

The New Hampshire.

Vol. 3, No. 76

CONCORD, N. H., MAY 6, 1914

PRICE 5 CENTS

CHAPEL EXERCISES.

Mr. Frank Sanborn of Concord, Mass., was the speaker in chapel on Wednesday afternoon, May 6th. Mr. Sanborn came to us as one of the few living representatives of that past generation of literateurs and statesmen whom New Hampshire now so sincerely honors. He is known not only as having been a friend of Longfellow, Thoreau, and all the other great men of their time, but also for his own breadth of knowledge as a historian and traveler, and for his researches in the field of criminal pathology.

His address concerned the earlier history of the state of New Hampshire. It has had a rigorous career as a state, and has enjoyed a remarkable and continuous growth since its early settlement. Mr. Sanborn has seen the time when the foreign immigrant in the towns of New Hampshire was a rarity. His talk was enlivened throughout by reminiscences that attested his personal connection with men and events that are now a part of history.

The depth and exactness of his knowledge is, in a man of his years, quite wonderful. The deep impression made upon the student body was that of a man of undiminished vitality and mental powers speaking to them from and of the great past, and all this made this venerable historian, scientist, and gentleman present an extraordinary and memorable figure.

THE MORROW ELECTRIC VACUUM CLEANER.

The Home Economics department of the college has added to its equipment an electric vacuum cleaner which is considered the best of its kind. This was accomplished through the efforts of Professor Cardullo, who prevailed upon the Morrow Co., of Wankegan, Illinois, to present the cleaner to the department. No conditions accompanied the gift except that it be shown and demonstrated to visitors of the laboratory.

The Morrow motor, which it took three years to perfect, is encased in a strong aluminum casing. This motor is guaranteed by the General Electric Company as well as by the Morrow Company. It can be operated by either direct or alternating current. The bearings are of phosphor bronze and the lubrication is by means of grease cups.

The cleaner contains a double action brush and a two and a half mile-a-minute suction fan which revolves at the speed of 150 miles an hour. It has both a metal extension, tube and a flexible one with attachments for cleaning walls, radiators, books, portiers, etc. This combination of remarkable efficiency weighs only eight and a half pounds and may be attached to any electric light socket. Previous to the presentation of the cleaner to the department, Professor Cardullo bought one and tested it in the engineering laboratory. He found that it was capable of doing more than the company vouched for and he recommends it most highly saying it is the most powerful and efficient of any of the portable type of cleaners of which he has the knowledge and he feels sure it will meet with deserved success.

Professor Whoriskey will be one of the judges of the Milford High School and Sanborn Seminary debate on May 15.

CHRISTIAN ASSOCIATION OFFICERS FOR 1914-15.

Pres., R. C. Bowden. First Vice Pres., G. M. Loomis. Second Vice President, R. W. Huse. Sec. D. P. Crockett. Treas., C. G. Paulson. Committees.—Membership, Chairman, V. A. Perkins, W. S. Bartlett, D. H. Goodwin, A. O. McCartney, R. W. Huse. Program, R. C. Graham, G. W. Chase, W. H. Thomas; Bible Study, S. G. Johnson, F. W. Fitch, V. W. Bachelor, J. Hartt; Extension, D. P. Crockett, G. M. Loomis, L. F. Brown; Social Service, W. J. Nelson, B. K. Baghdigian, W. E. Howard; Mission Study, H. S. Kidder, H. C. Robinson, C. W. Glidden; Social, R. J. Bugbee, S. W. Wentworth, A. L. Murdock; Finance, C. G. Paulson, R. A. Knight, H. F. Jenkins.

SCHOLARSHIPS AID STUDENTS.

Eight scholarships for next year paying from \$250 to \$500 each have just been offered to graduate students by the Ohio State University. The students receiving these scholarships are required to devote their entire time at the University to graduate study and research work.

The University pays also every year several graduate students from \$250 to \$300, each to act as assistant in the laboratories. Many students are enabled to stay in school and obtain advanced degrees by filling these positions.

Greek letter fraternities at Columbia University plan to organize within each chapter house a tutoring school on a large enough scale to bring the backward students in their membership up to the standard. There will be no charge. The fraternities will refuse admission to students who are unwilling to study and keep up the general average of scholarship. This is, in a way, a concession to the faculty, which has protested that the fraternities have been conducive to poor scholarship, extravagance and too much attention to society.

PROF. GROVES TO ATTEND CONFERENCE.

Prof. E. R. Groves of the Department of Psychology and Sociology is attending the National Conference of Charities and Correction, which is being held at Memphis, Tenn. This is a conference of social workers of all kinds, and this year special attention will be paid to southern problems. Last year Prof. Groves attended the conference at Seattle, Washington.

INTERCOLLEGIATE NOTES.

It has been the custom of the Freshmen at Northwestern University to hold an annual "Trig Cremation" at which every Freshman in the Trigonometry class burned his text book. This year fireworks were substituted. The customs of our present age certainly are deteriorating.

The women of the University of California have taken up track athletics.

The Legislature of California has made an appropriation of almost \$4,000,000 to her state university for the next two years.

Lane, secretary of the interior has expressed himself as being opposed to national universities.

WORCESTER P. I DEFEATED.

N. H. Show Up Well at Bat and in Field.

New Hampshire had no difficulty in defeating the Worcester Polytechnic Institute aggregation last Saturday by the score of 7 to 5.

Bissell pitched good ball for five innings, being relieved by Graham. The latter got through the sixth inning all right but was landed on in the seventh for four runs before he was pulled out and Paulson substituted.

Hobbs and Welch scored two runs in the first inning on a couple of errors and a base on balls. Two more were added in the third on hits by Hazen and Reardon and a base on balls by R. Brackett. In the fourth inning Cram and Bissell contributed a couple of points more and Welch scored the final tally in the seventh.

Worcester scored one run in the second on two errors and a passed ball. They did not score again until the seventh when they found Graham for four runs.

The score:	
New Hampshire	bh po a e
Fernald, cf	0 2 0 0
W. Brackett, ss	0 3 2 2

SENIOR-JUNIOR BANQUET.

At a joint meeting of the Senior and Junior classes on Wednesday noon, it was decided that they should unite in an excursion down the bay and a banquet. The day agreed upon was Tuesday, May 19th, so that the trip may furnish the necessary relief and relaxation which inevitably follows the ordeal of government inspection, which comes on Monday, the day before.

WIRELESS STATIONS IN DURHAM.

Marvelous Science Has Many Able Champions.

During the recent wonderful progress in the art of aviation, the advance in development of wireless telegraphy has been marching steadily forward. It has enlisted in the work several of the students of New Hampshire, and in the hands of these coming scientists has already accomplished noteworthy results. Through individual research coupled with organized effort, their work is coming more and more to be recognized and appreciated by the student body as well as the faculty, and has also even incited the interest of many of the townspeople of Durham.

Freeminent among the representatives of this art here at New Hampshire is the work of L. W. Davis '16. With a private set of instruments he has accomplished what to the average man appears to be wonders. Sitting quietly in his study he can get Washington standard time twice daily, at 12:00 noon, and 10:00 p. m., correct to one one-hundredth part of a second. This is sent forth into the ether from the station at Radio, Virginia, which is the most powerful of the United States government wireless stations. His set of instruments has also enabled him to hear all of the government stations along the Atlantic coast from Cape Elizabeth Maine, to Beaufort, North Carolina, including Portland, Me., Portsmouth, N. H., Boston, Mass., Cape Cod, Mass., Newport, R. I., Fire Island, Long Island, N. Y., New York (Brooklyn) N. Y., Philadelphia, Pa., Annapolis, Md., Washington, D. C., Norfolk, Va., Arlington, Radio, Va., Beaufort, N. C., as well as numerous commercial and ship stations along the coast.

Among the other experimenters in wireless here are R. F. Hayes, '16, N. C. Hurd, '16; W. H. Barr, '16; J. E. Frisbee '17, and R. L. Nelson, '17. They are now working on instruments which they hope to have in use very shortly.

The wireless squad of the military department is working consistently on sets of instruments for use in the field. This squad consists of all these men above named, and good results of their work are expected in the near future. With the field equipment which they are now perfecting they will probably be able soon to transmit messages under favorable conditions over distances of from 20 to 25 miles. This will of course be of inestimable value to the military department in the practice of field tactics.

Heretofore it is probable that the great majority of people in Durham have not realized that the standard time, the weather reports, and the important and national as well as international news items that are flashed through space are being daily picked out of the heretofore fathomless ether by these local experimenters, but this is nevertheless a fact. It is an interesting and important fact, and one that is well worth remembering.

ADDITIONS TO STAFF.

At a meeting of the New Hampshire staff of editors and managers held Thursday afternoon in Thompson Hall, L. W. Crafts '15, H. F. Jenkins, '17, and R. W. Huse, 2 yr, '15 were elected to serve on the board as associate editors.

AN OPPORTUNITY.

The students of New Hampshire College, who are interested in the progress and future welfare of their alma mater, will be given an excellent opportunity to show their interest during the coming interscholastic prize reading contest and athletic meet. Students from all parts of the state will participate in these contests, and this will afford a most opportune chance to influence some one, who is undecided where to go after graduating from "prep" school, to cast his or her lot at New Hampshire. The treatment and feeling of good fellowship which they receive from us on these occasions will have no small weight in determining their future college career.

Let us remember that these visitors are our guests and that it is our duty to treat them as such, and render to them the best we have. Not only will such a spirit serve to uplift New Hampshire before "prep" school and prospective students but will also tend to advertise the college and make a favorable impression in the minds of the citizens of the state. First impressions are often lasting and it is therefore highly essential that these impressions be favorable on the plastic minds of the New Hampshire youth.

As students of the college, let us not be loath to point out the advantages and opportunities offered by our institution and do all in our power to make the visitors feel welcome.

NEWS AND NOTES.

Dr. Farichild will speak at the annual meeting of the Manchester, Y. M. C. A. Sunday, May 1st.

N. H. C. Extension Service is testing out the growing of alfalfa in New Hampshire. It is endeavoring to get seeds which will be adapted to New England climatic conditions, and hopes to have about 100 lots located in different parts of the state.

Athletics, contrary to the enthusiastic belief of many an alumnus, do not pull very strongly as a factor in attracting men to a particular college, provided, of course, one can believe the undergraduate in an introspective mood. A Dartmouth investigation showed only five men out of nearly four hundred who confessed that athletics brought them to Hanover. The influence of Dartmouth graduates and undergraduates was the largest factor.

At the U. of Michigan during the past four years, eleven championships have been decided of which eight have gone to Maine.

The Saint Louis Americans have fifteen collegians in their squad this year.

Rules For Growing A Mustache Crop.

I. Proper preparation of the proposed area is best by regular and frequent liberal massage, administered by the osculatory process, preferably by a female to avoid unpleasant friction.

II. Use a nurse crop on the surrounding parts for the first few days to encourage the best efforts from alleged growth. (This also surprises the neighbors when the nurse crop is harvested.)

III. As the crop propagates by rhigomes, it can be hastened by scratching at intervals with a borrowed razor.

IV. Application of commercial fertilizer is not needed for quite obvious reasons.

V. Data has been gathered by T. T. Tucker on the old tradition that smeared cream licked off by the house cat stimulates growth, but he reports that it has no foundation on fact.

VI. Good stooling of the young shoots is only gotten by exercise of patience and continued stroking with thumb and forefinger (either hand.)

VII. Frequent top working and pasturing back results in stand that does not lodge easily but stands up well for harvest.

VIII. The first few crops should be harvested only in the secrecy of one's own chamber lest jealous people hurl calumny or other household articles.

Attention to these suggestions will result in time in a luxurious growth of hissute adornment that will cause the envy of even C. A. LeClair.

THE COUNTRY BOY'S CREED.

I believe that the country which God made is more beautiful than the city which man made, that life out of doors and in touch with the earth is the natural life of man. I believe that work is work whenever I find it, but that work with nature is more inspiring than work with the most intricate machinery. I believe that the dignity of labor depends not upon what you do but how you do it; that opportunity comes to a boy on the farm as often as to a boy in the city; that life is larger and freer and happier on the farm than in the town; that my success depends not upon my location but upon myself, not upon my dreams, but upon what I actually do; not upon luck, but upon pluck. I believe in working when you work, playing when you play, and in giving and demanding a square deal in every act of life. Ex.

INTERCOLLEGIATE NOTES.

Ware Hall, one of the most exclusive of the private dormitories at Harvard, will become an apartment house at the end of the present college year. The compulsory residence of freshmen in their special dormitories and the seniors in the college yard dormitories is the cause.

The Harvard Library has acquired in the last year 7000 pamphlets on English history between 1600 and 1800, and the collection now rivals that of the British Museum, which is the best in the world.

THE BALMACCAN

For a New Styled Coat is a much abused garment.

We are selling a lot of good Balmaccans in prices ranging from \$10 to \$20 that make friends for this store. But we see firms advertising to give a Balmaccan with any \$20 suit. Now such articles should never have the word Balmaccan attached to them.

We can buy such coats, but do not and advise our customers not to even accept them as a gift as they would be ashamed to wear them after they get them, and of course they are paying for them in an indirect manner.

Better buy a good \$20 suit, where it contains \$20 suit value.

Special patterns in \$12 and \$15 Balmaccans are ordered for special customers without any extra charge.

INTERCOLLEGIATE NOTES.

Coach George F. Conners of the Exeter Track Team is reported as successor to Mike Murphy at Pennsylvania.

The University of Pennsylvania is considering compulsory vaccination for all students.

In 150 leading American colleges there are 110,000 students, of which 18,000 are associated with teams which participate in intercollegiate athletics.

A graduate of Princeton in the class of '63, has offered to build and present to Princeton University for the use of the athletic association a stadium costing \$300,000 and seating 41,000 persons.

Sixty men at Michigan Agricultural College petitioned the faculty to offer a course in the study of the liquor problem with college credit.

University of Texas has a picture show owned and operated by the students. The profits help needy boys.

A "blanket tax" is proposed for athletics at Ohio State University. This will be a yearly assessment of five dollars on every student in the University, and will entitle them to entrance to all games and meets, and membership in the athletic association. The question will be put up to the student body, and from the sentiment now shown, should pass by a large majority.

A large electrical show has just been held at Ohio State University. It included apparatus and instruments worth thousands of dollars collected from all over the country. The entire field of modern electricity was covered from the wireless telephone to such "froakish" stunts as frying eggs on ice and running motors under water.

This very experience mayhap has been your experience, and you too may have questioned why it is that with Wyandotte Dairyman's Cleaner and Cleanser a certain quality of cleanliness is produced that is peculiar only to Wyandotte Dairyman's Cleaner and Cleanser-

To thoroughly appreciate why this is true one should realize that Wyandotte Dairyman's Cleaner and Cleanser represents years of study and experience in the manufacturing of a material made specially for dairy cleaning purposes. By gradual improvement in quality and by bettering the methods of manufacturing there has been given to Wyandotte Dairyman's Cleaner and Cleanser that certain touch of perfection which years of experience makes it possible to obtain.

And as you probably know, no claim for Wyandotte Dairyman's Cleaner and Cleanser is ever made that is not upheld by a guarantee of the highest quality. Your dealer can supply you in sacks. For kegs and barrels write your regular dairy supply house.

DE LAVAL CREAM SEPARATORS are used exclusively by 98% of the World's Creameries

TEN YEARS AGO THERE WERE a dozen different makes of creamery or factory separators in use. Today over 98 per cent of the world's creameries use De Laval Separators exclusively.

IT MEANS A DIFFERENCE OF several thousand dollars a year whether a De Laval or some other make of separator is used in a creamery.

EXACTLY THE SAME DIFFERENCES exist, on a smaller scale, in the

A De Laval Catalog, to be had for the asking, will make plain the many points of superiority of De Laval Cream Separators

THE DE LAVAL SEPARATOR CO.,

165 Broadway, NEW YORK. 29 E. Madison St., CHICAGO

50,000 Branches and Local Agencies the World Over.

use of farm separators. Owing to the fact, however, that most farm users do not keep as accurate records as the creameryman, or test their skim milk with the Babcock tester, they do not appreciate what the difference between a good and a poor separator means to them in dollars and cents.

NOW IF YOU WERE IN NEED OF legal advice, you would go to a lawyer. If you were sick you would consult a doctor. If you had the toothache, you would call on a dentist. Why? Because these men are all specialists in their line, and you rely on their judgment and skill.

WHEN IT COMES TO BUYING A separator why not profit by the experience of the creameryman which qualifies him to advise you correctly? He knows which separator will give you the best service and be the most economical for you to buy. That's why 98 per cent of the world's creameries and milk dealers use the De Laval exclusively.

THERE CAN BE NO BETTER recommendation for the De Laval than the fact that the men who make the separation of milk a business use the De Laval to the practical exclusion of all other makes of cream separators.

Com: "When is the guard turned out?"
Freshie: "For the President and on Holidays."

Poultry Student: "What's the best way to tell a bad egg?"

Humorous Professor (?): "There's only one way—break it gently."

Man is dust! Dust settles! Be a man.

Student to slow waiter: "Bring me a salad pleas, and you might send me a postcard every now and then while you're away."

It requires considerable tact to remember a woman's birthday and forget her age.

"Faith," said Paddy, examining the broken window, "'tis more serious than I thought, 'tis broken on both sides."

Student: Doctor, my eyes have been troubling me of late. I continually see red and black spots.

Doctor: Well my boy you had better stop playing cards.

Dear—"He's a fine one to take a girl fishing I must say!"

Sweet—"Why what did he do?"

Dear—"He fished!"—Exchange.

Popular Instructors.

Have enough outside business to keep them from each course twice a week.

Give out comprehensive outlines at the beginning of the lecture, so that the class may sleep with a calm sense of duty well done.

Forget the class roll frequently.

Tell stories that give the class a chance to laugh at them (i. e., at the instructors.) Dispense Fatimas.—Punch Bowl.

Money makes the mare go, but it takes ability to win the race.

"Conductor, can you tell me how that brakeman lost his finger?" asked the inquisitive woman. "He seems to be a very nice fellow. It is a pity he should be crippled." "That's just it, mum. He is a good fellow. He is so obliging that he wore his finger off pointing out the scenery along the line."—Chicago News.

Old Friend: "What! Another marriage? I thought you told me the light of your life had gone out." Widower: "Yes; but I'm going to strike another match."—Melbourne Australasian.

Griggs—"I should say that the two keys to success are luck and pluck."

Briggs—"Sure! Luck in finding some one to pluck."—Boston "Transcript."

Missionary—"Why do you look at me so intently?"

Canibal—"I am the food inspector."—Buffalo "Commercial."

Some German friend contributes this to the cheer-up literature of the day: "Schmile und the world schmiles mit you; laugh, und the world vill roar; howl, und the world vill leaf you, undt nefer come back no more; for all uv us couldn't peen handsome, nor all uv us veer goot clothes; but a schmile vas not expensive, undt covers a world of voes."
