PRICE 5 CENTS

TAFT FAVORS SINGLE SEVEN YEAR TERM.

EX-PRESIDENT SPEAKS IN DURHAM IN LECTURE COURSE.

AUDIENCE OVER SIX HUNDRED.

Distinguished Visitor Lectures Upon Duties and Responsibilities of the Executive Office.

Under the auspices of the New Hampshire College Lecture course, ex-President William H. Taft, addressed an audience of over 600 in the college gymnasium, Thursday afternoon. He declared that he was in favor of a single, seven year term for President. "But," he continued, with a smile, "I don't want the constitution amended now. I want that to wait until we are saner. If the vandals got hold of the constitution, there is no telling what they would do to it."

LECTURES TO NEXT GENERATION.

Ex-President Taft was introduced by President E. T. Fairchild and explained that his duties at Yale permitted his making week-end excursions and that he was particularly glad to talk in a small college. He went on to say that, having tried his hand on the present generation and not having made the best work of it, he now, in lectures to students, intended to try his hand on the next generation.

His discourse, which lasted an hour and a half, dealt with the executive, his duties and responsibilities. He said that a President of the United States has more power than has the King of England or the President of France, but on the other hand he has not so much power as has the English premier.

NOT A HALT IN PROGRESS.

He declared: "It often happens that Congress opposes the president and perhaps neither succeeds in putting through their plans. Some people think this a halt in progress but I think it is an advantage to the nation, because there is a wild desire to make laws. In the last four years, 65,000 have been drawn up. This is good for the lawyers, but hard on this people."

"It is considered the highest duty of the president to veto bills which are unconstitutional" said the ex-president, "and some think that this should be the limit of the veto power." But Mr. Taft said that he believed that the president should veto any bill that he thought was not expedient, because he represents all the people and his judgment would be more impartial than that of the congressmen who have particular interests.

THE DANGER IN VETO POWER.

However, Mr. Taft saw peril in the proposal to allow a President to veto single items in appropriation bills and would let the rider evil go unchecked rather than try to reach it by this extension of the veto power.

Mr. Roosevelt, he said used to tell a story of his (Roosevelt's) experience in the New York legislature with a politician there who sought the former president's help. Roosevelt declined to vote for his bill because he said he thought such a law would be unconstitutional. The politician indignantly inquired, "What's the constitution between friends?" Mr. Taft in concluding chuckled and said, "I am not sure but that Mr. Roosevelt has changed his views."

Mr. Wilson's method of delivering his address to congress in person meets Mr. Taft's approval, but he pointed out that it was Jefferson who began the written message, and said that there would have been no end of Democratic criticism had he or Roosevelt attempted the personal address.

FELT LIKE A BOY AGAIN.

"Thirty days after I left office I felt like a boy," he declared, "and I have felt like one ever since." No man without a sense of humor could stand the strain of the position.

A large part of the president's time is spent in signing appointments to the various offices all over the country.

Mr. Taft said, "The secret service men follow you about everywhere, some of them going ahead to make arrange-

PROFESSOR GROVES BULLETIN ATTRACTS MUCH ATTENTION.

Professor E. R. Groves of the Department of Sociology has recently got out a bibliography of Rural Sociology which is being favorably commented upon from all over the country. Requests for copies have come from the libraries of many of the western universities such as the Universities of Minnesota, Wisconsin, Washington, and North Dakota; Massachusetts and Pennsylvania State Colleges; Public Library of the District of Columbia, Free Library Commission, U. S. Department of Agriculture, Associated Charities of N. Y., Massachusetts Society for the Prevention of Cruelty to Children, and many other similar educational organizations. Free copies may be obtained upon request to Pres. Fairchild.

ECONOMICS CLUB FORMED TO DISCUSS CURRENT EVENTS.

An Economics club was formed recently by those students who are making a special study of Economics. The purpose of the club is to keep posted on all current events and economic problems of the day and to study and discuss these from an economic point of view. It is hoped that the new club will be a permanent organization.

BEAUTIFUL PICTURE PRESENTED TO FORESTRY DEPARTMENT.

The Forestry department has been given a very beautiful enlargement of a forest scene in northern Idaho. The picture is four feet by five, with a heavy oak frame, and was presented by Senator Burnham of Manchester.

DEAN THOMPSON AND MISS BLACK ENTERTAIN WOMEN'S LEAGUE.

The Women's League was entertained Wednesday afternoon, Dec. 9 at the home of Dean H. B. Thompson and Miss C. A. Black. Mrs. C. G. Smith called the meeting to order and after a short business session the ladies were delightfully entertained by Professor Richard Whoriskey who read several Christmas stories among which were "Christmas Day in the Morning," and "Saint Nicholas' Poems." Refreshments consisting of chicken salad and lime-ginger punch were served and each guest was given a Christmas stocking.

Professor Foster spoke before the Peterboro Woman's Club last Friday upon the subject of forestry.

Last Tuesday evening Professor R. V. Mitchell spoke on "Poultry Feeding" at a meeting of the Derry Poultry association.

The following evening he spoke at the Laconia Poultry Show. His subject was "Poultry Houses."

PRIZES AWARDED IN AGGIE CLUB CONTEST.

ORAL ARGUMENTS GIVEN BEFORE JUDGES MONDAY NIGHT.

G. A. RUNNALS IS WINNER.

A. E. Smith and L. B. Robinson Secure First and Second Places Respectively—Dairy and General Farms Chosen.

At a large and very interesting meeting of the Agricultural club, George A. Runnals, '15, 2yr., A. E. Smith '17 and L. B. Robinson '16 were awarded first, second, and third prizes respectively in the model farm contest, which has been running under the auspices of the club for several weeks.

Each contestant was given data describing a typical New Hampshire Farm and his problem was to show what could be done with it to make it yield the greatest profit. He might stock and equip this farm from one of the following standpoints:

- (a) A general farm.
- (b) A farm for beef raising in New England.
- (c) A dairy farm.
- (d) A commercial orchard.

ORAL REASONS GIVEN.

A paper was written before Dec. 7, by each contestant setting forth his standpoint and the reasons for choosing it. The final part of the contest, which came Monday night, was to defend these reasons orally. There were five men in the contest, three of them presenting their case from the standpoint of the general farm and two from that of the dairy farm. Of the winners Mr. Runnals chose to equip one of the latter type while Messrs. Smith and Robinson chose the former.

The judges of the evening were Prof. John C. Kendall, director and D. D. Hayden, manager of the Middlebrook Farm of Dover.

SCORE CARD USED.

In judging, smoothness of delivery was allowed 10 points, clearness of exposition 30 points and originality of thought 60 points.

The first, second and third prizes consisted of agricultural books and subscriptions to agricultural periodicals to the value of \$15, \$10 and \$5 respectively. The books were all autographed by President Fairchild. While the judges were making a decision R. E. Smith, 2 yr 16 gave two very interesting readings, followed by profitable remarks from Prof. F. W. Taylor who acted as critic of the evening.

1917 CLASS APPOINTS SOPHOMORE HOP COMMITTEES.

At a recent meeting of the sophomore class each member of the executive board was made chairman of a Sophomore Hop committee, and each chairman appointed the rest of the members of his committee. The committees are as follows:

Floor Committee: Chairman, W. H. Thomas, F. W. Fitch, J. E. Frisbee, H. A. Russell, E. F. Cutts, E. Long, C. W. Glidden, R. C. L. Graham, K. C. Westover, S. W. Wentworth, R. E. Hodgdon, W. P. Knox.

Invitation Committee: Chairman, N. J. Harriman, J. H. Rollins, C. L. Stevens, G. H. Foss, F. W. Weston, A. B. Whittemore.

Musical Committee: Chairman, R. L. French, V. W. Batchelor, E. S. Ross.

Refreshment Committee, Chairman, N. E. Robinson, F. W. Fitch, A. J. Connor, R. C. Wiggin, R. T. Roberts, G. Hubbard.

Decoration Committee, Chairman C. B. Tibbetts, Miss F. L. Crandall, Miss B. L. Fall, Miss M. O. Chase, E. F. Cutts, R. E. Hodgdon, L. A. Boutwell, G. D. Parnell.

HEAVY WORK OF RELAY TEAM AFTER CHRISTMAS VACATION.

A large squad is daily working out for the relay team under the efficient coaching of Mr. Reed. A daily record of the attendance is being kept, which shows which men are training faithfully and which are not. Only light training is being given the men at present to condition them, the heavy work starting in immediately after the Christmas vacation.

NEW HAMPSHIRE LOSES TO DARTMOUTH TEAM.

Hacover Victor by Score of 28 to 6—Blue and White Scores all Made on Goals From Fouls.

Dartmouth easily took the measure of the New Hampshire State five Tuesday by a score of 28 to 6. The visitors were unable to score a single basket, all six of their points coming on goals from fouls shot by Thompson. Winship starred for Dartmouth, securing five field goals and two goals from fouls. The second half was interesting, New Hampshire forcing Dartmouth to the limit.

The lineup:
Dartmouth New Hampshire
Sisson, lf lf Thompson
Williams, lf
Daley, lf
Winship, rf rf, Sanborn
Mudgett, rf rf, Clark

Rector, c c, Price
Steele, c
Bickford, lg lg, Bissell
Richardson, lg
Pelletier, rg rg, Came
Soutar, rg

Goals from floor—Winship 5, Sisson 2, Rector, Pelletier, Williams, Mudgett, Steele. Goals from fouls—Winship 2, Williams 2, Daley, Thompson 6. Referee—Lush of Yale. Timer—Wannamaker. Time—Twenty minute halves.

DISTINGUISHED VISITORS AT DEDICATION OF NEW HALL.

Governor Felker, Governor Elect Spaulding and J. D. Upham, president of the manufacturers' association of New Hampshire, were among the visitors to Durham Wednesday at the dedication of DeMeritt hall.

After being shown about the college buildings, those invited, for the most part representative manufacturers of the state, were guests of the college at a luncheon, after which they heard an address by President Fairchild in which he outlined the two year course in engineering which is to be given next year.

C. R. CLEVELAND NEW ASSISTANT IN ECONOMIC ENTOMOLOGY.

Charles H. Hadley, Jr., Assistant in Economic Entomology leaves New Hampshire the last of this week to accept a position in the experiment station at Cornell University. His place will be filled by Clarence R. Cleveland, who is a graduate of Wisconsin University '12. After graduation Mr. Cleveland accepted a position as assistant at the Wisconsin state experiment station and at present is employed by the extension service of the same state.

Mr. Cleveland is married and was brought up on a farm. While an undergraduate he was an athlete of note holding the middle distance championship of the west. He is an Iron Cross man which in itself shows that he stood high in all college activities. Mr. Cleveland will take up his new duties at New Hampshire College the last of this month.

FOUR INTERESTING ADDITIONS TO THE COLLEGE LIBRARY.

The following books have been lately added to the library: Mrs. Taft's Recollections of Full Years; Secrets of the German war office, by a German spy; the September number of the Round Table, (an English periodical of special interest on the war); List of plays suitable for amateur acting, compiled by the Drama League of Boston.

PUBLICITY COMMITTEE NEWLY APPOINTED BY N. H. C. C. A.

A new committee has been added to the working force of the college Christian Association, called the publicity committee. W. E. Howard, Jr., was appointed chairman with F. W. Fitch as assistant. The duties of the committee consist in advertising the meetings as well as possible throughout the college.

Pictures and high class vaudeville attractions at The Lyric, Dover.

COLLEGE GLEE CLUB PRESENTS CONCERT.

ORGANIZATION WELL RECEIVED IN INITIAL APPEARANCE.

FINELY ARRANGED PROGRAM.

Quartet and Mr. Brown Hits of Evening—Solos by Blake, Bugbee, and Brogini. Trips Planned.

The New Hampshire College Glee Club and Orchestra presented its first concert of the season in the college gymnasium Saturday evening before a large and enthusiastic audience. The great variety of the numbers in the concert made it of especial interest. The work of the Glee club was particularly good in volume, life and tone quality.

The individual work of the soloists was excellent, both Mr. Blake and Mr. Bugbee handling their selection in fine style. The cornet solo by Mr. Brogini and the violin duet by Messrs Weigel and Bachelor brought round after round of applause. All the other numbers including the mandolin quintet, orchestra and readings, were very well done.

HITS OF THE EVENING.

The hits of the evening were made by the college quartet in "Sleep Kentucky Babe" and Mr. Brown in parodies written upon the song, "The Vampire". These took the house by storm.

The college quartet was composed of S. G. Johnson, 1st tenor; E. J. Blake, 2nd tenor; R. J. Bugbee, 1st bass and R. L. Dame, 2nd bass.

In the absence of Mr. R. A. Knight, who has not been able to sing for several weeks on account of throat trouble, Mr. R. J. Bugbee acted as leader.

The concert reflected great credit upon the director Walter M. Dalglish of Lawrence and on the glee club as a whole.

Following is the program of the evening:

THE PROGRAM.

Part One.
Selection, King Midas, Elenberg
College Orchestra
Nightingale and Rose, Lehnert
Glee Club.

Violin Duet, Dream of a Shepherdess, Schumann
Messrs Weigel and Bachelor.
Sympathy, Waltz Song from the Firefly, Frimi
Glee Club.

Vocal Solo, The Bandolero
Mr. Blake

Readings,
"Trick vs Trick," Mr. Smith
"John W. Jones," Mr. Knox
Solos and Chorus from the Opera,
Robin Hood, deKoven
"The Legend of the Chimes,"
Mr. Blake and Glee Club.

Summer Days, Gordon
College Quartet.

De Coppar Moon, Shelley
Glee Club.
Intermission.

Part Two.
Schanspiel Overture, Orchestra
The Sword of Ferrara, Bullard
Glee Club.

Cornet Solo, Selected
Mr. Brogini.

Indifference, Rolfe
Mandolin Quintet

Vocal Solo, Argus McDorald, Roekel
Mr. Bugbee.

Talkology, or A Sad Salty Job, Mr. Brown.
Sleep, Kentucky Babe, Giebel
College Quartet

Violin Solo, Traumerie
Mr. Weigel

March of the Men of Harlech, Brewer
Glee Club.

College Hymn and New Hampshire
SEVERAL TRIPS PLANNED.

The club has a number of trips planned for later in the season, to include this state and Massachusetts. The first of these comes the last of January, when a visit will be made to Amesbury, Mass., and Nashua, N. H. In the spring recess the club will take a trip of about ten days through the central part of New Hampshire and Vermont.

Friday is Famous Player Day at The Lyric, Dover.

Entered as second-class matter October 30, 1914, at the post-office at Durham, New Hampshire under the of March 3, 1879.

DURHAM, N. H., DEC 18 1914

On account of the Christmas recess, the next issue of The New Hampshire will not be published until Jan. 15.

New Hampshire is a college of constant change and progress. Every year, every month even, we see accomplished here things that ought to stimulate in the highest degree that pride and loyalty which we have for our college.

Now we hear that, by means of the prospective two year course in engineering, this institution is about to reach out into new fields and come in contact with an entirely different class of people. To conceive this far-reaching plan it has required a bold and constructive imagination. To carry it out will require the sincere and thorough cooperation of state and college. But if it succeeds—and we believe that it will—it will be an enormously potent force both for service to the state and for the reputation and progress of the institution itself.

The reputation of a college does not depend on its athletic triumphs alone. Technology has no football team, yet it is known and respected among English speaking peoples, and the men that it has sent out have left their impress throughout the world.

This is because it serves so well and truly those who come to it.

So New Hampshire is reaching out and striving to be of real help and in spiration to its state, and by its efforts and its ideals, finally by its achievements and their value—we should judge it. That thought that would weigh a college's worth in the balance of athletic victories is only shallow and superficial. It is rather through such undertakings as we are soon to begin here, that a genuine and lasting success is won.

And it is because New Hampshire is second to no institution in this country in the sincerity of its ambitions and in its progress in realizing them—it is for this reason that it deserves far more pride and loyalty and eager support than it now receives.

People ought to realize that the college orchestra is not only better than ever before, but also that it is one of the best parts of our musical organization. The fact that we hear it so often at chapel probably lessens our interest in it. At the same time its playing in Glee Club and other concerts deserves far more than the perfunctory applause it receives. Likewise, though this seems to be contrary to popular impression, its music is not made either more beautiful or more inspiring by being obliged to make its way through a medley of general conversation. The orchestra is good, it merits everyone's attention and respect.

Of all possible improvements about college one of those most eligible for immediate action is the installing of a few more rows of coat hooks in the library. The present method of hanging coats on the radiators and on the floor while no doubt a world wide custom and one of ancient origin, hardly possesses the refinements demanded by a college community.

Were you one of those fellows who skated to Newmarket last Sunday and navigated home in the rain?

Query: Why does not the Home Economics department take in college mending?

We wonder how a freshman really looks without his uniform on.

Have you fastened the runners on your Ford yet?

How long for that five days a week drill!

Have you had your picture taken yet?

Wanted—Someone to invent a pill that can cure wireless cranks.

Have you taken her skating yet?

PROFESSOR RASMUSSEN SPEAKS TO COLEBROOK ACADEMY STUDENTS

Professor Fred Rasmussen recently spoke before the students of Colebrook Academy. His visit to this school was all the more enjoyable because three of the teachers are graduates of New Hampshire college. Mr. C. W. Kemp '11 is the principal, Mr. Russel W. Garland '14 is the manual training teacher, and Mr. Paul T. Sellers '14 the science teacher. It gave Professor Rasmussen much pleasure to see the efficient work that these men are doing and to hear the favorable comments of the citizens.

Evidently Mr. Sellers and Mr. Garland are not neglecting the opportunities for good hunting which that region affords, for each has shot two deer this season.

MINE ENEMY.

By Margaret Hale.

I had an enemy who wished me all of ill,
I had a wondrous friend I loved as mine own soul:

My friend would have me treading pleasure's pathway still,
Mine enemy it was who spurred me to my goal.

(All-Story Cavalier Weekly.)

THE MISFIT.

By Herbert R. Johnston.

He's one of the fellows that don't fit in,
You've met him without a doubt.
He's lost to his friends, his kith and kin,
And he tramps the world about.

At night he wanders beneath the stars
With the mien of an ancient seer,
And often he's humming a few sweet bars
Of a dream-song soft and clear.

Yes, he's one of the breed that never fits,
And never a dollar can glean;
He's one that a scornful world requites
As simply a might have been.

But deep in the heart of his hungry soul,
Tho' the smug world casts him out,
There burn like the flames of a glowing coal
The fires of a love devout.

(All-Story Cavalier Weekly.)

FOUR THINGS.

By Henry Van Dyke.

Four things a man must learn to do
If he would make his record true:
To think without confusion clearly;
To love his fellow-men sincerely;
To act from honest motives purely;
To trust in God and Heaven securely.

—The Boston Post.

SOCIAL SINEW.

By Alice Lindsey Webb.

What sort of a citizen, friend, are you?
Can you lift as much as you weigh?
Are you doing your share of the work to do,

Or just 'catching a ride on the sleigh'?

Are you standing up on your own two feet,

Or hunting around for a nice, soft seat?

Is your citizenship of a rose-scent sort,
Bound up with a silken string;
Or are you of solid iron and blood,
With a zest for the hardest thing?

Are you corseted tight by an outworn creed,
Or fighting for freedom, wherever there's need?

Come, out with it, friend; give the devil his due—
Have you filled your place at the front?

Are you skulking to rear with the cowardly few,
A bearing the battle's brunt?
Oh, a man who is honest and unafraid
Is as fine a thing as God has made!

All-Story Cavalier Weekly.

PHYSICAL TRAINING COURSE CONNECTED WITH DRILL.

Benefits Derived Would be Great—Long Felt Want Filled at N. H. College—Maximum Hours of Drill Lessened.

The proposition advanced by Lieutenant Sutherland at the last meeting of the faculty, Monday, Dec. 6, with regard to rearrangement of the schedule for next semester to make room for five hours each week of systematic, physical training and drill was referred to the administration committee which meets the last of this week. For the purpose of definite action on this matter the faculty will meet next Monday to hear report of this committee.

LONG FELT WANT

This system of physical culture, it is thought would fill a want long felt at New Hampshire College.

The plan is to devote five hours each week during each semester half to physical training in the gymnasium and half to strictly military training, the former during the colder weeks, or from about Dec. 1 to about March or April 1, and the latter during the first and remaining warmer weeks of the semesters. In the indoor work rifles would be used only in the setting-up exercises or those which tend toward purely physical development. A regular course would be taken in the use of dumb bells, Indian clubs, and use of the apparatus, to give each man a grounding in the essentials of physical training. The hours suggested are from 8 to 9 in the morning or from 3 to 4 in the afternoon, or these afternoon hours being impossible, from 4 to 5.

NOT AS MUCH ACTUAL DRILL.

As much time would not be devoted to military training under the new system as is devoted under the present system. Under the present system 54 hours a semester are spent in military training. Under the proposed system 45 hours would be devoted. Under the proposed system military training would come so as to concentrate efforts and gain results much more promptly, and in such a way instruction would not as soon be forgotten as under the present system.

Uniforms would not have to be worn from about Dec. 1, until about March or April 1 except in military science classes and in case it should be necessary to turn out for some purely military function.

LIEUT. SUTHERLAND'S ATTITUDE.

Lieutenant Sutherland believes that a man who has gone through an institution of this kind should be able to take away with him sufficient knowledge of physical training to enable him to take up or teach intelligently such a course of training in after life even should he not desire to keep it up all the time after leaving college. He believes that it is denying men something really due them to give them no physical training here at all. It is as much a part of an educational institution to teach its students the proper methods of caring for and developing their bodies as to train them in mental pursuits. Many men are very careful in their selection of a college to be sure that it has courses in physical training. Many high schools have such training and one coming from such a school to college would naturally expect to continue such training in the higher school.

To ascertain the benefit derived individual records could be kept and medical examination given at the completion of the course.

THE STEADY SUBSCRIBER.

How dear to my heart is the steady subscriber, who pays in advance without skipping a year; who takes out his dollars and offers them gladly and casts round the office a halo of cheer. Who never says, "Stop it, I can not afford it," or "Getting more papers each day than I read," but always says, "Send it, the ranch outfit likes it—in fact, we regard it as an absolute need." How welcome he is when he steps in the sanctum; how he makes our heart throb, how he makes our eyes dance; we outwardly thank him—we inwardly bless him—the steady subscriber who pays in advance—"Farm Journal."

The sootfall in the famous city of Pittsburgh varies from 595 to 1950 tons per square mile per annum. If ground up without oil this would afford enough black paint to give a double coat of from 17 to 57 square miles of surface.—Exchange.

SEEING the Difference BETWEEN THE DE LAVAL AND OTHER Cream Separators.

IT DOESN'T TAKE AN EXPERT knowledge of mechanics or a long working test to tell the difference between the De Laval and other cream separators.

ON THE CONTRARY, WITH A 1914 De Laval machine placed beside any other separator the difference is apparent at first sight to the man who never saw a separator before.

IF HE WILL THEN TAKE FIVE minutes to compare the separating bowl construction; the size, material and finish of the working parts, particularly those subject to wear and requiring to be occasionally taken apart and put together; the manner of oiling, and everything which enters into the design and construction of a separator as a simple durable machine, he will still further see the difference.

IF HE WILL GO A STEP FURTHER and turn the cranks of the two machines side by side for half an hour, particularly running milk or water through the bowl, he will see still more difference.

AND IF HE WILL TAKE THE two machines home, as every De Laval agent will be glad to have him do, and run them side by side in practical use, the De Laval one day and the other machine the next, for a couple of weeks, he will see still greater difference in everything that enters into cream separator practicality and usefulness.

THE MAN WHO TAKES EVEN the first step indicated in seeing for himself the difference between the De Laval and other cream separators doesn't put his money into any other machine one time in a thousand.

THE COMPARATIVELY FEW buyers of other separators are those who merely read printed matter claims or listen to the argument of some dealer working for a commission, and who do not think it worth while to see the difference for themselves.

THE WISE BUYER OF A CREAM separator today does see this difference when buying his first separator, while the unwise or careless one usually finds it worth while to do so when he comes to buy a second cream separator year or two later.

EVERY DE LAVAL AGENT CONSIDERS it a privilege to show the difference between the De Laval and other separators, and to afford every prospective buyer the opportunity to try out and prove the difference to his own satisfaction, if on first examination he feels the slightest doubt about it.

THAT'S THE REASON WHY four buyers out of five are buying De Laval Cream Separators in 1914, and why the use of De Laval machines will, before long, be nearly as universal on the farm as already is the creamery and milk plant use of power or factory separators.

The Store that sells "Wooltex." Dover, N. M.

STUDENTS and others who appreciate clean, wholesome properly prepared goods will find our establishment the leading one in this vicinity. One trial convinces the fastidious. Do not forget our soda fountain.
PALMER'S CANDY SHOP,
DOVER, N. H.

This is a Store of Sincerity.
According to our ideas there's a lot more to the clothing business than merely buying and selling.
We know that sincerity is a vital part of "THE GAME," sincerity in purpose, sincerity in policy, in quality and service.
We are sincere in our purpose to make this the kind of a store you will like—sincere in our policy to satisfy you—in our idea of quality—in our idea of service.
We sell the kind of merchandise that represents the same sort of sincerity we believe in ourselves.
We invite you to look at our Mackinaws and Sweaters, no bigger or better stock anywhere.

486-488 Central Avenue, Dover, N. H.

WHAT IS TO BE YOUR WORK AFTER GRADUATION.

119 Members of Freshman Class Answer This Question—Results Show Varied Fields of Work.

An inquiry among the members of the freshman class shows that more men have come to Durham to learn agriculture this year than for any one single purpose.

The multiplicity of the activities of the institution is shown in what the coming generation is already asking of it. Members of the incoming class expect to do almost everything from selling automobiles to entering the consular service. Next to that of farmer, the profession of chemist seems to be most attractive, though if all varieties of engineering are considered as one subject, there are 23 prospective engineers in the class. There are 40 interested in agricultural subjects and 37 in other science subjects. It seems in fact difficult to come to any conclusion from the statistics except that this state college is called upon to perform a decidedly varied service.

119 ANSWER QUESTION.

Of a class of 127 members, 119 answered the question, "What is to be your work after graduation?" Of those who answered 21 were girls. The men answered as follows:

- Farmer, 25.
- Farm manager, 1.
- Agricultural specialist, 4.
- Teacher of agriculture, 4.
- Forester, 6.
- Engineer (general) 4.
- Mechanical engineer, 5.
- Civil engineer, 4.
- Electrical engineer, 10.
- Chemist, 13.
- Teacher, 4.
- Business, 4.
- Y. M. C. A. work, 2.
- Social work, 1.
- Manual training, 1.
- U. S. consular service, 1.
- Artist, 1.
- Undecided, 9.

GIRLS TO BE TEACHERS.

- The girls answered as follows:
- Teacher, (general), 10.
- Teacher of home economics, 6.
- Physician, 1.
- Undecided, 4.

AMUSING INCIDENT AT THE ARRIVAL OF EX-PRES. TAFT.

One of the incidents of Ex-President Taft's visit to Durham last week not down on the regular program happened at the railroad station just after his arrival. Professors G. C. Smith and W. C. O'Kane were there to meet him with the latter's Ford automobile. Just as Professor Smith had gotten the robes nicely tucked around the Ex-President who practically filled the rear seat, Will Neal, a farmer living over on the Mill Road, stepped up to the car and asked "Is this Professor Taft?" Being answered in the affirmative, he replied, "Well, I just wanted to tell you that that fellow driving the machine (pointing to Professor O'Kane) was a loyal Roosevelt man and worked hard to defeat you two years ago." Just then Professor O'Kane started the auto and Mr. Taft's reply was lost in the whirr.

This incident doubtless gave rise to the remark Mr. Taft made that same evening at the Boston Art Club that he had just come from a New Hampshire town which he had been trying to redeem from its former condition of insanity.

WITH OUR FACULTY.

President Fairchild is to address the combined Christian Associations next Sunday. A large attendance is anticipated.

In the Christmas vacation, Professor Rasmussen also expects to go to Rutgers College, New Jersey, where he will give two lectures at the farmers' week course. The subject of his first lecture will be the "Cost of Milk Production." The second one is on the "Live Stock Industry of Europe" and is to be illustrated with pictures taken by him last summer, while visiting Switzerland, Germany, and Holland.

Professor Fred Rasmussen is planning to attend an executive committee meeting of the Official Dairy Instructor's Association of which he is president. This meeting will be held in New York City, Dec. 22. The other members of the committee are Professors W. A. Stocking and C. W. Larson of Cornell University and Pennsylvania State College respectively.

COLLEGE SENDS TWO NEW DEMONSTRATORS INTO FIELD.

E. M. Straight, of the Ontario Agricultural College at Guelph, Ontario began December 1, the work of making vegetable gardening demonstrations in the suburbs of Concord, Manchester and Nashua. Mr. Straight is a practical market gardener and should render valuable assistance to the men engaged in supplying New Hampshire city markets.

The first of the year Miss S. L. Bates will go into the field as the home economics extension worker. She will visit towns all over the state and give instruction in home economics and undertake to stimulate a greater interest in rural life, and help to improve the social and economic conditions of the farm homes of this state. She will organize the women to study home problems, such as sanitation, water supply, and the care of children and the sick.

Miss Bates is a graduate of the Framingham Normal school in the household arts department and took three years of special work at the Massachusetts Institute of Technology.

HIGH ARE YOU—LIFTER OR LEANER?

There are two kinds of people on earth today;
Just two kinds of people, no more, I say.
Not the sinner and saint, for it's well understood,
The good are half bad and the bad are half good.

Not the rich and the poor, for to rate a man's wealth,
You must first know the state of his conscience and health.
Not the humble and proud, for in life's little span,
Who puts on vain airs is not counted a man.

Not the happy and sad, for the swift flying years
Bring each man his laughter and each man his tears.
No; the two kinds of people on earth, I mean,
Are the people who lift, and the people who lean.

Wherever you go, you will find the earth's masses
Are always divided in just these two classes.
And oddly enough, you will find, too, I ween,
There's only one lifter to twenty who lean.

In which class are you? Are you easing the load
Of overtaxed lifters, who toil down the road?
Or are you a leaner, who lets others share
Your portion of labor, and worry and care?
—Ella Wheeler Wilcox.

TAFT FAVORS SINGLE TERM.
Concluded from page 1.

ments for you. They are very expert at present and if they had been as much so in Mr. McKinley's term I do not think that he would have been shot." MUST CONSTRU THE LAW.

One of the most onerous duties of the President is that covered by the rather general statement that he must see that the laws are fully executed. The former President said that this meant that the President must construe the law and this brought him many difficult problems. Instances were cited to illustrate this point and Mr. Taft commented on the quasi-legislative functions of the office.

He gave considerable attention to the dangers of any extension of the executive powers beyond those specifically provided for and quoted from the Roosevelt autobiography what Roosevelt has said that he intended to do in case the coal arbitration plan had failed. This was in effect to seize mines, take out the coal and supply the country. Mr. Taft declared that there was a benevolent purpose in the plan, but that such a course would have none the less been tyranny.

As to the recall, there was but a word at the finish. "Washington, Jefferson, Madison and Lincoln would have been recalled," he said. "That is the answer to the advocates of the measure."

Mr. Taft left Durham a few minutes after the close of his address, the Boston express halting for him.

BATES LEADS IN STATE
TEACHERS—N. H. C. IS TENTH.

Educators who received their college degrees from many institutions are to be found among the instructors in the secondary schools of New Hampshire, according to a list compiled by the state department of instruction. Colleges represented on the faculties of these schools, and the number of these representatives are as follows:

Bates, 45; Boston university, 40; Mt. Holyoke, 34; Smith, 29; Wellesley, 23; Dartmouth, 19; Radcliffe, 18; Middlebury, 17; Simmons, 16; New Hampshire college, 16; Brown, 15; Tufts, 14; Colby, 12; Harvard, 11; Bowdoin, 8; Clark college 7; Wesleyan, 7; Massachusetts Agricultural, 5; University of Vermont, 5; University of Maine, 4; Amherst, 2; Columbia, 2; Vassar, 2; Acadia university, 2; Holy Cross, 2; St. Lawrence university, 2; Rhode Island Agricultural, 2; Trinity, 2; Norwich university, 2; and one each from Clark university, Elmira, Colgate, McMaster university, Toronto, Rochester university, Wheaton, Alfred, Lincoln-Jefferson University of Minnesota, Syracuse university, Perdue university, Cornell, William Smith, Stanford, Michigan Agricultural, Yale and Oberlin. (Manchester Union.)

NEW HAMPSHIRE UNION GIVES
SMOKE TALK TO FRES MEN.

A large body of Freshmen were the invited guests at a social meeting held by the New Hampshire Union last Friday evening. The object of the gathering was to make known to the new men the aims and purposes of the Union. The past history of the organization was outlined and its plans for the future explained. All who were present showed interest and enthusiasm. Nearly all who were not members became such by signing the constitution.

It may seem early to talk Christmas Shopping, but it is not if you want the "choice pickings"

Our stock this year is more varied than ever, It contains a larger assortment of useful gifts than ever. Let us have your orders early. Glad to lay aside anything you request.

BASKET BALL SCHEDULE
PRACTICALLY COMPLETE.

Many Hard Games on List, Among Which are Connecticut, Aggies and Company K. of Malone, N. Y.

The basketball schedule with the exception of one game is now complete. There are several new strong teams taken on, among them being the Connecticut Aggies and Company K. of Malone, N. Y. A glance over the schedule will show the esteem in which New Hampshire's basketball team is being held. Wesleyan and Williams are two of the strongest teams we play, and Springfield winds up the season with us. After a five years' absence from basketball M. I. T., puts a varsity team in the field and comes up here to play us at House Party time.

THE SCHEDULE:

Dec. 7 Hudson Collegians at Durham.
Dec. 15 Dartmouth at Halover.
Jan. 8 Connecticut Aggies at Storrs.
Jan. 9 Wesleyan at Middletown.
Jan. 15 Cushing at Durham.
Jan. 23 Colby Independents at Durham.
Jan. 30 Tufts at Durham.
Feb. 3 Company K. at Malone, N. Y.
Feb. 4. Clarkson Tech. at Potsdam, N. Y.
Feb. 5 St. Lawrence University at Canton, N. Y.
Feb. 6 Pending.
Feb. 20 M. I. T. at Durham.
Feb. 26 Springfield Y. M. C. A. College at Springfield.
Feb. 27 M. I. T. at Boston.
Mar. 2 Cushing at Asburnham.
Mar. 3 Williams at Williamstown.
Mar. 6 Springfield Y. M. C. A. at Durham.
Mar. 12 Sophomores vs freshmen.

SOUVENIRS OF DEMERITT HALL
GIVEN VISITORS WEDNESDAY.

An attractive photographic souvenir of the engineering division of the college was presented to the visitors at the dedication of Demeritt Hall. The souvenir was composed of cards four by six inches in size bound within heavy brown covers tied by blue and white ribbon. It contained photographs of Demeritt Hall, the physics laboratory; one of the drawing rooms; the electrical engineering laboratory and switchboard, the machine shop; and the quantitative chemical laboratory. Three cards of printed matter relative to the engineering courses were also inserted. The negatives were made by Mr. C. Moran; the other photographic work was done by Mr. Moran and Doctor W. J. Fisher.

QUARANTINE REGULATIONS
HOLD UP COLLEGE SUPPLIES.

The foot and mouth disease quarantine regulations have held up some of the College supplies. There are now four fine Rambouillet ewes at the University of Illinois which should be here. They have been purchased by New Hampshire but the federal quarantine against Illinois forbids shipments. There is for the same reason in New York State a carload of alfalfa hay purchased for the stock here. It will arrive but not for months.

The Rockingham delegation to the state legislature were invited by the President to visit the college today.

CONANT HALL LABORATORY
FACILITIES INCREASED.

Many Improvements Installed—Apparatus Just Arriving that was Ordered Five Months Ago.

With the addition of two newly equipped laboratories on the first floor of Conant Hall the chemistry department of New Hampshire College will now have more ample accommodations.

The present plan of Prof. Charles James, head of the department, is to use the old 'lab' for qualitative analysis only, to have quantitative in the new room on the right of the corridor, and to devote the former electrical room on the left to research work.

These new laboratories are furnished with benches made of birch. The tops are to be coated with an acid-resisting preparation and the rest will receive a mahogany stain. The benches are larger than those in the old laboratory and afford a foot more working space per man. Each student will have six compartments in the lower part of his section of the bench for keeping apparatus. He will be provided with a single key that will open them all. On each bench also there is a double row of shelves.

WELL LIGHTED LABORATORIES.

The new rooms are well lighted and this together with the new equipment and the large amount of working space for each man makes them ideal laboratories.

The fixtures for the rooms are now being installed and the general finishing touches are being applied. The laboratories will be ready for occupancy at the opening of the second semester.

The arrival of 20 cases of apparatus and supplies for the chemistry department from Baird and Tatlock, a London firm, fills an order that was sent in more than five months ago but was held up by the breaking out of the European war.

The shipment was composed chiefly of permanent apparatus. It contained some porcelain and glassware but the majority of the articles were tripods, burners, and ring stands.

PROF. E. R. GROVES SPEAKS
ON "WHAT IS RELIGION."

Prof. E. R. Groves gave a very interesting and valuable talk to the Christian Association Sunday evening on the subject, "What is Religion?" He took as an outline for his subject, famous definitions of religion and showed how each fell under one of three headings, feeling, thinking, or will.

During the course of this talk he quoted what James said about religion in the New Testament, that pure religion is to help the poor and afflicted and to keep ourselves unstained from wickedness of the world. In concluding Professor Groves said, "It seems to me that this is a beautiful thought that should summarize to us the idea of religion." Religion is a life of service and love that will make men broader, wiser, purer, and better in every way.

The Christmas cantata of the Sunday School will be given in the church chapel Tuesday evening, Dec. 22, at 7.30 o'clock.

The New Hampshire State Grange is holding its annual meeting at Laconia this week.

One of the brightest stars in a co-ed's existence—Informals. There is going to be one tomorrow night which promises to be a good time for all who attend—so be there.

High Quality
Through and Through

Wyandotte
Dairyman's
Cleaner and Cleanser

is strictly a dairy cleaner of high quality. It fully measures up to the high standard of cleaning efficiency and cleansing purity which dairy authorities have established as being necessary to a dairy cleaner that makes milk utensils safe and sanitary containers.

Wyandotte Dairyman's Cleaner and Cleanser not only cleans clean thereby protecting milk from bacteria and other deteriorating factors but it also is a freshener and sweetener. It does easily what Dairyman always found difficult, if not altogether impossible to do with ordinary agents, such as removing staleness, reducing rusting to a minimum, prolonging the life and usefulness of utensils, or providing a real sanitary purity about the dairy at all times. When Wyandotte Dairyman's Cleaner and Cleanser costs no more than what you now use and when the results are guaranteed to be superior why not give it a thorough trial. Ask your dealer or write your supply man.
