STATISTICS REGARDING AGRICULTURAL COURSES.

Professor Taylor has just compiled some statistics concerning the graduates of the four-year and two-year courses in Agriculture. The figures are based upon the number of graduates in each of these courses during the past ten years or from 1904 to 1913 inclusive. During this period which represents the time of Professor Taylor's service in the institution, 47 students graduated from the four-year and 104 from the two-year course in Agriculture.

The most interesting facts are as follows:

First, proportion of four-year graduates engaged in practical farming, 51% of two-year graduates 77%.

Second, proportion of four-year graduates engaged in practical Agriculture remaining within the state, 71%; proportion of two-year graduates who were New Hampshire boys engaged in farming within the state, 84%.

Third, proportion of four-year graduates entering the service of agricultural colleges, Experiment Stations, or the U. S. Department of Agriculture, 23%.

Fourth, proportion of four-year graduates becoming teachers of Agriculture and allied subjects in secondary schools, 26%.

The following table will show the total number of agricultural students, number of two-year students, and the relative percentage of two-year students enrolled in the college for each of the past nineteen years.

Year	Total Agricultural Students	Two-year Students	Percent of two-year Students
1913	181	85	47
1912	167	77	46
1911	149	76	51
1910	122	59	48
1909	95	47	50
1908	72	25	35
1907	51	13	26
1906	51	13	26
1905	68	30	40
1904	59	24	41
1903	54	18	33
1902	49	10	20
1901	64	19	30
1900	59	20	34
1899	54	18	33
1898	34	5	15
1897	27	9	33
1896	20	8	40
1895	9	6	66

WORCESTER N. E. LEAGUE TAKES EASY VICTORY.

Worcester New England League team had no difficulty in defeating New Hampshire at Worcester, Thursday, April 23, by the score of 15 to 2. The Worcester batters made merry with Paulson's curves, hitting the ball almost at will.

—On last Wednesday evening, Prof. Wm. H. Wolff gave an interesting and instructive talk before the N. H. C. Horticultural Society on "Bees."

SHE SAW HERSELF.

"Farmers," said the fairy city visitor, "are just as dishonest as the city milkmen."

"How d'ye make that out?" asked the farmer's wife.

"This morning," said the girl accusingly, "with my own eyes I saw your hired man water the cows just before he milked them."

RHODE ISLAND WINS FROM N. H.

New Hampshire went down to defeat at the hands of their old rival Rhode Island at Kingston, Saturday, April 25 by the score of 5 to 1.

H. W. Sanborn was on the mound for New Hampshire and although he pitched a good game his support was ragged at times. Lussier, who did the twirling for Rhode Island, allowed New Hampshire but three hits, these being scattered.

Rhode Island scored first in the sixth inning. Tully got to second on an error by R. Brackett. McLeod hit to Sanborn who juggled the ball too long. Seifert hit to R. Brackett who threw to second catching McLeod. Reardon muffed Nichols fly, Tully scoring.

A couple of errors by R. Brackett and a single by Tully netted Rhode Island two more runs in the seventh. New Hampshire scored her only run in the eighth when, by an error, passed ball and a hit by Sanborn, Hobbs scored.

A hit by Nichols and two errors by W. Brackett gave Rhode Island her remaining two runs in the eighth.

The score:

Rhode Island		bh	po	a	e
Sullivan, lf		0	3	0	0
Lennox, ss		0	2	1	1
Tully, 2b		2	2	1	0

Two base hits, W. Brackett, Lawrence. First on balls off Sanborn, Lussier. Struck out by Lussier, 6, Sanborn 3.

ELECTRICAL ENGINEERING TRIP.

On the last Monday of vacation, the Senior Electrical Engineering Class, with Prof. Hewitt, visited the Vernon Plant of the Connecticut River Power Company. This plant is located at a bend in the Connecticut River, near Vernon Vt., about six miles south of Brattleboro. There are eight 2300 volt turbo-generators at the plant with a total output of about 3,000 horsepower. The voltage is stepped up through transformers of 66,000 volts and sent out over the three transmission lines, one of which is to Worcester, Mass., a distance of 65 miles.

This is one of the few typical Hydro-Electric developments in this part of the country and the class was very fortunate to be able to visit it, since many hardships were endured by several members in going and returning to Durham.

NORWICH DEFEATED.

N. H. Scores Shut-out Against Vt. Team.

In the second game of the season, Thursday, April 30, New Hampshire found no difficulty in defeating Norwich University by the score of 4 to 0.

A fair sized crowd was present in spite of the cold wind that blew straight down the field.

Bissell was New Hampshire's slab artist and only four hits were secured off his delivery. All four of these were by O'Dowd who connected for two three baggers and two singles out of four times at the bat. For Norwich, Sleeper pitched fairly good ball but his support was poor throughout the game.

New Hampshire scored her first run in the fourth inning. Hobbs, the first man up connected for a single, going to second on Welch's hit. R. Brackett struck out, but Hazen drew a free pass filling the bases. Reardon sent a high one up to deep center, Hobbs beating the throw in. Cram ended the inning on a grounder to short.

One more run was added in the fifth inning when Bissell connected for a two bagger, going to third on a passed ball and coming home on W. Brackett's sacrifice.

The final two tallies came in the seventh. Bissell grounded out to pitcher, but Fernald hit safely and stole second, coming home on Viano's muff of W. Brackett's grounder. Hobbs was an easy out but Sleeper dropped a high that Welch sent up, W. Brackett scoring.

The score:

Three base hits, O'Dowd 2; two base hits, Bissell; First on balls, off Sleeper, Bissell 2; struck out by Bissell 10, Sleeper 3; Umpire, Quinlan.

A much discussed question was definitely settled on March 10, when the University of Pennsylvania faculty committee on athletics decided that hereafter all men who have a degree from a recognized college or university, shall be prohibited from representing the University on any athletic field.

WON IN THE TENTH.

Brown Finally Gets Deciding Run.

The poor decision of Lannigan, who umpired, snatched a victory from New Hampshire at Providence, Wednesday, April 22, and gave Brown a chance to shove over the winning run in the tenth inning, the final score being 4 to 3.

Brown started scoring in the first inning. Dike the first man up drew a base on balls and went to second on a sacrifice hit by Sewhill; Babington drew another free pass and on a wild pitch both men advanced one base; Durgin the next man up slammed a three bagger to center field scoring Dike and Babington. Dunn and Nash proved easy outs.

No more scoring occurred until the third when Brown shoved another run across on a single by Durgin and a triple by Dunn.

New Hampshire scored all her runs in the ninth. Fernald struck out but the catcher dropped the third strike and "Bucket," landed safe on first. W. Brackett sent a high one up to Dunn, who dropped the ball, Fernald going to second on the play. Woodman struck out. Welch got a clean single scoring Fernald and advancing W. Brackett to third. R. Brackett banged out a screeching three bagger sending W. Brackett and Welch home and tying the score. Reardon sent a fast one down the third base line and while R. Brackett came home, Babington threw to first to nail Reardon. According to Lannigan he nipped him by the closest of margins, but to many it looked as if New Hampshire was robbed. Henry scored on Tewhill's hit to center field in the tenth giving Brown the winning run.

Cram of New Hampshire fielded his position at first perfectly and took care of several difficult chances.

Tewhill made several clean pickups and one clever stop of R. Brackett's fast grounder in the second, getting his man at first.

The score:

Brown University		bh	po	a	e
Dike, lf		0	0	0	0

BEAUTIFYING THE COLLEGE GROUNDS.

The remarks by President Fairchild regarding the cleaning up of rubbish and debris about the college campus were especially fitting and appropriate for any institution or community. While a small matter in itself, the effect which such things have upon the appearance of a place is far reaching in its results. One of the first things which impress a visitor, and often one of the important things by which he bases his judgment of a place, is its surroundings and the general appearance of tidiness or untidiness, which pervades the campus.

It has been stated by a noted architect that, in his opinion., Cornell University was the only educational institution in the East that had better advantages for developing its campus and improving its grounds than New Hampshire College. If such be the case, that we are endowed with so great opportunities, it behooves the student-body of the present generation to guard these treasures and see to it that they are not misused and abused. But with all of our opportunities for future development, even at the present time, New Hampshire College may justly boast of possessing one of the most beautiful campuses in New England. There are, however, a few rough sites which might be improved with comparatively little expense and exertion. While this may seem trivial, it does, nevertheless, produce a profound effect on the first opinion which the new visitor unconsciously forms. Another matter which requires only a little care but which is important in its effect is that of refraining from depositing the waste matter from our fruits, candies, etc., into the streets and sidewalks.

Such matters as these are things that appeal, to a large degree, to the prospective student, and the nearer we can approach the ideal campus the stronger, other things being equal, will be our appeal to prospective students, and the higher will our institution be regarded in the esteem of other people.

The track team of Louisiana State University is on a strike; lack of suitable out-fits is the cause given and the men say they will resume practice only when they receive their share of athletic expenditures.

In a list of figures recently given out by the University of Minnesota it was found that all but two of the ten sororities ranked higher than the highest fraternity in scholarship.

Sophomore pledging has proved a failure, especially where there are a great number of societies or fraternities, according to an inspector of Alpha Delta Phi Society of University of West Virginia.

CASQUE AND CASKET DANCE,

The ninth annual concert and ball given by the Casque and Casket Society will be held this year in the College gymnasium on the evening of Friday, the 15th. This event is the opening number of the annual spring house parties of the various fraternities of the College. The College Orchestra has been engaged to furnish music for the occasion. Simpson will cater at intermission. A fully enjoyable time is anticipated by all, and especially welcome at this time are the alumni. Following is the unofficial program of the festivities:

Friday afternoon—Guests arrive.
Friday 8.00 P. M.—Casque and Casket Dance at gymnasium.

Saturday, 2.00 P. M.—Track meet at Athletic Field; Univ. of Vermont vs New Hampshire.

Saturday 8.00 P. M.—Dancing at various fraternities.

Sunday—Departure of Guests. "Auv Wiedersehen."

SENIOR SKULL DANCE.

The Grange Hall was the scene of a merry "the dansant" last Friday evening. The occasion was a social dance given by the Senior Skulls to their friends of the fair sex.

Following the concert program a carefully arranged dance order of twenty numbers was commenced. The guests made merry until a late hour. At intermission a collation of ices and fancy sweets was served. The favors of the evening were tasty orders. Mr. and Mrs. John C. Kendall acted as chaperones. Music for the occasion was furnished by Messrs. Ward and Langley on the piano and traps.

NEWS AND NOTES.

Under the able and systematized direction of instructor James H. Cahill, the students in the engineering course are performing an important work for the College and at the same time are gaining valuable practical experience for themselves. Owing to the financial handicap under which this department is laboring, the Junior engineers are working industriously at the task of augmenting the mechanical equipment of the shops. Such implements as extra large milling cutters, millend tools of all sizes, etc., are being made of the finest of tool steel. In addition to this, they are repairing all the old lathes and putting them into first class condition.

The Sophomore engineers are doing excellent work under the new order of things, and at this time are farther advanced in machine work than any previous class has been in the corresponding time. The new experiment of giving freshmen practical work in this line is also proving very successful.

"Old Penn" the weekly review of the University of Pennsylvania publishes one of the songs of the University each week.

In a recent vote taken at Columbia on the honor system, 429 out of 623 votes favored it.

HAD A RELAPSE.

Into a general store of a town in Arkansas there recently came a darkey complaining that a ham which he had purchased there was not good.

"The ham is all right, Zep," insisted the storekeeper.

"No, it ain't boss," insisted the negro. "Dat ham's shore bad!"

"How can that be," continued the storekeeper, "when it was cured only last week?"

The darkey scratched his head reflectively and finally suggested:

"Den, mebbe it's had a relapse."

WHATSOEVER A MAN SEWS.

Father was walking to Sunday school with little Johnny, and endeavoring to improve the time by teaching Johnny his golden text, the words of which were: "Whatsoever a man soweth, that shall he also reap." Johnny repeated it after his father several times, and seemed to have mastered the correct wording.

As they drew near the Sunday school, the father gave Johnny his last rehearsal. "Now, son," he said, "let's have the golden text once more without any help from me."

This is what he got from Johnny: "Whatsoever a man sews always rips." —Harper's "Bazaar."

Penn State will probably require one year's residence as a prerequisite to practicing in varsity athletics in the future. This rule has been adopted by the greater colleges and universities as the final proof of the squareness of their athletics.

WHAT A DE LAVAL

SAVES

OVER ANY OTHER SEPARATOR OR
CREAMING SYSTEM.

Quantity of cream that no other separator will recover completely, particularly under the harder conditions of every day use.

Quality of cream is evidenced by De Laval butter always scoring highest in every important contest.

Labor in every way over any gravity system, and also over any other separator, by turning easier, being simpler, easier to clean and requiring no adjustment.

Time by hours over any gravity system, and as well over any other separator by reason of greater capacity and the same reasons that save labor

Cost since while a De Laval cream separator may cost a little more than a poor one to begin with it will last from ten to twenty years, while other separators wear out and require to be replaced in from one to five years.

Profit in more and better cream, with less labor and effort, every time milk is put through the machine, twice a day, or 730 times a year for every year the separator lasts.

Satisfaction, which in no small consideration, and can only come from knowing you have the best separator, with which you are at all times accomplishing the best possible results.

Easily proven—these are all facts capable of easy demonstration and proof to any user or intending buyer of a cream separator. Every De Laval agent is glad of a chance to prove them by a De Laval machine itself—without the slightest obligation on your part unless entirely satisfied.

If you don't know the nearest De Laval agent, simply address the nearest main office as below.

THE DE LAVAL SEPARATOR CO.,

165 Broadway, NEW YORK. 29 E. Madison St., CHICAGO

50,000 Branches and Local Agencies the World Over.

HAS BEEN ACCOMPLISHED.

Following are some of the principal things accomplished in the Wilson Administration's first year:

1. A new tariff law making sweeping reductions in the taxes on imports, and, it is claimed, in the future cost of living.

2. A law to raise an important part of the Government's revenues by a tax on the incomes of the rich and the well-to-do.

3. An entire new system of banking and currency, which, it is said by bankers, will forever prevent such great money panics as in the past have brought periods of "hard times."

4. A larger measure of self-government for the Philippines, and a promise of independence at last.

5. The end of "dollar diplomacy," which had turned our foreign embassies and legations into agencies for money-making by American capitalists. Withdrawal by the United States from the six-power loan to China.

6. Large extension of the parcel post, and reduction of rates.

7. The navy turned into a great institution for the education of the enlisted men.

8. A law passed, for building a thousand miles of government-owned railroad in Alaska.

9. Treaties of peace and arbitration with many nations.

10. Steel manufacturers compelled to compete with one another in bidding for government contracts.

11. (This is regarded by President Wilson as the most important of all) "the elimination of 'Wall Street' as a power in the Government."

Two more measures are expected to pass before Congress adjourns. The law against trusts is to be changed, to give the Government somewhat greater powers. That part of the Panama Canal tolls law which lets American coastwise ships go through free, is to be repealed, being regarded as a violation of the Hay-Pauncefote treaty.—Ex.

THERE WAS HOPE.

The office boy walked into the sanctum of the editor of the Peapod Breeze and said, "There is a tramp at the door, and he says he hasn't had anything to eat for a week."

"Fetch him right in," said the editor. "If we can discover how he does it we can run this paper for another week."—"Exchange."

Harry—"I understand Gertrude Gadalotte married a man who made a big fortune by a lucky speculation in soap. Grace—"Yes, and he disgraced her while they were on their honeymoon." Harry—"How did he do it?" Grace—"Gertrude wanted the other passengers to think an ocean voyage was an old story to them, when her husband, the first crack out of the box, pointed to a row of life preservers and asked the captain what was the idea of all the extra tires."—Life.

Harvard College has the unique reputation of having a student who writes love letters for his fellow students. He has established prices depending on the kind of letters written.
