those who create them.

H. R. McCartney, '14.

John W. Powers, who goes from the B. A. A., athletic department to become coach at New Hampshire State College, goes to his new work highly recommended. It is believed that the New Hampshire boys have secured a coming coach in Powers.—From The Boston Journal.

As a result of the cleanup movement, 100 students of the University of Illinois wielded shovels, picks and hoes cleaning the streets of the town.

The alumni of Princeton University have presented President Wilson with a bronze tiger.

From 1000 Freshmen at the University of Pennsylvania, 18 are studying Greek. They are training for college presidents.

ALUMNI BANQUET.

Mr. T. J. Laton, secretary of the New Hampshire College Alumni Association, recently took a vote of the alumni of the college on the question of the place for holding the annual alumni banquet. The alumni voted 3 to 1 in favor of Durham over Boston.

The banquet will be held this year May 2, probably in the college gymnasium, at 7 o'clock. After the banquet there will be speeches, a general reunion and dance. The banquet will be furnished by the college to the alumni and members will be entertained for the night at the various fraternity houses.

The president of the association, Mr. W. F. Furrington, is making arrangements for a list of speakers, and it is expected that there will be representatives of almost every phase of alumni activity.

President Fairchild has received the acceptance of Dr. George A. Gordon, pastor of the New Old South Church, Boston, as commencement speaker. Dr. Gordon will speak June 10th. His subject has not yet been announced.

NEW REQUIREMENT.

"Students graduating from the two-year course in 1914 and thereafter must present to the dean on or before the second Tuesday preceding their graduation satisfactory evidence of having had practical experience in farm work either thru having lived on a farm for at least two years subsequent to the age of 12, or thru having worked on a farm for at least four months subsequent to the age of 15."

The above requirements will be satisfactorily met if a letter is received from parents or other competent person stating when and where such practical work has been carried on.

Per Order,
The Dean.

Members of the scientific departments of the college heard a lecture here this week given by Professor O. L. Parsons, chief chemist of the federal bureau of mines, who has just returned to Washington from a short trip to New England.

Professor Parsons was at the head of the department of chemistry of New Hampshire college for 20 years and is one of the most distinguished scientists ever connected with the institution. His investigations while here in the rare earths won for him an international reputation. He is now much interested in research work relative to radium and its curative powers for cancer. He is an ardent advocate of legislation now pending in congress which will secure to the United States much of the radium which as ore is now shipped from this country to Europe.

Professor Parsons illustrated his remarks with lantern slides showing patients before and after some of the marvelous cures which have been effected by this little understood element.

President Pounce of Brown, has announced his desire to make the ability to swim a requirement for graduation.

WHAT A DE LAVAL SAVES

OVER ANY OTHER SEPARATOR OR
CREAMING SYSTEM.

Quantity of cream that no other separator will recover completely, particularly under the harder conditions of every day use.

Quality of cream is evidenced by De Laval butter always scoring highest in every important contest.

Labor in every way over any gravity system, and also over any other separator, by turning easier, being simpler, easier to clean and requiring no adjustment.

Time by hours over any gravity system, and as well over any other separator by reason of greater capacity and the same reasons that save labor

Cost since while a De Laval cream separator may cost a little more than a poor one to begin with it will last from ten to twenty years, while other separators wear out and require to be replaced in from one to five years.

Profit in more and better cream, with less labor and effort, every time milk is put through the machine, twice a day, or 730 times-a year for every year, the separator lasts.

Satisfaction, which in no small consideration, and can only come from knowing you have the best separator, with which you are at all times accomplishing the best possible results.

Easily proven—these are all facts capable of easy demonstration and proof to any user or intending buyer of a cream separator. Every De Laval agent is glad of a chance to prove them by a De Laval machine itself—without the slightest obligation on your part unless entirely satisfied.

If you don't know the nearest De Laval agent, simply address the nearest main office as below.

NEWS AND NOTES.

New Hampshire college must have another dormitory for girls at once. This was decided at a meeting of the board of trustees here April 5 and the decision has been made known. There is a girls' dormitory here now, but it is filled to overflowing, all of the available rooms in private houses are taken, and the present indications are that there will be fifty more girls in the entering class next fall. This means that next year the total number of women students in college will be doubled, as was the case this fall.

If the fifty new girl students were to arrive today, there would be no place in the town where they could spend the night. To provide facilities, a committee of the trustees was empowered to arrange for a dormitory. There is no hint in the report as to what steps will be taken to secure the building.

The trustees made another decision of great interest to the undergraduates. They have decided to lease to fraternities for a long term of years tracts of land for fraternity houses and have decided that these tracts shall all be in the McDaniel field on the main street of the village opposite the residence of the president. The student organizations will be given the land rent free.

The new \$80,000 scientific building is to be named DeMerritt Hall in honor of Albert DeMeritt, who died last fall. Mr. DeMeritt was a member of the old families of this part of the state and as representative of Durham at Concord labored loyally to secure the appropriation which made the erection of the much needed structure possible.

A committee of the trustees has been named to complete the college sewer system, and the president was authorized to make arrangements for taking a vote of the alumni for alumni trustee to succeed H. L. Boutwell, of the class of 1882.

Lucien Thompson, now of Denver, Colorado secretary of the board of trustees for 21 years, has resigned and his resignation was accepted by the board.

There will be several faculty changes next year in the college as the term here of Lieut. C. A. Hunt U. S. A., professor of military science, expires July 1 and the trustees have accepted the resignations of Prof. F. E. Cardullo, of the department of mechanical engineering, John M. Jones, instructor in animal husbandry, and Miss Miriam L. Hobbs, purchasing agent.

R. R. Sanborn ex-'14 (Rah Rah) announces the arrival of a son.—Carleton Ira.

Paul M. Phillips '12 was married on Wednesday, April 8 to Miss Josephine Hoyt at Newton Highlands, Mass. Mr. Phillips is supervisor of the dairy department of the Lyman School, Westboro, Mass.

J. M. Jones animal husbandman of the state experiment station, has handed his resignation to Director John C. Kendall. He will take a similar place in the experiment station of Texas.

Mr. and Mrs. C. S. Richardson of Claremont, N. H., are rejoicing over the birth of an eleven pound daughter, Isabel Sarah. C. S. Richardson is a member of the '09 class.

FARMER SKINNER'S GAL.

"It ain't everybody I'd trust my little gal to, said old Farmer Skinner to the love-lorn swain, who had become enamored of Miss Sally Skinner, and wished to carry her from the loving care and shelter of the home next.

The "little gal," who was five feet 11 inches high in her bare feet, as she was at that moment, hid her happy, blushing face on the dear, fond father's shoulder and wept happy tears as he said to Sally's deeply moved and sympathetic young lover: "You must take great care of my wee birdling, Jack; recollect that she's been raised kind o' tender like."

"Two acres a day is all I've asked her to plow, and an acre of corn a day is all she's used to hoeing. She kin do light work, such as making rail fences and digging post-holes and burning brush, and all that, but ain't used to regular farm work, and you mustn't ask too much of her. It's hard for her old dad to ve his little sunshine up. He'll have to split his own firewood and dig his own taters now, but go, birdie, and be happy."

On the evening of Friday, April 17th, the Girls' Glee Club in co-operation with that of Robinson Seminary gave a concert at the town hall in Exeter. The entertainment was excellent throughout, and reflected great credit upon the organization. A large and appreciative audience was in attendance.

It is better to have fussed and flunked than never to have fussed at all.—Ex.
